

Assistive Technology

To accommodate the educational limitations of students served by Disability Support Programs and Services, DSPS offers adaptive technology in its High Tech Center. In addition, the DSPS Instructional Assistant provides one-on-one training to eligible students. Examples of technology include:

- **Screen Reader Software**
- **Voice Recognition Software**
- **CCTV / Computer**
- **Screen Magnification Software**
- **Large Monitors**
- **Alternative Keyboards**
- **Talking Dictionaries**
- **Visual Idea-Mapping Software**
- **Scan and Read Technology**

Equipment Loan

Disability Support Programs and Services office has selected equipment available for loan. Equipment loans are upon counselor approval and will only be made if the student is enrolled in classes. Equipment is loaned for school-sponsored activities only. The student will be held responsible for lost, stolen, or damaged equipment. For Assistive Technology training and adaptive equipment, contact Michelle Meager at DSPS.

Adaptive Testing

Accommodations for Assessment, ATB and Classroom Exams

Alternative testing arrangements may be provided as determined by the student's disability-related limitations. Most test accommodations are served in the Student Support Center (L-106).

DSP&S offers alternative testing locations for students with disabilities who require accommodations. This assists the professor with the legally mandated responsibility to provide alternative testing locations and accommodations for students with disabilities. However, if preferred, the professor may give the exam to the student under his or her personal supervision as long as the accommodations the student needs are provided. These accommodations may include, but are not limited to, extended time, distraction-reduced setting and computers to be used for various adaptive programs. Students should schedule their exams at DSPS at least 48 hours in advance.
