Use correct formatting, spelling, punctuation, capital letters, and grammar in in-class and out-of-class writing assignments.

SLO 5: DEMONSTRATE AN EMERGING ABILITY TO APPLY NEW INFORMATION TO WRITING.

Synthesize information learned in readings.

Apply content from the readings to generate ideas for writing assignments.

ESL 54 Intermediate-Mid Skills Lab

Units: 0.5 - 1.5
Hours: 27 - 81 hours LAB
Prerequisite: None.
Advisory: concurrent enrollment in ESL 50, ESLR 50, and/or ESLW 50 is recommended as ESL 54 is designed to supplement the instruction students receive these courses.
Catalog Date: June 1, 2020

This course develops, expands, and reinforces multiple English language skills at the intermediate-mid level in an independent and/or in small group environment. Coursework includes integrated study topics relative to vocabulary and study skills, reading and grammar use, idiomatic language study and application, pronunciation and listening skills, composition and writing, and/or workplace skills. This is an open-entry open-exit course. Students may register until the end of the ninth week of the semester if space allows. This course is not a substitute for other ESL courses. Students will earn .5 units for each 27 hours of lab completed for a maximum of 1.50 units. This course is a Pass/No Pass course.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO #1: IDENTIFY CENTRAL MEANING IN ACADEMIC SPOKEN DISCOURSE.
  - Take notes on short academic lectures, identify main ideas, subtopics, and important details.
- SLO #2: DEMONSTRATE IMPLICIT AND EXPLICIT COMPREHENSION OF LEVEL APPROPRIATE TEXTS.
  - Derive main ideas and supporting details from new texts.
  - Distinguish between fact and opinion and draw conclusions
- SLO #3: WRITE SIMPLE, COMPOUND, AND COMPLEX SENTENCES WITH CORRECT PUNCTUATION.
  - Use clause and sentence combining strategies with a variety of connectors with correct punctuation.
- SLO #4: IDENTIFY AND USE GRAMMAR STRUCTURES, VERB TENSE AND ASPECT, AND WORD FORMS WITH CONFIDENCE AND RARE ERRORS.

ESL 110 ESL College English Preparation: Intermediate

Units: 6
Hours: 108 hours LEC
Prerequisite: None.
Catalog Date: June 1, 2020

ESL 110 is an accelerated course that integrates reading and writing. This course addresses the reading and writing skills English language learners need to succeed in college-level courses. Students focus on refining college-level academic skills in reading and writing with an emphasis on speed, vocabulary development, fluency, use of standard English, and analytical skills. Students will do extensive reading and writing with ever-increasing critical analysis. Students will follow the writing process in essay writing and will move from personal experiences to incorporating academic information. The class is the first semester of a two-semester sequence that moves students to ENGWR 300 and ENGRD 310/312.

Student Learning Outcomes

Upon completion of this course, the student will be able to:
SLO 1: DEMONSTRATE IMPLICIT AND EXPLICIT COMPREHENSION OF MULTI-PARAGRAPH, MULTI-PAGE ACADEMIC TEXTS

Actively and critically respond to readings through discussions, journals, etc.

Demonstrate understanding of ideas and organization in outlines, a variety of graphic organizers, and concise summaries that include the use of paraphrasing.

Demonstrate synthesis of new and previous information to reach conclusions.

SLO 2: EMPLOY VOCABULARY BUILDING STRATEGIES

SLO 3: USE A VARIETY OF ENGLISH SENTENCE PATTERNS WITH CORRECT PUNCTUATION

Use simple, compound, and complex sentences with correct punctuation and a variety of coordinators.

Use sentence combining strategies and clauses, including adjective, adverb, noun, and condition clauses.

SLO 4: EMPLOY THE WRITING PROCESS TO COMPLETE SEVERAL MULTI-DRAFT ESSAYS.

Use a variety of prewriting strategies, organizing, writing, and revising in the completion of essay writing.

SLO 5: DEMONSTRATE COLLEGE-APPROPRIATE SKILLS BOTH IN AND OUT OF THE CLASSROOM

Use effective time management strategies such as prioritizing assignments by level of importance and difficulty.

ESL 130 ESL College English Preparation: Advanced-Low

Units: 6
Hours: 108 hours LEC
Prerequisite: ESL 110 with a grade of "C" or better, or placement through the assessment process.
Catalog Date: June 1, 2020

ESL 130 is an accelerated course that integrates reading and writing at the high-intermediate and advanced-low level and prepares English language learners to be successful in college-level courses. Students refine academic reading skills with an emphasis on comprehension of academic texts, reading fluency, annotation, and vocabulary development. Students develop research and synthesizing skills and write a variety of essays based on critical analysis of readings. The course also emphasizes competent sentence variety and mastering the mechanics of English in the context of the essay. This class is the second semester of a two-semester sequence that moves students to ENGWR 300 and ENGRD 310/312.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO 1: DEMONSTRATE ACADEMIC READING SKILLS BOTH IN CLASS UNDER THE PRESSURE OF TIME AND OUT OF CLASS.
  Demonstrate the appropriate use of a variety of pre-reading techniques.
  Adapt strategies to address various reading tasks by choosing the appropriate reading skill to fit the task, working through difficult passages, annotating, and using text clues including headings, captions, etc. to aid comprehension.

- SLO 2: RESPOND TO READINGS IN CLEAR WRITTEN AND ORAL RESPONSES THAT SHOW CRITICAL ANALYSIS.
  Demonstrate the ability to infer, summarize, paraphrase, and make graphic organizers or outlines.

- SLO 3: EMPLOY THE WRITING PROCESS TO COMPLETE SEVERAL MULTI-DRAFT ESSAYS THAT INCLUDE OUTSIDE SOURCES.
  Use a variety of prewriting strategies, conduct basic research, write multiple drafts, and revise writing.
  Use instructor feedback and independent proofreading skills to complete final drafts with few grammatical errors.

- SLO 4: CONSISTENTLY DEMONSTRATE COLLEGE-APPROPRIATE SKILLS BOTH IN AND OUT OF THE CLASSROOM
  Complete college-level assignments including following multi-part instructions, using independent thinking or basic research, completing work on time even when multiple steps are required, and utilizing correct formatting for all written assignments.
  Respect academic integrity by using one's own ideas and words in writing and citing sources when necessary.

English as a Second Language - Grammar (ESLG)

ESLG 31 Basic English Grammar
This course provides English language learners with an introduction to the basics of English grammar including parts of speech, word form, word order, and the fundamental verb tenses necessary for writing. Students will learn to recognize how words function in English sentences, and be able to identify

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- **SLO 1:** UNDERSTAND THE PARTS OF SPEECH AND HOW THEY FUNCTION IN ENGLISH.
  - Recognize nouns, verbs, adjectives, adverbs, pronouns, articles, prepositions, and conjunctions.
  - Understand the function of each of the parts of speech in the context of a simple sentence.

- **SLO 2:** RECOGNIZE AND CONSTRUCT SIMPLE AND PROGRESSIVE VERB FORMS IN THE PAST, PRESENT, AND FUTURE.
  - Understand the use of auxiliary verbs and main verbs when constructing the past, present, and future tenses.
  - Utilize the correct auxiliary verb when creating negative statements, yes/no questions, and information questions.

- **SLO 3:** RECOGNIZE AND CONSTRUCT SIMPLE SENTENCES AND BASIC COMPOUND AND COMPLEX SENTENCES.
  - Analyze sentences to determine type, an use knowledge of sentence formation to correct errors.
  - Create original sentences using a variety of sentence types based on purpose or need.

ESLG 41 Elements of English Sentences

| Units: | 3 |
| Hours: | 54 hours LEC |
| Prerequisite: | ESLW 20 with a grade of "C" or better, or placement through the assessment process. |
| Catalog Date: | June 1, 2020 |

This course provides English Language Learners with a review of the basic elements of English sentences including parts of speech, word order, proper use of word form, and the simple and progressive verb tenses. Students will learn to recognize a variety of English sentence patterns in listening, and reading and be able to produce those patterns in their own speaking and writing.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- **SLO 1:** ANALYZE SENTENCES TO IDENTIFY THE PARTS OF SPEECH AND HOW THEY FUNCTION.
  - Label the parts of speech in a sentence.
  - Explain how words function in a given sentence.

- **SLO 2:** RECOGNIZE AND CONSTRUCT SIMPLE AND PROGRESSIVE VERB FORMS IN THE PAST, PRESENT AND FUTURE.
  - Identify simple and progressive verb forms in the past, present, and future and explain the reason a particular tense is used.
  - Produce sentences that use the simple and progressive past, present, and future verb forms correctly.

- **SLO 3:** CONSTRUCT SIMPLE AND COMPOUND SENTENCES IN THE CONTEXT OF A PARAGRAPH USING APPROPRIATE WORD FORMS AND CORRECT VERB FORM AND TENSE.
  - Explain the difference between the simple and compound sentence structures and how to use them effectively.
  - Write a paragraph using simple and compound sentence correctly.

ESLG 51 Grammar for Intermediate ESL Writers
This course reviews the form and use of the simple and continuous tenses in the present, past and future as well as the present perfect and present perfect continuous. It also provides instruction in other intermediate-level grammar topics such as gerunds and infinitives, articles, and nouns. It is intended for students who need additional grammar instruction to support their development writers in English.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- **SLO #1:** ANALYZE THE GRAMMATICAL STRUCTURES IN SELECTED SAMPLES OF WRITTEN AND ORAL ENGLISH.
  - Identify parts of speech, word forms, parts of a sentence, and clause structures in a variety of samples of English.

- **SLO #2:** DEMONSTRATE AN UNDERSTANDING OF GRAMMATICAL CONCEPTS TO EFFECTIVELY COMMUNICATE IDEAS BOTH ORALLY AND IN WRITING.
  - Demonstrate an understanding of verb tense by choosing tense and aspect to clearly communicate about time in response to level-appropriate topics.
  - Build sentences to demonstrate skill in using a limited variety of phrase and clause structures.
  - Demonstrate an emerging ability to recognize the role of modals and conditionals and use these structures in writing.
  - Demonstrate the ability to manipulate word forms to write correct sentences with parallel forms.
  - Proofread one's own writing for the grammatical concepts learned in the course.

ESLG 110 Grammar for Intermediate-High ESL Students

This course is intended for English language learners who need to develop an understanding of English grammar to study at the college level. It continues to build competency in the English verb tense system and provides instruction in more advanced clause structures, such as noun clauses, adverb clauses, and conditionals. Students will apply these concepts in writing assignments.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- **SLO #1:** ANALYZE THE GRAMMATICAL STRUCTURES IN SELECTED SAMPLES OF ADAPTED AND NATIVE WRITTEN AND ORAL ENGLISH.
  - Identify parts of speech, word forms, parts of a sentence, verb tenses, and clause structures in a variety of samples of English.
  - Explain the reason for the use of a variety of grammatical structures to convey meaning, identify time/aspect in a story, etc.

- **SLO #2:** DEMONSTRATE AN UNDERSTANDING OF GRAMMATICAL CONCEPTS TO EFFECTIVELY COMMUNICATE IDEAS BOTH ORALLY AND IN WRITING IN RESPONSE TO ACADEMIC PROMPTS.
  - Demonstrate an understanding of verb tense by choosing tense and aspect to clearly communicate about time in response to level-appropriate academic topics.
  - Build sentences to demonstrate skill in using a variety of phrase and clause structures including adjective and adverb clauses.
  - Recognize the role of modals and conditionals and use these structures correctly in writing.
  - Demonstrate the ability to manipulate word forms and use corpus information to write correct sentences with parallel forms.

ESLG 120 Advanced ESL Grammar

This course is intended for students who need to develop an understanding of English grammar to study at the college level. It continues to build competency in the English verb tense system and provides instruction in more advanced clause structures, such as noun clauses, adverb clauses, and conditionals. Students will apply these concepts in writing assignments.
This course focuses on developing control of the form and meaning of important grammar structures, especially those used in writing. Students also learn advanced-level grammar topics and develop independent editing skills. Students write extensively and apply strategies to correct both local and global grammatical errors. The course is intended for students who need to develop strong control of grammar to support their educational and career goals.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO #1: ANALYZE THE GRAMMATICAL STRUCTURES IN SAMPLES OF ADVANCED-LEVEL, ACADEMIC ENGLISH.
  - Identify parts of speech, word forms, parts of a sentence, verb tenses, clause structures, and other grammatical structures in a variety of samples of advanced-level English.

- SLO #2: DEMONSTRATE AN UNDERSTANDING OF ADVANCED GRAMMATICAL CONCEPTS TO EFFECTIVELY COMMUNICATE IDEAS BOTH ORALLY AND IN WRITING.
  - Demonstrate an understanding of verb tense, modals, and conditionals to respond to topics of varying degrees of complexity.
  - Build sentences to demonstrate skill in using an extensive variety of phrase and clause structures, including adjective, adverb, and reduced clauses.
  - Demonstrate the ability to manipulate word forms and word choice to write correct sentences with parallel forms and colloquial use of English.

- SLO #3: APPLY KNOWLEDGE OF GRAMMAR STRUCTURES AND EDITING TOOLS TO EDIT ONE'S OWN WRITING.
  - Identify and correct global errors including tense, word forms, non-colloquial forms, and clause structure.
  - Identify and correct local errors including subject/verb agreement, pluralization, article usage, and mechanics.
  - Demonstrate competence in using tools such as an English Language Learner dictionary and corpus to find grammatical information as an aid while editing one's own writing.

ESLG 310 Intermediate-High Grammar

This course focuses on further practice of the forms, meanings, and usage of grammatical structures of English. Oral and written practice reinforces the structures studied. Students practice writing extensively both in and out of class.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO #1: ANALYZE THE GRAMMATICAL STRUCTURES IN SELECTED SAMPLES OF WRITTEN AND ORAL ENGLISH.
  - Analyze the functions of word forms in sentences.
  - Assess the role and function of clauses in complex sentences.
  - Describe relationships among phrases and clauses within sentences.
  - Identify both hypothetical and probable conditions in written and oral English.

- SLO #2: SYNTHESIZE UNDERSTANDING OF, AND APPLY, GRAMMATICAL FORMS AND STRUCTURES TO EFFECTIVELY COMMUNICATE IDEAS BOTH ORALLY AND IN WRITING.
  - Choose active and passive voice verb tense and aspect structures to effectively communicate a full range of time concepts including actual and hypothetical conditions.
  - Choose appropriate present and past tense modals to communicate varying degrees of politeness, certainty and obligation in writing and oral presentations.
- Build sentences to demonstrate skill in modification using descriptive phrases and subordinate clauses for both adjectival and adverbial purposes including communication of time, purpose, contrast, concession, and condition.

- SLO #3: APPLY KNOWLEDGE OF COLLOCATIONS TO APPROPRIATELY SELECT AND EMPLOY A RANGE OF FORMS INCLUDING GERUNDS, INFINITIVES, PREPOSITIONS, AND MODAL AUXILIARIES.

- Research high frequency collocations used by native speakers via language samples found in dictionary and on line resources.

ESLG 320 Advanced-Low Grammar

Units: 3
Hours: 54 hours LEC
Prerequisite: Eligibility is determined by the assessment process, or completion of ESLG 310 with a grade of "C" or better.
Transferable: CSU
Catalog Date: June 1, 2020

This course focuses on developing control of the forms and meaning of major structures used in writing with an emphasis on aligning clause structures and writing purposes. Students write extensively and apply editing strategies introduced in the course. Assignments emphasize grammar and syntax in the context of longer written work.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO 1: RECOGNIZE AND NAME GRAMMAR AND SYNTACTIC STRUCTURES USING APPROPRIATE METALINGUISTIC TERMS.
- analyze parts of speech and phrase structure forms and functions
- analyze clause structures, forms, and functions
- distinguish among and correctly form tense and aspect structures
- SLO 2: WRITE SENTENCES APPROPRIATE TO SPECIFIC RHETORICAL PURPOSES
- employ passive and active voice appropriately
- express real and unreal conditions
- embed clauses and otherwise extend the meaning of sentences through modification
- SLO 3: REVISE AND IMPROVE THE LOGICAL ORGANIZATION AND DEVELOPMENT OF ONE’S OWN WRITING
- build clear relationships between and among ideas through appropriate use of logical connectors and transitions
- analyze the effects of word choice and sentence structure on the meaning of one’s own writing
- SLO 4: APPLY KNOWLEDGE OF GRAMMAR STRUCTURES TO EDIT ONE’S OWN WRITING
- identify and correct global errors including tense, word forms, syntax, logic and mechanics
- identify and correct local errors including subject/verb agreement, pluralization, and articles

English as a Second Language - Listening (ESLL)

ESLL 20 Novice Listening and Speaking

Units: 4
Hours: 72 hours LEC
Prerequisite: None.
Catalog Date: June 1, 2020

This course will provide an introduction to academic listening and speaking for novice level English language learners. Instruction focuses on basic listening and speaking strategies for a variety of situations, including listening for main ideas and utilizing learned phrases for class discussion. English sounds and intonation patterns are introduced.

Student Learning Outcomes
Upon completion of this course, the student will be able to:

- **SLO 1: IDENTIFY MOST OF THE PHONETIC SOUNDS OF AMERICAN ENGLISH**
  - Identify letters that are spoken clearly and produce the sounds with occasional native language interference.
  - Contrast consonant and vowel sounds and characteristics.

- **SLO 2: DEMONSTRATE ABILITY TO FUNCTION IN REHEARSED LISTENING AND SPEAKING SITUATIONS WHERE ENGLISH IS THE PRIMARY LANGUAGE**
  - Understand and respond appropriately to basic spoken instructions.
  - Recognize and orally produce words, phrases and sentences that follow basic phonetic patterns studied in contextual situations.

- **SLO 3: IDENTIFY CENTRAL MEANING IN BASIC ACADEMIC DISCOURSE**

- **SLO 4: USE A LIMITED VARIETY OF PRESENTATION AND DISCUSSION STRATEGIES EFFECTIVELY**
  - Use discussion strategies to communicate with students from other cultures in an active, respectful way.
  - Participate in group discussions about basic academic topics based on context learned in class and negotiate meaning in order to reach a desired result.
  - Plan and produce brief individual presentation and group skits or presentations on topics rehearsed in class with pronunciation comprehensible to a sympathetic listener.

- **SLO 5: FOLLOW APPROPRIATE COLLEGE BEHAVIOR GUIDELINES**
  - Use a monolingual ESL dictionary to learn vocabulary.
  - Complete out-of-class assignments in a timely manner.
  - Complete assignments and exams without the assistance of other students.

### ESLL 31 Listening and Speaking for College Readiness

**Units:** 3  
**Hours:** 54 hours LEC  
**Prerequisite:** ESLL 20 with a grade of "C" or better, or placement through the assessment process.  
**Catalog Date:** June 1, 2020

English language learners at the novice-high level develop the listening and speaking strategies necessary for college and workforce readiness. Basic listening strategies include listening for main ideas and supporting details in a variety of situations. Basic speaking strategies include the utilization of appropriate learned vocabulary and continued development of the production of English sounds, stress patterns, and intonation patterns. Students will also develop effective small group and class discussion strategies. This course is part of the ESL listening sequence, which is designed to prepare English language learners to take college courses leading to a certificate, degree, and/or transfer.

### Student Learning Outcomes

Upon completion of this course, the student will be able to:

- **SLO 1: DEMONSTRATE ABILITY TO FUNCTION IN CONTROLLED, HIGHLY SUPPORTED ACADEMIC LISTENING SITUATIONS IN ENGLISH.**
  - Develop basic note-taking skills using guided lecture outlines and demonstrate understanding by using these notes to respond to written questions.
  - Identify central meaning and important details in basic academic discourse which is supported by visual images and auditory cues.
  - Write dictated questions based on a mini lecture and respond appropriately in a timed situation.
  - Understand and respond to spoken instructions.

- **SLO 2: DEMONSTRATE ABILITY TO PARTICIPATE IN CONTROLLED, HIGHLY SUPPORTED ACADEMIC SPEAKING SITUATIONS IN ENGLISH.**
  - Use notes to respond to discussion questions with specific information from level appropriate lectures or video presentations.
  - Choose appropriate ideas and responses for meaningful discussions based on topics introduced in academic lectures.
  - Use learned expressions to participate effectively in small group and class discussions.
ESLL 41 Listening, Speaking and Presentation Skills for College

Units: 3  
 Hours: 54 hours LEC  
 Prerequisite: None.  
 Catalog Date: June 1, 2020

ESLL 41 is a course in college listening and speaking for English language learners at the intermediate-low level. Students improve their listening by learning to take notes while watching short lectures, and they develop their speaking skills through class discussions and short presentations. This course is part of the ESL listening sequence, which is designed to prepare English language learners to take college courses leading to a certificate, degree, and/or transfer.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- **SLO #1: PREPARE AND DELIVER SHORT YET ENGAGING PRESENTATIONS ON ACADEMIC TOPICS**
  - Give intelligible presentations of up to 5-6 minutes based on course topics.
  - Include an introduction and conclusion, clear transitions, complete information to explain subtopics, and engaging visuals that utilize technology.
  - Use verbal and non-verbal strategies to engage the audience during presentations.

- **SLO #2: USE INTERACTIVE SPEAKING STRATEGIES EFFECTIVELY**
  - Respond orally to listening passages by answering questions, stating opinions, or giving brief summaries.
  - Use learned strategies to engage others in group discussions.

- **SLO #3: USE NOTE-TAKING TECHNIQUES TO TAKE ORGANIZED, ACCURATE NOTES BASED ON SHORT LECTURES FROM A VARIETY OF DISCIPLINES**

ESLL 111 Academic Listening, Speaking, and Presentation Skills

Units: 3  
 Hours: 54 hours LEC  
 Prerequisite: None.  
 Catalog Date: June 1, 2020

This course is intended for English language learners who intend to study at the college level. It builds students' ability to listen and speak in the college classroom. Students improve their listening skills through academic lectures and develop strong classroom speaking skills through various types of presentations.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- **SLO #1: PREPARE AND DELIVER EFFECTIVE, ENGAGING PRESENTATIONS ON ACADEMIC TOPICS**
  - Give intelligible presentations of up to 8-10 minutes that include an appropriate introduction and conclusion, clear transitions, complete information to explain subtopics, and instructive visuals, including appropriate use of PowerPoint.
  - Use strategies to engage the audience during presentations.

- **SLO #2: USE A VARIETY OF INTERACTIVE SPEAKING STRATEGIES EFFECTIVELY**
  - Respond to lectures orally by paraphrasing, summarizing, or expressing personal reactions.
ESLL 114 Intermediate Listening and Speaking for Allied Health Careers

Units: 3
Hours: 54 hours LEC
Prerequisite: Completion of ESL 40 with a grade of "C" or better; or placement through the assessment process.
Catalog Date: June 1, 2020

ESLL 114 is a listening and speaking course at intermediate level designed for English language learners who wish to enter the allied health field. This course is designed to introduce students to the listening and speaking skills needed in both the academic and work environment. Students will continue to develop pronunciation skills and complex pronunciation strategies in the context of the allied health field. Students will expand their abilities to communicate in both familiar and unfamiliar allied health situations as they continue to refine their oral communication skills. In addition, students will develop focused listening and note-taking strategies necessary to complete course and work related activities in the field of allied health.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO 1: DEMONSTRATE ABILITY TO FUNCTION IN LISTENING AND SPEAKING SITUATIONS WHERE ENGLISH IS THE PRIMARY LANGUAGE.
- Discuss academic allied health topics in groups.
- Take notes from short academic lectures on topics related to allied health.
- Understand, follow, and restate spoken instructions.
- Demonstrate comprehension and ability to converse with emerging fluency in most allied health related situations.
- SLO 2: PRODUCE SHORT, UNREHEARSED EXAMPLES OF MOSTLY INTELLIGIBLE CONNECTED SPEECH.
- Speak clearly but with some hesitation.
- Use mostly comprehensible pronunciation while demonstrating a limited ability to correct spoken errors that lead to misunderstanding.
- Use grammar and vocabulary to convey meaning although sometimes making mistakes that disrupt communication.
- SLO 3: IDENTIFY CENTRAL MEANING IN SPOKEN DISCOURSE.
- Take notes based on short lectures on allied health related topics.
- Identify main ideas, subtopics, and important details.
- Use notes to respond in speaking and writing.
- SLO 4: USE A VARIETY OF PRESENTATION AND DISCUSSION STRATEGIES EFFECTIVELY.
- Give intelligible presentations on allied health related topics that include a clear organization with an introduction, transitions between subtopics, supporting information, informative visuals, and a conclusion.
- Participate in meaningful discussions using strategies to clarify, express opinions, agree, disagree, and ask for others' opinions.

ESLL 121 Academic Listening, Note-taking, and Discussion

Units: 3
Hours: 54 hours LEC
Prerequisite: ESLL 111 with a grade of "C" or better, or placement through the assessment process.
Advisory: ESLL 310
Catalog Date: June 1, 2020
This course prepares English language learners for the level of listening, note-taking, and discussion necessary to be successful in college classes. Students develop academic note-taking skills by listening to real academic lectures and build speaking skills by responding to lectures in class discussions. This course helps prepare ESL students for the rigor of general education courses in the sciences, social sciences, humanities, and other disciplines.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- **SLO #1: USE PRE-LISTENING STRATEGIES TO PREPARE FOR LECTURES**
  Prepare for listening by building background knowledge, learning relevant vocabulary, and predicting content.

- **SLO #2: DEMONSTRATE COMPETENCE TAKING ACCURATE NOTES BASED ON LECTURES**
  Use note-taking techniques to organize lecture content into sub-topics, main ideas, and supporting details.

- **SLO #3: FILL IN LECTURE OUTLINES**

- **SLO #4: DEMONSTRATE THE ABILITY TO APPLY INFORMATION FROM NOTES TO A VARIETY OF CLASS ASSIGNMENTS**
  Use notes to recreate lectures.
  Analyze information from notes to answer questions, write summaries, and study for tests.

- **SLO #4: ACTIVELY PARTICIPATE IN A VARIETY OF CLASS DISCUSSION ACTIVITIES**
  Use a range of academic speaking and discussion strategies to critically discuss and respond to lecture content.

ESLL 124 Advanced Listening and Speaking for Allied Health Careers

| Units: | 3 |
| Hours: | 54 hours LEC |
| Prerequisite: | ESLL 114, ESLR 114, and ESLW 114 with grades of “C” or better |
| Corequisite: | ESLR 124 and ESLW 124 |
| Catalog Date: | June 1, 2020 |

ESLL 124 is a listening and speaking course at the advanced level designed for English language learners who wish to enter the allied health field. In this course students will refine the listening and speaking skills necessary for both the academic and work environment. Students will expand their abilities to communicate in both familiar and unfamiliar allied health situations as they continue to refine their oral communication skills. In addition, students will expand their abilities to participate in focused listening situations and lectures necessary for content courses and work related situations.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- **SLO 1: USE A VARIETY OF INTERACTIVE LISTENING AND SPEAKING STRATEGIES EFFECTIVELY.**
  Demonstrate ability to apply active listening strategies to situations encountered in allied health related content courses and careers.
  Demonstrate ability to use effective speaking strategies in situations encountered in allied health related content courses and careers.

- **SLO 2: DEMONSTRATE THE ABILITY TO TAKE EFFECTIVE LECTURE NOTES AND UTILIZE THE INFORMATION ACQUIRED THROUGH THE NOTE-TAKING PROCESS ON TOPICS IN ALLIED HEALTH AND RELATED CONTENT AREAS.**
  Prepare for listening by building background knowledge, learning relevant vocabulary, and predicting content.
  Use note-taking techniques to organize lecture content into sub-topics, main idea, and supporting details.

- **SLO 3: PREPARE AND DELIVER EFFECTIVE, ENGAGING PRESENTATIONS ON TOPICS IN ALLIED HEALTH AND RELATED DISCIPLINES.**
  Give intelligible presentations of up to 8-10 minutes that include an appropriate introduction, fully developed content with clear transitions between subtopics, and a conclusion.
  Utilize presentation software effectively to enhance the presentation.

- **SLO 4: ACTIVELY PARTICIPATE IN A VARIETY OF CLASS DISCUSSION ACTIVITIES.**
Use a range of academic speaking and discussion strategies to critically discuss and respond to lectures in allied health and related disciplines.

ESLL 310 Intermediate-High Listening and Speaking

Units: 3
Hours: 54 hours LEC
Prerequisite: Completion of ESLL 50 with a grade of "C" or better; or placement through the assessment process.
Transferable: CSU
Catalog Date: June 1, 2020

ESLL 310 is an academic listening and speaking course at intermediate-high level designed for English language learners who wish to further the development of their communication skills. This is a course to further develop listening and speaking for academic purposes, including comprehension of lectures, note-taking, presentations, and classroom discussion. Further work on pronunciation is included with emphasis on understanding and producing stress, rhythm, and intonation patterns to communicate effectively. This course is part of the ESL listening sequence, which is designed to prepare English language learners to take college courses leading to a certificate, degree, and/or transfer.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO 1: DEMONSTRATE ABILITY TO FUNCTION IN MOST ACADEMIC AND NON-ACADEMIC ENGLISH-ONLY LISTENING AND SPEAKING SITUATIONS
  - discuss academic topics in groups
  - discuss two sides of an issue
  - take notes from academic lectures
  - understand spoken instructions
  - demonstrate comprehension and ability to converse fluently about level-appropriate topics

- SLO 2: PRODUCE UNREHEARSED EXAMPLES OF MOSTLY INTELLIGIBLE CONNECTED SPEECH
  - speak fluently with little hesitation
  - use clear and comprehensible pronunciation
  - use grammar and vocabulary to convey meaning while rarely making mistakes that disrupt meaning

- SLO 3: IDENTIFY CENTRAL MEANING IN ACADEMIC SPOKEN DISCOURSE OF MORE THAN 5 MINUTES IN LENGTH
  - take notes based on lectures using note-taking techniques including abbreviations and key words
  - identify organization including main ideas, subtopics, and important details
  - use notes to respond in speaking and writing

- SLO 4: USE A LIMITED VARIETY OF INTERACTIVE SPEAKING/LISTENING AND PRESENTATION STRATEGIES EFFECTIVELY
  - give an intelligible presentation that includes an introduction, conclusion, transitions between subtopics, clear supporting information, and informative visuals
  - use discussion strategies effectively, including clarifying, expressing opinions, agreeing, disagreeing and asking others’ opinions

- SLO 5: DEVELOP THE ABILITY TO CONTRIBUTE TO A DIVERSE DEMOCRATIC SOCIETY WITH A PLURALISTIC PERSPECTIVE OF THE WORLD
  - examine topics from more than one perspective and understand the reasoning behind both sides
  - engage oneself in out-of-class events or other situations that present diverse perspectives
  - participate in group activities appropriately and respectfully with people of different backgrounds

- SLO 6: MAKE PROGRESS TOWARD BECOMING INDEPENDENT LEARNERS
  - demonstrate ability to correct most spoken errors that lead to misunderstanding
  - conduct basic research to gather information, then paraphrase and organize the information into a presentation
  - demonstrate respect for academic integrity at all times
ESLL 320 Advanced-Low Listening and Speaking

This is a course with intensive practice in listening and active participation strategies that are appropriate for American college courses. Students will listen to extended lectures from various subject areas, refine note-taking skills, be able to participate in in-depth discussions, and give oral presentations. Students will continue to improve pronunciation skills.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO 1: DEMONSTRATE ABILITY TO FUNCTION IN LISTENING AND SPEAKING SITUATIONS WHERE ENGLISH IS THE PRIMARY LANGUAGE
  - analyze selected issues and prepare to support multiple viewpoints
  - take notes on challenging, lengthy academic lectures
  - participate in discussions and interviews with confidence
  - understand spoken questions, instructions, and announcements
  - demonstrate comprehension of main points of news videos or other excerpts of native speech
  - demonstrate comprehension and ability to converse fluently in everyday conversation

- SLO 2: PRODUCE LENGTHY, UNREHEARSED EXAMPLES OF INTELLIGIBLE CONNECTED SPEECH
  - speak fluently at an appropriate speed with very little or no hesitation
  - use clear and comprehensible pronunciation
  - use correct grammar and vocabulary correctly so that meaning is not disrupted

- SLO 3: IDENTIFY CENTRAL MEANING IN CONCEPTUALLY AND LINGUISTICALLY CHALLENGING SPOKEN DISCOURSE
  - take organized and accurate notes based on lectures using note-taking techniques
  - identify main ideas, subtopics, and important supporting facts
  - use notes to respond in speaking and writing and to recreate the lecture

- SLO 4: USE A VARIETY OF INTERACTIVE SPEAKING/LISTENING AND PRESENTATION STRATEGIES EFFECTIVELY
  - give an intelligible presentation of 8-10 minutes that includes an appropriate introduction and conclusion, clear transitions, complete information to explain subtopics, and instructive visuals, including appropriate use of PowerPoint
  - interact with group members to delegate tasks and come to consensus
  - use a variety of discussion strategies effectively, including clarifying, expressing opinions, agreeing, disagreeing and eliciting others' input
  - critically discuss, analyze, and summarize relevant content of lectures, videos, or other listening material

- SLO 5: ENHANCE ABILITY TO CONTRIBUTE TO A DIVERSE DEMOCRATIC SOCIETY WITH A PLURALISTIC PERSPECTIVE OF THE WORLD
  - examine topics from more than one perspective and summarize the reasoning behind both sides
  - attend campus events related to cultural pluralism
  - participate in group activities appropriately and respectfully with people of different backgrounds

- SLO 6: MAKE PROGRESS TOWARD BECOMING SELF-RELIANT AND INDEPENDENT LEARNERS
  - demonstrate ability to correct spoken errors that lead to misunderstanding
  - conduct basic research for presentations and paraphrase and organize relevant information
  - use the Internet and e-mail to research topics, watch videos, and/or complete web-based listening exercises
English as a Second Language - Pronunciation (ESLP)

ESLP 41 The Basics of English Pronunciation

Units: 3
Hours: 54 hours LEC
Prerequisite: None.
Catalog Date: June 1, 2020

This course introduces the phonetic alphabet and focuses on the identification and production of the sounds of English. Students use basic pronunciation rules to begin to control pronunciation of words and sentences and add expression to their speech.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO 1: IDENTIFY ALL THE SOUNDS OF ENGLISH WITH OCCASIONAL ERRORS.
- Be able to write sounds and transcribe level-appropriate words using the International Phonetic Alphabet.
- Use transcriptions in the International Phonetic Alphabet to pronounce words with occasional errors.
- Identify vowel characteristics: front, central, and back, tense and lax, and vowel length. Identify the place and manner of articulation used to produce most consonant sounds.
- Distinguish minimal pairs with emerging consistency.
- SLO 2: DEMONSTRATE AN EMERGING ABILITY TO PRONOUNCE ALL THE SOUNDS OF ENGLISH IN CONTROLLED SPEECH.
- SLO 3: USE BASIC WORD STRESS RULES TO IDENTIFY AND PRONOUNCE STRESSED SYLLABLES.
- Use rules of word stress to predict the stressed syllables in two-syllable nouns, verbs, and adjectives.
- Use rules of word stress to predict the stressed syllables in words with common suffixes.
- Pronounce level-appropriate vocabulary words with correct word stress.
- SLO 4: USE BASIC RULES OF SUPRASEGMENTAL STRESS TO IDENTIFY AND PRONOUNCE SENTENCE STRESS AND INTONATION.
- Identify intonation patterns of statements and questions.
- Use voice to add expression to one's speech and to use English rhythm and intonation with emerging accuracy.

ESLP 51 Building English Fluency and Comprehensibility

Units: 3
Hours: 54 hours LEC
Prerequisite: ESLP 41 with a grade of "C" or better
Catalog Date: June 1, 2020

This course builds on the skills learned in ESLP 41 while adding increased focus on sentence stress, rhythm, and intonation. Students use pronunciation rules to increase their ability to control pronunciation in a variety of situations and to make their speech more comprehensible and engaging.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO 1: IDENTIFY ALL THE SOUNDS OF ENGLISH.
- Be able to transcribe the sounds of English using the International Phonetic Alphabet.
- Distinguish minimal pairs, including vowel characteristics and differences in articulation and voicing of consonants, with occasional errors.
ESLP 310 Intermediate-High Pronunciation

Units: 4
Hours: 54 hours LEC; 54 hours LAB
Prerequisite: None.
Transferable: CSU
Catalog Date: June 1, 2020

This course is designed to further enhance intelligible speech in English language learners. In addition to review of the International Phonetic Alphabet and standard American speech sounds, students will receive intensive training in the phonology of English including common contractions, reductions, deletions, and the effects of specific phonetic environments. Participants record speech production exercises and receive personal analysis and suggestions for improvement. Students will be responsible for writing and presenting dialogs, skits, and brief other oral presentations.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO #1: independently investigate, discover, and produce the pronunciation of English words, including variations conditioned by adjacent phonological environments.
- Utilize a dictionary and the International Phonetic Alphabet to determine the pronunciation of unfamiliar English words.
- Recognize phonemic environments and invoke applicable phonological rules.
- Analyze texts to select and apply both standard stress and intonation patterns as well as alternative realizations to vary meaning.
- SLO #2: perform memorized passages, skits, or dialogs with control of practiced pronunciation skills.
- Produce effectively all the phonemic inventory of standard American English.
- Work independently with recording devices to self-monitor speech production.

ESLP 320 Advanced-Low Pronunciation

Units: 4
Hours: 54 hours LEC; 54 hours LAB
Prerequisite: ESLP 310 with a grade of "C" or better
Transferable: CSU
Catalog Date: June 1, 2020

In this course, students focus on refining English pronunciation skills with an emphasis on eliminating production errors in spontaneous spoken English. Students will review and expand their understanding of phonological principles. Skill mastery will be demonstrated through lengthy impromptu presentations on prepared or familiar topics.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO #1: Produce lengthy, unrehearsed examples of intelligible connected speech.
- Organize and practice prepared material for a spoken presentation without reading or reciting from memory.
- Analyze speech production and effectively self-monitor to correct errors while speaking.
- Modulate the voice to achieve various rhetorical effects.
- Critique impromptu speech samples through independent work with a recording device.

English as a Second Language - Reading (ESLR)

ESLR 20 Novice Reading

Upon completion of this course, the student will be able to:

- **SLO #1:** DEMONSTRATE UNDERSTANDING OF THE ALPHABETIC PRINCIPLE.
  - recognize and write all letters of the English alphabet.
  - associate speech sounds and spoken words to their alphabetic equivalents.
  - analyze the syllabic structure of spoken and written words.
  - apply the alphabetic principle to vocalize printed words having regular spellings.

- **SLO #2:** EMPLOY BASIC VOCABULARY BUILDING RESOURCES AND STRATEGIES.
  - use a basic English language learner dictionary
  - infer meanings of new words given visual and contextual clues.

- **SLO #3:** DISTINGUISH THE MEANING OF FUNDAMENTAL ENGLISH SYNTAX.
  - identify basic parts of speech.
  - interpret the information conveyed by punctuation and capitalization.
  - discriminate the phrase structure of simple and compound sentences.
  - discriminate the word forms used in noun, verb, and prepositional phrases.
  - relate meanings of logical connectors and negation.

- **SLO #4:** DEMONSTRATE EMERGING UNDERSTANDING OF THE INFORMATION CONVEYED BY VERB FORM, TENSE AND ASPECT.
  - differentiate between time orientations signaled by simple present, present progressive, simple past, and simple future.
  - recognize the significance of -ed and -s suffixes on verbs.
  - explain the information conveyed by the modal auxiliary verbs ‘will’, ‘can’, and ‘might’.

- **SLO #5:** DEMONSTRATE EXPLICIT COMPREHENSION OF BASIC TEXTS.
  - interpret and answer simple questions about the literal content of beginning-level texts.
  - employ rudimentary scanning to locate explicit information in assigned texts.

- **SLO #6:** DEMONSTRATE APPROPRIATE PARTICIPATION BEHAVIORS IN SMALL AND LARGE GROUP ACTIVITIES.
ESLR 51 Building Vocabulary Skills

Upon completion of this course, the student will be able to:

- SLO #1: DEMONSTRATE COMPETENCE USING AN ENGLISH-ENGLISH DICTIONARY.
  - Use basic dictionary skills, including the use of head words and alphabetical order, to locate words.
  - Distinguish multiple meanings of words.
  - Find basic information about words, including part of speech, definition, synonyms, and examples.

- SLO #2: USE WORD ATTACK SKILLS TO PREDICT INFORMATION ABOUT NEW VOCABULARY.
  - Identify part of speech based on word parts and the syntax of the sentence in which the word was found.
  - Identify basic prefixes and suffixes, demonstrate knowledge of how affixes can affect the meaning of a word, and use affixes and roots to predict meanings of new words.

- SLO #3: USE VOCABULARY STUDY STRATEGIES TO INCREASE VOCABULARY.
  - Identify useful vocabulary for independent study.
  - Gather complete information about a new word and organize it into a word journal, word map, or other vocabulary organizer for independent study.

- SLO #4: SHOW KNOWLEDGE OF LEVEL-APPROPRIATE VOCABULARY FROM THE ACADEMIC WORD LIST.
  - Use learned vocabulary correctly in speaking and writing with occasional errors.

ESLR 111 Academic Vocabulary

This course is intended to prepare English language learners for the sophisticated vocabulary needed for higher-level study or work. Students will engage with the Academic Word List while continuing to develop vocabulary building skills. The course teaches more complex vocabulary study strategies, word attack skills, and academic vocabulary from the Academic Word List.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO 1: DEMONSTRATE COMPETENCE USING AN ENGLISH-ENGLISH DICTIONARY.
  - Use dictionary skills to quickly locate words, distinguish multiple meanings of words, and find relevant grammatical information.
  - Use transcriptions to identify the pronunciation of words with occasional errors.
  - Locate the word family and additional information, such as examples, synonyms, collocations, and connotation.

- SLO 2: USE WORD ATTACK SKILLS TO PREDICT INFORMATION ABOUT NEW ACADEMIC VOCABULARY.
  - Use affixes and roots to predict the part of speech and meaning of a word in the context of an academic text.
ESLR 114 Intermediate Reading for Allied Health Careers

Units: 3
Hours: 54 hours LEC
Prerequisite: None.
Catalog Date: June 1, 2020

ESLR 114 is a reading skills course at the intermediate level designed for English language learners who wish to enter the allied health field. In this course, students build on the reading and vocabulary skills necessary for both the academic and work environment. This course focuses on the further development of academic reading skills, with an emphasis on vocabulary development, literal comprehension, and dictionary skills. Students will continue to develop critical thinking skills to understand, analyze, discuss, and write responses to ideas expressed in readings related to the field of allied health.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO 1: DEMONSTRATE IMPLICIT AND EXPLICIT COMPREHENSION OF LEVEL-APPROPRIATE TEXTS.
  - Derive main ideas and supporting details from new text that isn't highly complex or sophisticated.
  - Distinguish fact and opinion and draw conclusions.
  - Select the appropriate meaning of words from contextual clues
  - Recognize patterns of organization in expository writing.
  - Demonstrate comprehension after reading under the pressure of time.

- SLO 2: ANALYZE READINGS FOR SPECIFIC PURPOSES.
  - Identify main idea, supporting ideas, and conclusions.
  - Outline or otherwise demonstrate awareness of the organizational patterns of readings.
  - Identify authors' points-of-view.
  - Synthesize new and previous information to reach appropriate conclusions.
  - Demonstrate some competence in critical analysis through personal reactions
  - Read and respond to a short timed reading that is clearly organized and related to a familiar topic.

- SLO 3: EMPLOY VOCABULARY BUILDING STRATEGIES
  - Infer meanings of unfamiliar words through recognition of context clues.
  - Demonstrate emerging ability to analyze word roots and affixes.
  - Integrate context clues and word-attack skills in building vocabulary.
  - Employ new vocabulary in a variety of tasks including discussion, journals, and/or summaries.

ESLR 124 Advanced Reading and Vocabulary for Allied Health Careers
ESLR 124 is a reading and vocabulary development course at the advanced level designed for English language learners who wish to enter the allied health field. In this course students will refine their academic reading skills with a focus on comprehension of academic text, reading fluency, and annotation in disciplines related to allied health. Students will also develop vocabulary building strategies necessary for allied health related disciplines. In addition, students will use their reading and writing skills to provide critical analysis of materials read. Students who complete this course will be prepared for the reading demands of both the academic and work environment in allied health related fields.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO 1: DEMONSTRATE ACADEMIC READING SKILLS IN COLLEGE LEVEL READINGS ON TOPICS RELATED TO THE ALLIED HEALTH FIELD.
  - Use a variety of pre-reading techniques to enhance reading comprehension.
  - Distinguish between main ideas and supporting details through the use of outlining and/or graphic organizers.
  - Identify author's use of organizational patterns within a reading.
  - Adjust reading strategies to fit the task and complexity of the reading including skimming, scanning, and the use of in text clues such as headings, pictures, graphs, diagrams, captions, etc. to improve understanding.

- SLO 2: CRITICALLY ANALYZE ACADEMIC TEXTS ON TOPICS RELATED TO ALLIED HEALTH.
  - Demonstrate ability to summarize, paraphrase, and infer meaning from a reading.
  - Synthesize information from a multiple text to draw conclusions and support one's opinion orally and in writing.
  - Present critical analysis of text through oral and written personal responses.

- SLO 3: EMPLOY ACADEMIC VOCABULARY BUILDING STRATEGIES IN ACADEMIC READINGS RELATED TO ALLIED HEALTH.
  - Use knowledge of prefixes, suffixes, and roots to enhance understanding of medical terminology.
  - Employ new vocabulary in a variety of tasks including discussion, journals, and written responses.

---

ESLW 20 is a writing course for English language learners at the novice level. This course is an introduction to English writing at the sentence and paragraph level. Students will write about familiar topics focusing on the structure of English including word form, parts of speech, verb tense and word order. Students will learn to construct affirmative and negative statements, and yes/no and information questions in simple present, simple past, present continuous and simple future tenses. This course is part of the ESL writing sequence which is designed to prepare English language learners to take college courses leading to a certificate, degree, and/or transfer.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO 1: WRITE A BASIC PARAGRAPH OF ABOUT 10 SENTENCES
  - Respond to a prompt by writing sentences that are related or tell a story
  - Use correct paragraph format

- SLO 2: CONSTRUCT SIMPLE AFFIRMATIVE AND NEGATIVE STATEMENTS AND QUESTIONS
  - Use the simple present, past, and future and the present progressive tenses
ESLW 114 Intermediate Writing for Allied Health Careers

Units: 3
Hours: 54 hours LEC
Prerequisite: None.
Catalog Date: June 1, 2020

ESLW 114 is a writing course at the intermediate level designed for English language learners who wish to enter the allied health field. This course introduces students to the writing skills needed in both the academic and work environment. Students build an understanding of the writing process and types of writing necessary in the allied health field. Students continue to build confidence in using correct sentence structure, grammar, and editing skills.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO 1: EMPLOY THE WRITING PROCESS TO COMPLETE MULTIPLE PARAGRAPH ASSIGNMENTS FOR SPECIFIC PURPOSES.
  - Identify and utilize the appropriate rhetorical structures for a given task.
  - Use a variety of prewriting, organizational, writing, and revising strategies to complete writing assignments which reflect the types of writing necessary for academic and workplace writing in the allied health field.
  - Produce a written response appropriate to the task in a timed setting.

- SLO 2: DEMONSTRATE ABILITY TO USE A VARIETY OF ENGLISH SENTENCE PATTERNS WITH CORRECT PUNCTUATION.
  - Use simple, compound, and complex sentences with correct punctuation and a variety of coordinators.
  - Use sentence combining strategies to create adjective, adverb, noun, and conditional clauses with correct punctuation.

- SLO 3: RECOGNIZE AND UTILIZE GRAMMAR STRUCTURES, VERB TENSE & ASPECT, AND VERB FORMS WITH MINIMAL ERRORS.
  - Identify and correct grammatical errors through proofreading.
  - Use teacher feedback to edit and improve writing.

ESLW 124 Advanced-Low Writing for Allied Health Careers

Units: 3
Hours: 54 hours LEC
Prerequisite: ESLL 114, ESLR 114, and ESLW 114 with grades of “C” or better
Corequisite: ESL 124 and ESLR 124
Catalog Date: June 1, 2020

ESLW 124 is a writing course at the advanced level designed for English language learners who wish to enter the allied health field. In this course students will refine the writing skills needed in both the academic and work environment. Students will expand their understanding of the writing process and types of writing necessary in the allied health field. Students will build fluency and accuracy with the English language including grammar, sentence structure, and style.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO 1: EMPLOY THE WRITING PROCESS TO COMPLETE MULTIPLE DRAFT ASSIGNMENTS FOR SPECIFIC AUDIENCES PURPOSES.
  - Use a variety of prewriting strategies, conduct basic research, write multiple drafts, and revise writing in assignments which reflect the types of writing necessary for academic and technical writing in the allied health field.
Produce a written response appropriate to the task in a timed setting.
SLO 2: RESEARCH, EVALUATE, AND SYNTHESIZE SOURCES TO SUPPORT A POSITION IN VARIOUS TYPES OF TECHNICAL
WRITING USED IN THE ALLIED HEALTH FIELDS.
Collect and evaluate information from a variety of sources.
Incorporate research into one's own writing using summary, paraphrase, and direct quotation.
Cite sources using the appropriate format (MLA, APA, etc).
SLO 3: DEMONSTRATE THE ABILITY TO USE A VARIETY OF LINGUISTICALLY COMPLEX SENTENCE PATTERNS TO COMMUNICATE
EFFECTIVELY.
Construct effective simple, compound, complex and compound-complex sentences.
SLO 4: PRODUCE WRITING ASSIGNMENTS THAT ARE RELATIVELY FREE FROM ERROR.
Use instructor feedback and independent proofreading skills to complete final drafts with few grammatical errors.


Ethnic Studies | Cosumnes River College

Ethnic Studies is an interdisciplinary and diverse field that gives voice to historically marginalized peoples and their perspectives by challenging systems of injustice and valuing diversity. This program seeks to educate students on progressive social change, reflect on the dynamics of power and knowledge, and promote multiple approaches to social justice issues while encouraging students to be informed and active citizens. Ethnic Studies allows students a particular focus on marginalized and disadvantaged populations while also de-centering the dominant cultural, political, and social ideals that have shaped western societies.

This interdisciplinary course examines the social, political, economic, and cultural experience of racial and ethnic minority groups in the United States using concepts, theories, and terminology from distinct disciplines within the social sciences. As an ethnic studies course, it has a culturally relativistic approach. Specifically, this course examines and redefines the lives of racial and ethnic minority groups through their own experiences: from the inside looking out at the world. This course was formerly SOCSC 300.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- Introduce interdisciplinary terms, concepts, and theories to minority racial and ethnic group experiences in the U.S.
- Apply the interdisciplinary vocabulary to understand the developing historical, cultural, and psychological conditions under which minority groups have lived in the U.S.
- Interpret and summarize various aspects of racial and ethnic minority group experiences in the U.S.
- EXAMINE THE CULTURAL AND RACIAL STRUCTURE OF AMERICAN SOCIETY. (SLO 2).
- Explain the ideology of white supremacy as a means to understanding it (White Supremacy) as the organizing system of race relations in the U.S.
- Discuss the social, cultural, and structural conditions that compelled the social movements and organizations of minority racial and ethnic groups in the U.S.
- DESCRIBE THE DIRECT LINK BETWEEN THE SOCIAL CONDITIONS EXPERIENCED BY MINORITY RACIAL AND ETHNIC GROUPS AND MINORITY GROUP IDENTITY FORMATION. (SLO 3).
- Explore and apply Social Identity Theory and Ethnic Identity theory to describe the experiences of minority racial and ethnic groups in the U.S.
- Explore and apply Cultural Capital Theory as it relates to racial and ethnic minority group experiences in the U.S.
• Explore and apply the term stereotype threat to describe the unique experiences of minority racial and ethnic groups in the U.S.

• CRITICALLY EXAMINE THE ECONOMIC, PSYCHOLOGICAL, POLITICAL, AND CULTURAL PROGRESS OF MINORITY RACIAL AND ETHNIC GROUPS IN THE U.S (SLO 4).

• Use a historical comparative approach to explain the dimensions of progress for minority racial and ethnic groups.

• List and describe contemporary social issues facing minority racial and ethnic groups in the U.S.

• Use the learned vocabulary to discuss the likelihood of developing concrete solutions to address the contemporary issues uniquely facing minority racial and ethnic groups in the U.S.

ETHNS 320 The African American Experience

Units: 3
Hours: 54 hours LEC
Prerequisite: None.
Advisory: Completion of ENGWR 101 with a grade of "C" or better, or completion of ESLW 340 with a grade of "C" or better
Transferable: CSU; UC
General Education: AA/AS Area V(b); AA/AS Area VI; CSU Area D; IGETC Area 4
Catalog Date: June 1, 2020

This interdisciplinary course examines the social, political, economic, and cultural experience of racial and ethnic minority groups in the United States using concepts, theories, and terminology from distinct disciplines within the social sciences. As an ethnic studies course, it has a culturally relativistic approach. Specifically, this course redefines the lives of African Americans through their own experiences: from the inside looking out at the world. This course was formerly SOCSC 320.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

• DEVELOP A VOCABULARY THAT DESCRIBES THE UNIQUE EXPERIENCES OF AFRICAN AMERICANS IN THE U.S. (SLO 1).

• Introduce interdisciplinary terms, concepts and theories to minority racial and ethnic group experiences in the U.S.

• Apply the interdisciplinary vocabulary to understand the developing historical, political, cultural, psychological conditions under which African Americans have lived in the U.S.

• Interpret and summarize various aspects of the African American experience in the U.S.

• EXAMINE THE CULTURAL AND RACIAL STRUCTURE OF AMERICAN SOCIETY. (SLO 2).

• Explain the ideology of white supremacy as a means to understanding it (White Supremacy) as the organizing system of race relations in the U.S.

• Discuss the social, cultural and structural conditions that compelled the African American social movements (collective action) and organizations in the U.S.

• EXAMINE THE RELATIONSHIP BETWEEN THE SOCIAL CONDITIONS EXPERIENCED BY AFRICAN AMERICANS AND AFRICAN AMERICAN GROUP IDENTITY FORMATION. (SLO 3).

• Describe the role of the institution of slavery in the development of the dominant group's perception of African Americans in the U.S.

• Describe the era of scientific racism and its role in the development of the dominant group's perception of African Americans in the U.S.

• Explore and apply Social Identity Theory to describe identity formation for African Americans.

• Explore and apply Ethnic Identity Theory to describe identity formation for African Americans.

• Explore and apply Stereotype Threat to describe its impact in the unique experiences of African Americans brought on by dominant group perception in the U.S.

• CRITICALLY EXAMINE THE ECONOMIC, PSYCHOLOGICAL, POLITICAL, AND CULTURAL PROGRESS OF AFRICAN AMERICANS IN THE U.S (SLO 4).

• Use a historical comparative approach to explain the dimensions of progress for African Americans in the U.S.

• List and describe contemporary social issues facing African Americans in the U.S.

• Use the vocabulary developed throughout the course to discuss the likelihood of developing concrete solutions to address the contemporary issues uniquely facing African Americans in the U.S.
ETHNS 330 The Asian American Experience in America

This interdisciplinary course examines the social, political, economic, and cultural experience of Asian Americans in the United States. As an Ethnic Studies course, it has a culturally relativistic approach. Specifically, this course examines and redefines the lives of Asian Americans through their own experiences: from the inside looking out at the world. This course was formerly SOCSC 325.

Upon completion of this course, the student will be able to:

- Introduce interdisciplinary terms, concepts and theories.
- Apply the interdisciplinary vocabulary to understand the developing historical, political, cultural, psychological conditions under which Asian Americans have lived in the U.S.
- Interpret and summarize various aspects of the Asian American experience in the U.S.
- EXAMINE THE CULTURAL AND RACIAL STRUCTURE OF AMERICAN SOCIETY. (SLO 2).
- Explain the ideology of white supremacy as a means to understanding it (White Supremacy) as the organizing system of race relations in the U.S.
- Discuss the social, cultural and structural conditions that compelled the Asian American social movements (collective action) and organizations in the U.S.
- DESCRIBE THE RELATIONSHIP BETWEEN THE SOCIAL CONDITIONS EXPERIENCED BY ASIAN AMERICANS AND ASIAN AMERICAN GROUP IDENTITY FORMATION. (SLO 3).
- Describe the role of the institution of slavery in the development of the dominant group's social perception of Asian and Asian American subgroups in the U.S.
- Describe the era of scientific racism and its role in the development of the dominant group's perception of Asian and Asian American subgroups in the U.S.
- Explore and apply Social Identity Theory to describe identity formation for Asian Americans.
- Explore and apply Ethnic Identity Theory to describe identity formation for Asian Americans.
- Explore and apply stereotype threat to describe its impact in the unique experiences of Asian Americans brought on by dominant group perception in the U.S.
- Use a historical comparative approach to explain the dimensions of progress for Asian Americans in the U.S.
- List and describe contemporary social issues facing Asian Americans in the U.S.
- Use the vocabulary developed throughout the course to discuss the likelihood of developing concrete solutions to address the contemporary issues uniquely facing Asian Americans in the U.S.

ETHNS 340 Chicanos/Mexican Americans in the U.S.
This is an interdisciplinary course in which terms, concepts, and theories from distinct disciplines within the social sciences will be utilized to examine the social, political, economic, and cultural experience of Mexican Americans in the United States. As an Ethnic Studies course, it has a culturally relativistic approach. Specifically, this course examines and redefines the lives of Mexican Americans through their own experiences: from the inside looking out at the world. This course was formerly SOCSC 330.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- Introduce interdisciplinary terms, concepts and theories as they relate to Mexican American experience in the U.S.
- Apply the interdisciplinary vocabulary to understand the developing historical, political, cultural, psychological conditions under which Mexican Americans have lived in the U.S.
- Interpret and summarize various aspects of the Mexican American experience in the U.S.
- EXAMINE THE CULTURAL AND RACIAL STRUCTURE OF AMERICAN SOCIETY. (SLO 2).
- Explain the ideology of white supremacy as a means to understanding it (White Supremacy) as the organizing system of race relations in the U.S.
- Discuss the social, cultural and structural conditions that compelled the Mexican American social movements (collective action) and organizations in the U.S.
- DESCRIBE THE RELATIONSHIP BETWEEN THE SOCIAL CONDITIONS EXPERIENCED BY MEXICAN AMERICANS AND MEXICAN AMERICAN GROUP IDENTITY FORMATION. (SLO 3).
- Describe the role of the institution of slavery in the development of the dominant group's social perception of Mexican and Mexican Americans in the U.S.
- Describe the era of scientific racism and its role in the development of the dominant group's perception of Mexican and Mexican Americans in the U.S.
- Explore and apply Social Identity Theory to describe identity formation for Mexican Americans sociocultural mobility and progress.
- Explore and apply Ethnic Identity Theory to describe identity formation for Mexican Americans.
- Explore and apply the term stereotype threat to describe its impact in the unique experiences of Mexican Americans brought on by dominant group perception in the U.S.
- Use a historical comparative approach to explain the dimensions of progress for Mexican Americans in the U.S.
- List and describe contemporary social issues facing Mexican Americans in the U.S.
- Use the vocabulary developed throughout the course to discuss the likelihood of developing concrete solutions to address the contemporary issues uniquely facing Mexican Americans in the U.S.

This interdisciplinary course examines the social, political, economic, and cultural experience of racial and ethnic minority groups in the United States using concepts, theories, and terminology from distinct disciplines within the social sciences. As an ethnic studies course, it has a culturally relativistic approach. Specifically, this course redefines the lives of Latino American subgroups through their own experiences: from the inside looking out at the world.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- DEVELOP A VOCABULARY THAT DESCRIBES THE UNIQUE EXPERIENCES OF LATINO AMERICAN SUBGROUPS IN THE U.S. (SLO 1).
  - Apply interdisciplinary vocabulary to understand the developing historical, political, cultural, psychological conditions under which Latino American subgroups have lived in the U.S.
  - Describe the push and pull factors that lead to both immigration and emigration for Latino subgroups.
  - Describe the various forms of nativism experienced by Latino subgroups as they settled in the U.S.

- EXAMINE THE CULTURAL AND RACIAL STRUCTURE OF AMERICAN SOCIETY. (SLO 2).
  - Explain the ideological development of white supremacy as a means to understanding it (white supremacy) as the organizing social system of race relations in the U.S.
  - Understand the relationship between institutional power and social power within a social system.
  - Explain the relationship between the ideological development of white supremacy and its effect on Latino subgroups' agency in the U.S.

- UNDERSTAND THE CONDITIONS UNDER WHICH LATINO SUBGROUPS BOTH ASSIMILATE AND ACCULTURATE AND FORM A LATINO AMERICAN IDENTITY. (SLO 3).
  - Explore and apply Social Identity Theory to describe identity formation for Latino American subgroups.
  - Explore and apply Ethnic Identity Theory to describe identity formation for Latino American subgroups.
  - Explore and apply stereotype threat to describe its impact in the unique experiences of Latino American subgroups brought on by dominant group perception in the U.S.
  - Describe the role of the institution of slavery in the development of the dominant group's social perception of Latino subgroups in the U.S.
  - Describe the role of Native American land encroachment in the development of the dominant group's social perception of Latino subgroups.
  - Describe the era of scientific racism and its role in the development of the dominant group's perception of Latino subgroups in the U.S.
  - Describe the role and process of ethnogenesis undertaken by Latino subgroups as they develop a Latino American identity in the U.S.

  - Use a historical comparative approach to explain the dimensions of progress for Latino American subgroups in the U.S.
  - List and describe contemporary social issues facing Latino American subgroups in the U.S.
  - Use the vocabulary developed throughout the course to discuss the likelihood of developing concrete solutions to address the contemporary issues uniquely facing Latino American subgroups in the U.S.
Family and Consumer Science | Cosumnes River College

CRC's course offerings in Family and Consumer Science are designed primarily to provide knowledge and skills in the areas of human development.

Family and Consumer Science (FCS)

FCS 324 Human Development: A Life Span

| Units: | 3 |
| Hours: | 54 hours LEC |
| Prerequisite: | None. |
| Transferable: | CSU; UC (FCS 312, 324 and PSYC 372 combined: maximum transfer credit is two courses) |
| General Education: | AA/AS Area III(b); CSU Area E1 |
| Catalog Date: | June 1, 2020 |

This course will provide an overview of the physical, cognitive, social, and emotional development from conception through the life span. The emphasis will be on the practical application of developmental principles. The course is designed as a foundation course of careers in educational, social, psychological, and medical fields. An optional field study unit may be offered to provide opportunities for observation and experience with various age groups.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO #1: Analyze developmental theories and current research on life span in the biosocial, psychosocial, and cognitive domains.
- Assess the history of the life span perspective and address contemporary concerns.
- Define and distinguish between biological processes, cognitive processes, and socio-emotional processes.
- Appraise the major developmental periods from conception to death.
- Evaluate the three major developmental issues (nature and nurture, continuity and discontinuity, stability and change).
- Understand normative cognitive changes across the life span as suggested by the different theories.
- SLO #2: Analyze, compare, and contrast the key development theories.
- Define and distinguish between biological processes, cognitive processes, and socioemotional processes.
- Appraise and distinguish between theory, hypotheses, and the scientific method.
- Evaluate the different research measures used by developmental psychologists, and developmental theorists.
- SLO #3: Assess the developmental stages and growth processes across the biosocial, psychosocial, and cognitive domains of development, from the prenatal period through the end of life.
- Differentiate and analyze typical and atypical behavior, experiences, growth and development throughout the life span.
- Demonstrate knowledge of specific growth processes and analyze the interplay of genes and the environment on human growth and development.
• Assess the genetic foundations of life.
• Evaluate normative cognitive changes across the life span as suggested by the different theories.
• SLO #4: Analyze the six stages of the family life cycle, from leaving home and becoming a single adult to the family in later life.
• Appraise how research on temperament, personality, and attachment illustrate both stability and change in development.
• Demonstrate knowledge of specific growth processes and analyze the interplay of genes and the environment on human growth and development.
• Critique the various aspects of marriage, cohabitation, and committed relationships.
• Analyze the links between attachment and intimate relationships in adolescence and adulthood.
• Assess the current research on parenting children.
• Evaluate aspects of parent-adolescent relationships, seeing that while conflict with parents may increase in adolescence, it is usually moderate, not severe, and while adolescents seek to be independent, secure attachment to parents is positive for development.
• Appraise grandparenting and intergenerational relationships.
• Assess the changing family dynamics throughout the life span.
• SLO #5: Define death and life/death issues.
• Explore the developmental and cultural perspective on death and dying across the life span.
• Describe how individuals experience and view death, loss, and bereavement.

FCS 495 Independent Studies in Family and Consumer Science

| Units: | 1 - 3 |
| Hours: | 54 - 162 hours LAB |
| Prerequisite: | None. |
| Transferable: | CSU |
| Catalog Date: | June 1, 2020 |

An independent studies project involves an individual student or small group of students in study, research, or activities beyond the scope of regularly offered courses. See the current catalog section of "Special Studies" for full details of Independent Studies.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

• SLO #1: Actively engage in intellectual inquiry beyond that required in order to pass a course of study (College Wide Learning Outcome – Area 4).
• Discuss and outline a proposal of study (that can be accomplished within one semester term) with a supervising instructor qualified within the discipline.
• Design an independent study (to be completed individually or by collaboration of a small group) to foster special knowledge, skills, and experience that are not available in any one regularly scheduled course.
• Use information resources to gather discipline-specific information.
• SLO #2: Utilize modes of analysis and critical thinking to apply theoretical perspectives and/or concepts in the major discipline of study to significant problems and/or educational activities (College Wide Learning Outcome – Area 3).
• Analyze and apply the knowledge, skills and experience that are involved in the independent study to theoretical perspectives and/or concepts in the major discipline of study.
• Explain the importance of the major discipline of study in the broader picture of society.
• SLO #3: Communicate a complex understanding of content matter of the major discipline of study (College Wide Outcome – Area 3).
• Demonstrate competence in the skills essential to mastery of the major discipline of study that are necessary to accomplish the independent study.
• SLO #4: Identify personal goals and pursue these goals effectively (College Wide Outcome – Area 4).
Utilize skills from the "academic tool kit" including time management, study skills, etc., to accomplish the independent study within one semester term.
Film and Media Studies
Cosumnes River College

Film and Media Studies is designed to develop critical thinking and screenwriting skills while fostering a humanistic and social scientific understanding of the media. Students combine hands-on courses in scriptwriting, with critical studies of the visual media as an art form and social force. This major is particularly encouraged for students who intend to transfer to university film and media programs or pursue careers that demand a high level of visual literacy, analytic and writing skills. The production of digital film and broadcast television are taught through the Radio, Television and Film Production program.

Briand Bedford

Associate Degree

A.A. in Film and Media Studies

Film and Media Studies is designed to develop critical thinking and screenwriting skills while fostering a humanistic and social scientific understanding of the media. Students combine hands-on courses in scriptwriting, with critical studies of the visual media as an art form and social force. This major is particularly encouraged for students who intend to transfer to university film and media programs or pursue careers that demand a high level of visual literacy, analytic and writing skills. The production of digital film and broadcast television are taught through the Radio, Television and Film production program.

Highlights include:
* State-of-the-art 32-station computer lab for graphics and non-linear editing including Apple's Final Cut Pro, DVD Studio Pro, Adobe Photoshop, Illustrator, After Effects.
* Hand-on courses in film and video production and editing
* Screening room with rear screen projector and advanced sound system

Note to Transfer Students:
If you are interested in transferring to a four-year college or university to pursue a bachelor's degree in this major, it is critical that you meet with a CRC counselor to select and plan the courses for your major. Schools vary widely in terms of the required preparation. The courses that CRC requires for an Associate's degree in this major may be different from the requirements needed for the Bachelor's degree.

Total Units: | | 18

The Film and Media Studies Associate in Arts (A.A.) degree may be obtained by completion of the required program, plus general education requirements, plus sufficient electives to meet a 60-unit total. See CRC graduation requirements.

Student Learning Outcomes

Upon completion of this program, the student will be able to:

- Analyze, interpret, and exercise critical judgment in the evaluation of film and media forms and cultures. (SLO-1)
- Recognize, articulate, and judge the visual, verbal, and audio conventions through which images, words, and sounds make meaning in film and media texts. (SLO-2)
- Write clear, concise, and well-developed analyses of film and media texts. (SLO-3)
- Demonstrate an understanding of the professional, technical, and formal choices that realize, develop, or challenge existing practices and traditions in film. (SLO-4)
- Determine what type of information is needed for a research question, problem, or issue and identify, evaluate and effectively apply this information in scholarly or visual projects. (SLO-5)
- Articulate the history, development, genre, and movements of the film medium and recognize the contributions of national, minority, diasporic, and subaltern filmmakers. (SLO-6)
- Explain the processes, current structure, and ethical norms of American media. (SLO-7)
- Evaluate research on and popular claims of the media's social, political, and individual effects. (SLO-8)
- Produce videos that demonstrate an understanding of camera coverage, frame composition and mise-en-scene, camera perspective and blocking, editorial rhythm, pace, structure and style. (SLO-9)

Career Information

Career Options Director, Entertainment Writer or Editor, Producer, Screenwriter, Script Supervisor, Story Editor Some career options may require more than two years of college study. Classes beyond the associate degree may be required to fulfill some career options or for preparation for transfer to a university program.

Film and Media Studies (FMS)

FMS 300 Introduction to Film Studies

Units: 3
Hours: 54 hours LEC
Prerequisite: None.
Transferable: CSU; UC
General Education: AA/AS Area I; CSU Area C1; IGETC Area 3A
Catalog Date: June 1, 2020

This course offers an introduction to the film medium with emphasis on aesthetics, theory and methods of critical analysis. Students will examine film as an art form, as a medium for communicating ideas and as a social and cultural force.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- identify, analyze and evaluate the use and role of shots, angles, lighting, color, movement, editing, mise en scene and sound in cinema.
- explain and evaluate the contributions of the cinematographer, writer, director, editor and actor to cinematic art.
- explain and examine the codes and the conventions of film genre, myth, narrative, rhetoric.
- compose a film scene and construct a storyboard by employing cinematic language.
• recognize, discuss and examine the nature of culture, class, gender, and ethnicity in Hollywood mythologies and oppositional films.

• identify, explain, and understand contemporary film theories and use these theories to analyze, interpret, and criticize motion pictures.

FMS 305 Film History

Same As: RTVF 305
Units: 3
Hours: 54 hours LEC
Prerequisite: None.
Transferable: CSU; UC
General Education: AA/AS Area I; CSU Area Ct; IGETC Area 3A
Catalog Date: June 1, 2020

This course is an introduction to the art of motion pictures, using lectures and films. Students will study the history and development of motion pictures and will view, evaluate, and critique landmarks in the art of movie making. This course is the same as RTVF 305 and only one may be taken for credit.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

• analyze, interpret, and exercise critical judgment in the evaluation of film and media forms and cultures (SLO-1).

• analyze film critically through stylistic, narrative, and thematic analyzes.

• critique and understand films as art, literature, and communication.

• recognize, articulate, and judge the visual, verbal, and audio conventions through which images, words, and sounds make meaning in film and media texts (SLO-2).

• critique the stylistic, narrative, and thematic concerns in major works of film art.

• identify, understand, and evaluate the language of film narration, editing, and cinematography.

• develop and apply the technical language of film art and industry in evaluating film production and direction.

• demonstrate an understanding of the professional, technical, and formal choices that realize, develop, or challenge existing practices and traditions in film (SLO-3).

• employ basic critical approaches (formalistic, psychological, socio-political, and generic) in analyzing films and their cultural implications.

• evaluate the role of technologies in the development of film art.

• assess what type of information is needed for a research question, problem, or issue and identify, evaluate and effectively apply this information in scholarly or visual projects (SLO-4).

• describe the history, development, genre, and movements of the film medium and recognize the contributions of national, minority, diasporic, and subaltern filmmakers (SLO-5).

• classify and critique the periods, movements, major figures, landmark films, genres, and codes of film.

• compare and contrast the work of different directors and the concerns of different national cinema.

• recognize and evaluate the contributions of women and minorities to film.

FMS 310 Basic Screenwriting

Units: 3
Hours: 54 hours LEC
Prerequisite: ENGWR 300
Advisory: CSU
Transferable: AA/AS Area I
General Education: AA/AS Area I
Catalog Date: June 1, 2020
This course is a study of the creativity and techniques of screenwriting for short films, feature films, and television. Students will view and analyze exemplary films, participate in writing exercises and workshops, and complete a treatment and master scenes of a full-length project.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- understand and apply the elements of story structure and film narrative.
- critically analyze produced scripts. Write film dialogue.
- identify successful scenes. Develop three-dimensional characters.
- apply concepts from mythology to plot and character development.
- understand and apply literary techniques for sub-text to symbolism to create multi-layered narratives. Plot a feature film.
- create proposals and treatments for film projects.
- compose a short film or the first third of a feature-length film.

FMS 320 Film Genre

| Units: | 3 |
| Hours: | 54 hours LEC |
| Prerequisites: | None. |
| Transferable: | CSU; UC |
| General Education: | AA/AS Area I; CSU Area C2; IGETC Area 3B |
| Catalog Date: | June 1, 2020 |

This course examines the structure, mythology, style, themes and critical theory of one or more film genre, such as the comedy, the thriller and the film noir.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- understand genre theory, genre's relationship to popular culture, its role in fostering ideology and images of gender and ethnicity.
- explain and examine the codes, conventions, myths and transformations of film genre.
- apply current film theory to the analysis and criticism of genre films.
- identify and analyze the relationship of cinematic aesthetics and visual motifs to a genre or genres.
- write critical papers on film genre.
- apply semiotics to the study of film genre.

FMS 488 Honors Seminar: Introduction to Critical Theory

| Same As: | HONOR 350 |
| Units: | 3 |
| Hours: | 54 hours LEC |
| Prerequisites: | None. |
| Transferable: | CSU; UC |
| General Education: | AA/AS Area I; CSU Area C2; IGETC Area 3B |
| Catalog Date: | June 1, 2020 |

This course investigates questions of interpretation and representation in film, literature, media, and culture. Students examine contemporary critical and cultural theory, then apply these theories in analyzing a variety of texts from the Shakespearean play to the sciencefiction horror film. Theories introduced include, but are not limited to, semiotics, psychoanalysis, rhetorical criticism, gender theory, and postmodernism. Students intending to transfer into arts, film, literature, humanities, and cultural studies programs will find this course particularly useful in understanding the critical language of the university. Enrollment is limited to Honors Program students.

Details about the Honors Program can be found in the front of the Catalog and on the CRC website. This course is the same as HONOR 350, and only one may be taken for credit.
Upon completion of this course, the student will be able to:

- EXPRESS IDEAS CLEARLY IN WELL-ORGANIZED WRITTEN MESSAGES (SLO #1, College Wide SLO – Area 1, and General Education SLO C5a – English Composition). This includes the ability to:
  - Express ideas clearly and completely in a variety of written formats.
  - Utilize correct and appropriate conventions of mechanics, usage, and style in written communication.
  - Comprehend main ideas and reasonably interpret written information.
  - Compose and apply properly documented sources of information.

- UTILIZE MODES OF ANALYSIS AND CRITICAL THINKING IN A DISCIPLINE OF STUDY AS APPLIED TO SIGNIFICANT ISSUES AND/OR PROBLEMS (SLO #2; College Wide SLO Area 3). This includes the ability to:
  - Construct an accurate and/or logical interpretation of reasoning while applying a framework of analytic concepts.

- ACTIVELY ENGAGE IN INTELLECTUAL INQUIRY BEYOND THAT REQUIRED IN ORDER TO PASS A COURSE OF STUDY (SLO #3, College Wide SLO – Area 4). This includes the ability to:
  - Apply information and resources necessary to develop academically and personally.
  - Utilize skills from one’s “academic tool kit” including time management, study skills, etc.

- RECOGNIZE THE ETHICAL DIMENSIONS OF DECISIONS AND ACTIONS (SLO #4, College Wide SLO – Area 5). This includes the ability to:
  - Demonstrate the ability to engage in ethical reasoning necessary to exercise responsibility as an ethical individual, professional, local and global citizen.

- ARTICULATE AN AWARENESS OF A VARIETY OF PERSPECTIVES WITHIN A DISCIPLINE AND THE RELEVANCE OF THESE PERSPECTIVES TO ONE’S OWN LIFE (SLO #5, College Wide SLO – Area 2). This includes the ability to:
  - Understand, evaluate, and apply critical theory, theory’s relationship to art and culture, its role in interpreting literary and visual arts, and examining ideology and representations of gender and ethnicity.
  - Apply current theory to the analysis and criticism of film, literature, and media.
  - Understand, evaluate and apply the basic concepts of semiotics, post-structuralism, psychoanalysis, gender theory, and postmodernism and their relationship to/influence on art and politics.

FMS 489 Honors Seminar: The Films of Alfred Hitchcock

This seminar studies the work of Alfred Hitchcock from the perspective of the key concepts in film theory. Students will investigate the films and criticism of one of the greatest and strangest directors, the self-styled master of suspense. This seminar takes a close reading of Hitchcock’s most important films and the most significant writing on the director’s work. For students interested in film, media, art, literature, and the humanities, the course examines Hitchcock’s visual style, thematic concerns, and directorial techniques, and introduces the major critical approaches to cinema studies. Enrollment is limited to Honors Program students. Details about the Honors Program can be found in the front of the Catalog and on the CRC website. This course is the same as HONOR 352, and only one may be taken for credit.

Upon completion of this course, the student will be able to:

- EXPRESS IDEAS CLEARLY IN WELL-ORGANIZED WRITTEN MESSAGES (SLO #1, College Wide SLO – Area 1, and General Education SLO C5a – English Composition). This includes the ability to:
  - Express ideas clearly and completely in a variety of written formats.
  - Utilize correct and appropriate conventions of mechanics, usage, and style in written communication.
• Comprehend main ideas and reasonably interpret written information.

• Compose and apply properly documented sources of information.

• UTILIZE MODES OF ANALYSIS AND CRITICAL THINKING IN A DISCIPLINE OF STUDY AS APPLIED TO SIGNIFICANT ISSUES AND/OR PROBLEMS (SLO #2; College Wide SLO Area 3). This includes the ability to:

  • Construct an accurate and/or logical interpretation of reasoning while applying a framework of analytic concepts.

  • ACTIVELY ENGAGE IN INTELLECTUAL INQUIRY BEYOND THAT REQUIRED IN ORDER TO PASS A COURSE OF STUDY (SLO #3, College Wide SLO – Area 4). This includes the ability to:

  • Apply information and resources necessary to develop academically and personally.

  • Utilize skills from one’s “academic tool kit” including time management, study skills, etc.

  • ARTICULATE AN AWARENESS OF A VARIETY OF PERSPECTIVES WITHIN A DISCIPLINE AND THE RELEVANCE OF THESE PERSPECTIVES TO ONE’S OWN LIFE (SLO #4, College Wide SLO – Area 2). This includes the ability to:

  • Identify the stylistic, narrative, and thematic concerns in the director’s work.

  • Understand Hitchcock’s contribution to the cinematic language (pure cinema, point of view, montage, mise-en-scene) and genre (the melodrama and the thriller).

  • Read, understand, evaluate, and compare the key critical appraisals of the director by Modelski, Wood, Spoto, Truffaut and others.

  • Apply critical theory (auteur, feminist, psychoanalytic, semiotic) in the analysis of the films and their cultural implications.

  • Participate in the seminar mode of learning, including seminar discussion and presentation of a creative and original paper of critical value to the study of Hitchcock.

FMS 495 Independent Studies in Film and Media Studies

Units: 1 - 3
Hours: 54 - 162 hours LAB
Prerequisite: None.
Transferable: CSU
Catalog Date: June 1, 2020

An independent studies project involves an individual student or small group of students in study, research, or activities beyond the scope of regularly offered courses. See the current catalog section of “Special Studies” for full details of Independent Studies.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

• SLO #1: Actively engage in intellectual inquiry beyond that required in order to pass a course of study (College Wide Learning Outcome – Area 4).

• Discuss and outline a proposal of study (that can be accomplished within one semester term) with a supervising instructor qualified within the discipline.

• Design an independent study (to be completed individually or by collaboration of a small group) to foster special knowledge, skills, and experience that are not available in any one regularly scheduled course.

• Use information resources to gather discipline-specific information.

• SLO #2: Utilize modes of analysis and critical thinking to apply theoretical perspectives and/or concepts in the major discipline of study to significant problems and/or educational activities (College Wide Learning Outcome – Area 3).

• Analyze and apply the knowledge, skills and experience that are involved in the independent study to theoretical perspectives and/or concepts in the major discipline of study.

• Explain the importance of the major discipline of study in the broader picture of society.

• SLO #3: Communicate a complex understanding of content matter of the major discipline of study (College Wide Outcome – Area 3).

• Demonstrate competence in the skills essential to mastery of the major discipline of study that are necessary to accomplish the independent study.

• SLO #4: Identify personal goals and pursue these goals effectively (College Wide Outcome – Area 4).
Utilize skills from the "academic tool kit" including time management, study skills, etc., to accomplish the independent study within one semester term.
Film/Digital Cinema Production  
Cosumnes River College

This Associate of Arts degree program is designed to provide skills in film production, digital cinema, and television through the preparation of projects for viewing on campus, cable TV, the Internet and new technologies. Given the expansion of new media distribution opportunities and the production convergence of High-Definition video and film, students will gain a broad exposure to visual storytelling in a professional environment, including dramatic narrative, documentary and experimental styles.

Dean

 (916) 691-7170

BedforB@crc.losrios.edu

Associate Degree

A.A. in Film / Digital Cinema Production

This Associate of Arts degree program is designed to provide skills in film production, digital cinema, and television through the preparation of projects for viewing on campus, cable TV, the Internet and new technologies. Given the expansion of new media distribution opportunities and the production convergence of High-Definition video and film, students will gain a broad exposure to visual storytelling in a professional environment, including dramatic narrative, documentary and experimental styles. This option can lead to entry-level jobs in the film industry, post-production, television, new media, business and industry. Some of the courses in this major also transfer to a four year university program. Please see a counselor for more information.

Highlights include:
* Practical experience working with school equipment on productions for viewing on campus, on cable TV and the Internet.
* Working in teams to build projects using a professional approach.
* State-of-the-art digital computer lab for graphics and non-linear editing, including Apple’s Final Cut Pro, DVD production, Adobe Photoshop, Adobe Illustrator, and Adobe After Effects.
* Internship opportunities working in local independent film-makers, post-production facilities and at local television stations.
* Industry guest speakers provide real world examples of how to be successful in the film industry.

Note to Transfer Students:
If you are interested in transferring to a four-year college or university to pursue a bachelor’s degree in this major, it is critical that you meet with a CRC counselor to select and plan the courses for your major. Schools vary widely in terms of the required preparation. The courses that CRC requires for an Associate’s degree in this major may be different from the requirements needed for the Bachelor’s degree.

The Film / Digital Cinema Production Associate in Arts (A.A.) degree may be obtained by completion of the required program, plus general education requirements, plus sufficient electives to meet a 60-unit total. See CRC graduation requirements.

Student Learning Outcomes

Upon completion of this program, the student will be able to:

- Write in clear, concise English. (PSLO-1)
- Research critically, filter the results and present them in a cogent manner. (PSLO-2)
- Resolve and execute standard pre-production skills including planning, script, script breakdown, budgeting, storyboard creation, and crew and equipment selection. (PSLO-3)
- Utilize basic field production equipment correctly, safely and creatively, including cameras, lights and audio. (PSLO-4)
- Operate essential post production equipment for audio and film/video editing and distribution in a variety of contemporary and emerging methods. (PSLO-5)
- Analyze, interpret, and exercise critical judgment in the evaluation of media productions. (PSLO-6)
- Demonstrate through projects that with the power of a communicator, comes moral and ethical responsibility. (PSLO-7)
- Demonstrate a hands-on ability to perform the professional level critical thinking needed for successful teamwork in media employment. (PSLO-8)

Career Information

Camera Operator; Cinematographer; Director of Photography; Lighting Director; Computer Graphic Artist; Non-Linear Video Editor; Audio Engineer; Broadcast Technician; Gaffer; Production Coordinator; Production Assistant; TV, Film, DVD, or Internet Producer/Director; Personal or Corporate Video. Some career options may require more than two years of college study. Classes beyond the associate degree may be required to fulfill some career options or for preparation for transfer to a university program.
Fire Technology
| Cosumnes River College

The fire service is one of the most dynamic employers in the country. This CRC program is designed to provide the student with updated skills and knowledge necessary to complete and successfully apply for fire service positions. The curriculum serves as an inservice program as well as a pre-employment program for students seeking employment or advancement in the profession of urban firefighting and fire suppression.

Total Units: 25 - 28

1The student must have 1-4 units of work experience in Fire Prevention to receive a degree.

The Fire Prevention Associate in Science (A.S.) degree may be obtained by completion of the required program, plus general education requirements, plus sufficient electives to meet a 60-unit total. See CRC graduation requirements.
Student Learning Outcomes

Upon completion of this program, the student will be able to:

- PSLO #1: Comprehend the qualifications for entry level skills, the discipline and evaluation process, fire service structure, history, and culture for the field of fire prevention.
- PSLO #2: Identify and comprehend laws, regulations, codes, standards and the regulatory and advisory organizations that influence fire prevention operations.
- PSLO #3: Analyze and determine the causes of fire, extinguishing agents, stages of fire, fire development, and methods of heat transfer.
- PSLO #4: Identify and describe the common types of building construction and conditions associated with structural collapse.
- PSLO #5: Differentiate between fire detection and fire suppression systems.

Career Information

Fire Inspector, Fire Investigator, Plans Examiner, Building Inspector, Fire Prevention Specialist/Officer, Public Education Specialist/Officer, Manager, Firefighter Some Career Opportunities may require more than two years of college study. Classes beyond the associate degree may be required to fulfill some career opportunities for preparation for transfer to a university program.

A.S. in Fire Technology

The fire service is one of the most dynamic employers in the country. This CRC program is designed to provide the student with updated skills and knowledge necessary to complete and successfully apply for fire service positions. The curriculum serves as an inservice program as well as a pre-employment program for students seeking employment or advancement in the profession of urban fire fighting and fire suppression.

HIGHLIGHTS

*Up-to-date technical information
*Field trips to a variety of fire service locations
*Networking with other fire service members
*Fire Technology work experience internships
(Fire Technology 498 for on-the-job experience)

NOTE TO TRANSFER STUDENTS: If you are interested in transferring to a four-year college or university to pursue a bachelor's degree in this major, it is critical that you meet with a CRC counselor to select and plan the courses for your major. Schools vary widely in terms of the required preparation. The courses that CRC requires for an Associate's degree in this major may be different from the requirements needed for the Bachelor's degree.

Catalog Date: June 1, 2020

1 A current California EMT certificate or Paramedic license will be accepted as satisfactory completion of the EMT 100 requirement.

2 The student must have 1-4 units of work experience in Firefighting or Emergency Medical Services to receive a degree.

The Fire Technology Associate in Science (A.S.) degree may be obtained by completion of the required program, plus general education requirements, plus sufficient electives to meet a 60-unit total. See CRC graduation requirements.

Student Learning Outcomes

Upon completion of this program, the student will be able to:

- PSLO #1: Comprehend the qualifications for entry level skills, the discipline and evaluation process, fire service structure, history, and culture for the field of fire technology.
- Analyze, appraise, and evaluate fire incidents and components of emergency management and firefighter safety.
- PSLO #2: Comprehend laws, regulations, codes, standards and the regulatory and advisory organizations that influence fire department operations.
- PSLO #3: Analyze and determine the causes of fire, extinguishing agents, stages of fire, fire development, and methods of heat transfer.
- Synthesize and determine the appropriate use and flow requirement of hydraulic fire apparatus.
- Describe the appropriate uses and maintenance for apparatus and equipment used in the fire service.
- PSLO #4: Evaluate the common types of building construction and conditions associated with structural collapse and firefighter safety.
- Evaluate fire detection and fire suppression systems.

Career Information

Firefighter; Inspector; Investigator; Supervisor; Manager Some career options may require more than two years of college study. Classes beyond the associate degree may be required to fulfill some career options or for preparation for transfer to a university program.

Certificate of Achievement

Firefighter Suppression Specialist Certificate

The fire service is one of the most dynamic employers in the country. This CRC program is designed to provide students with updated skills and knowledge necessary to complete and successfully apply for fire service positions. The purpose of the Fire Suppression Specialist Certificate is to recognize, through certification, qualified individuals who are dedicated to curtailing fire loss, both physical and financial, and who have acquired a level of professionalism through applied work experiences and related education opportunities, and through successful completion of a certification examination.

The curriculum serves as an in-service program as well as a pre-employment program for students seeking employment or advancement in the profession of urban fire fighting, fire prevention, and public and private fire suppression.

1A current California EMT certificate or Paramedic license will be accepted as satisfactory completion of the EMT 100 requirement.

Students should take 4 units of Fire Technology Work Experience (FT 498) each semester for 4 semesters, earning a total of 16 units of work experience through FT 498.

Student Learning Outcomes

Upon completion of this program, the student will be able to:

- PSLO 1: Comprehend the qualifications for entry level skills, the discipline and evaluation process, fire service structure, history, and culture for the field of fire technology.
- PSLO 2: Analyze, appraise, and evaluate fire incidents and components of emergency management and firefighter safety.
- Comprehend laws, regulations, codes, standards, and the regulatory and advisory organizations that influence fire department operations.
- PSLO 3: Develop policies, procedures, and training programs to inform and educate population in fire prevention principles and fire and life safety practices; understand proper design, installation, and maintenance of electrical systems and appliances while identifying the components that, alone or in combination, form emergency and standby power systems; analyze the dynamics of heating systems; identify basic components of and the hazards associated with ‘hot work’ and the manufacturing processes necessary for effective fire prevention.
- PSLO 4: Analyze facility fire hazard management to include capturing knowledge of property fire insurance, building construction and/or field experience; performing fire/property surveys involving detailed analyses; observation, examination, inspection, and gathering of data to describe all aspects of a property/building and business; conducting complex inspection surveys of commercial and residential properties to evaluate physical characteristics of a property and business.
- PSLO 5: Recognize system approaches to property classes; assessing life safety as it relates to fire protection in special occupancies and understanding fire protection in warehouse and storage operations.
- Evaluate fire detection and fire suppression systems.
- PSLO 6: Define organizations for fire and rescue services; perform pre-incident planning for industrial and commercial facilities, interpret operations of fire loss prevention and emergency organizations, understand operations of emergency medical services, describe municipal fire prevention and code enforcement operations; train fire and emergency services; understand the use and function of fire and emergency services protective clothing and protective equipment; and evaluate fire department resources and the placement thereof.

Career Information

Firefighter; Fire Inspector; Investigator; Supervisor; Manager, Plans Examiner; Building Inspector; Fire Prevention Specialist/Officer; Public Education Specialist/Officer
FT 110 Fire Apparatus

This course covers various aspects of fire apparatus. Topics include design, typing, specifications, construction, performance capabilities, and maintenance. This course includes principles and techniques for maintaining and operating fire service pumping and other mobile apparatus. The course includes fire service equipment and apparatus troubleshooting; principles and techniques of preventive maintenance; construction and operation of fire service pumps and pump accessories; basic highway operating techniques for fire apparatus; fire apparatus specifications and testing procedures. Also included are warning devices and the utilization of apparatus in fire service emergencies. Effective utilization of equipment on the fireground will be the focus with emphasis on practical applications.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO 1: Analyze, appraise, and evaluate fire incidents and components of emergency management and firefighter safety.
- analyze fire case study scenarios and formulate solutions.
- SLO 2: Synthesize and determine the appropriate use and flow requirement of hydraulic fire apparatus.
- list and explain the principles of pumping operations.
- SLO 3: Describe the appropriate uses and maintenance for apparatus and equipment used in the fire service.
- compare and contrast the design characteristics of aerial ladder trucks.
- describe operating principles of fully-hydraulic aerial, hydro-mechanical aerial, and manual-emergency operational procedures.
- explain the types of fire ground scenarios in which elevating platform apparatus would be used.
- describe types of platform apparatus; explain their comparative use under different kinds of conditions.
- analyze the hazards associated with the use of fire apparatus under emergency conditions.
- describe the use of specialized equipment such as fireboats, airport apparatus, etc.
- describe the components and the importance of systems checks for the maintenance of fire apparatus.
- prepare apparatus inspection records.
- describe safety procedures and records to be kept for safe use of all fire apparatus.

FT 130 Fire Company Organization and Management

An in-depth review of the operation, organization and planning concepts of today's fire departments. Emphasizes the functions of management including budgeting, time management, delegation, motivation, and discipline. Explores concepts of continuous improvement, team-building, and principles of quality management, relative to fire service operations.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO 1: Comprehend the qualifications for entry level skills, the discipline and evaluation process, fire service structure, history, and culture for the field of fire technology.
FT 170 Fire Investigation

**Units:** 3
**Hours:** 54 hours LEC
**Prerequisite:** None.
**Advisory:** FT 300 or employment as a firefighter
**Catalog Date:** June 1, 2020

This course focuses on determining causes of fires (accidental, suspicious and incendiary), the types of fires, related laws, an introduction to arson and incendiarism, recognizing and preserving evidence, the interviewing of witnesses and suspects, arrest and detention procedures, court procedures and giving court testimony.

**Student Learning Outcomes**

Upon completion of this course, the student will be able to:

- SLO 1: Comprehend laws, regulations, codes, standards and the regulatory and advisory organizations that influence fire department operations.
- describe the proper arrest and detention procedures for adults and juveniles.
- SLO 2: Analyze and determine the causes of fire, extinguishing agents, states of fire, fire development, and method of heat transfer.
- diagnose the point of origin at a fire scene
- recognize, protect, and preserve evidence of fire cause; in proper techniques relating to court testimony; in proper techniques for interviewing witnesses and suspects; in laws relating to fire investigation.
- relate the responsibilities of determining the cause of fire to fire and police personnel.
- describe the scientific method of fire investigation

FT 180 Rescue Practices
This course focuses on the identification and management of rescue situations, such as proper utilization and awareness of equipment, tools, and techniques to handle various rescue situations. Topics include vehicle extrication, water rescue, vertical rescue, building collapse, radiation hazards, hazardous materials rescue, fire situations including rapid intervention awareness, and other emergency situations.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO 1: Analyze, appraise, and evaluate fire incidents and components of emergency management and fire fighter safety.
- develop an overall understanding of emergency rescue technicians.
- develop an interest in the Rescue Service.
- develop an understanding of specific rescue problems and procedures.
- SLO 2: Describe techniques for dealing with various rescue situations and obtain a working knowledge of how to set-up emergency rescue equipment
- describe confined space rescue operations
- improvise treatments for common medical injuries, using minimal equipment
- SLO 3: Identify next steps towards receiving technical rescue certifications applicable toward firefighter career enhancement and advanced mobility

FT 190 Fire Tactics and Strategy

This course provides the study of fundamental principles of fire tactics and strategy under fireground conditions and procedures for effective development and application of pre-fire plans. Fire emergency problems are critically analyzed and definitive coping strategies are examined as it relates to staffing resources, equipment and extinguishing agents available during the emergency incident. This course meets the National Fire Academy, Fire and Emergency Services Higher Education (FESHE) curriculum model for the Strategy and Tactics Course. This course is also aligned with the State of California Fire Marshal "All Risk Command for Company Officers" (2D) certification track series.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO 1: Comprehend the qualifications for entry level skills, the discipline and evaluation process, fire service structure, history, and culture for the field of fire technology.
- explain the primary functions of engine and truck companies.
- describe methods for dealing with the personal stress accompanies fire command.
- SLO 2: Comprehend laws, regulations, codes, standards and the regulatory and advisory organizations that influence fire department operations.
- describe the goal of the nation's fire service.
- identify common fireground safety practices, safety violations, and fire fighter injury rates.
- SLO 3: Analyze, appraise, and evaluate fire incidents and components of emergency management and fire fighter safety.
- identify the essential data that should be gathered and recorded on pre-fire plans.
- define "size-up" and describe the factors of size-up, which must be considered for control of an emergency situation.
- identify and describe the seven strategic and tactical priorities.
- describe tactical plans for rescue, exposure protection, confinement, extinguishments, overhaul, ventilation, and salvage.
- identify the factors to consider when writing a report of conditions at an emergency scene.
- describe the role and responsibilities of first-in officer at the scene of an emergency.
- SLO 4: Analyze and determine the causes of fire, extinguishing agents, stages of fire, fire development, and methods of heat transfer.
- identify the four components of the fire Tetrahedron and their relationship to the combustion process.
- compare the four classes of fire and the process of fire behavior and growth.
- identify the four levels of emergencies and provide examples.
- identify the four leading causes of fire.
- identify methods of heat transfer and describe fire spread within structures.
- describe special circumstances to be considered in fireground operations.
- SLO 5: Synthesize and determine the appropriate use and flow requirement of hydraulic fire apparatus.
- describe and compare the general methods of water application to fireground situation and the manpower requirements necessary to deploy hose lines and develop fire streams.
- determine the manpower requirements necessary to deploy hose lines and develop fire streams.
- SLO 6: Describe the appropriate uses and maintenance for apparatus and equipment used in the fire service.
- identify the six categories of extinguishing agents and provide examples of each.
- compare the effectiveness of extinguishing agent type on the four classifications of fuel.
- discuss the four variable factors that may affect basic positioning of apparatus in an emergency.
- SLO 7: Evaluate the common types of building construction and conditions associated with structural collapse and firefighter safety.
- describe firefighting hazards and conditions associated with: remodeled structures, balloon construction, arch truss roofs, light weight construction, and poke-through construction.
- evaluate the risks associated with discovering remodeled work done without appropriate local permitting.
- identify the roles of the National Incident Management System (NIMS) and Incident Management System (ICS) as it relates to strategy and tactics;
- demonstrate the various roles and responsibilities in ICS/NIMS

FT 210 Firefighter Academy for the Internship Program

- **Units:** 7.5
- **Hours:** 90 hours LEC; 135 hours LAB
- **Prerequisite:** FT 300 with a grade of "C" or better; Current EMT Certification in the State of California. BLS Provider or BLS for the Healthcare Provider from American Heart Association; or current American Red Cross CPR for Professional Rescuer). CPR must stay current for the entire internship. The student must meet other Academy requirements including but not limited to: drug screening, background check, purchasing firefighting personal protective equipment, college GPA of 2.5, physical, physical ability test, respirator fit testing, and a valid driver's license. current Candidate Physical Ability Test (CPAT) card. The students applying for FT 210 must pass a fire interview board to be accepted into the course.
- **Corequisite:** FT 498
- **Enrollment Limitation:** All students must be enrolled in FT 498 to sign up for FT 210.
- **Catalog Date:** June 1, 2020

FT 210 is a Firefighter Academy to provide the techniques and skills to work effectively and safely within the fire environment as well as in the fire department. This Firefighter Academy is CSD Fire Department’s Academy (NOT a State Certified Regional Fire Academy). Students that successfully complete this course along with the CSD/CRC Firefighter work experience program (FT 498) are allowed to apply for the State of California Fire Fighter I certification. Topics include indoctrination into the fire service, general maintenance, apparatus and equipment operations, fire control, salvage, fire prevention and public education, fire and arson investigation, rapid intervention crew tactics, physical fitness/wellness, emergency care, and forcible entry. Students may be charged a lab fee for personal protective equipment (PPE) in the use of and maintenance of structural firefighter turnouts and equipment in this course. Students will also be responsible for purchasing other equipment, liability insurance and uniforms. Pass/no pass only.
Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO #1: Understand the core values of the fire service and the duty to provide service to the public.
- Describe the history, development, structure, organization, and responsibility of the fire service.
- Demonstrate basic skills in public education procedures and instruction.
- Understand and performs preventative maintenance to fire station, apparatus, and equipment.
- Explain and apply the basic concept of fire control, fire and arson investigation, and fire communication systems.
- SLO #2: Understand and apply national standards to firefighting techniques and operations.
- Use fire department apparatus and tools within the scope of assignment.
- Identify and demonstrate first responder responsibilities for handling medical emergencies.
- Demonstrate firefighter rescue and survival skills.
- Demonstrate fire suppression tactics and strategies.
- SLO #3: Demonstrate professional values and standards for fire service personnel that the industry requires
- Apply workplace rules and laws regarding harassment/discrimination policies and mandated reporting procedures.
- Comprehend the need to maintain both physical and mental health fitness to work in the field of Fire Service.

---

FT 295 Independent Studies in Fire Technology

Units: 1 - 3
Hours: 54 - 162 hours LAB
Prerequisite: None.
Catalog Date: June 1, 2020

An independent studies project involves an individual student or small group of students in study, research, or activities beyond the scope of regularly offered courses. See the current catalog section of “Special Studies” for full details of Independent Studies.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO #1: Actively engage in intellectual inquiry beyond that required in order to pass a course of study (College Wide Learning Outcome – Area 4).
- Discuss and outline a proposal of study (that can be accomplished within one semester term) with a supervising instructor qualified within the discipline.
- Design an independent study (to be completed individually or by collaboration of a small group) to foster special knowledge, skills, and experience that are not available in any one regularly scheduled course.
- Use information resources to gather discipline-specific information.
- SLO #2: Utilize modes of analysis and critical thinking to apply theoretical perspectives and/or concepts in the major discipline of study to significant problems and/or educational activities (College Wide Learning Outcome – Area 3).
- Analyze and apply the knowledge, skills and experience that are involved in the independent study to theoretical perspectives and/or concepts in the major discipline of study.
- Explain the importance of the major discipline of study in the broader picture of society.
- SLO #3: Communicate a complex understanding of content matter of the major discipline of study (College Wide Outcome – Area 3).
- Demonstrate competence in the skills essential to mastery of the major discipline of study that are necessary to accomplish the independent study.
- SLO #4: Identify personal goals and pursue these goals effectively (College Wide Outcome – Area 4).
- Utilize skills from the “academic tool kit” including time management, study skills, etc., to accomplish the independent study within one semester term.
FT 300 Fire Protection Organization

This course provides an introduction to fire protection and emergency services. Fire Protection Organization is recommended as the first course in the series of fire technology courses. Topics covered include: career opportunities in fire protection and related fields; culture and history of emergency services; philosophy and history of fire protection; fire loss analysis; organization and function of public and private fire protection services; fire departments as part of local government; laws and regulations affecting the fire service; fire service nomenclature; specific fire protection functions; basic fire chemistry and physics; an introduction to fire protection systems; and an introduction to fire strategy and tactics; life safety initiatives. This course meets the National Fire Academy, Fire and Emergency Services Higher Education (FESHE) curriculum model for the Principles of Emergency Services.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO 1: Comprehend the qualifications for entry level skills, the discipline and evaluation process, fire service structure, history, and culture for the field of the fire service.
  - analyze and describe the differences between the certificate, two-year, four-year degree programs and state certification.
  - define the educational requirements, duties and information sources for various occupations in fire protection and explain the value of higher education to the professionalization of the fire service.
- SLO 2: Comprehend laws, regulations, codes, standards and the regulatory and advisory organizations that influence fire department and emergency operations.
  - list and describe the major organizations that provide emergency response service and illustrate how they interrelate.
  - describe the effects of fire on the environment and the historical efforts made to protect society.
  - identify the major organizations that contribute to fire protection.
  - define and describe the scope, purpose, and organizational structure of fire and emergency services.
  - identify the various codes, standards, ordinances and regulations that affect fire protection.
  - Identify the primary responsibilities of fire prevention personnel including, code enforcement, public information, and public and private protection systems.
- SLO 3: Analyze the basic components of fire; determine the causes of fire, extinguishing agents, stages of fire, fire development, and method of heat transfer.
  - describe firefighting strategy and tactics.
  - demonstrate the basic elements of firefighting safety and survival.
- SLO 4: Describe the common types of fire and emergency service facilities, equipment, and apparatus along with its appropriate uses and maintenance.
  - summarize the basic components of fire as a chemical reaction, the major phases of fire and examine the main factors that influence fire spread and fire behavior.
  - examine the types of common fire department apparatus, equipment and personal safety equipment used for firefighting.
  - identify the various applications of computers in the fire service.
- SLO 5: Define command structure utilized at all fire and emergency incidents.
  - define the role of national, State and local support organizations in the fire and emergency services.
  - compare and contrast effective management concepts for various emergency situations.
- SLO 6: Recognize the components of career preparation and goal setting.
  - identify fire protection and emergency-service careers in both the public and private sector.
  - describe the importance of wellness and fitness as it relates to all fire and emergency services.
  - demonstrate a working knowledge of basic culinary etiquette appropriate for shift work.
FT 301 Fire Prevention Technology

This course provides fundamental knowledge relating to the field of fire prevention, history and philosophy of fire prevention, organization and operation of a fire prevention bureau, use and application of codes and standards, plans review, fire inspection practices with identification and correction of fire hazards, fire and life safety education, and fire investigation. This course meets the National Fire Academy, Fire and Emergency Services Higher Education (FESHE) curriculum model for Fire Prevention.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO 1: Comprehend the qualifications for entry level skills, the discipline and evaluation process, fire service structure, history, philosophy of fire prevention.
- define the national fire problem and role of fire prevention, its origin and history within the United States.
- define all functions of a fire prevention bureau and explain the basic fire prevention functions of a fire department.
- describe inspection practices and procedures and list opportunities in professional development for fire prevention personnel.
- identify fire prevention organizations and associations.
- Identify and describe the standards for professional qualifications for Fire Marshal, Plans Examiner, Fire Inspector, Fire and Life Safety Educator, and Fire Investigator.
- SLO 2: Analyze, appraise, and evaluate fire incidents and components of emergency management and fire fighter safety.
- summarize the relationship between fire safety education and fire prevention.
- describe the importance of report preparation and records management in fire prevention efforts.
- identify the responsibility and authority for fire prevention inspections and related activities.
- SLO 3: Comprehend laws, regulations, codes, standards and the regulatory and advisory organizations that influence fire department operations.
- identify the plan review function of a fire prevention bureau.
- define laws, rules, regulations, and codes and identify those relevant to fire prevention of the authority having jurisdiction
- SLO 4: Analyze and determine the causes of fire, extinguishing agents, stages of fire, fire development, and methods of heat transfer.
- identify hazards of use, storage and transfer of flammable liquids and gases and other hazardous materials.
- identify basic electrical fire hazards.
- identify the responsibility and authority for fire prevention inspections and related activities.
- SLO 5: Evaluate fire detection and fire suppression systems.
- identify principles and procedures used to correct fire hazards.
- define operational deficiencies in sprinkler systems and special fixed fire protection systems.
- define operating deficiencies of standpipe systems.
- define operational deficiencies of detection alarm systems.
- identify principles of fire cause determination as they relate to fire prevention and fire investigation.
- define basic principles of fire cause determination as they relate to fire prevention and fire investigation.
- SLO 6: Evaluate the common types of building construction and conditions associated with structural collapse and firefighter safety.
- identify occupancies and building construction types.
- define basic exiting requirements.
FT 302 Fire Protection Equipment and Systems

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO 1: Comprehend laws, regulations, codes, standards, and the regulatory and advisory organizations that influence fire department operations at the national, state, and local level.
- identify and describe various types and uses of fire protection systems.
- explain the basic components of a fire alarm system
- identify the different types of detectors and explain how they detect fire
- discuss the appropriate application of fire protection systems
- SLO 2: Evaluate the common types of building construction and conditions associated with structural collapse and firefighter safety.
- explain the benefits of fire protection systems in various types of structures
- compare smoke and fire movements in various types of construction and the relationship to systems and equipment.
- SLO 3: Describe the basic elements of a public water supply system as it relates to fire protection, the basic elements including sources, distribution networks, piping and hydrants
- synthesize and determine the appropriate use and flow requirement of hydraulic fire apparatus.
- calculate water supply requirements, distribution system and testing for public and private fire protection and explain why water is a commonly used extinguishing agent.
- identify the different types of non-water based fire suppression systems
- analyze the application of hydraulic theory for fire protection.
- identify the different types and components of a sprinkler, standpipe, and foam systems
- examine the components and operation of automatic and special sprinkler systems.
- examine the types of standpipe systems and water supply requirements.
- review residential and commercial sprinkler legislation
- SLO 4: Describe the appropriate uses and maintenance for apparatus and equipment used in the fire service
- explain the operation and appropriate application for the different types of portable fire protection systems
- examine types, classifications, and effectiveness ratings of fire extinguishers.
- classify distribution, installation and test requirements for fire extinguishers
- examine the types, components and operation of fire protection systems and equipment for special hazards.
- compare detection, alarm and supervisory devices and systems.
- compare heat and smoke control devices and hardware and describe the hazards of smoke
- list the four factors that can influence smoke movement in a building.
This course is the study of the components of building construction that relate to firefighter and life safety. The elements of construction and design of structures are shown to be key factors when inspecting buildings, pre-planning fire operations and operating at fires and other emergencies. The development and evolution of building and fire codes will be studied in relationship to past fires in residential, commercial land industrial occupancies. This course meets the National Fire Academy, Fire and Emergency Services Higher Education (FESHE) curriculum model for Building Construction for Fire Protection.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO 1: Analyze, appraise, and evaluate fire incidents and components of emergency management and firefighter safety.
  - analyze safety concerns presented by the following loads: designed, wind, snow, concentrated, distributed, dead, alive, fire, static, impact, suspended, axial, eccentric and torsional.
  - apply consequences of fire exposure on compressive or tensile members composed of common building materials.

- SLO 2: Identify various classifications of building construction and understand theoretical concepts of how fire impacts major types of building construction
  - evaluate the common types of building construction and conditions associated with structural collapse and firefighter safety.
  - evaluate fire stability for the following structural members: column, wall, arch, beam, truss.
  - define the key factors in fire performance of three common floors and four ceilings commonly found in wood and ordinary construction.
  - identify the key features of a wood frame building and their implications for fire stability.
  - identify the function of each principal structural component in typical building design
  - explain the different loads and stresses that are placed on a building and their interrelationships
  - describe building construction as it relates to firefighter safety, building codes, fire prevention, code inspection, firefighting strategy and tactics
  - classify major types of building construction in accordance with a local/model building code
  - define ordinary construction and factors in fire stability and fire spread.
  - analyze the hazards and tactical considerations associated with the various types of building construction along with indicators of collapse in ordinary construction.
  - apply the probable fire reaction of alterations, additions, vernacular construction, or faulty construction. detection systems, and spatial characteristics.
  - identify key factors that may be expected to lessen or increase the resistance of steel to stress and fire.
  - differentiate between fire resistance, flame spread, and describe the testing procedures used to establish ratings for each
  - identify key factors that increase or lessen concrete's resistance to stress and fire.
  - evaluate the implications for fire growth in modern building design by applying basic principles of fire growth analysis.
  - identify fire concerns related to interior finish.
  - evaluate the probable impact of the following factors on smoke spread within buildings, buoyancy, expansion, stack effect, wind, HVAC, smoke control systems, fire protection systems, detection systems, and spatial characteristics.
  - analyze features that may adversely affect effectiveness of safety of emergency operations in buildings under construction.
  - classify occupancy designations of the building code
  - identify the indicators of potential structural failure as they relate to firefighter safety
  - identify the role of GIS as it relates to building construction.
FT 304 Fire Behavior and Combustion

This course provides the student with theories and fundamentals of how and why fires start, spread and are controlled; an in-depth study of fire chemistry and physics, fire characteristics of materials, extinguishing agents and fire control techniques. This course meets the National Fire Academy, Fire and Emergency Services Higher Education (FESHE) curriculum model for Fire Behavior and Combustion.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- **SLO 1:** Analyze, appraise, and evaluate fire incidents and components of emergency management and fire fighter safety.
- identify the fundamental theories of fire behavior and combustion
- explain the basic laws differentiating matter and energy.
- identify physical properties of the three states of matter
- **SLO 2:** Comprehend laws, regulations, codes, standards and the regulatory and advisory organizations that influence fire department operations.
- describe the Department of Transportation warning placards and labeling systems.
- define the Department of Transportation Hazard Class System
- **SLO 3:** Analyze and determine the causes of fire, extinguishing agents, stages of fire, fire development, and methods of heat transfer.
- define basic terminology, definitions and terms associated with basic fire chemistry and the dynamics of fire
- categorize the components of fire
- examine some of the basic chemical symbols used in chemical formula writing.
- explain the importance of the various physical properties of the three physical states of matter as it relates to the process of burning
- examine how physical forces caused by fire can affect the changes in the physical states of matter.
- discuss various materials and their relationship to fires as fuel
- **SLO 4:** Describe the appropriate uses and maintenance for apparatus and equipment used in the fire service.
- demonstrate knowledge of the characteristics of water as a fire suppression agent
- differentiate the various types of extinguishing agents and identify various methods and techniques to the theory of fire extinguishment.
- articulate other suppression agents and strategies

FT 305 Firefighter Safety and Survival

The course introduces the principles and history related to the national firefighter life safety initiatives, focusing on the need for cultural and behavioral changes throughout the emergency services profession. Emphasis is placed on occupational health and safety of firefighters as well as their personal and organizational accountability. Topics include safety, risk management, medical and fitness standards, industry standards relating to vehicle operation and road scene safety as well as firefighter fatality case studies and analysis. The course emphasizes best safety practices before, during, and after the emergency incident. This course meets the National Fire Academy, Fire and Emergency Services Higher Education (FESHE) curriculum model for Principles of Fire and Emergency Services Safety and Survival.
Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO #1: Define and describe the need for cultural and behavioral change within the emergency services relating to safety, incorporating leadership, supervision, accountability and personal responsibility.
- explain the need for enhancements of personal and organizational accountability for health and safety.
- define how the concepts of risk management affect strategic and tactical decision-making.
- SLO #2: Describe and evaluate circumstances that might constitute an unsafe act.
- explain the concept of empowering all emergency services personnel to stop unsafe acts.
- SLO #3: Validate the need for national training standards as they correlate to professional development inclusive of qualifications, certifications, and re-certifications.
- defend the need for annual medical evaluations and the establishment of physical fitness criteria for emergency services personnel throughout their careers.
- explain the vital role of local departments in national research and data collection systems.
- illustrate how technological advancements can produce higher levels of emergency services safety and survival.
- explain the importance of investigating all near-misses, injuries and fatalities.
- SLO #4: Discuss how incorporating the lessons learned from investigations can support cultural change throughout the emergency services.
- describe how obtaining grants can support safety and survival initiatives.
- formulate an awareness of how adopting standardized policies for responding to emergency scenes can minimize near-misses, injuries and deaths.
- SLO #5: Explain how the increase in violent incidents impacts safety for emergency services personnel when responding to emergency scenes.
- recognize the need for counseling and psychological support for emergency services personnel, their families, as well as, identify access to local resources and services.
- describe the importance of public education as a critical component of life safety programs.
- discuss the importance of fire sprinklers and code enforcement.
- explain the importance of safety in the design of apparatus and equipment.

FT 320 Hazardous Materials

This course provides a study of the fire fighting practices related to hazardous chemicals, including their physical properties, uses in industry, and characteristics when involved in spills, fires, and accidents. Basic information regarding health effects and treatment, and fire department protocols and responsibilities.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO 1: Analyze, appraise, and evaluate fire incidents and components of emergency management and fire fighter safety.
- evaluate the various Dept. of Transportation Hazard classes.
- evaluate the United Nations Placarding and Labeling System.
- examine the basic physical properties and burning characteristics of the various classes of hazardous materials.
- SLO 2: Comprehend laws, regulations, codes, standards, and the regulatory and advisory organizations that influence fire department operations.
compare the safety considerations encumbered by the fire department to ensure compliance with State and Federal guidelines.

describe the legislature and legal authority controlling the actions of all activities conducted on scene by all agencies involved.

SLO 3: Analyze and determine the causes of fire, extinguishing agents, stages of fire, fire development, and methods of heat transfer.

explain the need for scene isolation, scene stabilization, and incident control.

compare various acceptable methods of incident control measures depending upon the dangers of the chemicals.

describe the importance of evacuation, noncommitment by the fire department, and total withdrawal procedures.

analyze the effects of such modifying conditions as wind, temperature, and other weather and terrain-related factors in dealing with a hazardous material spill.

explain the health dangers of chemical classes, and describe their resultant symptoms during physical human contact.

SLO 4: Evaluate fire detection and fire suppression systems.

analyze hazardous materials emergency case studies and develop management procedures and plans.

FT 495 Independent Studies in Fire Technology

Units: 1 - 3
Hours: 54 - 162 hours LAB
Prerequisite: None.
Transferable: CSU
Catalog Date: June 1, 2020

An independent studies project involves an individual student or small group of students in study, research, or activities beyond the scope of regularly offered courses. See the current catalog section of “Special Studies” for full details of Independent Studies.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO #1: Actively engage in intellectual inquiry beyond that required in order to pass a course of study (College Wide Learning Outcome – Area 4).

- Discuss and outline a proposal of study (that can be accomplished within one semester term) with a supervising instructor qualified within the discipline.

- Design an independent study (to be completed individually or by collaboration of a small group) to foster special knowledge, skills, and experience that are not available in any one regularly scheduled course.

- Use information resources to gather discipline-specific information.

- SLO #2: Utilize modes of analysis and critical thinking to apply theoretical perspectives and/or concepts in the major discipline of study to significant problems and/or educational activities (College Wide Learning Outcome – Area 3).

- Analyze and apply the knowledge, skills and experience that are involved in the independent study to theoretical perspectives and/or concepts in the major discipline of study.

- Explain the importance of the major discipline of study in the broader picture of society.

- SLO #3: Communicate a complex understanding of content matter of the major discipline of study (College Wide Outcome – Area 3).

- Demonstrate competence in the skills essential to mastery of the major discipline of study that are necessary to accomplish the independent study.

- SLO #4: Identify personal goals and pursue these goals effectively (College Wide Outcome – Area 4).

- Utilize skills from the “academic tool kit” including time management, study skills, etc., to accomplish the independent study within one semester term.

FT 498 Work Experience in Fire Technology
This course provides students with opportunities to develop marketable skills in preparation for employment in their major field of study or advancement within their career. It is designed for students interested in work experience and/or internships in transfer level degree occupational programs. Course content includes understanding the application of education to the workforce; completion of required forms which document the student’s progress and hours spent at the work site; and developing workplace skills and competencies. Appropriate level learning objectives are established by the student and the employer. During the semester, the student is required to participate in a weekly orientation and 75 hours of related paid work experience, or 60 hours of unpaid work experience for one unit. An additional 75 or 60 hours of related work experience is required for each additional unit. Work Experience may be taken for a total of 16 units when there are new or expanded learning objectives. Only one Work Experience course may be taken per semester.

### Student Learning Outcomes

Upon completion of this course, the student will be able to:

- **DEMONSTRATE AN UNDERSTANDING AND APPLICATION OF PROFESSIONAL WORKPLACE BEHAVIOR IN A FIELD OF STUDY RELATED ONE’S CAREER. (SLO 1)**
  - Understand the effects time, stress, and organizational management have on performance.
  - Demonstrate an understanding of consistently practicing ethics and confidentiality in a workplace.
  - Examine the career/life planning process and relate its relevancy to the student.
  - Demonstrate an understanding of basic communication tools and their appropriate use.
  - Demonstrate an understanding of workplace etiquette.

- **DESCRIBE THE CAREER/LIFE PLANNING PROCESS AND RELATE ITS RELEVANCY TO ONE’S CAREER. (SLO 2)**
  - Link personal goals to long term achievement.
  - Display an understanding of creating a professional first impression.
  - Understand how networking is a powerful job search tool.
  - Understand necessary elements of a résumé.
  - Understand the importance of interview preparation.
  - Identify how continual learning increases career success.

- **DEMONSTRATE APPLICATION OF INDUSTRY KNOWLEDGE AND THEORETICAL CONCEPTS AS WRITTEN IN LEARNING OBJECTIVES IN PARTNERSHIP WITH THE EMPLOYER WORK SITE SUPERVISOR. (SLO 3)**

Geography | Cosumnes River College

Geography is the science of place and space. Geographers study the relationships among geographic places, natural systems, society, cultural activities, and the interdependence of all these over space.

Dean

(916) 691-7537
CoxR@crc.losrios.edu

Associate Degrees for Transfer

A.A.-T. in Geography

Geography is the science of place and space. Geographers study the relationships among geographic places, natural systems, society, cultural activities, and the interdependence of all these over space.

There are two main branches of geography: human geography and physical geography. Human geography is concerned with the spatial aspects of human existence – how people and their activities are distributed in space, how people use and perceive space, and how people create and sustain the places that make up Earth’s surface. Physical geographers study the physical elements and spatial processes that make up and shape the environment, including energy, air, water, weather, climate, landforms, soils, animals, plants, etc. Many human and physical geographers have skills in cartography and Geographic Information Systems (GIS).

Geographers also study the linkages between human activity and natural systems. Geographers were, in fact, among the first scientists to sound the alarm that human-induced changes to the environment were beginning to threaten the balance of life itself. Geographers today are active in the study of global warming, desertification, deforestation, loss of biodiversity, groundwater pollution, flooding, and more.

The Associate in Arts in Geography for Transfer Degree (AA-T) is designed to provide a seamless transfer pathway for students interested in pursuing a Geography degree in the California State University (CSU) system. The required and elective coursework surveys a broad spectrum of physical geography, human geography, geospatial technologies (e.g. GIS, the Global Positioning System, remote sensing), and related disciplines. The degree is comprised of lower division coursework typically required by CSU institutions. Students must complete a total of 60 transferable semester units with a minimum 2.0 GPA, to include either the California State University General Education Breadth pattern or the Intersegmental General Education Transfer Curriculum; students must also earn a grade of C or better in all the courses for the major as described in the Required Program. Upon successful completion of the degree requirements, students will be guaranteed admission to the CSU system with junior status and will not have to repeat lower division coursework. Students are encouraged to meet with a counselor to develop their educational plans as degree options and general education requirements vary for each university.

Total Units: 19

1Students may also substitute courses from Elective List A not already counted toward the degree.

The Associate in Arts in Geography for Transfer (AA-T) degree may be obtained by completion of 60 transferable, semester units with a minimum 2.0 GPA, including (a) the major or area of emphasis described in the Required Program, and (b) either the Intersegmental General Education Transfer Curriculum (IGETC) or the California State University General Education-Breadth Requirements.

**Student Learning Outcomes**

Upon completion of this program, the student will be able to:

- **demonstrate understanding of the global natural and cultural environments and the geographic methods by which they are studied. (PSLO1)**
- **compare and contrast the general biophysical and socio-cultural differences and similarities among world regions that operate through time and over space. (PSLO2)**
- **evaluate and analyze critical geographic issues facing the world today. (PSLO3)**
- **recognize the diversity of peoples, places, and events globally as well as within specific geographic regions. (PSLO4)**
- **interpret maps and mapped data utilizing basic map elements, including scales, common coordinate systems, and map symbols. (PSLO5)**
- **use a computer effectively to research, map and analyze geographic information. (PSLO6)**
- **compare and contrast common geographic technologies such as geographic information systems (GIS) and the global positioning system (GPS). (PSLO7)**
- **communicate geographic information effectively in oral, written, and graphic form. (PSLO8)**

**Career Information**
The AA-T in Geography provides students with the foundational knowledge necessary for transfer to a 4-year Bachelor of Arts (BA) degree program. Career opportunities for geographers are as varied as the scope of geography itself. Geographers are found throughout the public and private sector, though rarely in positions with the title of “Geographer.” When combined with appropriate internships and/or other work experience, a baccalaureate degree in geography is excellent preparation for careers in Natural Resource Management; Environmental Conservation; International Development; Urban and Regional Planning; Education (K-12 through University); Tourism; International Business; Cartography; Climatology; Transportation Planning; Real Estate; International Business; Marketing; Land Surveying; Demography; and many other fields (please contact the program for additional information). Some careers may require additional training.

NOTE TO TRANSFER STUDENTS: The Associate Degree for Transfer program is designed for students who plan to transfer to a campus of the California State University (CSU). Other than the required core, the courses you choose to complete this degree will depend to some extent on the selected CSU for transfer. In addition, some CSU-GE Breadth or IGETC requirements can also be completed using courses required for this associate degree for transfer major (known as “double-counting”). Meeting with a counselor to determine the most appropriate course choices will facilitate efficient completion of your transfer requirements. For students wishing to transfer to other universities (UC System, private, or out-of-state), the Associate Degree for Transfer may not provide adequate preparation for upper-division transfer admissions; it is critical that you meet with a CRC counselor to select and plan the courses for the major, as programs vary widely in terms of the required preparation. Students planning to transfer to a CSU are strongly advised to take GEOG 331 (Exploring Maps and Geographic Technologies) because it is a required lower-division course at many campuses, including CSU Sacramento.

Associate Degrees

A.S. in Environmental Studies & Sustainability

The Environmental Studies & Sustainability Associate of Science degree is an interdisciplinary and multidisciplinary program of study that presents a broad overview of ecological issues from a variety of perspectives in the natural, physical, and social sciences. The coursework examines the interplay between natural and social systems, and the ideological foundations of humankind's attitudes and behaviors with respect to their ever-changing environment. This program is designed to prepare students to research, analyze, and propose solutions to the myriad environmental challenges facing the world today.

This degree is designed to correlate with the lower division courses required to transfer into an Environmental Studies program at many four-year institutions as well as provide broad-based environmental education for transfer in related disciplines.

The disciplines of environmental studies and geography are complementary fields, both focused on aspects of human-environment interaction. This complementarity is reflected in the many 4-year institutions that house combined Geography and Environmental Study programs. Students interested in double-majoring in these two closely-related disciplines, and/or simultaneously earning a Certificate in Geographic Information Systems, are encouraged to examine the required coursework and plan their program of study accordingly.

Students should use PROJECT ASSIST (http://www.assist.org) to research lower division major requirements at the transfer institution of their choice and should also work with the program adviser and a counselor to determine the appropriate transfer coursework.

Students interested in pursuing an Environmental Science major should consult with science faculty and counselors to tailor the specific coursework necessary to transfer to the 4-year institution of their choice.

- A minimum of 3 units from the following: 3
  - ECON 310 Statistics for Business and Economics (3)
  - PSYC 330 Introductory Statistics for the Behavioral Sciences (3)
  - STAT 300 Introduction to Probability and Statistics (4)
  - MATH 350 Calculus for the Life and Social Sciences I (3)
  - MATH 400 Calculus I (5)

**Social Science Courses:**
- ECON 304 Principles of Microeconomics 3
- GEOG 310 Human Geography: Exploring Earth's Cultural Landscapes 3

**Total Units:** 31

The Environmental Studies & Sustainability Associate in Science (A.S.) degree may be obtained by completion of the required program, plus general education requirements, plus sufficient electives to meet a 60-unit total. See CRC graduation requirements.

**Student Learning Outcomes**

Upon completion of this program, the student will be able to:
PSLO-1: Articulate an understanding of the natural environment and human societies’ relationship to it. This includes the ability to:

1. Communicate effectively about environmental issues and sustainability, correctly utilizing vocabulary while indicating a complex understanding of disciplines in the program.
2. Articulate an awareness of the relevance of environmental studies to the student’s life and wider community at both local and global scales.
3. Recognize the importance of interdisciplinary and multidisciplinary approaches to solving environmental problems.

PSLO-2: Evaluate and analyze environmental processes and human impacts on the natural environment. This includes the ability to:

1. Use logical and quantitative reasoning to solve environmental problems.
2. Analyze critical environmental problems facing the world today.
3. Evaluate data and draw reasonable conclusions.
4. Utilize the scientific method.
5. Employ information-gathering tools to investigate environmental ideas.

PSLO-3: Recognize the ethical dimensions of decisions and actions and engage in the ethical reasoning necessary to be a responsible local and global citizen. This includes the ability to:

1. Recognize the ethical implications of research and the responsibility to use knowledge wisely.
2. Articulate the value of understanding environmental systems.

PSLO-4: Transfer to a 4-year program and further prepare for employment in an environmental career.

Career Information

Natural Resource Management; Forestry; Range Management; Park Ranger; Wildlife Biology; Agriculture; Soil and Water Conservation; Land Use Planning; Waste Management; Environmental Education; Environmental Policy And Planning; Environmental Law; Environmental Consulting; Environmental Lobbying; Environmental Planning; Environmental Protection; Environmental Compliance; Environmental Engineering; Air Quality Control; Landscape Architecture; Urban and Regional Planning; Alternative Energy Development; Risk Analysis; Contaminated Lands Reclamation; Research; Consulting

A.S. in General Science

Areas of Study include:
• Physical Anthropology
• Astronomy
• Biology
• Chemistry
• Engineering
• Physical Geography
• Geology
• Physics

Eighteen (18) units of transfer level course work in science is required. Two laboratory courses must be included: one in the physical sciences and one in the biological sciences. Courses may be selected from astronomy, biology, chemistry, geology, physical geography, physical anthropology, and physics. The student, in consultation with a counselor, should choose science courses to meet his or her program, transfer, or general education requirements.

Students interested in transferring to a four-year university with a science major are encouraged to complete a science AS or AS-T degree such as Anthropology, Biology, Chemistry, Engineering, Geography, Geology, or Physics. This General Science degree may not include the majors-level transfer courses needed for many science majors. Students are strongly recommended to see a counselor for guidance.

¹Courses used in A or B above will not count towards C, except units exceeding the 4 or 3 unit minimum in A and B. For example, a student completing the 5 unit CHEM 309 under B could apply 2 of those units towards C. A total of 18 science units is required.

The General Science Associate in Science (A.S.) degree may be obtained by completion of the required program, plus general education requirements, plus sufficient electives to meet a 60-unit total. See CRC graduation requirements.

**Student Learning Outcomes**

Upon completion of this program, the student will be able to:

- explain the core perspectives of the scientific method and apply it to at least one scientific discipline. (SLO 1)
- solve introductory problems of a conceptual and/or numerical nature of at least one scientific discipline. (SLO 2)
- accurately apply the basic vocabulary and concepts of at least one scientific discipline verbally and in writing. (SLO 3)
- recognize the use and misuse of scientific concepts in society including politics and the media. (SLO 4)

**A.S. in Geography**

Geography is the science of place and space. Geographers study the relationships among geographic places, natural systems, society, cultural activities, and the interdependence of all these over space.

There are two main branches of geography: human geography and physical geography. Human geography is concerned with the spatial aspects of human existence—how people and their activities are distributed in space, how people use and perceive space, and how people create and sustain the places that make up Earth's surface. Physical geographers study the physical elements and spatial processes that make up and shape the environment, including energy, air, water, weather, climate, landforms, soils, animals, plants, etc. Many human and physical geographers have skills in cartography and Geographic Information Systems (GIS).
Geographers also study the linkages between human activity and natural systems. Geographers were, in fact, among the first scientists to sound the alarm that human-induced changes to the environment were beginning to threaten the balance of life itself. Geographers today are active in the study of global warming, desertification, deforestation, loss of biodiversity, groundwater pollution, flooding, and more.

The CRC Geography program offers courses that satisfy lower division General Education requirements in both the physical and social sciences. In addition, the program offers an Associate Degree in Geography that provides students with a solid foundation in geography as well as the standard prerequisites for upper-division coursework leading to the baccalaureate degree. Students may also earn a certificate in Geographic Information Systems (GIS). Students planning to transfer to a four-year school with a major in Geography should consult the lower division requirements at the university they plan to attend.

Note to Transfer Students:
If you are interested in transferring to a four-year college or university to pursue a bachelor's degree in this major, it is critical that you meet with a CRC counselor to select and plan the courses for your major. Schools vary widely in terms of the required preparation. The courses that CRC requires for an Associate's degree in this major may be different from the requirements needed for the Bachelor's degree.

Highlights include:
* Comprehensive course offerings including a Physical Laboratory as well as specialized training in Geographic Information Systems (GIS)
* Program's students have won top awards at state-level competitions annually since 1999
* Field study courses to Yosemite, Pt. Reyes, Monterey/Big Sur, Tahoe, and the Eastern Sierra
* Internships available with State of California, County of Sacramento, and Federal Land Management Agencies
* Three courses fulfill the CRC and CSU multicultural requirement
* Day, evening, and online sections

Catalog Date: June 1, 2020

1A minimum of 60 units is required for the A.S. degree which includes core courses, electives, and general education (GE) graduation requirements. Geography majors are encouraged to complete additional GE requirements from a list of suggested courses on file in the Geography Department and at the Counseling Center. Students should use PROJECT ASSIST (http://www.assist.org) to research lower division major requirements at the transfer institution of their choice and also work with a counselor to determine the most appropriate transfer coursework.

The Geography Associate in Science (A.S.) degree may be obtained by completion of the required program, plus general education requirements, plus sufficient electives to meet a 60-unit total. See CRC graduation requirements.

Student Learning Outcomes

Upon completion of this program, the student will be able to:

- **SLO#1:** demonstrate understanding of the global natural and cultural environments and the geographic methods by which they are studied.
- **SLO#2:** compare and contrast the general biophysical and socio-cultural differences and similarities among world regions that operate through time and over space.
- **SLO#3:** evaluate and analyze critical geographic issues facing the world today.
- **SLO#4:** recognize the diversity of peoples, places, and events globally as well as within specific geographic regions.
Career Information
Natural Resource Management; Environmental Conservation; International Development; Urban and Regional Planning; Education (K-12 through University); Tourism; Cartographer; Climatologist; Park Ranger; Transportation Specialist; Real Estate Analyst; International Business; Marketing Analyst; Land Surveyor; Research Scientist; Remote Sensing Specialist; Demographer; GIS Analyst; and many more (please contact the program for additional information). Some career options may require more than two years of college study.

Certificates of Achievement

Field Data Mapping and Geographic Information Systems (GIS) Certificate

Students interested in research related to field data collection and analysis will need certain skills to correctly find locations in the field, identify locations, map sites, and integrate collected data into a Geographic Information System (GIS) for display and analysis. This interdisciplinary certificate program provides students with the tools needed to collect, map, display, and analyze data collected in a field-based setting and coordinate this with other mapping data and sources.

Student Learning Outcomes

Upon completion of this program, the student will be able to:

- SLO #1: DEMONSTRATE AN UNDERSTANDING OF THE MAJOR MODES OF GEOGRAPHIC INQUIRY.
- SLO #2: DEMONSTRATE AN UNDERSTANDING OF MAPPING CONCEPTS, GIS, AND THE ABILITY TO INTERPRET MAPS AND MAPPED DATA.
SLO #3: DEMONSTRATE AN UNDERSTANDING OF COMMON GEOGRAPHIC TECHNOLOGIES AND THE ABILITY TO USE THEM TO COLLECT, ANALYZE, AND DISPLAY GEOSPATIAL DATA.

SLO #4: ORGANIZE, MANIPULATE, ANALYZE AND DISPLAY TABULAR DATA INTO SPATIAL VISUALIZATIONS.

SLO #5: EXHIBIT SKILLS LEARNED THROUGH MAPPING AND GIS PROJECT DEVELOPMENT.

Sustainability Certificate

This certificate advances student's understanding of the principles of sustainability and sustainable practices with respect to ecosystems, green buildings, business, agriculture, nutrition, natural resource management and conservation, waste management, energy, transportation systems, urban planning and design, and more. Theoretical and practical aspects of sustainability are explored including social, economic, and environmental dimensions.

Total Units: 12

Student Learning Outcomes

Upon completion of this program, the student will be able to:

- PSLO#1: Communicate effectively about environmental issues and sustainability, utilizing correct vocabulary.
- PSLO#2: Articulate an awareness of the relevance of sustainability to the student's life and wider community at both local and global scales.
- PSLO#3: Evaluate and analyze environmental problems facing the world today and propose sustainable solutions.
- PSLO#4: Employ information-gathering tools to investigate theoretical and practical aspects of sustainability in the context of energy consumption, transportation systems, food production, water resources, industry, the built environment, and socio-cultural institutions and practices.

Career Information
This course investigates the interrelationships between Earth and humans, with an emphasis on natural systems (solar energy balance, weather and climate, water resources, landforms, natural hazards, vegetation, and soil). Relevant application of these elements to today's world is stressed to help students better understand Earth's physical environment as well as human-environment interaction. A field trip may be required to relate class discussions to the real world.

**Student Learning Outcomes**

Upon completion of this course, the student will be able to:

- **SLO 1: DEMONSTRATE AN UNDERSTANDING OF THE MAJOR MODES OF GEOGRAPHIC INQUIRY AND TOOLS USED FOR GEOGRAPHIC ANALYSIS.**
  - Describe how the scientific method and spatial analysis are used to research topics in physical geography.
  - Demonstrate how to locate places on Earth using the geographic grid (latitude and longitude).
  - Discuss several methods used to collect geographic data as well as several tools used to visualize and analyze this data.
  - Demonstrate the ability to interpret maps and mapped data.

- **SLO 2: DEMONSTRATE AN UNDERSTANDING OF HOW EARTH'S FOUR MAJOR OPEN SYSTEMS WORK AND INTERACT WITH ONE ANOTHER.**
  - Explain latitudinal variation in energy receipt and how this relates to global patterns of temperature, precipitation, weather & climate, vegetation, wildlife habitat, etc.
  - Diagram important physical processes (e.g., anticyclonic and cyclonic circulation, the global atmospheric circulation model, local & regional winds, the hydrologic cycle, the rock cycle, types of plate boundaries, etc.).
  - Outline how processes in the atmosphere, hydrosphere, and lithosphere interact to create Earth's biosphere.

- **SLO 3: RECOGNIZE AND EXPLAIN THE LOCATION OF MAJOR PHYSICAL FEATURES ON EARTH.**
  - Locate and identify the major significant physical features in California and elsewhere in the world.
  - Apply knowledge of the hydrologic cycle, the rock cycle, Plate Tectonics, and other geomorphic processes to explain the location and formation of Earth's major landforms and natural hazards.

- **SLO 4: PRODUCE A RESEARCH PROJECT (E.G., ACADEMIC POSTER, TERM PAPER, OR SIMILAR PRODUCT) ON A COURSE-RELATED THEME.**
  - Research information from multiple sources (maps, books, periodicals, Internet, interviews, etc.).
  - Synthesize findings in written format and document sources using an approved in-text citation method with references listed in standard bibliographic format.

- **SLO 5: RECOGNIZE THE IMPORTANCE OF, AND THINK CRITICALLY ABOUT, GEOGRAPHIC INFORMATION RELEVANT TO LIFE ON EARTH.**
  - Analyze the role of humans in modifying Earth's physical environment as well as the environment's role in shaping human activities.
  - Evaluate the personal and societal implications of current geographic issues (e.g. climate change, ozone depletion, sea-level rise, pollution, natural hazards, etc.).
This course provides "hands-on" study of the basic principles and concepts involved in understanding Earth's environment systems. Labs feature observation, collection, analysis and display of data related to the study of Earth's energy balance, weather and climate, vegetation, tectonic processes, landforms, and natural hazards. Additionally, labs involve geographic methods and technology, including interpretation of maps and other geographic imagery, weather instrumentation, navigation equipment such as a compass and the Global Positioning System (GPS), and other relevant computer and Internet applications. A field trip may be required.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- **SLO#1:** Collect, measure, and/or analyze geographic data using common instruments.
  - Measure angular distance north/south of the Equator and east/west of the Prime Meridian in order to specify precise geographic coordinates on a map and/or globe.
  - Collect and analyze data using common meteorological instruments (e.g. thermometer, anemometer, barometer, sling psychrometer, etc.), geomorphic instruments (e.g. stereoscopic imagery), and navigational instruments (e.g. compass, Global Positioning System (GPS) unit).
  - Calculate unit conversions for various types of data (e.g. angular and linear distance, temperature, air pressure, etc.).

- **SLO #2:** Interpret and analyze geographic information using maps (thematic, regional, and topographic).
  - Define the concepts of map scale and projection and explain how these concepts affect the way that geographic information is represented on maps and/or globes.
  - Analyze global, regional, and/or local temperature, atmospheric pressure maps, and synoptic-scale weather maps and explain reasons for observed patterns.
  - Interpret elevation data shown on a topographic map and use this information to construct a topographic profile for an area.

- **SLO#3:** Analyze and describe geomorphic processes and landforms using topographic maps.
  - Explain geographic processes which act upon and shape Earth's physical environment.
  - Explain how and why the amount of solar insolation received on Earth varies by latitude and relate how this affects life processes.
  - Apply concepts related to atmospheric and geomorphic processes to predict impacts on Earth's physical and human environments.
  - Identify types of landforms created by endogenic processes (e.g. volcanic and tectonic activity) and exogenic processes (e.g. weathering, erosion, and deposition).

- **SLO#4:** Compare and contrast local geographic data with other locations at regional, national and global scales.
  - Construct climographs for Sacramento, various other locations in CA, the U.S. and the world and identify factors responsible for observed climatic differences.
  - Analyze meteorologic and geomorphic patterns in Sacramento, CA, the U.S., and the world and explain why these phenomena are observed where they are found.

**GEOG 302 Environmental Studies & Sustainability**

- **Units:** 3
- **Hours:** 54 hours LEC
- **Prerequisite:** None.
- **Transferable:** CSU; UC
- **General Education:** AA/AS Area V(b); CSU Area D5; CSU Area D7; IGETC Area 4E; IGETC Area 4G
- **Catalog Date:** June 1, 2020

This introductory course offers an interdisciplinary perspective on the major environmental problems confronting society and explores solutions directed toward producing a more sustainable future. Course topics include an introduction to environmental issues, and related values, ethics and politics; a primer on Earth system science — the interconnected nature of the atmosphere, hydrosphere, lithosphere, and biosphere; a global survey of natural resources and exploitation; changing global climates; the world water crisis; the demography of human population, and contrasts between less- and more-developed countries; agricultural and food supply challenges; renewable and nonrenewable energy resources; and land use patterns and related issues. Throughout the course, human impacts on the environment, environmental impacts on human societies, and the sustainability of economies and practices at local, regional, and global scales are investigated. A field trip may be required to relate class discussions to the real world.

Student Learning Outcomes

Upon completion of this course, the student will be able to:
GEOG 305 Global Climate Change

Units: 3
Hours: 54 hours LEC
Prerequisite: None.
Transferable: CSU; UC
General Education: AA/AS Area IV; CSU Area B1; IGETC Area 5A
Catalog Date: June 1, 2020

This interdisciplinary course explores the natural and human factors causing the Earth’s climate to change. Students will be provided with the scientific tools to analyze evidence that climate change is a looming threat. Through lectures, readings, discussions and projects, students will examine the Earth’s present and past climates as well as the influence of climate on the geographical distribution of plants, animals and human societies.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- **SLO 1: DEMONSTRATE AN UNDERSTANDING OF THE PHYSICAL FACTORS AFFECTING CLIMATE AND THE RESULTING GEOGRAPHIC VARIATION OF ENERGY RECEIPT, TEMPERATURE, PRECIPITATION, AND BIOMES.**
  - Explain the factors responsible for the latitudinal variation in energy receipt and its effects on global temperature and precipitation patterns.
  - Diagram the global energy balance, accounting for major sources of input and outputs, heat exchange and absorption.
  - Describe the various layers of the atmosphere and explain their role in producing the Greenhouse Effect and anthropogenic global warming.
  - Apply knowledge of meteorology as well as global oceanic circulation to hypothesize how terrestrial and marine biotic communities may be impacted by climate change.

- **SLO 2: DEMONSTRATE AN UNDERSTANDING OF HOW CLIMATE INFLUENCES THE DISTRIBUTION OF LIVING ORGANISMS.**
  - Explain the factors that determine the geographic distribution of the principal biomes.
  - Discuss the importance of physiological tolerance and species interactions in the structure, diversity, and stability of communities.
  - Use data from paleoclimatology to demonstrate how the geographic ranges of organisms may be affected by climate shifts.
  - Apply knowledge of the carbon cycle to explain the physical and biology factors that influence carbon dioxide levels in the atmosphere.
  - Outline how increasing atmospheric carbon dioxide levels may affect the acidity of oceans and the structure of marine communities.

- **SLO 3: APPLY SCIENTIFIC REASONING TO ASSESS THE EVIDENCE FOR HUMAN-INDUCED CLIMATE CHANGE.**
  - Describe how scientists collect data to determine the history of the earth’s climate and biogeography.
  - Outline how the study of paleoclimatology helps scientists predict future changes.
  - Present data that support and data that contradict the argument that current climate change is primarily due to human activities in contrast to natural forces.

- **SLO 4: ANALYZE THE COMPLEXITIES AND DIFFICULTIES IN CONSTRUCTING CLIMATE CHANGE MODELS.**
  - Diagram feedback loops involving atmospheric carbon dioxide and other greenhouse gases, albedo, photosynthesis, temperature, cloud cover, pollution, and other related variables.
  - Discuss the reasons why it is difficult to predict future climate change.
<b>SLO 5: UNDERSTAND HOW CLIMATE CHANGE MAY AFFECT THEIR LIVES AND THE FUTURE OF LIFE ON EARTH.</b>  
1. Describe the major principles of recent climate policies and discuss their limitations.  
2. Identify how global warming may affect weather extremes, incidence of wildfires, availability of water, agriculture, human disease patterns, settlement patterns, economic, political stability, and other aspects of human society.  
3. Outline effective short term and long term strategies for mitigating the effects of climate change.

This course is an introduction to atmospheric processes including energy and moisture exchanges, atmospheric pressure, winds, and global circulation. Severe weather conditions such as hurricanes and tornadoes are also studied. World, regional, and local climates are investigated. Student work will include weather observations and analysis of atmospheric data using charts, weather maps and radar and satellite imagery from the Internet and other sources.

**Student Learning Outcomes**

Upon completion of this course, the student will be able to:

- Demonstrate the ability to graph and/or map atmospheric data and explain its significance.  
- Draw a simplified diagram explaining Earth's energy balance and explain the energy flows portrayed.  
- Explain atmospheric energy exchange associated with the phase changes of water (latent heat exchange).  
- Explain the processes of energy exchange within the Earth-Atmosphere system.  
- Describe moisture sources and the steps necessary for condensation.  
- Diagram and explain atmospheric lifting mechanisms (frontal, orographic, convergent, and convectional).  
- Identify the global and regional geographic regions where precipitation is more/less likely to occur and explain why.  
- Describe moisture sources and the steps necessary for condensation.  
- Diagram and explain atmospheric lifting mechanisms (frontal, orographic, convergent, and convectional).  
- Identify the global and regional geographic regions where precipitation is more/less likely to occur and explain why.  
- Predict where cloud formation is likely to occur using knowledge of atmospheric instability and adiabatic processes.  
- Explain why and where precipitation occurs, including sources of moisture, lifting mechanisms, adiabatic processes, and cloud/precipitation formation.  
- Describe moisture sources and the steps necessary for condensation.  
- Diagram and explain atmospheric lifting mechanisms (frontal, orographic, convergent, and convectional).  
- Identify the global and regional geographic regions where precipitation is more/less likely to occur and explain why.

This course investigates the diverse patterns of human settlement, development, and movement on earth, which evolved as a result of cultural and environmental factors. Emphasis is placed on understanding global population and migration patterns, language, religion, ethnicity, political and economic systems, development issues, agriculture and urbanization.
Upon completion of this course, the student will be able to:

- SLO1: Analyze human's role in transforming Earth's surface into a series of distinctive cultural landscapes. Explain the significance of the major stages of human cultural evolution over time (i.e. agricultural, industrial, medical, and technological revolutions).

- SLO2: Propose explanations for the geographic origin and global diffusion of key aspects of culture (e.g. technology, language, religion, ethnocentrism, racism, agriculture, urbanization). Differentiate between relocation and expansion diffusion as mechanisms for spreading cultural traits. Explain the role of globalization as an accelerator of cultural diffusion.

- SLO3: Describe broad historical and modern global socioeconomic processes such as migration, colonization, and globalization. Explain how these processes relate to spatial patterns today, such as ethnicity, unequal development, poverty, conflict, and environmental degradation.

- SLO4: Recognize and appreciate patterns of cultural diversity in California, the U.S., and the world. Describe patterns of diversity and explain how these enrich local, regional, and global culture.

- SLO5: Demonstrate understanding of key geographic concepts such as diffusion and globalization by analyzing and explaining spatial patterns represented on maps. Interpret maps of various types of socioeconomic data (e.g. demographic, linguistic, religious, ethnic, AIDS incidence, GNP per capita, etc.) and explain their significance.

- SLO6: Communicate geographic information effectively in oral, written, and/or graphic form. Produce a significant research project (e.g. academic poster, term paper, or similar product) on a course-related theme.

GEOG 320 World Regional Geography

Units: 3
Hours: 54 hours LEC
Prerequisite: None.
Transferable: CSU; UC
General Education: AA/AS Area V(b); AA/AS Area VI; CSU Area D5; IGETC Area 4E
C-ID: C-ID GEOG 125
Catalog Date: June 1, 2020

This course is a global survey of the world's major geographic realms: their physical environments, cultures and economies; their origins, interactions and global roles. Geographic concepts and ideas are used to study and compare cultures, landscapes, resources, livelihood and land use across Earth. Explanation for the globalization of culture and economy, the widening gap between rich and poor countries, and ethnic diversity in the United States and abroad is stressed throughout the course. A major goal of this course is to improve each student's 'mental map of the world.'

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO1: Recognize the diversity of peoples, places, and events globally as well as within specific geographic regions. Generalize the special combination of cultural, physical, historical, economical, and organizational qualities that characterize each of the major geographic regions of the world (such as East Asia, North America, Sub-Saharan Africa, etc.).

- SLO2: Evaluate and analyze critical geographic issues facing regions of the world today. Identify major socioeconomic, political, and/or environmental issues currently affecting Earth's major geographic regions.

- SLO3: Use and interpret maps effectively to build geographic understanding of the world. Recognize and identify the world's major geographic regions, as well as all countries located within them, on a blank outline map.

- SLO4: Communicate geographic information effectively in oral, written, and/or graphic form. Produce a significant research project (e.g. academic poster, term paper, or similar product) on a course-related theme.

GEOG 322 Geography of California

Units: 3
Hours: 54 hours LEC
Prerequisite: None.
Transferable: CSU; UC
General Education: AA/AS Area V(b); AA/AS Area VI; CSU Area D5; IGETC Area 4E
C-ID: C-ID GEOG 140
Catalog Date: June 1, 2020
This course investigates California’s physical, cultural, and economic environments, analyzing cardinal changes resulting from both natural and human interaction. The emphasis is on cultural diversity, human alteration of the landscape, and contemporary problems resulting from accelerated competition for natural, financial, and human resources. Some field trips may be required.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- **SLO #1:** demonstrate understanding of California’s physical and human environments, their interconnections, and the geographic processes that form and change them.
- **Objective 1.1:** expound of several examples of the influence of the environment on the human population and the human influence on the environment.
- **Objective 1.2:** describe the change of the environment and human population over time.
- **SLO #2:** analyze and interpret geographic information at local, regional, and/or global scales.
- **Objective 2.1:** identify and explain the influence of cultures and ideas from around the world on the State and regions within California.
- **Objective 2.2:** apply basic principles of the physical environment to interpret California’s environmental phenomena.
- **SLO #3:** analyze and evaluate critical geographic issues, their ethical dimensions, and their influence on decision-making.
- **Objective 3.1:** describe both perspectives on several ethical issues facing California and propose some solutions.
- **SLO #4:** recognize, appreciate, and understand the geographic diversity of people, places, and events specific to California.
- **SLO #5:** communicate geographic information effectively in oral, written, and graphic form.

GEOG 331 Exploring Maps and Geographic Technologies

- **Units:** 3
- **Hours:** 48 hours LEC; 18 hours LAB
- **Prerequisite:** None.
- **Transferable:** CSU; UC
- **General Education:** AA/AS Area IV
- **C-ID:** C-ID GEOG 150
- **Catalog Date:** June 1, 2020

Maps are the most effective way to communicate spatial information. This course introduces students to the quickly changing world of maps (both hardcopy and digital) and geographic techniques and technologies such as map and aerial photograph interpretation, spreadsheet operations, basic statistics, cartography, Global Positioning Systems (GPS), Internet mapping, remote sensing and Geographic Information Systems (GIS) that aid in data collection, analysis and presentation.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- **SLO #1:** DEMONSTRATE AN UNDERSTANDING OF THE MAJOR MODES OF GEOGRAPHIC INQUIRY.
- **SLO #2:** DEMONSTRATE AN UNDERSTANDING OF MAPPING CONCEPTS AND THE ABILITY TO INTERPRET MAPS AND MAPPED DATA.
- **SLO #3:** DEMONSTRATE AN UNDERSTANDING OF COMMON GEOGRAPHIC TECHNOLOGIES AND THE ABILITY TO USE THEM TO COLLECT, ANALYZE, AND DISPLAY GEOSPATIAL DATA.
**Student Learning Outcomes**

Upon completion of this course, the student will be able to:

- **SLO #1**: demonstrate an understanding of GIS technologies, theories and practices.
- **SLO #2**: apply GIS technical skills in a professional setting.
- **SLO #3**: exhibit skills learned via GIS project development.
- **SLO #4**: cultivate spatial analysis and critical thinking skills for decision-making purposes.
- **SLO #5**: understand how GIS skills are applicable in specific career fields.

**Description**

Geographic Information Systems (GIS) are computer-based mapping programs that analyze spatial data. This course provides the foundation for using desktop GIS software. A conceptual overview along with hands-on experience will be used to explore basic GIS software functionality. Emphasis will be placed on display characteristics, attribute querying, database exploration and management, spatial analysis, data creation, and cartographic presentation.

This course is not open to students who have received credit for GEOG 335.1, 335.2, and 335.3.
GEOG 353 Introduction to the Global Positioning System (GPS)

Units: 1
Hours: 16 hours LEC; 6 hours LAB
Prerequisite: None.
Transferable: CSU
Catalog Date: June 1, 2020

This course introduces the Global Positioning System (GPS). Topics include basic concepts of GPS including hands-on operation of the technology, real-world applications, computer interfaces, GIS and other mapping software. A field trip may be required.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- **SLO 1: Demonstrate competent use of GPS technology and function**
  - Evaluate GPS receiver operation for positioning and navigation
  - Design and implement field data collection for mapping
  - **SLO 2: Integrate GPS data into computer mapping applications**
  - Describe GPS in relation to basic geographic information system (GIS) concepts
  - Describe the procedure for downloading and uploading GPS data to and from a computer
  - Create maps of GPS data using computer software

GEOG 390 Field Studies in Geography

Units: 1 - 4
Hours: 6 - 24 hours LEC; 36 - 144 hours LAB
Prerequisite: None.
Transferable: CSU
C-ID: C-ID GEOG 160
Catalog Date: June 1, 2020

This course involves the study of geographic principles and processes in the field. Course content will vary by destination but may include topics in physical geography (e.g., plant and animal communities, climate and weather, geology and geomorphology, natural hazards, environmental impacts, etc.), human geography (e.g., cultural landscapes, economic activities, transportation issues, land use patterns, etc.), and/or introduction to tools and techniques used for geographic field research (e.g., map and compass use, the Global Positioning System (GPS), Geographic Information Systems (GIS), etc.). Field trip(s) are required.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- **SLO 1: APPLY BASIC PRINCIPLES OF GEOGRAPHY TO OBSERVATIONS IN THE FIELD**
  - Develop observational skills in the field.
  - Explain any evidence of human-environmental interactions observed in the field and discuss its implications.
  - Understand the roles of biotic and abiotic elements within specific ecosystems.
- **SLO 2: UTILIZE INVESTIGATIONS, OBSERVATIONS AND READINGS TO DEVELOP A GREATER DEPTH OF UNDERSTANDING OF GEOGRAPHIC PRINCIPLES.**
  - Compare knowledge gained from readings and lectures to field observations.
  - Utilize appropriate information sources to increase knowledge of one aspect of the course topic.
- **SLO 3: COMMUNICATE KNOWLEDGE GAINED IN THIS COURSE EFFECTIVELY IN ORAL, WRITTEN, AND/OR GRAPHIC FORM**
GEOG 391 Field Studies in Geography: Mountain Landscapes

This course involves the study of geographic principles and processes in mountain environments. The course content will vary by destination but may include topics in physical geography (e.g., plant and animal communities, climate and weather, geology and geomorphology, natural hazards, environmental impacts, etc.), human geography (e.g., cultural landscapes, economic activities, transportation issues, land use patterns, etc.), and introduction to tools and techniques used for geographic field research (e.g., map and compass use, the Global Positioning System (GPS), Geographic Information Systems (GIS), etc.). Field excursions are required.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO 1: demonstrate skill of gaining and applying learned material in a field experience.
- apply concepts and processes discussed in lecture to experiences in the field.
- compose field notes and collect and analyze field data.
- SLO 2: explain physical and/or cultural phenomena of a specific region.
- describe and explain physical and/or cultural phenomena of a specific region.
- integrate geographic information from various disciplines (geology, biology, ecology, urban studies, anthropology, history, economics, cultural studies, and others) in order to explain landscape patterns and processes.

GEOG 392 Field Studies in Geography: Coastal Landscapes

This is a field studies course of the geography of coastal landscapes. Physical and cultural processes, characteristics and landscapes will be observed and analyzed. Specific content will vary by geographic region. A field trip is required.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO 1: demonstrate skills of gaining and applying learned material in a field experience.
- apply concepts and processes discussed in lecture to experiences in the field.
- compose field notes and collect and analyze field data.
- SLO 2: explain physical and/or cultural phenomena of a specific region.
- describe and explain geographic phenomena related to the particular physical and/or human environments under study.
- integrate geographic information from various disciplines (geology, biology, ecology, urban studies, anthropology, history, economics, cultural studies, and others) in order to explain landscape patterns and processes.

GEOG 393 Field Studies in Geography: Arid Landscapes
This course involves the study of geographic principles and processes in arid environments. The course content will vary by destination but may include topics in physical geography (e.g., plant and animal communities, climate and weather, geology and geomorphology, natural hazards, environmental impacts, etc.), human geography (e.g., cultural landscapes, economic activities, transportation issues, land use patterns, etc.), and introduction to tools and techniques used for geographic field research (e.g., map and compass use, the Global Positioning System (GPS), Geographic Information Systems (GIS), etc.). Field excursions are required.

Upon completion of this course, the student will be able to:

- SLO 1: demonstrate skill of gaining and applying learned material in a field experience.
- apply concepts and processes discussed in lecture to experiences in the field.
- compose field notes and collect and analyze field data.
- SLO 2: explain physical and/or cultural phenomena of a specific region.
- describe and explain physical and/or cultural phenomena of a specific region.
- integrate geographic information from various disciplines (geology, biology, ecology, urban studies, anthropology, history, economics, cultural studies, and others) in order to explain landscape patterns and processes.

**GEOG 394 Field Studies in Geography: Volcanic Landscapes**

This course involves the study of geographic principles and processes in volcanic environments. The course content will vary by destination but may include topics in physical geography (e.g., plant and animal communities, climate and weather, geology and geomorphology, natural hazards, environmental impacts, etc.), human geography (e.g., cultural landscapes, economic activities, transportation issues, land use patterns, etc.), and introduction to tools and techniques used for geographic field research (e.g., map and compass use, the Global Positioning System (GPS), Geographic Information Systems (GIS), etc.). Field excursions are required.

Upon completion of this course, the student will be able to:

- SLO 1: demonstrate skills of gaining and applying learned material in a field experience.
- apply concepts and processes discussed in lecture to experiences in the field.
- compose field notes and collect and analyze field data.
- SLO 2: explain physical and/or cultural phenomena of a specific region.
- describe and explain geographic phenomena related to the particular physical and/or human environments under study.
- integrate geographic information from various disciplines (geology, biology, ecology, urban studies, anthropology, history, economics, cultural studies, and others) in order to explain landscape patterns and processes.

**GEOG 495 Independent Studies in Geography**

This course involves the study of geographic principles and processes in arid environments. The course content will vary by destination but may include topics in physical geography (e.g., plant and animal communities, climate and weather, geology and geomorphology, natural hazards, environmental impacts, etc.), human geography (e.g., cultural landscapes, economic activities, transportation issues, land use patterns, etc.), and introduction to tools and techniques used for geographic field research (e.g., map and compass use, the Global Positioning System (GPS), Geographic Information Systems (GIS), etc.). Field excursions are required.

Upon completion of this course, the student will be able to:

- SLO 1: demonstrate skills of gaining and applying learned material in a field experience.
- apply concepts and processes discussed in lecture to experiences in the field.
- compose field notes and collect and analyze field data.
- SLO 2: explain physical and/or cultural phenomena of a specific region.
- describe and explain geographic phenomena related to the particular physical and/or human environments under study.
- integrate geographic information from various disciplines (geology, biology, ecology, urban studies, anthropology, history, economics, cultural studies, and others) in order to explain landscape patterns and processes.
An independent studies project involves an individual student or small group of students in study, research, or activities beyond the scope of regularly offered courses. See the current catalog section of “Special Studies” for full details of Independent Studies.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- **SLO #1**: Actively engage in intellectual inquiry beyond that required in order to pass a course of study.
- Discuss and outline a proposal of study with a supervising instructor in Geography or Geographic Information Systems (GIS) or Environmental Studies.
- Design an independent study (to be completed individually or by collaboration of a small group) to foster special knowledge, skills, and experience that are not available in any one regularly scheduled course.
- Gather data or information needed for analysis in Geography or Geographic Information Systems (GIS) or Environmental Studies.
- **SLO #2**: Utilize modes of analysis and critical thinking to apply theoretical perspectives and/or concepts in Geography or Geographic Information Systems (GIS) or Environmental Studies to significant problems and/or educational activities.
- Analyze and apply the knowledge, skills and experience that are involved in the independent study to theoretical perspectives and/or concepts in Geography or Geographic Information Systems (GIS) or Environmental Studies.
- **SLO #3**: Communicate a complex understanding of content matter of Geography or Geographic Information Systems (GIS) or Environmental Studies.
- Demonstrate competence in the skills necessary to accomplish the independent study.
- Present the results of your research or inquiry.
Geology | Cosumnes River College

Geology is the study of the origin and evolution of the earth, utilizing the principles of mathematics, chemistry, physics and biology. The concept of geologic time and the principles of uniformitarianism help geologists to understand the processes that shape the earth and its environments. Geologists study rocks, minerals and fossils in an effort to draw conclusions about both the earth’s observable surface processes that meet the eye, and the earth’s interior.

Associate Degrees for Transfer

A.S.-T. in Geology

The Associate in Science in Geology for Transfer Degree (AA-T) is designed to provide a seamless transfer pathway for students interested in pursuing at least one Geology degree option in the California State University (CSU) system. Students must complete the core curriculum and electives to meet a total of 60 transferable units with a minimum 2.0 GPA, which includes the CSU General Education Breadth or the Intersegmental General Education Transfer Curriculum (IGETC) pattern. Students must also earn a grade of C or better in all the courses for the major as described in the Required Program. Upon successful completion of the degree requirements, students will be guaranteed admission to the CSU system with junior status and will not have to repeat lower division coursework. Students are encouraged to meet with a counselor to develop their educational plans as degree options and general education requirements vary for each university.

Catalog Date: June 1, 2020

The Associate in Science in Geology for Transfer (AS-T) degree may be obtained by completion of 60 transferable, semester units with a minimum 2.0 GPA, including (a) the major or area of emphasis described in the Required Program, and (b) either the Intersegmental General Education Transfer Curriculum (IGETC) or the California State University General Education-Breadth Requirements.

Student Learning Outcomes

Upon completion of this program, the student will be able to:
Career Information

The AS-T in Geology can provide students with the foundational knowledge necessary for transfer to a 4-year Bachelor of Art or Science (BA or BS) degree program. Career opportunities for students who have earned Bachelor's degrees in Geology include but are not limited to Geologist (for private industry or the government), Environmental Planner or Consultant, Earth Science Educator (middle school through university), Paleontologist, Petrologist, Land Use and Natural Resource Management, Cartographer/Stratigrapher, Park Naturalist, Hydrologist, GIS Specialist, and Oceanographer. Some careers may require additional training. NOTE TO TRANSFER STUDENTS: The Associate Degree for Transfer program is designed for students who plan to transfer to a campus of the California State University (CSU). Other than the required core, the courses you choose to complete this degree will depend to some extent on the selected CSU for transfer. In addition, some CSU-GE Breadth or IGETC requirements can also be completed using courses required for this associate degree for transfer major (known as “double-counting”), Meeting with a counselor to determine the most appropriate course choices will facilitate efficient completion of your transfer requirements. For students wishing to transfer to other universities (UC System, private, or out-of-state), the Associate Degree for Transfer may not provide adequate preparation for upper-division transfer admissions; it is critical that you meet with a CRC counselor to select and plan the courses for the major, as programs vary widely in terms of the required preparation.

Associate Degrees

A.S. in General Science

Areas of Study include:

- Physical Anthropology
- Astronomy
- Biology
- Chemistry
- Engineering
- Physical Geography
- Geology
- Physics

Eighteen (18) units of transfer level course work in science is required. Two laboratory courses must be included: one in the physical sciences and one in the biological sciences. Courses may be selected from astronomy, biology, chemistry, geology, physical geography, physical anthropology, and physics. The student, in consultation with a counselor, should choose science courses to meet his or her program, transfer, or general education requirements.

Students interested in transferring to a four-year university with a science major are encouraged to complete a science AS or AS-T degree such as Anthropology, Biology, Chemistry, Engineering, Geography, Geology, or Physics. This General Science degree may not include the majors-level transfer courses needed for many science majors. Students are strongly recommended to see a counselor for guidance.

1Courses used in A or B above will not count towards C, except units exceeding the 4 or 3 unit minimum in A and B. For example, a student completing the 5 unit CHEM 309 under B could apply 2 of those units towards C. A total of 18 science units is required.

The General Science Associate in Science (A.S.) degree may be obtained by completion of the required program, plus general education requirements, plus sufficient electives to meet a 60-unit total. See CRC graduation requirements.

Student Learning Outcomes

Upon completion of this program, the student will be able to:

- explain the core perspectives of the scientific method and apply it to at least one scientific discipline. (SLO 1)
- solve introductory problems of a conceptual and/or numerical nature of at least one scientific discipline. (SLO 2)
- accurately apply the basic vocabulary and concepts of at least one scientific discipline verbally and in writing. (SLO 3)
- recognize the use and misuse of scientific concepts in society including politics and the media. (SLO 4)

A.S. in Geology

This degree is designed to meet common lower division requirements for a major in Geology.

All CRC Geology courses satisfy lower division General Education requirements for the A.A., A.S., B.A., and B.S. degrees. For transfer students earning a Baccalaureate Degree in Geology, satisfactory completion of the CRC Geology curriculum provides a solid foundation and the standard prerequisites for upper division coursework. Geology majors planning to transfer to four-year institutions should take GEOL 300, 301, 310, and 311.

HIGHLIGHTS
* Comprehensive lower division course offerings, including a Physical Laboratory, Mineral Laboratory, and Field Course
* Dynamic geologic environment near the Sierra Nevada, San Andreas Fault, and Sacramento Delta
* Internships available with State of California, County of Sacramento, and Federal Land Management Agencies
* A Mathematics, Engineering and Science Achievement (MESA) program

Catalog Date: June 1, 2020

The Geology Associate in Science (A.S.) degree may be obtained by completion of the required program, plus general education requirements, plus sufficient electives to meet a 60-unit total. See CRC graduation requirements.

Student Learning Outcomes

Upon completion of this program, the student will be able to:

- <strong>SLO 1: Understand the culture and practice of science.</strong>
- <strong>SLO 2: Evaluate how nature and humans exist in various dimensions of space and time.</strong>
- <strong>SLO 3: Integrate geoscience technologies and information resources.</strong>
- <strong>SLO 4: Analyze critical geoscience issues facing the world today.</strong>
- <strong>SLO 5: Communicate geoscience concepts and information effectively in various forms (e.g., verbal, written, graphic).</strong>
- <strong>SLO 6: Assess the use and limits of natural resources.</strong>
- <strong>SLO 7: Analyze the impacts of natural processes on humanity.</strong>

Career Information

Geologist (for private industry or the government); Environmental Planner or Consultant; Earth Science Educator (middle school through university); Paleontologist; Petrologist; Land Use and Natural Resource Management; Cartographer/Stratigrapher; Park Naturalist; Hydrology; GIS Specialist; Oceanographer Most career options require additional college study.

Geology (GEOL)

GEOL 300 Physical Geology

Units: 3
Hours: 54 hours LEC
Prerequisite: None.
Advisory: Concurrent enrollment in GEOL 301.
Transferable: CSU; UC
General Education: AA/AS Area IV; CSU Area B1; IGETC Area 5A
C-ID: C-ID GEOL 100
Catalog Date: June 1, 2020

Physical Geology introduces the composition and dynamics of Earth from the atomic scale of minerals to the global scale of plate tectonics. Major themes include the composition of minerals and rock, volcanism, Earth structures, earthquakes, erosion and surface processes, geologic time, geologic hazards, and plate tectonics. This course analyzes human interactions with geologic processes and the physical environment. Successful completion of physical geology prepares the student to recognize, understand, and appreciate the physical processes which continually change Earth over geologic time.
Student Learning Outcomes

Upon completion of this course, the student will be able to:

- **SLO#1: Apply the Scientific Method to evaluating geologic processes.**
  - Examine scientific inquiry as a platform for exploring our world objectively.
  - Illustrate a historical instance in geology where scientific ideas were improved upon through inquiry using the scientific method.

- **SLO#2: Evaluate temporal and spatial dimensions in which Earth originated and exists.**
  - Discuss the basic narrative of Earth origin and ocean and atmospheric development based on known scientific evidence.
  - Use basic concepts and tools of geologic time -- uniformity, geometric principals of relative age dating, radiometric dating -- to solve problems of geologic timing.

- **SLO#3: Examine how we can determine Earth's interior and surface compositions.**
  - Synthesize data from geophysics, seismology, and petrology to produce a comprehensive view of Earth's interior layered structure.
  - Recognize what minerals are and how to identify important rock forming varieties.
  - Define and give examples of igneous, sedimentary, and metamorphic rocks.
  - Identify environmental influences on rock formation based on textural, compositional, and structural features in the rock.
  - Evaluate the importance, availability, and rate of usage of those natural resources which are geologic in nature.

- **SLO#4: Apply plate tectonic theory to formulate geologic settings for physical processes.**
  - Discuss evidence that contributed to the development of plate tectonics.
  - Evaluate divergent, convergent, and transform boundaries and describe the characteristics of each.
  - Identify the main features of ocean floor topography.
  - Evaluate how volcanic activity, mountain building, and earthquakes are related to each other.
  - Contrast and assess evidence of orogenesis and explain how continents grow by accretion.

- **SLO#5: Assess the potential threats of geologically-related natural disasters.**
  - Recognize and appraise the hazards associated with earthquakes.
  - Evaluate the conditions that generate floods and landslides.
  - Assess how good long and short term predictions are for major natural disasters.
  - Explain some environmental disasters that humans can potentially create.

- **SLO#6: Evaluate the various depositional and erosional features associated with different agents of erosion -- wind, glaciers, rivers, gravity, and waves.**
  - Critique how features of these environments can indicate climate change.

- **SLO#7: Communicate geologic concepts and information effectively in various forms (e.g., verbal, written, graphic).**
  - Research credible sources of geologic information.

GEOL 301 Physical Geology Laboratory

- **Units:** 1
- **Hours:** 54 hours LAB
- **Prerequisite:** None.
- **Corequisite:** GEOL 300 (may be taken previously)
- **Transferable:** CSU; UC
- **General Education:** CSU Area B3; IGETC Area 5A; IGETC Area 5C
- **C-ID:** C-ID GEOL 100L
- **Catalog Date:** June 1, 2020
This course provides "hands-on" experience with the tools and skills discussed in Physical Geology (GEOL 300). Lab topics include mineral and rock identification, map and air photograph interpretation and landform identification, and introduction to the study of geologic maps and cross-sections.

Student Learning Outcomes
Upon completion of this course, the student will be able to:

- **SLO#1**: Apply the Scientific Method to evaluating Earth science processes.
  - Note how the scientific method is followed in various experiments.
  - Evaluate a data set with conscious reference to the scientific method.
- **SLO#2**: Examine Earth's interior and solid surface compositions.
  - Identify rock and minerals specimens in hand samples to determine their geologic origin.
  - Deduce the properties and compositions of Earth's interior layers based on various types of evidence observed at Earth's surface.
  - Interpret the geologic processes which produce specific rock types.
- **SLO#3**: Apply plate tectonic theory to formulate geologic settings for physical processes.
  - Discuss how earthquakes are connected to tectonic settings.
  - Calculate rates of plate motion and sea floor spreading.
  - Distinguish between different plate boundaries and the rock types produced by tectonic processes.
  - Compare and contrast the rate of seafloor spreading and explain the physiographic features produced.
  - Evaluate the affect of hot spots on continent and ocean-floor evolution.
- **SLO#4**: Evaluate temporal and spatial dimensions in which Earth history is explored.
  - Assess the time-event sequence on a geologic column by utilize both relative and absolute time.
  - Assemble a geologic map and evaluation the relative and absolute time sequencing.
- **SLO#5**: Assess the impact of earthquake activity at a human scale.
  - Calculate and model the speed of P and S waves to derive an earthquake's epicenter.
  - Analyze the factors that cause earthquake destruction and how serious damage can be avoided.
- **SLO#6**: Confirm the effects of surface geologic processes on terrain landscape.
  - Construct and interpret topographic maps and compute gradient from them.
  - Inspect and evaluate aerial/satellite photos and determine the geologic structures present.
  - Recognize, describe, and illustrate groundwater processes and the formation of karst topography.
  - Illustrate, examine, and interpret erosional and depositional features produced by stream, glacial, and wind processes.

GEOL 305 Earth Science

| Units: | 3 |
| Hours: | 54 hours LEC |
| Prerequisites: | None. |
| Transferable: | CSU; UC (No transfer credit for GEOL 305 or 306, if taken after GEOL 300, 301, 310, or 311) |
| General Education: | AA/AS Area IV; CSU Area B1; IGETC Area 5A |
| C-ID: | C-ID GEOL 120 |
| Catalog Date: | June 1, 2020 |

This course is an introductory course covering major topics in geology, oceanography, meteorology, astronomy, scientific method, and philosophy of science. This course is designed for non-science majors. This course is not open to students who have received credit for GEOL 300 or GEOL 310.

Student Learning Outcomes
Upon completion of this course, the student will be able to:

- **SLO#1**: Apply the Scientific Method to evaluating Earth science processes.
- Examine scientific inquiry as a platform for exploring our world objectively.
- Illustrate historical instances where scientific ideas were improved upon through inquiry using the scientific method.
- **SLO#2**: Evaluate temporal and spatial dimensions in which Earth originated and exists.
- Discuss the basic narrative of Earth origin and ocean and atmospheric development based on known scientific evidence.
- Compare and contrast Earth as a planet to other planets and objects in the Solar System.
- Use basic concepts and tools of geologic time -- uniformity, geometric principals of relative age dating, radiometric dating -- to solve problems of geologic timing.
- **SLO#3**: Apply plate tectonic theory to formulate geologic settings for physical processes.
- Discuss evidence that contributed to the development of plate tectonics.
- Analyze how plate tectonic theory explains the development and break up of continents, and of the growth and shrinkage of oceans.
- Identify the main features of ocean floor topography.
- Evaluate how volcanic activity, mountain building, and earthquakes are related to each other.
- **SLO#4**: Examine how we determine Earth's interior and solid surface compositions.
- Synthesize different data sets to produce a comprehensive view of Earth's interior layered structure.
- Discuss how different minerals form in different environments to produce the three categories of rocks.
- Deduce past surface environments from textures and features in sedimentary rocks.
- **SLO#5**: Investigate how different aspects of atmospheric change contribute to weather and climate.
- Describe Earth's atmosphere's origin, composition, and structure.
- Delineate the various factors that affect how Earth is heated.
- Assess how changes in the atmosphere's moisture/humidity content with temperature bring about observable changes in weather.
- Evaluate how changes in atmospheric pressure produce different weather results.
- **SLO#6**: Survey Earth's basic marine processes.
- Explain the formation of three basic types of water movements (tides, currents, waves) and how they affect human activity.
- Investigate the characteristic physical properties ocean water.
- **SLO#7**: Assess the impacts of Earth processes on human activity, and human activity on Earth processes.
- Analyze the causes and impacts of global warming and global climate change.
- Assess how earthquakes are a danger to humans.
- Examine how human activity contributes to or mitigates beach erosion.

**GEOL 306 Earth Science Laboratory**

- **Units**: 1
- **Hours**: 54 hours LAB
- **Prerequisite**: GEOL 305
- **Corequisite**: CSU; UC (No transfer credit for GEOL 305 or 306, if taken after GEOL 300, 301, 310, or 311)
- **Transferable**: CSU Area B3; IGETC Area 5A
- **General Education**: C-ID GEOL 120L
- **Catalog Date**: June 1, 2020

This course emphasizes scientific methods and systematic laboratory procedures. Topics include weather analysis, rock and mineral identification, study of geologic concepts by means of topographic maps, and exercises in astronomy and oceanography. One field trip may be required. Not open to students who have received credit for GEOL 300 or GEOL 301.
Upon completion of this course, the student will be able to:

- **SLO#1**: Apply the Scientific Method to evaluating Earth science processes.
  - Note how the scientific method is followed in various experiments.
  - Evaluate a data set with conscious reference to the scientific method.

- **SLO#2**: Evaluate temporal and spatial dimensions in which Earth originated and exists in the solar system.
  - Construct a model of the solar system in order to observe characteristics of distance among the planets and sun.
  - Relate Earth, Sun, and Moon motions to observable phenomena on Earth, such as tides and lunar phases.
  - Describe the position and motion of the planets using key constellations as reference.
  - Explain why the moon exhibits all of its phases and surface textures.
  - Investigate methods for determine ages and sequences of geologic events.

- **SLO#3**: Apply plate tectonic theory to formulate geologic settings for physical processes.
  - Calculate rates of plate motion and sea floor spreading.
  - Discuss how earthquakes are connected to tectonic settings.
  - Relate igneous activity to the tectonic context of the area.

- **SLO#4**: Examine how we determine Earth's interior and solid surface compositions.
  - Identify rock and minerals specimens in hand samples to determine their geologic origin.
  - Deduce the properties and compositions of Earth's interior layers based on various types of evidence observed at Earth's surface.
  - Investigate how different components of atmospheric change contribute to weather and climate.
  - Analyze how noon-time sun angle and duration of sunlight influence the distribution of heat on Earth.
  - Compute the quantity of water vapor in the atmosphere and evaluate its significance on weather trends.
  - Measure atmospheric pressure and evaluate its affect on weather trends.
  - Integrate the above atmospheric measurements to determine conditions for weather storms.

- **SLO#5**: Collect, measure, and/or analyze geologic information using common instruments and tools.
  - Collect and analyze data using common meteorological instruments (e.g. thermometer, barometer, sling psychrometer),
 geomorphic instruments (e.g., stereoscopic imagery, stereoscope) and mapping tools (e.g., latitude/longitude, scale, USGS quad maps).

---

**GEOL 310 Historical Geology**

- **Units**: 3
- **Hours**: 54 hours LEC
- **Prerequisites**: None.
- **Advisory**: GEOL 300 or 305; An introductory geology or earth science course.
- **Transferable**: CSU; UC
- **General Education**: AA/AS Area IV; CSU Area B1; IGETC Area 5A
- **C-ID**: GEOL 110
- **Catalog Date**: June 1, 2020
This course explores the origin and geologic history of Earth and the evolution of its plant and animal inhabitants. Plate tectonic theory is used to explain changes in composition and structure of rocks in Earth's crust from the formation of Earth to the present. Emphasis is placed on the formation of sedimentary rocks for the purpose of understanding how they and the fossils contained within them record changes in Earth environment and processes. Evolution and extinction are studied to understand how they reflect environmental changes in Earth's ocean, atmosphere, and surface. Present day Earth processes are used as a model to understand past activity.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- **SLO#1:** Apply the Scientific Method to evaluating Earth history.
  - Evaluate the Scientific Method as a means to acquire and verify knowledge.
  - Explain specific instances where the Scientific Method advanced how geologists understand Earth history (e.g., uniformity, catastrophism, faunal succession).
  - Show instances where the Scientific Method identifies gaps or limits in our knowledge of Earth history (e.g., stratigraphic unconformities, lack of fossil specimens).
  - **SLO#2:** Evaluate temporal rates and spatial scales of geologic processes in Earth history.
  - Explain and apply methods used to determine the numerical and relative ages of geologic events.
  - Analyze how the Geologic Time Scale is constructed, and place significant events in Earth history within that timeline.
  - Correlate changes in fossil distribution, isotopic ratios, elemental concentration in rocks to changes in sea level, climate change, and atmospheric composition in Earth history.
  - Predict possible short term and long term trends for Earth's future environment (climate trends, sea level, atmospheric composition) based in part on the past geologic record.
  - **SLO#3:** Assess theories of evolution and extinction and the logic and evidence leading to their development and application.
  - Discuss Darwin's basic theory of evolution in the context of the development of scientific thinking of the time.
  - Critique subsequent modifications that have been made to our understanding of Darwinian evolution (e.g., DNA analyses, punctuated equilibrium).
  - Identify key fossils that are characteristic of particular periods in the geologic time scale.
  - Validate evolutionary changes in life forms and ecosystems to changes in Earth environment, with specific focus on types of extinction events (e.g., meteorite impact) and periods of diversification in life forms (e.g., "Cambrian explosion").
  - **SLO#4:** Apply plate tectonic theory to formulate past, present, and future changes on Earth.
    - Examine how tectonic environments and processes have changed throughout Earth history.
    - Illustrate how paleomagnetism is used to locate the positions of crustal fragments in the past.
    - Deduce how rock sequences and units indicate specific mountain building events which add crust to continental masses.
    - Construct a general history of ocean basin development from specific examples identified in Earth history (e.g., Tethyan, proto-Atlantic).
    - Formulate a tectonic and geologic history of California and North America from geologic features found in the region.

**GEOL 311 Historical Geology Laboratory**

- **Units:** 1
- **Hours:** 54 hours LAB
- **Prerequisites:** None.
- **Corequisites:** GEOL 310
- **Advisory:** GEOL 300 and 301
- **Transferable:** CSU; UC
- **General Education:** CSU Area B3; IGETC Area 5A; IGETC Area 5C
- **C-ID:** C-ID GEOL 110L
- **Catalog Date:** June 1, 2020

Laboratory studies will accompany and complement GEOL 310, Historical Geology. Use of sedimentary rocks, fossils, geologic maps, and cross sections will aid in interpreting ancient environments, tectonic settings, and geologic history. Other concepts addressed include age relations and correlation of rock and time units, and introduction to fossil identification and biostratigraphy. At least one field trip or an appropriate alternative activity will be required as an introduction to sedimentary environments and field methods in geology.
Student Learning Outcomes

Upon completion of this course, the student will be able to:

- **SLO#1: Evaluate temporal rates and spatial scales of geologic processes in Earth history.**
  - Explain and apply methods used to determine the numerical and relative ages of geologic events.
  - Correlate changes in fossil distribution, isotopic ratios, elemental concentration in rocks to changes in sea level, climate change, and atmospheric composition in Earth history.
- **SLO#2: Evaluate sedimentary environments through geologic time.**
  - Resolve lithologic changes within a sedimentary basin.
  - Correlate strata over multiple stratigraphic sections.
- **SLO#3: Incorporate fossil evidence to decipher geologic history.**
  - Identify major groups and key examples of fossils and their ages.
  - Use index fossils to constrain the age of a geologic event.
- **SLO#4: Assess information from geologic maps.**
  - Extrapolate cross-sections from geologic maps.
  - Interpret geologic history from map information.
- **SLO#5: Apply plate tectonic theory to formulate past, present, and future changes on Earth.**
  - Examine how tectonic environments and processes have changed throughout Earth history.
  - Deduce how rock sequences and units indicate specific mountain building events which add crust to continental masses.

GEOL 330 Introduction to Oceanography

**Units:** 3  
**Hours:** 54 hours LEC  
**Prerequisite:** None.  
**Transferable:** CSU; UC  
**General Education:** AA/AS Area IV; CSU Area B1; IGETC Area 5A  
**Catalog Date:** June 1, 2020

The course will provide an introduction to the basic principles and practices of oceanography. Topics will be presented in terms of the applications of physics, geology, chemistry, and biology to a study of the world's oceans. Specific topics will include planetary science and earth origin, the geologic timescale, geography and location systems, matter, marine provinces, sediments, seismology, plate tectonics, seawater composition, geochemical distributions, deep ocean circulations, winds and surface circulation, waves, tides, estuarine environment, biological production, nekton, plankton, and benthic organisms.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- **SLO#1: Apply the scientific method to evaluating Earth processes.**
  - Evaluate the Scientific Method as a means to acquire and verify knowledge.
  - Explain specific instances where the Scientific Method advanced how Earth scientists understand ocean processes.
- **SLO#2: Evaluate temporal rates and spatial scales of Earth processes.**
  - Discuss the basic narrative of Earth origin and ocean development based on known scientific evidence.
  - Compare rates of change of ocean processes, including sea level, ocean chemistry, and temperature variations.
- **SLO#3: Apply plate tectonic theory to formulate past, present, and future changes on Earth.**
  - Explain how exploration of features of marine geology refined plate tectonic theory.
  - Analyze how plate tectonic theory explains the development of oceans, their growth, and their shrinkage and collapse.
  - Identify the main features of ocean floor topography.
- **SLO#4:** Assess how Earth processes affect the physical environments and resources of living organisms, and analyze evidence that living organisms have changed their physical environments.<p>

- Categorize different marine communities based on depth, available sunlight, salinities, and temperatures.

- Assess evidence of global climate change and how ocean processes are involved.

- Evaluate instances in which human activity caused positive and negative effects on ocean environments. <p>

- **SLO#5:** Determine the kinds and degrees of interaction between the atmosphere and the ocean and between the solid earth and ocean.<p>

- Describe how winds help to determine direction of major currents.

- Explain how winds affect wave dimensions.

- Investigate how coasts form in interactions of waves with various rocks.

- Explain how storms strengthen over water, weaken over land.

- Relate how temperature differentials between land and water generate certain kinds of breezes.

---

**GEOL 390 Field Studies in Geology**

| Units: | 1 - 4 |
| Hours: | 6 - 24 hours LEC; 36 - 144 hours LAB |
| Prerequisite: | None. |
| Advisory: | GEOL 300 or 305 |
| Transferable: | CSU; UC |
| Catalog Date: | June 1, 2020 |

This course covers the study of geologic principles and processes of specific areas (mountains, deserts, great valley, coastal region, etc.). A multi-day field trip and camping may be required. For specific details, see the course description(s) listed in the schedule.

**Student Learning Outcomes**

Upon completion of this course, the student will be able to:

- examine the surrounding physical and/or human environment and formulate explanations for the geologic patterns and processes observed. (SLO 1)

- apply concepts and processes discussed in lecture to the real world. (SLO 2)

- compose field notes and collect and analyze field data.

- integrate geologic information with other disciplines (geography, biology, ecology, urban studies, anthropology, history, economics, cultural studies, and others), as appropriate, in order to develop a comprehensive view of landscapes and processes. (SLO 3)

---

**GEOL 495 Independent Studies in Geology**

| Units: | 1 - 3 |
| Hours: | 54 - 162 hours LAB |
| Prerequisite: | None. |
| Transferable: | CSU |
| Catalog Date: | June 1, 2020 |

An independent studies project involves an individual student or small group of students in study, research, or activities beyond the scope of regularly offered courses. See the current catalog section of “Special Studies” for full details of Independent Studies.

**Student Learning Outcomes**

Upon completion of this course, the student will be able to:

- SLO #1: Actively engage in intellectual inquiry beyond that required in order to pass a course of study (College Wide Learning Outcome – Area 4).

- Discuss and outline a proposal of study (that can be accomplished within one semester term) with a supervising instructor qualified within the discipline.
• Design an independent study (to be completed individually or by collaboration of a small group) to foster special knowledge, skills, and experience that are not available in any one regularly scheduled course.

• Use information resources to gather discipline-specific information.

• SLO #2: Utilize modes of analysis and critical thinking to apply theoretical perspectives and/or concepts in the major discipline of study to significant problems and/or educational activities (College Wide Learning Outcome – Area 3).

• Analyze and apply the knowledge, skills and experience that are involved in the independent study to theoretical perspectives and/or concepts in the major discipline of study.

• Explain the importance of the major discipline of study in the broader picture of society.

• SLO #3: Communicate a complex understanding of content matter of the major discipline of study (College Wide Outcome – Area 3).

• Demonstrate competence in the skills essential to mastery of the major discipline of study that are necessary to accomplish the independent study.

• SLO #4: Identify personal goals and pursue these goals effectively (College Wide Outcome – Area 4).

• Utilize skills from the “academic tool kit” including time management, study skills, etc., to accomplish the independent study within one semester term.
Courses in Health Education are designed to provide students the essential information for the evaluation, protection and maintenance of individual health.

Associate Degree

A.S. in Health Information Technology

The CRC Health Information Technology A.S. degree program is designed to train health information professionals with the knowledge and skills to process, analyze, disseminate and maintain health care information. A career as a health information professional offers a unique opportunity to combine an interest in health information, business, and computer information science. Employment opportunities are available in long-term care, ambulatory care, and acute care facilities; state and federal health agencies; and private industry.

HIGHLIGHTS

According to the Bureau of Labor Statistics, employment of medical records and health information technicians is expected to increase by 21 percent from 2010 to 2020, faster than the average for all occupations.

*The HIT A.S. Degree Program is accredited by the Commission on Accreditation for Health Informatics and Information Management Education (CAHIIM) in cooperation with the Council on Accreditation of the American Health Information Management Association (The Certificate of Achievement Health Information Coding Specialist Program is not accredited by the Commission on Accreditation for Health Informatics and Information Education (CAHIIM)).

*A Non-paid clinical experience at an affiliated health-related agency is required as part of this Program.

*This is an online program

To be eligible for enrollment in the program, the student must meet the following criteria: A grade of "C" or better in the following courses; AH 110, AH 124, and BIOL 100 or 102. Completion of a pre-enrollment form. See the Program website for more information.

Catalog Date: June 1, 2020

Total Units: 35

1 AH 110 and AH 124 and BIOL 100 or 102 must be completed prior to enrolling in the AH program as part of the pre-enrollment process. Contact the Careers and Technology Division Office for more information.

The Health Information Technology Associate in Science (A.S.) degree may be obtained by completion of the required program, plus general education requirements, plus sufficient electives to meet a 60-unit total. See CRC graduation requirements.

**Enrollment Eligibility**

To be eligible for enrollment in the program, the student must meet the following criteria:

- Completion of AH 110, AH 124, and Biology 100 or 102 with grades of C or better.
- Completion of a pre-enrollment form. Forms are available online on the Health Information Technology website.

**Enrollment Process**

Eligible students are selected for the program according to the following steps:

- Only students who meet the enrollment eligibility criteria will be considered for the program.

**Student Learning Outcomes**

Upon completion of this program, the student will be able to:

- SLO #1 Recognize and apply the knowledge and skills necessary to pass the national Registered Health Information Technician (RHIT) examination.
- SLO #2 Demonstrate certifiable skills and knowledge to be employable in the health information field.

**Career Information**

Employment Opportunities are possible in the Following Settings: Ambulatory Care, Long-Term Care/Rehabilitation, State and Federal Health Agencies, Professional Review Organizations, Insurance Companies, Educational Settings, Consulting Firms, Mental Health/Chemical Dependency, Acute Care. Some career options may require experience in addition to two years of college study.

**Certificate of Achievement**
Health Information Coding Specialist Certificate

The Health Information Coding Specialist Certificate prepares the student to apply medical coding classifications to health care encounters using industry standards through both theory and practical (externship) applications for the purpose of: meeting health care industry needs; preparing students for appropriate certification exams; and providing career ladder opportunities for health care workers.

A career as a health information coding specialist offers a unique opportunity to combine an interest in health information, business, and computer information science. Employment opportunities are available in long-term care, ambulatory care, and acute care facilities; state and federal health agencies; and private industry.

The Certificate of Achievement Health Information Coding Specialist Program is not accredited by the Commission on Accreditation for Health Informatics and Information Education (CAHIIM).

HIGHLIGHTS
Employment of medical records and health information technicians is expected to increase by 21 percent from 2010 to 2020, faster than the average for all occupations.

This is an online program.

Enrollment Eligibility:
To be eligible for enrollment in the Health Information Coding Specialist Program, the student must meet the following criteria:
A grade of "C" or better in the following courses; AH 110, AH 124, and BIOL 100 or 102.

Completion of a pre-enrollment form. The form is available online on the Health Information Technology website.

Catalog Date: June 1, 2020

1AH 110, AH 124, and BIOL 100 or 102 must be taken prior to enrolling in the HIT program as part of the pre-enrollment process. Contact the Careers and Technology Division Office for more information.

Enrollment Eligibility
To be eligible for enrollment in the program, the student must meet the following criteria:

- Completion of AH 110, AH 124, and Biology 100 or 102 with grades of C or better.
- Completion of a pre-enrollment form.

Enrollment Process
The aim of this course is to help people achieve a high level of wellness and prevent disease by assisting them to maximize both their personal lifestyles and their environments. This course will help you to identify the various factors influencing your current and future levels of wellness. Information presented will include, but not be exclusive to: mental health, stress management, nutrition, weight control, fitness, sexuality, addictive substances, and disease.

Upon completion of this course, the student will be able to:

- SLO #1: Examine and be able to utilize critical thinking skills to assess health information presented through health products, fitness endeavors and other sources.
- SLO #2: Explain the basic concepts of Health and Wellness
- SLO #3: Identify all dimensions of the individual and relate them to overall health.
- SLO #4: Evaluate their current status of Health in all dimensions of the individual.
- SLO #5: Identify characteristics of mental illness and understand treatment options for specific illnesses.
- SLO #6: Recognize the components of a healthy diet and avoid diet misconceptions.
- SLO #7: Apply training principles to a fitness program and avoid fitness misconceptions.
- SLO #8: Interpret and recognize signs of anorexia and bulimia.
- SLO #9: Distinguish between healthy and unhealthy behaviors in relationships.
- SLO #10: Identify structures and functions of the male and female reproductive anatomy.
- SLO #11: Identify the phases of human sexual response.
- SLO #12: Appraise the various birth control methods for effectiveness and understand how they work.
- SLO #13: Illustrate knowledge of pregnancy and birth.
- SLO #14: Recognize various drug properties and the effects of specific drugs on the body.

Employment Opportunities Are Possible in the Following Settings Ambulatory Care Long-Term Care/Rehabilitation State and Federal Health Agencies Professional Review Organizations Insurance Companies Consulting Firms Mental Health/Chemical Dependency Acute Care Some career options may require experience in addition to at least one year of college study.
HEED 350 Personal Wellness

Upon completion of this course, the student will be able to:

- SLO #1: Utilize critical thinking skills to assess health information presented through lectures, assignments and other sources.
- Define the basic concepts of health and wellness.
- Identify the components of fitness.
- Describe the recommendations of nutrition guidelines and assessments useful in selecting a proper diet.
- Evaluate the different ways to assess body composition.
- Distinguish between unhealthy and healthy stress.
- Analyze strategies useful in coping with stress.
- Evaluate and assess methods toward making responsible decisions.
- SLO #2: Evaluate their current personal health status and devise programs designed to improve and/or maintain that status.
- Evaluate their current status of Wellness.
- Apply training principles to a fitness program and avoid fitness misconceptions.
- SLO #3: Articulate the importance of lifestyle choices as a determinant toward disease prevention and leading a healthier, happier life.
- Measure and assess the effects of negative health habits and positive health habits on both short and long term health.
- SLO #4: Apply goal setting techniques to produce behavioral changes for improvement in their lives.
- Recognize the distinct stages for changing a behavior.
- Create short term, medium and long term goals geared toward behavioral changes for improved health.
- Evaluate and apply motivational techniques when implementing a behavioral change plan.

HEED 495 Independent Studies in Health Education

An independent studies project involves an individual student or small group of students in study, research, or activities beyond the scope of regularly offered courses. See the current catalog section of "Special Studies" for full details of Independent Studies.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO #1: Actively engage in intellectual inquiry beyond that required in order to pass a course of study (College Wide Learning Outcome – Area 4).

- Discuss and outline a proposal of study (that can be accomplished within one semester term) with a supervising instructor qualified within the discipline.

- Design an independent study (to be completed individually or by collaboration of a small group) to foster special knowledge, skills, and experience that are not available in any one regularly scheduled course.

- Use information resources to gather discipline-specific information.

- SLO #2: Utilize modes of analysis and critical thinking to apply theoretical perspectives and/or concepts in the major discipline of study to significant problems and/or educational activities (College Wide Learning Outcome – Area 3).

- Analyze and apply the knowledge, skills and experience that are involved in the independent study to theoretical perspectives and/or concepts in the major discipline of study.

- Explain the importance of the major discipline of study in the broader picture of society.

- SLO #3: Communicate a complex understanding of content matter of the major discipline of study (College Wide Outcome – Area 3).

- Demonstrate competence in the skills essential to mastery of the major discipline of study that are necessary to accomplish the independent study.

- SLO #4: Identify personal goals and pursue these goals effectively (College Wide Outcome – Area 4).

- Utilize skills from the "academic tool kit" including time management, study skills, etc., to accomplish the independent study within one semester term.
Health Information Technology | Cosumnes River College

The CRC Health Information Technology program is designed to train health information professionals with the knowledge and skills to process, analyze, disseminate and maintain health care information. A career as a health information professional offers a unique opportunity to combine an interest in health information, business, and computer information science.

Dean
Collin Pregliasco

Associate Degree

A.S. in Health Information Technology

The CRC Health Information Technology A.S. degree program is designed to train health information professionals with the knowledge and skills to process, analyze, disseminate and maintain health care information. A career as a health information professional offers a unique opportunity to combine an interest in health information, business, and computer information science. Employment opportunities are available in long-term care, ambulatory care, and acute care facilities; state and federal health agencies; and private industry.

HIGHLIGHTS

According to the Bureau of Labor Statistics, employment of medical records and health information technicians is expected to increase by 21 percent from 2010 to 2020, faster than the average for all occupations.

*The HIT A.S. Degree Program is accredited by the Commission on Accreditation for Health Informatics and Information Management Education (CAHIIM) in cooperation with the Council on Accreditation of the American Health Information Management Association (The Certificate of Achievement Health Information Coding Specialist Program is not accredited by the Commission on Accreditation for Health Informatics and Information Education (CAHIIM)).

*This is an online program

To be eligible for enrollment in the program, the student must meet the following criteria: A grade of "C" or better in the following courses; AH 110, AH 124, and BIOL 100 or 102.
Completion of a pre-enrollment form. See the Program website for more information.

$^1$AH 110, AH 124, and BIOL 100 or 102 must be taken prior to enrolling in the HIT program as part of the pre-enrollment process. Contact the Careers and Technology Division Office for more information.

Enrollment Eligibility

To be eligible for enrollment in the program, the student must meet the following criteria:

- Completion of AH 110, AH 124, and Biology 100 or 102 with grades of C or better.
- Completion of a pre-enrollment form.
Enrollment Process

Eligible students are selected for the program according to the following steps:

- Only students who meet the enrollment eligibility criteria will be considered for the program.

Student Learning Outcomes

Upon completion of this program, the student will be able to:

- SLO # 1: DEMONSTRATE AN UNDERSTANDING OF HEALTH DATA MANAGEMENT WITH EMPHASIS ON HEALTH DATA STRUCTURE, CONTENT AND STANDARDS
  - Collect and maintain health data, such as data elements, data sets, and databases.
  - Analyze data to ensure documentation in the health record supports the diagnosis and reflects the patient's progress, clinical findings, and discharge status.
  - Validate policies and procedures to ensure the accuracy of health data.
  - Apply clinical vocabularies and terminologies used in the organization's health information systems.
  - Verify timeliness, completeness, accuracy, and appropriateness of data and data sources for patient care, management, billing reports, registries, and/or databases.

- SLO # 2: DEMONSTRATE AN UNDERSTANDING OF HEALTH INFORMATION REQUIREMENTS AND STANDARDS
  - Cite, monitor and apply organization-wide record documentation guidelines.
  - Cite and apply policies and procedures to ensure organizational compliance with regulations and standards.
  - Define the procedure of reporting compliance findings according to organizational policy.
  - Define accuracy and completeness of the patient record as defined by organizational policy and external regulations and standards.
  - Define the procedure for the preparation required of the organization for accreditation, licensing, and/or certification surveys.

Career Information

Employment Opportunities Are Possible in the Following Settings: Ambulatory Care, Long-Term Care/Rehabilitation, State and Federal Health Agencies, Professional Review Organizations, Insurance Companies, Consulting Firms, Mental Health/Chemical Dependency, Acute Care. Some career options may require experience in addition to at least one year of college study.

Health Information Technology (HIT)

HIT 100 Introduction to Health Information Technology: Hospital Settings

<table>
<thead>
<tr>
<th>Units:</th>
<th>3</th>
</tr>
</thead>
<tbody>
<tr>
<td>Hours:</td>
<td>45 hours LEC; 27 hours LAB</td>
</tr>
<tr>
<td>Prerequisite:</td>
<td>None.</td>
</tr>
<tr>
<td>Catalog Date:</td>
<td>June 1, 2020</td>
</tr>
</tbody>
</table>

This course is an introduction to health records systems in the acute care setting focusing on procedures for completion, maintenance, and preservation of health information. The relationship between health information management and the health care delivery system will also be discussed. Students will become familiar with the concept of accreditation, certification, and licensing of health care facilities with emphasis on the accreditation survey process.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO #1: DEMONSTRATE AN UNDERSTANDING OF HEALTH DATA MANAGEMENT WITH EMPHASIS ON HEALTH DATA STRUCTURE, CONTENT AND STANDARDS
  - Collect and maintain health data, such as data elements, data sets, and databases.
  - Analyze data to ensure documentation in the health record supports the diagnosis and reflects the patient's progress, clinical findings, and discharge status.
  - Validate policies and procedures to ensure the accuracy of health data.
  - Apply clinical vocabularies and terminologies used in the organization's health information systems.
  - Verify timeliness, completeness, accuracy, and appropriateness of data and data sources for patient care, management, billing reports, registries, and/or databases.

- SLO # 2: DEMONSTRATE AN UNDERSTANDING OF HEALTH INFORMATION REQUIREMENTS AND STANDARDS
  - Cite, monitor and apply organization-wide record documentation guidelines.
  - Cite and apply policies and procedures to ensure organizational compliance with regulations and standards.
  - Define the procedure of reporting compliance findings according to organizational policy.
  - Define accuracy and completeness of the patient record as defined by organizational policy and external regulations and standards.
  - Define the procedure for the preparation required of the organization for accreditation, licensing, and/or certification surveys.
SLO # 3: DEMONSTRATE AN UNDERSTANDING OF HEALTH INFORMATION REIMBURSEMENT METHODOLOGIES

- Apply policies and procedures for the use of clinical data required for reimbursement and prospective payment systems (PPS) in healthcare delivery.
- Verify accurate billing through coding, chargemaster, claims management, and bill reconciliation processes.
- Recognize established guidelines to comply with reimbursement and reporting requirements such as the National Correct Coding Initiative.
- Compile patient data and perform data quality reviews to validate code assignment and compliance with reporting requirements such as outpatient prospective payment systems.

SLO # 4: DEMONSTRATE AN UNDERSTANDING OF HEALTH SERVICE ORGANIZATIONS AND DELIVERY SYSTEMS

- Apply information system policies and procedures required by national health information initiatives on the healthcare delivery system.
- Apply current laws, accreditation, licensure, and certification standards related to health information initiatives from the national, state, local, and facility levels.
- Apply policies and procedures to comply with the changing regulations among various payment systems for healthcare services such as Medicare, Medicaid, managed care, and so forth.
- Define the roles of various providers and disciplines throughout the continuum of healthcare and respond to their information needs.

HIT 102 Introduction to Health Information Technology: Alternative Settings

**Units:** 2  
**Hours:** 36 hours LEC  
**Prerequisite:** None.  
**Catalog Date:** June 1, 2020

This course introduces a multitude of alternative health care settings available to the health information management professional. The student will be introduced to: regulatory issues; documentation; reimbursement and funding; information management, including data flow, coding and classification, electronic information systems, and data sets; quality improvement and utilization management; risk management and legal issues; role of HIM professionals; and trends.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO # 1: Describe general characteristics of the healthcare practice area, including past, present, and future utilization, if applicable.
- SLO # 2: Demonstrate an understanding of regulatory issues, including licensure and accreditation standards.
- Demonstrate an understanding of documentation requirements and practices.
- Demonstrate an understanding of reimbursement, payment, and other revenue requirements, practices, and issues.
- SLO # 3: Demonstrate an understanding of information management, including coding and classification, data and information flow, electronic information systems, and data sets.
- SLO # 4: Describe issues in information management, including coding and classification, data and information flow, electronic information systems, and data sets.
- SLO # 5: Demonstrate an understanding of Quality assessment and utilization management activities, risk management and legal concerns.

HIT 110 Medical Legal Aspects of Health Information

**Units:** 2  
**Hours:** 36 hours LEC  
**Prerequisite:** HIT 100 with a grade of "C" or better  
**Catalog Date:** June 1, 2020
This course explores the legal aspects surrounding the maintenance, use, disclosure, and protection of health information. Policies and procedures that guide the handling of health information to prevent inappropriate use and improper disclosure will be discussed.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO # 1: Identify legal issues related to ownership, control, and confidentiality of health information.
- Become familiar with the types of laws that govern the healthcare industry.
- Understand the significance of statutes, administrative laws, and regulatory agencies with regard to the maintenance, use and disclosure of health information.
- Understand policies and procedures with regard to health information use and disclosure.
- Discuss the HIPAA Privacy Rule with regard to health information use and disclosure, including requirements implemented by the American Recovery and Reinvestment Act.
- Describe types of medical identity theft and understand actions required by the Red Flags Rule.
- Identify legal issues relating to the workforce, including employees and the medical staff.
- SLO # 2: Apply and promote ethical standards of practice.
- Identify ethical principles and professional values that can guide health information management professionals who must confront and respond to ethical problems.

HIT 120 Basic ICD-CM Coding

<table>
<thead>
<tr>
<th>Units:</th>
<th>2</th>
</tr>
</thead>
<tbody>
<tr>
<td>Hours:</td>
<td>27 hours LEC; 27 hours LAB</td>
</tr>
<tr>
<td>Prerequisite:</td>
<td>AH 120 with a grade of &quot;C&quot; or better</td>
</tr>
<tr>
<td>Catalog Date:</td>

</tr>
</tbody>
</table>

This introductory course covers the basic principles of coding diseases and procedures using the INTERNATIONAL CLASSIFICATION OF DISEASES, Current Edition. Coding for reimbursement will be introduced, including topics such as third-party payers and health care reimbursement methodologies.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO # 1: DEMONSTRATE AN UNDERSTANDING OF HEALTHCARE DATA MANAGEMENT AND CLINICAL CLASSIFICATION SYSTEMS.
- Use and maintain electronic applications and work processes to support clinical classification and coding.
- Apply diagnosis codes and procedure codes using ICD-CM/PCS.
- Adhere to current regulations and established guidelines in code assignment.
- Ensure accuracy of diagnostic/procedural groupings such as Diagnosis related groups (DRG), Ambulatory payment classification (APC), and so on.
- Use and maintain applications and processes to support other clinical classification and nomenclature systems.
- Resolve discrepancies between coded data and supporting documentation.
- SLO # 2: DEMONSTRATE AN UNDERSTANDING OF HEALTHCARE DATA MANAGEMENT AND REIMBURSEMENT METHODOLOGIES.
- Understand policies and procedures for the use of clinical data required in reimbursement and prospective payment systems (PPS) in healthcare delivery.
- Use established guidelines to comply with reimbursement and reporting requirements such as the National Correct Coding Initiative.
- Comprehend the processes for compilation of patient data and the performance of data quality reviews to validate code assignment and compliance with reporting requirements such as outpatient prospective payment systems.
- Understand clinical vocabularies and terminologies used in the organization's health information systems.
HIT 122 Advanced ICD Coding

This course is a study of advanced coding principles related to ICD-CM/PCS coding. Class lectures and labs will focus on learning and applying higher level coding skills. The Prospective Payment System and Diagnosis Related Groups (DRGs) will be introduced as well as coding for prospective payment for acute inpatient, long term care, and inpatient rehabilitation care. Computerized encoders and groupers may be emphasized.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO # 1: DEMONSTRATE AN UNDERSTANDING OF HEALTHCARE DATA MANAGEMENT AND CLINICAL CLASSIFICATION SYSTEMS.
- Use and maintain electronic applications and work processes to support clinical classification and coding.
- Apply diagnosis codes using ICD-CM/PCS codes.
- Adhere to current regulations and established guidelines in code assignment.
- Ensure accuracy of diagnostic/procedural groupings such as DRG, APC, and so on.
- Adhere to current regulations and established guidelines in code assignment.
- Use and maintain applications and processes to support other clinical classification and nomenclature systems (such as ICD-10-CM, Systemized Nomenclature of Medicine Clinical Terminology (SNOMED), and so on.
- Resolve discrepancies between coded data and supporting documentation.
- SLO # 2: DEMONSTRATE AN UNDERSTANDING OF HEALTHCARE DATA MANAGEMENT AND REIMBURSEMENT METHODOLOGIES.
- Apply policies and procedures for the use of clinical data required in reimbursement and prospective payment systems (PPS) in healthcare delivery.
- Support accurate billing through coding, chargemaster, claims management, and bill reconciliation processes.
- Use established guidelines to comply with reimbursement and reporting requirements such as the National Correct Coding Initiative.
- Compile patient data and perform data quality reviews to validate code assignment and compliance with reporting requirements such as outpatient prospective payment systems.
- Contribute to the definitions for and apply clinical vocabularies and terminologies used in the organization's health information systems.
- Verify timeliness, completeness, accuracy, and appropriateness of data and data sources for patient care, management, billing reports, registries, and databases.

The principles and mechanics of coding procedures according to the Current Procedural Terminology Coding System (CPT) are taught in this course. Coding for reimbursement will be introduced, including topics such as: third-party payers, health care reimbursement systems and the impact of HIPAA on reimbursement.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO # 1: DEMONSTRATE AN UNDERSTANDING OF HEALTHCARE DATA MANAGEMENT AND CLINICAL CLASSIFICATION SYSTEMS.
Use and maintain electronic applications and work processes to support clinical classification and coding.

Apply procedure codes using CPT/HCPCS.

Adhere to current regulations and established guidelines in code assignment.

Validate coding accuracy using clinical information found in the health record.

Resolve discrepancies between coded data and supporting documentation.

SLO # 2: DEMONSTRATE AN UNDERSTANDING OF HEALTHCARE DATA MANAGEMENT AND REIMBURSEMENT METHODOLOGIES.

Use established guidelines to comply with reimbursement and reporting requirements such as the National Correct Coding Initiative.

HIT 130 Health Statistics

Units: 2
Hours: 27 hours LEC; 27 hours LAB
Prerequisite: HIT 100 with a grade of "C" or better
Catalog Date: June 1, 2020

This course will introduce the principles of health care statistics including the process of abstracting data from medical records, the preparation of administrative and medical reports, the use of statistics in medical research, the applications of automated systems, and the interpretation of reports and the registration of vital statistics. Automated abstracting and vital statistics systems, as well as the use of spreadsheet packages for data display will be introduced.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO #1: DEMONSTRATE AN UNDERSTANDING OF HEALTH STATISTICS, BIOMEDICAL RESEARCH, AND QUALITY MANAGEMENT
  - Abstract and maintain data for clinical indices/databases/registries
  - Collect, organize, and present data for quality management, utilization management, risk management, and other related studies.
  - Compute and interpret healthcare statistics.
  - Apply Institutional Review Board (IRB) processes and policies.
  - Use specialized databases to meet specific organization needs such as medical research and disease registries.

HIT 140 Computerized Health Information Systems

Units: 2
Hours: 27 hours LEC; 27 hours LAB
Prerequisite: CISC 302 with a grade of "C" or better
Catalog Date: June 1, 2020

This online course will provide practical experience in the use of software programs commonly used in health information, including master patient index, chart tracking, abstracting, encoders and groupers, release of information, birth registration, and incomplete record management systems. Emphasis will also be placed on the use of spreadsheet and database programs in the manipulation and use of health information.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO #1: DEMONSTRATE AN UNDERSTANDING OF HEALTHCARE DATA MANAGEMENT, HEALTH DATA STRUCTURE, CONTENT AND STANDARDS.
  - Collect and maintain health data (such as data elements, data sets, and databases).
  - Conduct analysis to ensure documentation in the health record supports the diagnosis and reflects the patient's progress, clinical findings, and discharge status.
  - Apply policies and procedures to ensure the accuracy of health data.
Contribute to the definitions for and apply clinical vocabularies and terminologies used in the organization’s health information systems.

Verify timeliness, completeness, accuracy, and appropriateness of data and data sources for patient care, management, billing reports, registries, and/or databases.

SLO #2: DEMONSTRATE AN UNDERSTANDING OF HEALTHCARE DATA MANAGEMENT, HEALTH INFORMATION REQUIREMENTS AND STANDARDS.

Monitor and apply organization-wide health record documentation guidelines.

Apply policies and procedures to ensure organizational compliance with regulations and standards.

Report compliance findings according to organizational policy.

Maintain the accuracy and completeness of the patient record as defined by organizational policy and external regulations and standards.

SLO #3: DEMONSTRATE AN UNDERSTANDING OF HEALTHCARE DATA MANAGEMENT, CLINICAL CLASSIFICATION SYSTEMS.

Adhere to current regulations and established guidelines in code assignment.

Validate coding accuracy using clinical information found in the health record.

Use and maintain applications and processes to support other clinical classification and nomenclature systems (such as ICD-10-CM, SNOMED, and so on).

SLO #4: DEMONSTRATE AN UNDERSTANDING OF HEALTH SERVICE ORGANIZATIONS AND DELIVERY SYSTEMS.

Differentiate the roles of various providers and disciplines throughout the continuum of healthcare and respond to their information needs.

Use technology, including hardware and software, to ensure data collection, storage, analysis, and reporting of information.

Use common software applications such as spreadsheets, databases, word processing, graphics, presentation, e-mail, and so on in the execution of work processes.

Design and generate reports using appropriate software.

SLO #5: DEMONSTRATE AN UNDERSTANDING OF HEALTH SERVICES ORGANIZATION AND DELIVERY, PRIVACY, CONFIDENTIALITY, LEGAL, AND ETHICAL ISSUES.

Apply policies and procedures for access and disclosure of personal health information.

Use specialized software in the completion of HIM processes such as record tracking, release of information, coding, grouping, registries, billing, quality improvement, and imaging.

HIT 150 Continuous Quality Improvement

This course will provide an overview of Continuous Quality Improvement inherent in the health care industry. Students will explore the history and development of Continuous Quality Improvement (CQI) efforts in health care. Students will also discuss quality and process improvement techniques applicable to health care. The roles and responsibilities of individuals involved in medical staff peer review, utilization review and risk management will be presented to students. The concept of an organized medical staff will be discussed, as well as the role of the medical staff office. The variety of computer applications available for CQI and Medical Staff Organization (MSO) functions will also be presented to students.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

SLO # 1: DEMONSTRATE AN UNDERSTANDING OF HEALTH STATISTICS, BIOMEDICAL RESEARCH AND QUALITY MANAGEMENT.

Abstract and report data for facility-wide quality management and performance improvement programs.

Analyze clinical data to identify trends that demonstrate quality, safety, and effectiveness of healthcare.

SLO # 2: DEMONSTRATE AN UNDERSTANDING OF ORGANIZATIONAL RESOURCES, INCLUDING HUMAN RESOURCES.

Apply the fundamentals of team leadership.
HIT 160 Supervision for the Allied Health Professional

This course studies classic and current management principles in the healthcare setting. Students will be introduced to leadership styles, motivation principles, ethical standards, communication principles, and strategies for dealing with difficult behavior in the workplace.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- **SLO # 1: DEMONSTRATE AN UNDERSTANDING OF HEALTH DATA STRUCTURE, CONTENT AND USE.**
  - Collect and maintain health data (such as data elements, data sets, and databases).
  - Conduct analysis to ensure documentation in the health record supports the diagnosis and reflects the patient's progress, clinical findings, and discharge status.
  - Apply policies and procedures to ensure the accuracy of health data.
  - Contribute to the definitions for and apply clinical vocabularies and terminologies used in the organization’s health information systems.
  - Verify timeliness, completeness, accuracy, and appropriateness of data and data sources for patient care, management, billing reports, registries, and/or databases.
- **SLO # 2: DEMONSTRATE AN UNDERSTANDING OF QUALITY MANAGEMENT AND PERFORMANCE IMPROVEMENT.**
  - Recognize requirements for abstracting and reporting data for facility-wide quality management and performance improvement programs.
- **SLO # 3: DEMONSTRATE AN UNDERSTANDING OF HEALTHCARE PRIVACY, CONFIDENTIALITY, LEGAL AND ETHICAL ISSUES.**
  - Participate in the implementation of legal and regulatory requirements related to the health information infrastructure.
  - Apply policies and procedures for access and disclosure of personal health information.
  - Practice release of patient-specific data to authorized users.
  - Recognize requirements for conducting privacy and confidentiality training programs.
  - Investigate and recommend solutions to privacy issues/problems.
  - Apply and promote ethical standards of practice.
- **SLO # 4: DEMONSTRATE AN UNDERSTANDING OF HUMAN RESOURCES.**
  - Apply the fundamentals of team leadership.
  - Organize and contribute to work teams and committees.
  - Recognize requirements for conducting new staff orientation and training programs.
  - Recognize requirements for conducting continuing education programs.
  - Recognize requirements for monitoring staffing levels and productivity standards for health information functions, and provide feedback to management and staff regarding performance.
  - Communicate benchmark staff performance data.
  - Prioritize job functions and activities.
  - Use quality improvement tools and techniques to monitor, report and improve processes.
SLO # 5: DEMONSTRATE AN UNDERSTANDING OF FINANCIAL AND PHYSICAL RESOURCES.

- Make recommendations for items to include in budgets and contracts.
- Define the process for monitoring and ordering supplies needed for work processes.
- Describe the process for monitoring coding and revenue cycle processes.
- Recognize the process for recommending cost-saving and efficient means of achieving work processes and goals.
- Recognize the process required for contributing to work plans, policies, procedures, and resource requisitions in relation to job functions.

HIT 170 Health Information Technology Directed Practice

HIT 170 provides the student with practical work experience in community health-related institutions. The clinical experience is performed under professional supervision. Students perform delineated functions and will complete handbook questions about various health information management topics. Students shall have the status of learner and shall not be considered agency employees, nor shall they replace agency staff. Directed Practice is conducted as a non-paid laboratory experience. Students must have a TB clearance and any other immunization required by the clinical facility. A drug screen and background check may be required. Students must have an established Agency Agreement with a sponsoring site prior to the beginning of the first day of class. Contact the Career and Technology Main Office for information about the Agency Agreement.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO # 1: DEMONSTRATE AN UNDERSTANDING OF INFORMATION TECHNOLOGY AND SYSTEMS
  - Use technology, including hardware and software, to ensure data collection, storage, analysis, and reporting of information.
  - Use common software applications such as spreadsheets, databases, word processing, graphics, presentation, and e-mail, in the execution of work processes.
  - Use specialized software in the completion of HIT processes such as record tracking, release of information, coding, grouping, registries, billing, quality improvement, and imaging.
  - Apply policies and procedures to the use of networks, including intranet and Internet applications to facilitate the electronic health record (EHR), personal health record (PHR), public health, and other administrative applications.

- SLO # 2: DEMONSTRATE AN UNDERSTANDING OF DATA, INFORMATION AND FILE STRUCTURES
  - Apply knowledge of data base architecture and design (such as data dictionary, data modeling, data warehousing) to meet departmental needs.

- SLO # 3: DEMONSTRATE AN UNDERSTANDING OF DATA STORAGE AND RETRIEVAL
  - Use appropriate electronic or imaging technology for data/record storage.
  - Query and generate reports to facilitate information retrieval.
  - Design and generate reports using appropriate software.
  - Maintain archival and retrieval systems for patient information stored in multiple formats.
  - Coordinate, use, and maintain systems for document imaging and storage.

- SLO # 4: DEMONSTRATE AN UNDERSTANDING OF DATA SECURITY
  - Apply confidentiality and security measures to protect electronic health information.
  - Protect data integrity and validity using software or hardware technology.
  - Apply departmental and organizational data and information system security policies.

- SLO # 5: DEMONSTRATE AN UNDERSTANDING OF HEALTHCARE INFORMATION SYSTEMS

Units: 4
Hours: 36 hours LEC; 108 hours LAB
Prerequisite: HIT 102, 110, 122, 123, 140, and 150 with grades of "C" or better
Catalog Date: June 1, 2020
- Participate in the planning, design, selection, implementation, integration, testing, evaluation, and support for organization-wide information systems.
- Use the principles of ergonomics and human factors in work process design.
- SLO # 6: DEMONSTRATE AN UNDERSTANDING OF ORGANIZATIONAL RESOURCES.
- Use quality improvement tools and techniques to monitor, report, and improve processes.

HIT 172 Directed Practice: Health Information Coding Specialist

HIT 172 provides the student with practical work experience in community health-related institutions. The clinical experience is performed under professional supervision. Students perform coding and abstracting and other delineated functions and will complete handbook questions about various health information management topics. Students shall have the status of learner and shall not be considered agency employees, nor shall they replace agency staff. Directed Practice is conducted as a non-paid laboratory experience. Students must have a TB clearance and any other immunization required by the clinical facility. A drug screen and background check may be required. Students must have an established Agency Agreement with a sponsoring site prior to the beginning of the first day of class. Contact the Career and Technology Main Office for information about the Agency Agreement.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO # 1: DEMONSTRATE AN UNDERSTANDING OF HEALTH DATA MANAGEMENT AND CLINICAL CLASSIFICATION SYSTEMS.
- Use and maintain electronic applications and work processes to support clinical classification and coding.
- Apply diagnosis codes using ICD-CM/PCS.
- Ensure accuracy of diagnostic/procedural groupings such as Diagnosis Related Groups (DRG), Ambulatory Payment Classifications (APC) etc.
- Adhere to current regulations and established guidelines in code assignment.
- Validate coding accuracy using clinical information found in the health record.
- Use and maintain applications and processes to support other clinical classification and nomenclature systems (such as ICD-10-CM, SNOMED, and so on.)
- Resolve discrepancies between coded data and supporting documentation.

HIT 295 Independent Studies in Health Information Technology

<table>

</tr>
</tbody>
</table>

An independent studies project involves an individual student or small group of students in study, research, or activities beyond the scope of regularly offered courses. See the current catalog section of "Special Studies" for full details of Independent Studies.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO #1: Actively engage in intellectual inquiry beyond that required in order to pass a course of study (College Wide Learning Outcome – Area 4).
- Discuss and outline a proposal of study (that can be accomplished within one semester term) with a supervising instructor qualified within the discipline.
• Design an independent study (to be completed individually or by collaboration of a small group) to foster special knowledge, skills, and experience that are not available in any one regularly scheduled course.

• Use information resources to gather discipline-specific information.

• SLO #2: Utilize modes of analysis and critical thinking to apply theoretical perspectives and/or concepts in the major discipline of study to significant problems and/or educational activities (College Wide Learning Outcome – Area 3).

• Analyze and apply the knowledge, skills, and experience that are involved in the independent study to theoretical perspectives and/or concepts in the major discipline of study.

• Explain the importance of the major discipline of study in the broader picture of society.

• SLO #3: Communicate a complex understanding of content matter of the major discipline of study (College Wide Outcome – Area 3).

• Demonstrate competence in the skills essential to mastery of the major discipline of study that are necessary to accomplish the independent study.

• SLO #4: Identify personal goals and pursue these goals effectively (College Wide Outcome – Area 4).

• Utilize skills from the “academic tool kit” including time management, study skills, etc., to accomplish the independent study within one semester term.

HIT 298 Work Experience in Health Information Technology

This course provides students with opportunities to develop marketable skills in preparation for employment in their major field of study or advancement within their career. It is designed for students interested in work experience and/or internships in associate degree level or certificate occupational programs. Course content includes understanding the application of education to the workforce; completion of required forms which document the student's progress and hours spent at the work site; and developing workplace skills and competencies. Appropriate level learning objectives are established by the student and the employer. During the semester, the student is required to participate in a weekly orientation and 75 hours of related paid work experience, or 60 hours of unpaid work experience for one unit. An additional 75 or 60 hours of related work experience is required for each additional unit. Work Experience may be taken for a total of 16 units when there are new or expanded learning objectives. Only one Work Experience course may be taken per semester.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

• DEMONSTRATE AN UNDERSTANDING AND APPLICATION OF PROFESSIONAL WORKPLACE BEHAVIOR IN A FIELD OF STUDY RELATED ONE’S CAREER.(SLO 1)

• Understand the effects time, stress, and organizational management have on performance.

• Demonstrate an understanding of consistently practicing ethics and confidentiality in a workplace.

• Examine the career/life planning process and relate its relevancy to the student.

• Demonstrate an understanding of basic communication tools and their appropriate use.

• Demonstrate an understanding of workplace etiquette.

• DESCRIBE THE CAREER/LIFE PLANNING PROCESS AND RELATE ITS RELEVANCY TO ONE’S CAREER.(SLO 2)

• Link personal goals to long term achievement.

• Display an understanding of creating a professional first impression.

• Understand how networking is a powerful job search tool.

• Understand necessary elements of a résumé.

• Understand the importance of interview preparation.
- Identify how continual learning increases career success.

- DEMONSTRATE APPLICATION OF INDUSTRY KNOWLEDGE AND THEORETICAL CONCEPTS AS WRITTEN IN LEARNING OBJECTIVES IN PARTNERSHIP WITH THE EMPLOYER WORK SITE SUPERVISOR (SLO 3)
Health Records Information Technology
| Cosumnes River College

The Health Records Information Technology program is in the process of discontinuance and will not be accepting new students.

The Health Records IT certificates are designed to quickly train students in the kind of computerized health information systems that are being installed by hospitals, medical and dental offices across the country. These IT systems make it possible for health care providers to better manage patient care through secure use and sharing of health information in electronic form. The electronic systems are replacing inefficient paper records and allow health providers to quickly review and update a patient’s medical history, which can be shared electronically as patients move to other health systems and/or to other geographic locations. Students completing these programs will support the IT systems that are in place in various health care related facilities.

Certificates of Achievement

Health Records IT Implementation Support Specialist Certificate

Students who complete this certificate will be prepared to provide on-site user support for the period of time before and during implementation of Health IT systems in clinical and public health settings. These individuals will provide support services, above and beyond what is provided by the vendor, to be sure the technology functions properly and is configured to meet the needs of the redesigned practice workflow.

**Student Learning Outcomes**

Upon completion of this program, the student will be able to:

- Execute implementation project plans, by installing hardware (as needed) and configuring software to meet practice needs.
- Incorporate usability principles into software configuration and implementation.
- Test the software against performance specifications.
- Interact with the vendors as needed to rectify technical problems that occur during the deployment process.
- Proactively identify software or hardware incompatibilities.
- Assist the practice in identifying a data back-up and recovery solution, and ensure the solution is effective.
- Ensure that the mechanism for hardware/software recovery (e.g., data backup or redundant systems) and related capabilities are appropriately implemented to minimize system downtime.
- Ensure that privacy and security functions are appropriately configured and activated in hardware and software.
- Document IT problems and evaluate the effectiveness of problem resolution.
- Assist end users with the execution of audits.
- Demonstrate effective listening skills to comprehend spoken messages, analyze information critically and consider multiple perspectives.
- Express ideas clearly in effective, appropriate and well-organized format.

**Career Information**

Health Care/IT Implementation Support Specialist

**Health Records IT Technical Support Specialist Certificate**

Students who complete this certificate will be prepared to support, on an ongoing basis, the technology deployed in clinical and public health settings. Workers in this role maintain systems in clinical and public health settings, including patching and upgrading of software. They also provide one-on-one support, in a traditional “help desk” model, to individual users with questions or problems.

Student Learning Outcomes

Upon completion of this program, the student will be able to:

- Interact with end users to diagnose IT problems and implement solutions.
- Document IT problems and evaluate the effectiveness of problem resolution.
- Support systems security and standards.
- Assist end users with the execution of audits and related privacy and security functions.
- Incorporate usability principles into ongoing software configuration and implementation.
- Ensure that the hardware/software “fail-over” and related capabilities are appropriately implemented to minimize system downtime.
- Ensure that privacy and security functions are appropriately configured and activated in hardware and software.
- Interact with the vendors as needed to rectify technical problems that occur during the deployment process.
- Work with the vendor and other sources of information to find the solution to a user’s question or problem as needed.
- Describe the purpose of typical networking hardware and software.
- Summarize the mechanisms used to make network data continuously available.
- Analyze fundamental security concepts.
- Demonstrate effective communication skills.
- Review the skills for troubleshooting computer problems.
- Examine common support problems.

Career Information

Technical Support Staff or Software Support Staff
Health Records IT Trainer Certificate

Students who complete this certificate will be prepared to design and deliver training programs, using adult learning principles, to employees in clinical and public health care settings.

Student Learning Outcomes

Upon completion of this program, the student will be able to:

- Assess a range of Health Records IT applications, preferably at an expert level
- Communicate proficiently using both health care and IT concepts
- Assess training needs and competencies of adult learners
- Build lesson plans while structuring active learning principles for the users
- Analyze training records of the users and develop appropriate learning plans
- Demonstrate effective listening skills to comprehend spoken messages, analyze information critically and consider multiple perspectives.
- Express ideas clearly in effective, appropriate and well-organized format.

Career Information

Health Care IT Trainer/Instructor

Health Records Information Technology (HRIT)
HRIT 100 Introduction to Health Care and Public Health in the U.S.

Units: 2
Hours: 36 hours LEC
Prerequisite: None.
Catalog Date: June 1, 2020

This course is a survey of how health care and public health are organized and services delivered in the United States. It also covers public policy, relevant organizations and their interrelationships, professional roles, legal and regulatory issues, and payment systems.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- EXAMINE THE MEDICAL MODEL OF HEALTH CARE IN THE U.S. (SLO #01)
- Distinguish between health care systems and health care practice
- Measure key paradigm shifts in medicine
- Examine in overview terms the technology used in the delivery and administration of health care

- EVALUATE THE ADMINISTRATIVE AND FUNCTIONAL ORGANIZATION OF ENTITIES THAT DELIVER HEALTH CARE IN THE U.S., BOTH IN THE INPATIENT AS WELL AS THE OUTPATIENT SETTING (SLO #02)
- Compare the organization of healthcare at the federal, state and local levels
- Compare different types of long term care facilities, with an emphasis on their function

- RESEARCH THE ROLE OF VARIOUS HEALTHCARE PROFESSIONALS, THEIR EDUCATION, AND CERTIFICATION/LICENSURE REQUIREMENTS (SLO #03)
- Compare the organization of clinical health care delivery in the outpatient setting, and the organization of outpatient health care delivery (including organizational characteristics such as large medical groups, IPAs, small and single-provider offices, and types of outpatient environments such as multispecialty offices, single specialty offices, community health centers, urgent care centers and teaching/training clinics)
- Describe the organization of ancillary health care delivery in the outpatient setting
- Discuss the role of different health care providers, with an emphasis on the delivery of care in an interdisciplinary setting, and their education and licensing

- EXAMINE HEALTH CARE FINANCING STRUCTURES, INCLUDING INSURANCE PLANS, THIRD-PARTY Payers, MEDICARE, AND MEDICAID (SLO #04)
- Describe models of health care financing in the US and in selected other countries
- Describe the organization and function of Medicare and Medicaid
- Analyze the organization and structure of network-based managed care health insurance programs

- ASSESS METHODS OF BILLING AND REIMBURSEMENT IN HEALTHCARE (SLO #05)
- Describe concepts of billing and reimbursement in medicine
- Summarize, at a broad overview level, concepts of coding
- Discuss methods to control exorbitant medical costs

- COMPARE AND CONTRAST THE FUNCTION OF THE JOINT COMMISSION, FDA, CDC, AND NIH, WITH AN EMPHASIS ON EHRS (SLO #06)
- Categorize the organization and role of the Department of Health and Human Services (HHS), including the Office of the Secretary and the agencies of the HHS
- Describe the role of JCAHO and the process of accreditation and certification of health care organizations in the U.S.
- Identify major health care regulatory bodies in the U.S.
- Describe the key processes in regulating the confidentiality and safety of the patient in the health care environment
- Discuss legal aspects of medicine including medical malpractice and tort reform

- CONTRAST THE ORGANIZATION OF PUBLIC HEALTH IN THE U.S. AT THE FEDERAL, STATE, AND LOCAL LEVELS, AND DISCUSS THE ROLE OF PUBLIC HEALTH IN AVERTING EPIDEMICS AND BIO-TERRORISM (SLO #07)
Discuss the role of public health in mitigating the severity of communicable and chronic diseases, and in averting bioterrorism

DESCRIBE EVIDENCE-BASED MEDICINE, CLINICAL PRACTICE GUIDELINES, AND QUALITY INDICATORS IN MEDICINE. IDENTIFY KEY ORGANIZATIONS INVOLVED IN DEVELOPING CLINICAL GUIDELINES (SLO #08)

Uncover evidence-based medicine, clinical practice guidelines, and quality indicators in medicine

Inspect the patient-centered medical home

Discuss the key issues driving health care reform in the U.S.

HRIT 102 The Culture of Health Care

Units: 2
Hours: 36 hours LEC
Prerequisite: None.
Catalog Date: June 1, 2020

This course addresses job expectations in a health care setting. It covers how care is organized inside a practice setting, privacy laws, and professional and ethical issues encountered in the workplace.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- ANALYZE THE MAJOR TYPES OF CLINICAL PERSONNEL INVOLVED IN HEALTH CARE, INCLUDING THEIR EDUCATION AND TRAINING, CERTIFICATION AND LICENSURE, AND TYPICAL ROLES IN HEALTH CARE (SLO #01)
- Categorize common medical specialties and sub-specialties
- Assess doctors and nurses (their education, training, certification, licensure, and roles)
- Describe the major types of settings in which health care occurs including ambulatory care, acute and emergency care, hospital based and critical care, and community health and public health settings.
- UNCOVER THE MAJOR TYPES OF SETTINGS IN WHICH HEALTH CARE OCCURS INCLUDING AMBULATORY CARE, ACUTE AND EMERGENCY CARE, HOSPITAL BASED AND CRITICAL CARE, AND COMMUNITY HEALTH AND PUBLIC HEALTH SETTINGS (SLO #02)
- Distinguish between outpatient care and secondary care
- COMPARISONTHE MAJOR PROCESSES OF INFORMATION GATHERING, ANALYSIS, AND DOCUMENTATION USED BY CLINICIANS TO DETECT, UNDERSTAND, AND PREVENT OR TREAT DISEASES (SLO #03)
- Critique the classic paradigm (one doctor, one patient, one problem, one episode)
- Compare the differences between nursing assessment, intervention, and judgment
- EXAMINE THE ROLE OF COMMUNITY HEALTH AND PUBLIC HEALTH IN MANAGING ILLNESS OUTBREAKS, EPIDEMICS, AND PANDEMICS (SLO #04)
- INSPECT THE ROLE OF MEDICAL ETHICS AND PROFESSIONAL VALUES IN CARE DELIVERY INCLUDING SUCH ISSUES AS PRIVACY (INCLUDING HIPAA), ETHICAL CONFLICTS, AND HEALTH DISPARITIES (SLO #05)
- Critique the Oath of Geneva
- Compare the principles of medical ethics (autonomy, beneficence, non-maleficence and justice)
- Evaluate some common ethical conflicts (privacy and confidentiality, end of life care, death with dignity, disparities in health care, ‘rationing’ of care and clinician religious and conscientious objection)
- ANALYZE COMMON FORMS OF QUALITY MEASUREMENT, PERFORMANCE IMPROVEMENT, AND INCENTIVE PAYMENT SCHEMES MEANT TO INFLUENCE CARE DELIVERY (SLO #06)
- Examine quality measurement, performance improvement, and incentive payment schemes meant to influence care delivery
- Evaluate socio-technical aspects of medicine
- Rate the interaction and interdependence of social and technical issues, such as the "resistance to change"
HRIT 104 Medical Terminology for Health Records IT Professionals

This course is designed to give IT Professionals an overview of medical language. Students will learn basic terms found in the health care systems. This course is intended only for students in the HRIT program. If you are interested in other Allied Health programs, please see a counselor or someone in the appropriate department to determine which medical terminology course will meet your program's requirements.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- POSSESS A BASIC WORKABLE KNOWLEDGE OF MEDICAL VOCABULARY – SLO #1
- Utilize medical terms correctly as they apply to the systems of the body - anatomy, physiology, disease, diagnosis, and treatment
- Define medical abbreviations and translate in to non-medical language.
- ANALYZE THE STRUCTURAL DESIGN OF MEDICAL TERMS - SLO #2
- Compose medical words with correct spelling and pronunciation
- Identify component parts of a medical word including prefixes, suffixes and combining forms.

HRIT 112 Networking and Health Information Exchange for Health Records IT Professionals

This course is designed to give IT Professionals an overview of data mobility. Students will learn about hardware infrastructure, Internet protocols, nationwide health records information systems, and other nationwide approaches.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- POSSESS A BASIC WORKABLE KNOWLEDGE OF THE COMPONENTS OF HEALTH RECORDS IT STANDARDS FOR HEALTH INFORMATION EXCHANGE-SLO #1.
- Identify component parts of health records IT standards, including Health Level 7 and Technical Committee standard 215.
- POSSESS A BASIC KNOWLEDGE OF PRIVACY, CONFIDENTIALITY, AND SECURITY STANDARDS FOR HEALTH INFORMATION EXCHANGE-SLO #2
- Describe professional and regulatory standards related to privacy, confidentiality, and security when implementing and maintaining networks and health information exchange systems.

HRIT 132 Configuring Electronic Health Records (EHRs)

This course offers a practical experience with a laboratory component, addressing approaches to assessing, selecting, and configuring EHRs to meet the specific needs of customers and end-users.
Student Learning Outcomes

Upon completion of this course, the student will be able to:

- EXPLAIN THE IMPORTANCE OF MIGRATING TO AN ELECTRONIC HEALTH RECORD (EHR) SYSTEM (SLO #01).
- Describe the migration to the electronic health record.
- Determine the appropriate members for a steering committee, who are planning to move to electronic health records.
- Define the steps in a basic strategic management plan.
- RELATE THE IMPORTANCE OF MEANINGFUL USE TO DEFINE THIS FIELD (SLO #02).
- Understand the process and purpose of EHR certification and the work of CCHIT and other possible certifying bodies.
- Understand how the exchange of electronic health data relates to meaningful use.
- Understand how clinical quality measures relate to meaningful use.
- DEFINE A CLINICAL DECISION SUPPORT (CDS) SYSTEM (SLO #03).
- Define what is meant by clinical decision support (CDS) systems.
- Discuss key factors in the development of CDS for clinical and administrative use.
- Given a case study, analyze the issues related to provider fatigue related to alerts and reminders.
- EVALUATION OF AN EHR SYSTEM AND SELECTION CRITERIA FOR A HOSPITAL AND A DOCTOR’S OFFICE (SLO #04).
- Analyze/interpret user specification requirements against vendor specifications.
- Assess interpersonal skills between IT and user.
- Discuss/role-play the interaction between IT and user for successful development of user data entry screens and templates.
- Discuss key issues in electronic health record development and implementation affecting acute care.
- Discuss key issues in electronic health record development and implementation affecting long term care including interchange of health information with acute care.
- Discuss key issues in electronic health record development and implementation affecting ambulatory care including interoperability with acute care, ASP and community offerings for an EHR.
- Discuss key issues in electronic health record development in other health care settings including physician practice, home health and hospice, behavioral health, and health departments.

HRIT 140 Introduction to Health Records Management
Information Systems

Units: 2
Hours: 36 hours LEC
Prerequisite: None.
Catalog Date: June 1, 2020

This course is an introduction to health records IT standards, health-related data structures, software applications, and enterprise architecture in health care and public health organizations.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- RECOMMEND SOME GENERAL FUNCTIONS, PURPOSES AND BENEFITS OF HEALTH INFORMATION SYSTEMS, WHY THEY ARE NEEDED, AND THE BENEFITS THEY PROVIDE IN DIFFERENT HEALTHCARE AND PUBLIC HEALTH SETTINGS (SLO #01)
- Detect how health informaticians process data into information and knowledge for health care tasks with the support of information technology to improve patient care
- Critique the professional roles and skills of health informaticians
- Recommend some good information management, information technology and informatics systems
- INVESTIGATE THE SIGNIFICANT DEVELOPMENTS AND FEDERAL INITIATIVES THAT HAVE INFLUENCED THE EVOLUTION AND ADOPTION OF HEALTH INFORMATION SYSTEMS (SLO #02)
• COMPARE AND CONTRAST THE DIFFERENT TYPES OF HEALTH INFORMATION SYSTEMS IN TERMS OF THEIR ABILITY TO SUPPORT THE REQUIREMENTS OF A HEALTH CARE ENTERPRISE (SLO #03)

• Define the concept of an information system in general and characteristics of an information system and a health information system in particular

• Examine the challenges presented by emerging trends in information technology (e.g., mobility, web services, the Internet, Intranet, and wireless computing), social media, and global communications

• Discuss the advantages and disadvantages of using the Internet as a platform for health care applications

• MEASURE HOW ELECTRONIC HEALTH RECORDS AFFECT PATIENT SAFETY, QUALITY, EFFICIENCY AND PATIENT CARE, PRODUCTIVITY, AND REPORTING OUTCOMES (SLO #04)

• Compare and contrast the similarities and differences between an electronic medical record (EMR) and electronic health record (EHR)

• Explain how the use of an EHR can affect patient care safety, efficiency of care practices, and patient outcomes

• Outline issues regarding governmental regulation of EHR systems such as meaningful use of interoperable health information technology and a qualified EHR

• Identify how ongoing developments in biomedical informatics can affect future uses and challenges related to health information systems

• Research how the Institute of Medicine’s ‘Vision for 21st Century Health Care’ and ‘Wellness’ may impact health management information systems

• PROPOSE STRATEGIES TO MINIMIZE MAJOR BARRIERS TO THE ADOPTION OF ELECTRONIC HEALTH RECORDS (SLO #05)

• Examine the purposes, processes, storage concerns, and management issues related to the use of imaging systems in healthcare

• Analyze the purpose, attributes and functions of patient monitoring systems

• Analyze how the integration of data from many sources assists health care professionals in making clinical decisions

• Examine the role of smart technology and links to health information systems for use in the home

• EMPLOY THE PRINCIPLES OF HEALTHCARE DATA EXCHANGE AND STANDARDS, WORKFLOW DESIGN AND ASSESSMENT, AND THEIR RELATIONSHIP TO PATIENT CARE (SLO #06)

• Discuss how current and emerging technologies may influence consumer health informatics

• Explore the strategies used by healthcare organizations to ensure integration of front-end clinical data collection, back-end billing functions

• Explain how automation tools (such as scheduling system support tools) need to be and are being integrated in health information systems

• Describe the significance of information systems in promoting the health of the public and communities

• Examine how a national health information infrastructure is related to homeland security

• Explore how public health related large-scale strategies and other federal initiatives are likely to shape the development of an HAI Information Architecture

HRIT 142 Installation and Maintenance of Health Records IT Systems

**Units:** 2
**Hours:** 27 hours LEC; 27 hours LAB
**Prerequisite:** CISA 320, CISC 356, and HCIT 112 with grades of “C” or better
**Catalog Date:** June 1, 2020

This course covers the installation and maintenance of a Health IT system, including testing prior to implementation. Introduction to principles underlying system configuration is also covered.

**Student Learning Outcomes**

Upon completion of this course, the student will be able to:

• DESCRIBE THE USE OF CLIENT AND SERVER HARDWARE TO ACCESS AND STORE EHRS (SLO #01).

• Describe network needs to access and store EHRs.
Identify application software and back-end data storage software in a Health IT System.

DEFINE COTS (COMMERCIAL OFF-THE-SHELF) AND IN-HOUSE/HOMEGROWN SYSTEMS AND DESCRIBE THEIR RELATIVE ADVANTAGES AND DISADVANTAGES (SLO #02).

Estimate costs and consider advantages and disadvantages of purchasing versus licensing hardware and software.

Explain vendor documentation of system functionality and requirements.

Determine whether systems meet ARRA “Meaningful Use” criteria.

Compare and rank vendor systems.

Evaluate and select system based on requirements and certification needs.

IDENTIFY POSSIBLE STEPS TO CHOOSING AN EHR SYSTEM (SLO #03).

Gather functional requirements from institution and users.

Document use-cases and relate them to functional requirements.

Prioritize functional requirements, including grouping as essential versus desired.

Identify minimum and recommended software and hardware requirements.

CREATE PROJECT PLAN FOR SYSTEM DESIGN AND IMPLEMENTATION, INCLUDING DATA MIGRATION AND CONVERSION (SLO #04).

DEFINE THE STEPS OF THE SOFTWARE DEVELOPMENT LIFE CYCLE (SDLC) AND THE PURPOSE AND IMPORTANCE OF EACH ONE (SLO #05).

Map project plan to SDLC model.

Choose a popular, commonly-known software application and describe how it might have gone through the SDLC.

IDENTIFY REGULATORY REQUIREMENTS, SUCH AS HIPAA, FOR EHRs AND INTEGRATE THEM INTO THE PROJECT PLAN (SLO #06).

Identify best practices for OS and network system security installation and patches (such as those provided by vendors, SANS, and ISC2) and integrate into project plan.

Provide training for system users regarding the methods and importance of security compliance.

IDENTIFY AND IMPLEMENT AN EFFECTIVE TROUBLESHOOTING PROCEDURE FOR REPORTING, EVALUATING, FIXING, DEPLOYING, AND FOLLOWUP OF ERRORS, PROBLEMS, OR LIMITATIONS FOR THE SYSTEM (SLO #07).

Develop a process for communicating requirements and supplying updates between vendors/developer and users.

Create a baseline for system performance measurement and comparison for troubleshooting.

PERFORM SYSTEM TESTING AND VALIDATION (SLO #08).

Gather user feedback and performance baseline for system validation and testing

Document problems with their resolution status.

Create, execute, and document a test plan.

HRIT 144 Working with Health Records IT Systems

Units: 2
Hours: 27 hours LEC; 27 hours LAB
Prerequisite: HCIT 142 with a grade of “C” or better
Catalog Date: June 1, 2020

Students will work with simulated systems or real systems with simulated data. As they play the role of practitioners using these systems, they will learn what is happening “under the hood.” They will experience threats to security and appreciate the need for standards, high levels of usability, and how errors can occur.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- UNDERSTAND THE COMPONENTS OF A HEALTH IT SYSTEM (SLO #01).
Define a system and relate systems concepts to HIT
Discuss specific examples of settings where Health IT is used (acute, rural, public health, clinic, office, patient home, etc.).
Identify common components of a clinical HIT system.
Demonstrate beginning level competency in maneuvering the demonstration EHRS.
IDENTIFY THE FUNCTIONS OF A HEALTH IT SYSTEM (SLO #02).
- Identify the health IT functions that support a generic ambulatory patient care process.
- Identify the health IT functions that support a generic inpatient care process.
DISCUSS THE WAY INFORMATION IS EXCHANGED IN A HEALTH IT SYSTEM (SLO #03).
- Identify common elements of the HIT system.
- Explain the need for standards and why they exist.
- Define and differentiate between messaging standards and terminology standards.
- Compare current efforts to facilitate health information exchange between providers, communities, regions, & nation. (basic level definitions/descriptions – NHIN, HIEs, etc.).
UNDERSTAND THE EFFECTIVENESS OF A HEALTH IT SYSTEM (SLO #04).
- Identify characteristics of an effective HIT system.
- Define and provide examples of how evidence-based practice can be supported in HIT Systems.
- List and contrast different types of reports/queries (predefined vs. ad hoc) required for internal and external reporting.
DEFINE THE USEABILITY OF A HEALTH IT SYSTEM (SLO #05).
- Define usability in relation to HIT systems.
- Explain the impact of HIT usability on user satisfaction, adoption, and workarounds in error rates or unintended consequences.
- Provide alternatives to HIT usability bottlenecks.
RECITE ISSUES RELATED TO PRIVACY, SECURITY, AND CONFIDENTIALITY IN A HEALTH IT SYSTEM (SLO #06).
- Explain and illustrate privacy, security, and confidentiality in HIT settings.
- Identify common threats encountered when using HIT.
- Formulate strategies to minimize threats to privacy, security, and confidentiality in HIT systems.

HRIT 160 Professionalism and Customer Service in the Health Care Environment

This course is designed to give IT Professionals an overview of the skills necessary to communicate effectively across the full range of roles that will be encountered in health care and public health settings.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- EXPLAIN KEY ELEMENTS OF CUSTOMER SERVICE IN HEALTH CARE IT-SLO #1
- Describe the definitions of customer service.
- Identify different approaches to customer service in Health Care IT.
- DEMONSTRATE EFFECTIVE WRITTEN AND ORAL COMMUNICATION APPROACHES TO COMMON COMMUNICATION INTERACTIONS-SLO # 2.
- Identify common roles in health care.
HRIT 162 Training and Instructional Design in Health Records IT

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- EXAMINE DIFFERENT INSTRUCTIONAL SYSTEMS DESIGN METHODS AND THE PHASES OF THE ADDIE MODEL OF INSTRUCTION DESIGN, TO A GIVEN POPULATION OF ADULT LEARNERS (SLO #01)
- Analyze the levels of learning per Bloom’s Taxonomic Domains (Cognitive, Affective, Psychomotor)
- Categorize the characteristics of adult learners and factors that could impact training design and learning outcomes
- Describe the five phases of the ADDIE (Analysis, Design, Development, Implementation, and Evaluation) model of instruction design.
- PLAN AND IMPLEMENT AN INSTRUCTIONAL NEEDS ASSESSMENT, GIVEN A SPECIFIC POPULATION OF USERS IN A HEALTH CARE SETTING (SLO #02)
- Identify an instructional design problem for a given group of learners and a training setting
- List a range of useful data collection methods for conducting needs assessments in healthcare settings
- Analyze learner, task, and situational characteristics
- Recognize the special training needs and constraints in a health care setting
- ASSEMBLE A LESSON PLAN USING APPROPRIATE INSTRUCTIONAL METHODS AND APPROACHES, GIVEN A SPECIFIC POPULATION OF LEARNERS (SLO #03)
- Compile measurable goals and learning objectives for a training program which meet the SMART criteria (Specific, Measurable, Attainable, Relevant, Time-bound)
- Make specific learning objectives based on Bloom’s Taxonomy, classifying learning from the simplest to the most complex levels
- Identify the appropriate instructional approaches tied to a needs analysis, situational characteristics, and subject matter domain when designing a lesson plan
- Select appropriate activities for training objectives
- Create learning objectives that are tied to needs analysis and outcomes
- CONSTRUCT AN INSTRUCTIONAL PRODUCT USING APPROPRIATE MEDIA, SUCH AS CUSTOMIZED IMAGES, CUSTOMIZED VIDEO (SLO #04)
- Design simple online tutorials using screen capture software
- Select appropriate instructional media for a given lesson plan and objectives/goals
- CREATE A CUSTOM PRESENTATION USING THE PRINCIPLES OF EFFECTIVE DESIGN, GIVEN A PARTICULAR TRAINING PROGRAM AND LEARNER POPULATION (SLO #05)
- Construct a script or storyboard for a presentation
- Distinguish between the appropriate use of color and text in a presentation
- Assess different software for designing instructional materials
- Design a custom slide background for a training program
- BUILD A MULTIMEDIA TRAINING/PRESENTATION, GIVEN A SET OF USER NEEDS AND TRAINING CONTEXT (SLO #06)
- Assess the training environment
- Modify a presentation to compensate for presentation constraints
- Demonstrate effective public speaking skills
- Operate necessary computer and AV equipment to make an effective multimedia presentation

**CONDUCT STUDENT OUTCOME ASSESSMENTS AND PROGRAM EVALUATIONS IN GIVEN TRAINING CONTEXTS (SLO #07)**
- Assess appropriate assessment/testing instruments and procedures aligned with instructional goals/objectives
- Conduct formative evaluations in one-on-one and group contexts

**DESIGN A TRAINING PROGRAM IN LEARNING MANAGEMENT SYSTEMS (LMS) THAT ADHERE TO THE STANDARDS AND OPEN SOURCE INITIATIVES IN ONLINE LEARNING (SLO #08)**
- Build a training program in an LMS, applying standards for online learning
- Identify the role of standards and open source initiatives in online learning
- Describe the basic functions and technologies in Learning Management Systems (LMS) and Content Management Systems (CMS)

**CLASSIFY AND IMPLEMENT WEB 2.0 TECHNOLOGIES AS INSTRUCTIONAL TECHNOLOGIES GIVEN A SPECIFIC PLATFORM AND TRAINING PROGRAM (SLO #09)**
- Distinguish between synchronous and asynchronous learning
- Utilize different tools within the design and delivery of online training
- Select an appropriate platform for a particular training program
- Use basic functions of an LMS or CMS

---

**HRIT 164 Usability and Human Factors in Health Records IT**

**Units:** 1  
**Hours:** 18 hours LEC  
**Prerequisite:** None  
**Catalog Date:** June 1, 2020

This course covers the discussion of rapid prototyping, user-centered design and evaluation, usability; understanding effects of new technology and workflow on downstream processes; and facilitation of a unit-wide focus group or simulation.

**Student Learning Outcomes**

Upon completion of this course, the student will be able to:

- ARTICULATE A SYSTEMS APPROACH TO USABILITY AND HUMAN FACTORS AS IT APPLIES TO HEALTH INFORMATION TECHNOLOGY (SLO #01)
- Assess the importance of technology in health
- Test the concept of system usability
- Distinguish patient safety issues
- EXPLAIN THE COGNITIVE CONSEQUENCES OF HEALTH INFORMATION TECHNOLOGY ON CLINICAL PERFORMANCE (SLO #02)
- Produce an understanding of how to conduct a workflow analysis
- Construct different methods to interpret results of data collection
- Support the need of gathering an usability evaluation
- COMPARE AND CONTRAST COGNITION AND HUMAN PERFORMANCE MODELS (SLO #03)
- Investigate the concept of cognitive engineering
- Examine the representational effect as it applies to human computer interaction and web design
- Correlate how cognition and human performance models should inform iterative design processes
- Examine human factors in relation to systems-design and the study of human errors and patient safety (SLO #04)
- Distinguish between human factors and human computer interactions (HCI) as they apply to usability
- Describe how the concepts of mental workload, selective attention and information overload affect usability
- Select the most appropriate usability evaluation method, given particular system, setting, and development phase (SLO #05)
- Rate the different usability testing environments, required equipment, logistics, and materials (moderator/facilitator guide, consent forms, and surveys) being used today
- Apply principles of usability and design to critiquing EHR systems and to making recommendations for iterative improvement (SLO #06)
- Analyze the role of usability testing, training and implementation of electronic health records
- Identify potential methods of assessing and rating EHR usability when selecting an appropriate EHR
- Explain how user-centered design can enhance adoption of EHRs
- Diagnose problems associated with a clinical decision support system (SLO #07)
- Define clinical decision support and its relation to errors in clinical error
- Assess cognitive methods of analysis to medical device testing (SLO #08)
- Define the scope of medical devices in healthcare
- Distinguish the role of usability in mobile health devices and communication in healthcare
- Compare and contrast user interface designs using cognitive methods of analysis, usability testing, and Nielsen's heuristic evaluation method (SLO #09)
- Recognize whether an interface design exhibits good design principles
- Reason how requirements translate into good design
- Distinguish the difference between low fidelity and high fidelity prototypes and when it would be appropriate to use one versus the other
- Detect various types of errors and create or select potential solutions (SLO #10)
- Identify sources of error in medicine
- Define workflow analysis
- Explain the cognitive taxonomy of error
- Explain how to “design for safety”
- Detect appropriate technology input methods given different technology uses, user populations and contexts (SLO #11)
- Categorize and define a range of technology input methods (pen input, voice, gesture, menu structures & beyond, context-sensitive menus)
- Compare and contrast technology input methods
- Examine how information visualization can support and enhance the representation of trends and aggregate data (SLO #12)
- Critique the role of mobile and ubiquitous computing in healthcare (SLO #13)
- Define context-sensitive applications
- Examine the role of mobile and ubiquitous computing in healthcare

HRIT 180 Special Topics Course on Vendor-Specific Systems in Health Records IT

Units: 1
Hours: 18 hours LEC
Prerequisite: None.
Catalog Date: June 1, 2020
This course is designed to give IT Professionals an overview of the most popular vendor systems, highlighting the features of each and noting the differences between the systems.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- **ASSESS AND COMPARE COMMON COMMERCIAL EHR SYSTEMS-SLO #1**
  - Describe the most common commercial electronic health record systems used in ambulatory and inpatient care settings.
- **ANALYZE THE FUNCTIONALITY OF A VENDOR EHR SYSTEM, GIVEN A SET OF USER NEEDS-SLO #2**
  - Compare and contrast EHR functionality for CPOE, documentation, messaging, and results review among different vendor applications.

HRIT 298 Work Experience in Health Records Information Technology

This course provides students with opportunities to develop marketable skills in preparation for employment in their major field of study or advancement within their career. It is designed for students interested in work experience and/or internships in associate degree level or certificate occupational programs. Course content includes understanding the application of education to the workforce; completion of required forms which document the student's progress and hours spent at the work site; and developing workplace skills and competencies. Appropriate level learning objectives are established by the student and the employer. During the semester, the student is required to participate in a weekly orientation and 75 hours of related paid work experience, or 60 hours of unpaid work experience for one unit. An additional 75 or 60 hours of related work experience is required for each additional unit. Work Experience may be taken for a total of 16 units when there are new or expanded learning objectives. Only one Work Experience course may be taken per semester.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- **DEMONSTRATE AN UNDERSTANDING AND APPLICATION OF PROFESSIONAL WORKPLACE BEHAVIOR IN A FIELD OF STUDY RELATED ONE’S CAREER,(SLO 1)**
  - Understand the effects time, stress, and organizational management have on performance.
  - Demonstrate an understanding of consistently practicing ethics and confidentiality in a workplace.
  - Examine the career/life planning process and relate its relevancy to the student.
  - Demonstrate an understanding of basic communication tools and their appropriate use.
  - Demonstrate an understanding of workplace etiquette.
  - **DESCRIBE THE CAREER/LIFE PLANNING PROCESS AND RELATE ITS RELEVANCY TO ONE’S CAREER,(SLO 2)**
  - Link personal goals to long term achievement.
  - Display an understanding of creating a professional first impression.
  - Understand how networking is a powerful job search tool.
  - Understand necessary elements of a résumé.
  - Understand the importance of interview preparation.
  - Identify how continual learning increases career success.
  - **DEMONSTRATE APPLICATION OF INDUSTRY KNOWLEDGE AND THEORETICAL CONCEPTS AS WRITTEN IN LEARNING OBJECTIVES IN PARTNERSHIP WITH THE EMPLOYER WORK SITE SUPERVISOR,(SLO 3)**
History | Cosumnes River College

Associate Degree for Transfer

A.A.-T. in History

The Associate in Arts in History for Transfer degree provides a clearly articulated curricular track for students who wish to transfer to a CSU campus, while also serving the diverse needs of students interested in the breadth and depth of the field of history. Additionally, this degree exposes students to the core principles and practices of the study of history in order to build a foundation for their future personal, academic and professional paths.

The Associate in Arts in History for Transfer Degree (AA-T) is designed to provide a seamless transfer pathway for students interested in pursuing a History degree in the California State University (CSU) system. The required and elective coursework surveys a broad spectrum of physical geography, human geography, geospatial technologies (e.g., GIS, the Global Positioning System, remote sensing), and related disciplines. The degree is comprised of lower division coursework typically required by CSU institutions. Students must complete a total of 60 transferable semester units with a minimum 2.0 GPA, to include either the California State University General Education Breadth pattern or the Intersegmental General Education Transfer Curriculum; students must also earn a grade of C or better in all the courses for the major as described in the Required Program. Upon successful completion of the degree requirements, students will be guaranteed admission to the CSU system with junior status and will not have to repeat lower division coursework. Students are encouraged to meet with a counselor to develop their educational plans as degree options and general education requirements vary for each university.

Catalog Date: June 1, 2020

Total Units: 18

1 Students completing both HIST 310 and 320, or both HIST 311 and 321, may not receive credit for both courses at all universities. Please see a counselor for more information.

2 One course from the following group if not used in World History/Western Civilization or List B above.

The Associate in Arts in History for Transfer (AA-T) degree may be obtained by completion of 60 transferable, semester units with a minimum 2.0 GPA, including (a) the major or area of emphasis described in the Required Program, and (b) either the Intersegmental General Education Transfer Curriculum (IGETC) or the California State University General Education Breadth Requirements.

Student Learning Outcomes

Upon completion of this program, the student will be able to:

- PSLO #1: Analyze and describe key developments and events in United States History.
- Analyze and describe key developments and events in Western and World Histories to 1500.
- Analyze and describe key developments and events in Western and World Histories from 1500 to the present.
- PSLO #2: Demonstrate an understanding of the historian's methods in reconstructing the past using primary and secondary sources.
- Identify and explain the sequence of cause and effect in history.
- Research and compose written work based on extensive research of primary and secondary source materials.
- PSLO #3: Evaluate the diversity in American and world societies with particular attention on race, ethnicity, class, gender, religion, and nation.
- Appreciate the role of geography in history.

History (HIST)

HIST 301 History of Western Civilization (to 1660)
History 301 is a survey course on Western Civilization from c. 3000 BCE to 1600 CE. The course will trace the origins, development, and advancement of European Civilization from antiquity to early modernization. In addition to political analysis, emphasis will be placed upon the socio-economic structures of various peoples discussed during the four thousand six hundred year time period. Finally, the birth, growth, and later fragmentation of Christianity will be covered.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- demonstrate an understanding of Western Civilization from c. 3000th BCE to the 17th century CE (SLO #1).
- evaluate and assess the development of key civilizations and imperial powers through the use of critical thinking skills.
- differentiate the diverse political and economical structures of each civilization and/or nation grouping covered in the course.
- compare and contrast the common and diverse cultural and spiritual values of European peoples during the Middle Ages.
- apply analytical skills in evaluating the effects of intellectual development on early Western Civilization.
- survey and incorporate the geography discussed in the class.
- demonstrate an understanding of the historian's methods in reconstructing the past using primary and secondary sources (SLO #2).
- analyze and describe selected topics from both lectures and required readings.
- research and compose written work based on extensive research of secondary source materials.

HIST 302 History of Western Civilization

This is a survey of Western Civilization from 1600 to the present. The course will trace the development and advancement of European nation-states from early modernization to the crises of the World Wars. In addition to political analysis, emphasis will be placed upon the ideological and socio-economic structures that developed during the last four hundred years of the 20th century. Finally, the effects of the Cold War and decolonization will also be addressed.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- demonstrate an understanding of Western Civilization from the 17th century to the present (SLO #1).
- evaluate and assess the development of nation-states in both Western and Eastern Europe through the use of critical thinking skills.
- differentiate the diverse political and economical structures of each nation group covered in the course.
- compare and contrast the common and diverse cultures of both Western and Eastern Europeans.
- apply analytical skills in evaluating the effects of intellectual development on European History.
- survey and incorporate the geography discussed in the class.
- demonstrate an understanding of the historian's methods in reconstructing the past using primary and secondary sources (SLO #2).
analyze and describe selected topics from both lectures and required readings.
research and compose written work based on extensive research of secondary source materials.

HIST 307 History of World Civilizations to 1500

Units: 3
Hours: 54 hours LEC
Prerequisite: None.
Advisory: ENGWR 300, or placement through the assessment process.
Transferable: CSU; UC
General Education: AA/AS Area V(b); CSU Area D6; IGETC Area 4F
Catalog Date: June 1, 2020

History 307 is a survey course on world civilization from c. 3000 BCE to 1500 CE. The course will trace the development of various peoples beginning with the first civilizations of Mesopotamia, India, and China to the establishment of great empires and infant nations of the world. In addition to political analysis, emphasis will be placed upon the advancement of various world cultures and social structures. Particular attention will be placed on the lives of the common people of various civilizations discussed during the four thousand, five hundred year time period. Finally, various world religions will be highlighted during the duration of the course.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- demonstrate an understanding of World Civilization from c. 3000 BCE to the 16th century CE (SLO #1).
- evaluate and assess the development of key civilizations and imperial powers through the use of critical thinking skills.
- differentiate the diverse political and economical structures of each civilization and/or nation group covered in the course.
- compare and contrast the development of religious values and the universal use of religion to manipulate the masses.
- apply analytical skills in evaluating the effects of intellectual development on influential civilizations.
- survey and incorporate the role of geography on developing civilizations discussed in the class.
- demonstrate an understanding of the historian's methods in reconstructing the past using primary and secondary sources (SLO #2).
- analyze and describe selected topics from both lectures and required readings.
- research and compose written work based on extensive research of secondary source materials.

HIST 308 History of World Civilizations, 1500 to Present

Units: 3
Hours: 54 hours LEC
Prerequisite: None.
Advisory: ENGWR 300, or placement through the assessment process.
Transferable: CSU; UC
General Education: AA/AS Area V(b); AA/AS Area VI; CSU Area D6; IGETC Area 4F
C-ID: C-ID HIST 160
Catalog Date: June 1, 2020

History 308 is a survey course on world civilization from 1500 to the present age. The course will cover the political, economic, and intellectual developments of various world social and cultural structures. Particular emphasis will be placed upon the increased integration of peoples and cultures as a result of globalization. Additional focus will center upon the influencing effects of modern warfare, military technology, and international politics in shaping world society. Analysis of these revolutionary changes of the past five hundred years will offer a better understanding of world society today.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- demonstrate an understanding of World Civilization from the 16th century to the present by comparing the diverse political and economic structures of each civilization /or nation covered in the course (SLO #1).
- evaluate and interpret primary and secondary sources to better understand the historian's methods in reconstructing the past (SLO #2).
HIST 310 History of the United States

This is a survey course on the establishment and development of the United States from its colonial beginnings to the end of Reconstruction in 1877. Particular emphasis will be placed upon the political, economic, social, and cultural developments of the United States during the designated time period. The course will cover the ideological influences that were instrumental in shaping the Constitution and other related government structures. Additionally, the course will address the institution of slavery and how the divisive issue dismembered the nation and further complicated the process of Reconstruction.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO #1 Demonstrate a basic knowledge of the key events, individuals, and themes that have shaped United States history, to 1877.
- Demonstrate a working knowledge of the chronology involved in this period of United States history.
- Analyze the roles, contributions, sacrifices, and both the unique and common experiences of the wide variety of people who have been significant in the development of the United States in this period.
- Assess the major aspects of the institution of slavery and the Atlantic Slave Trade as they relate to the development of the United States. These phenomena will be examined in terms of economics, culture, politics, religion and society.
- Demonstrate a clear understanding of the geography of the area under study and offer a hypothesis concerning the role of geography in the development of the United States.
- Investigate the philosophical reasoning behind and the nature of democratic ideology with a particular emphasis on the philosophical thinking of the framers of the Constitution and their antecedents.
- Illustrate the relationship between national, state, and local governments and evaluate the effectiveness of the federal system.
- SLO #2 Demonstrate an understanding of and an appreciation for historiography.
- Examine methods of organizing and recording information; testing methods; distinguishing fact from opinion; the importance of historical distance, reflection and revision; the use of numerous and sometimes conflicting sources; the use of the past in an attempt to understand the present and speculate about (and prepare) for the future.
- Research and prepare written work based on extensive use of primary and secondary sources.
- SLO #3 Demonstrate the mastery of higher level analytical skills.
- Illustrate the realities of history's inter-connectedness through the ability to compare and contrast events, times, individuals.
- Develop historical themes using events and individuals from vastly different time periods.
- Evaluate and analyze the connection between events in other parts of the world and developments in the United States.
- Offer an appraisal of the cyclical nature of history.

HIST 311 History of the United States
This is a survey course on the development and growth of the United States from Reconstruction to the present day. Particular emphasis will be placed upon the political, economic, social and cultural developments during the designated time period. The course will cover the establishment and evolutionary status of the U.S. as a leading world power. Additionally, the course will address the changes to American society resulting from various revolutionary movements on race, gender, orientation, and labor. Includes coverage of California state and local government.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- Demonstrate a basic knowledge of the key events, individuals, and themes that have shaped United States History from 1865-Present (SLO #1).
- Illustrate the nature of cause and effect relationships, concepts of continuity and change, the impact of ideas and individuals, and how it is that members of society both shape and are shaped by History.
- Apply analytical skills in evaluating changes in both domestic and foreign affairs during the course time period (SLO #2).
- Investigate and critically assess the roles, contributions, sacrifices and both the unique and common experiences of the wide variety of social and ethnic groups who have been significant in the development of the United States in this period.
- Demonstrate an understanding of the historian's methods in reconstructing the past using primary and secondary sources (SLO #3).
- Analyze different methods in reviewing information and distinguishing fact from bias in an attempt to understand the present and speculate about (and prepare for) the future.
- Survey and incorporate the chronology and the geography discussed in this course.
- Compare and contrast both Democrat and Republican Party platforms that evolved during the late 19th to early 21st centuries.
- Research and compose written work based on primary and secondary source materials.
- Critique the special role California has played in the growth and development of the United States in this period. Specifically, they will focus on the origins and revision of the California constitution; the nature and processes of state government and their impact on the nation as a whole (i.e. Progressive Era reforms); California's ethnic and social diversity; California today.

HIST 314 Recent United States History

This is a survey of the development and growth of the United States from the conclusion of World War II in 1945 to the present. Particular emphasis will be placed upon the political, economical, social, and cultural developments of the United States during the designated time period. The course will also address the establishment of the United States as a world power following the Second World War. Finally, particular emphasis will center upon the social and economical conditions of various minority groups, especially African Americans.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- demonstrate an understanding of United States History from 1945 to the present (SLO #1).
- apply analytical skills in evaluating the development of United States foreign policy during the Cold War and the current crusade against terrorism.
- evaluate and assess the evolution of socio-economic conditions in the United States during course's time period.
compare and contrast the development of both Democrat and Republican party platforms of the late 20th and early 21st centuries

demonstrate an understanding of the historian’s methods in reconstructing the past using primary and secondary sources (SLO #2).

survey and incorporate the geography discussed in the class.

analyze and describe selected topics from both lectures and required readings.

research and compose written work based on extensive research of secondary source materials.

HIST 320 History of the United States: African-American Emphasis

Units: 3  
Hours: 54 hours LEC  
Prerequisite: None.  
Advisory: ENGWR 300  
Transferable: CSU; UC (HIST 312 and 320 combined; maximum transfer credit is one course)  
General Education: AA/AS Area V(a); CSU Area D; CSU Area F1; CSU Area F2; IGETC Area 4F  
Catalog Date: June 1, 2020

U.S. History from the founding of Jamestown in 1607, through the Civil War. The course begins with a brief overview of the Black American’s African heritage. It continues with the role played by African-American women as well as men in the growth and development of the nation. The U.S. Constitution and the establishment of American government institutions are also covered.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

• SLO #1 Students will demonstrate a basic knowledge of the key events, individuals, and themes that have shaped United States history, with an African-American to 1865.

• evaluate the complex interplay between World history and United States history with special emphasis put on the African American experience.

• identify and critique the crucial role major events and diverse social and ethnic groups have played in the shaping of American history.

• SLO #2 Students will demonstrate the mastery of higher level analytical skills:

• develop critical thinking skills particularly in the area of cause and effect and analyze and differentiate between trends in history.

• investigate the reasoning behind and the nature of democratic ideology with a particular emphasis on the philosophical thinking of the framers of the Constitution and their antecedents.

• illustrate the relationship between national, state, and local governments and evaluate the effectiveness of the federal system.

• critique the complex interplay between the historical experience of black people and the large society.

• develop analytical tools and objective attitudes in dealing with questions of race, ethnicity, class, sex and other controversial issues in U.S. history.

Units: 3  
Hours: 54 hours LEC  
Prerequisite: None.  
Advisory: ENGWR 300  
Transferable: CSU; UC (HIST 313 and 321 combined; maximum transfer credit is one course)  
General Education: AA/AS Area V(a); CSU Area D; CSU Area F1; CSU Area F3; IGETC Area 4F  
Catalog Date: June 1, 2020

U.S. History from 1865 to the present, including coverage of the state and local government, with an increased emphasis on the role of black women as well as men, spelling out their specific contributions in the growth and development of the nation. It includes coverage of California state and local government.
Upon completion of this course, the student will be able to:

- **SLO #1** Students will demonstrate a basic knowledge of the key events, individuals, and themes that have shaped United States history, with an African-American Emphasis from 1865 to the present.
- Evaluate the complex interplay between World history and United States history with special emphasis put on the African American experience.
- Identify and investigate the crucial role major events and certain individuals have played in the shaping of American history.
- **SLO #2** Students will demonstrate the mastery of higher level analytical skills:
  - Develop critical thinking skills particularly in the area of cause and effect and the analysis of trends in history.
  - Examine and analyze California history and its crucial role in the growth of the United States; its state constitutional processes and its social diversity with special emphasis put on the African American Experience.
  - Evaluate interplay between the historical experience of black people and the larger society.
  - Integrate analytical tools and objective attitudes in dealing with questions of race, ethnicity, class, sex and other controversial issues in U.S. history.

**HIST 331 Women in American History**

Survey history of the United States from 1607 to the present, emphasizing the economic and social conditions that gave women more actual respect and some public power. Course includes the roles of women in Native American tribes, the English heritage of the colonists, the contributions of women in creating new homes and farms, and the role of women in times of war. Emphasis on the role of women in the three major social issues of the 19th century: labor, abolition, and women's rights. Includes present-day issues and the legacy of how women in the past dealt with similar issues.

Upon completion of this course, the student will be able to:

- **SLO #1** Demonstrate an understanding of the basic facts, themes and chronology involved in the account of Women in American History.
- Critically analyze and compare the experiences of different groups of American women’s lives across time, paying particular attention to the ways that race, class, and ethnicity shaped their experiences.
- Assess the social, economic, and political arrangements that structured women’s status, and how they accepted or challenged these arrangements.
- Investigate and offer an appraisal of gender norms of different eras throughout American history and relate the experiences of women to broader themes in American history.
- Critique the social conditions that granted options to women.
- **SLO #2** Demonstrate an understanding of and appreciation for historiography.
- Differentiate between methods of organizing and recording information; testing methods; distinguishing fact from opinion; the importance of historical distance, reflection, and revision; the use of numerous and sometimes conflicting sources; the use of the past in an attempt to understand the present and speculate about (and prepare for) the future.
- **SLO #3** Demonstrate the mastery of higher level analytical skills.
- Offer an appraisal of the various historical explanations for women's past experiences, using both primary and secondary sources.
HIST 344 Survey of California History: A Multicultural Perspective

This is a survey course on the development and growth of California from its origins to the present time. Particular emphasis will be placed upon California's multicultural heritage and the state's significant local history. The course will examine, compare, and evaluate the historical experiences of Native Californians, Spanish, Mexican, Asian, African, and European Americans. Field trips to local sites of historical significance may be included.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- Demonstrate understanding of California history from its origin to the present day (SLO #1).
- Apply analytical skills in evaluating the development of California's multicultural history and appraise the contributions of different cultural groups to the state's historical evolution.
- Demonstrate an understanding of the historian's methods in reconstructing the past using primary and secondary sources (SLO #2).
- Compare and contrast the experiences of various groups as influenced by race, class, gender, nationality, and ethnicity.
- Demonstrate an understanding of the influence of synergistic global forces in California history and evaluate their connections to local and international developments (e.g., European settlement, the US conquest, industrialization, commercialization of agriculture, technological change, civil and human rights struggles, environmental movements, ideological clashes over capitalism and state power, the rise of multinational corporations, etc.).
- Examine the origins of the California constitution, the constitutional revision in 1878, and Progressive Era reforms, especially the nonpartisan ballot, as well as the initiative, referendum, and recall.
- Assess the role of California's geography on its historical development.

HIST 360 History of African Civilizations

This course is an introductory survey of the history of Africa from earliest times to the present. Major topics will include origins of humanity and society, civilizations of the Nile Valley, the peopling of Sub-Saharan Africa, African societies to 1500 A.D., precolonial Saharan and Sub-Saharan Africa, colonial Africa and the emergence of modern state in Africa.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO #1 Students will demonstrate a basic knowledge of the key events, individuals, and themes that have shaped African Civilizations.
- Form a hypothesis concerning the profound influence the past has had on the present.
- Critique civilizations that have been developed by non-literate societies and be able to differentiate between their contributions and those of literate societies.
- Evaluate the meaning and the definitions of history, civilization, culture, and the impact of cultural evolution and cultural diffusion as well as the environment influence on cultural development.
- demonstrate the integration of the outside contacts on the African Continent and the complex interplay of African history and World history.
SLO #2 Students will demonstrate the mastery of higher level analytical skills:
- investigate the reality of the contributions of African Societies to global history and world civilizations
- demonstrate critical thinking, particularly in the area of cause and effect and the analysis of trends in history.

This is a survey of Asian History from the birth of civilization to 1600 C.E. With particular emphasis on East Asia, the course will evaluate the political, economical, social, and cultural developments of China, Japan, and Korea. Additional topics will include the effects of foreign interactions with peoples from India, the Middle East, and Europe.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- demonstrate an understanding of East Asian civilizations from the birth of such civilizations to the 17th century C.E. (SLO #1).
- evaluate and assess Chinese, Japanese, Korean, and other East Asian civilizations through the use of critical thinking skills.
- differentiate the diverse political and economical structures of each group covered in the course.
- compare and contrast the common and diverse cultures of East Asian peoples.
- utilize analytical skills in evaluating the effects of foreign ideas and religions on East Asian peoples.
- survey and incorporate the geography discussed in the class.
- demonstrate an understanding of the historians' methods in reconstructing the past using primary and secondary sources (SLO #2).
- analyze and describe selected topics from both lectures and required readings.
- research and prepare written work based on extensive research of secondary source materials.

This is a survey of Asian History from 1600 C.E. to the present. With particular emphasis on China, Japan, Korea, and Vietnam, the course will evaluate the political, economical, social, and cultural effects of Western involvement in East Asia. Additional topics will include the rise of nationalism in East Asia during the Cold War, as well as China's rising participation in world events.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- demonstrate an understanding of East Asian civilizations from the 17th century C.E. to the present (SLO #1).
- evaluate and assess Chinese, Japanese, Korean, and other East Asian civilizations through the use of critical thinking skills.
- differentiate the diverse political and economical structures of each group covered in the course.
- compare and contrast the common and diverse cultures of East Asian peoples.
- utilize analytical skills in evaluating the effects of Western imperialism and ideologies on East Asian peoples.
HIST 370 History of the Americas through the 19th Century Wars of Independence

- survey and incorporate the geography discussed in the class.
- demonstrate an understanding of the historian's methods in reconstructing the past using primary and secondary sources (SLO #2).
- analyze and describe selected topics from both lectures and required readings.
- research and compose written work based on extensive research of secondary source materials.

This course is a general historical survey of North, Central, and South America from the earliest civilizations through to the 19th century wars of independence. The focus is on the roles played by political, economic, cultural, and religious forces in shaping the western hemisphere.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- demonstrate an understanding of the history of the Americas to the 19th century wars of independence by comparing the diverse political and economical structures of each civilization and/or nation covered in the course (SLO #1).
- evaluate and interpret primary and secondary sources to better understand the historian's methods in reconstructing the past (SLO #2).
- demonstrate mastery of higher level analytical skills to recognize the historical process of cause and effect. (SLO #3)
- evaluate key events, social groups, and various colonial institutions.
- analyze the differences between and the effects of the Anglo-American and Ibero-American process of colonization on indigenous peoples.

HIST 371 History of the Americas from the 19th Century Wars of Independence to the Present

- survey and incorporate the geography discussed in the class.
- demonstrate an understanding of the historian's methods in reconstructing the past using primary and secondary sources (SLO #2).
- analyze and describe selected topics from both lectures and required readings.
- research and compose written work based on extensive research of secondary source materials.

This course is a general historical survey of North, Central, and South America from the wars of independence to the present day. Special emphasis is placed on a review of the North American colonies, the road to revolution, independence from England, and the constitutional period as well as subsequent Latin American - United States relations. This course satisfies the state requirements in United States history.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- demonstrate an understanding of the history of the Americas from the 19th century wars of independence to the present day by comparing the diverse political and economical structures of each civilization and/or nation covered in the course (SLO #1).
- evaluate and interpret primary and secondary sources to better understand the historian's methods in reconstructing the past (SLO #2).
- demonstrate mastery of higher level analytical skills to recognize the historical process of cause and effect. (SLO #3)
analyze the marginalization and disenfranchisement of disadvantaged groups in various North, Central, and South American countries.

examine how Central and South American nations have and continue to be affected by the United States' heightened involvement in the western hemisphere.

HIST 373 History of Mexico

Units: 3
Hours: 54 hours LEC
Prerequisite: None.
Advisory: Eligibility for ENGWR 300
Transferable: CSU; UC
General Education: AA/AS Area V(b); CSU Area D6; IGETC Area 4F
Catalog Date: June 1, 2020

History 373 is a survey course on the origins and development of Mexico from c. 2500 BCE to the present. In addition to discussing the early civilizations of Mesoamerica, the course will evaluate the political, economical, social, and cultural evolution of Mexico from the colonial era to the present day. Finally, Mexico's relationship with the United States and other western powers will be addressed.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- demonstrate an understanding of the history of Mexico from the earliest Mesoamerican civilizations to the present day by comparing the key events, individuals, and themes that helped shape Mexican history from Mesoamerican heritage to the present (SLO #1).
- discover and appreciate the cultural heritage of Mexico and its impact on the United States southwest.
- summarize the impact on Mexico regarding the strong presence of the U.S. in the western hemisphere.
- explain the role of geography in the development of Mexico as nation.
- evaluate and interpret primary and secondary sources to better understand the historian's methods in reconstructing the past (SLO #2).
- exhibit mastery of higher level analytical skills to recognize the historical process of cause and effect. (SLO #3)

HIST 380 History of the Middle East

Units: 3
Hours: 54 hours LEC
Prerequisite: ENGWR 101, or placement through the assessment process.
Advisory: CSU; UC
Transferable: AA/AS Area V(b); CSU Area C2; CSU Area D6; IGETC Area 3B; IGETC Area 4
General Education: June 1, 2020

This course surveys the history of the Middle East and North Africa with emphasis on the period from the 6th century C.E. (A.D.) to the present. The course focuses on the major social, economic, political and cultural transformations of the region, while taking into account both regional and global contexts of interaction and change in a comparative format. This course will provide students with a historical understanding of the impact of European colonialism, the discovery of petroleum and its consequences, the Palestinian-Israeli conflict, and the role played by the United States in the region.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- DESCRIBE AND ANALYZE THE ANCIENT HISTORICAL CONTEXT OF THE MIDDLE EAST AND NORTH AFRICA. - SLO 1
- In particular examine those aspects of the cultures of late antiquity which impacted the subsequent development of the region in pre-Islamic times, then in the earliest days of Islam, followed by the Arab/Islamic conquests of the 7th century C.E.
- ANALYZE THE DEVELOPMENT OF CIVILIZATION AND CULTURE IN THE MIDDLE EAST AND NORTH AFRICA FROM THE 6TH CENTURY C.E. TO CONTEMPORARY TIMES. - SLO 2.
Study and examine urban cultures during Rashidun times, the Classical Age of Islam in the Middle East, Andalusian and Maghrebi Muslim periods, Safavid, Seljuk and Ottoman Empires.

IDENTIFY AND RECOGNIZE THE CONTRIBUTIONS AND INTERACTIONS OF DIFFERENT CULTURAL GROUPS TO MIDDLE EASTERN AND NORTH AFRICAN HISTORY. - SLO 3.

Compare, contrast, and integrate the rich multicultural composition of Middle Eastern and North African societies and peoples, for example, Arabs, Iranians, Berbers, Turks, Kurds, Mauritaniians, Spaniards, as well as religious groups, Muslims, and minority groups such as Christians and Jews.

Analyze and assess travel and trade, communication networks, cultural explorations and writers of the culture.

DEVELOP CRITICAL THINKING SKILLS NECESSARY FOR FORMULATING AN ANALYTICAL FRAMEWORK RELEVANT TO THE STUDY OF THE HISTORY OF THE REGION. - SLO 5.

Research topics and write evaluative essays, papers, and reports.

Compare, contrast, synthesize and analyze current regional historical issues in light of past history.

Explore cross-cultural comparative aspects of Middle Eastern and North African history.

Compose evaluative essays, papers and reports.

HIST 485 Recent United States History - Honors

This course is an introduction to the study of American history from 1945 to the present day. It is an honors course that uses an intensive instructional methodology designed to challenge motivated students and cultivate advanced critical thinking skills. Particular emphasis will be placed on the role played by complex interrelationships of political, economic, social, and cultural forces in United States history after World War II, and the role played by multiple ethnic groups as well. This course is not open to students who have completed HIST 314. Enrollment is limited to Honors Program students. Details about the Honors Program can be found in the front of the Catalog and on the CRC website.

Upon completion of this course, the student will be able to:

- ANALYZE REASONING PROCESSES TO EVALUATE ISSUES, VALUE JUDGMENTS, OR CONCLUSIONS THAT DETERMINE THE QUALITY, VALIDITY, AND/OR RELIABILITY OF INFORMATION (SLO #1).
- Construct an accurate and/or logical interpretation of reasoning while applying a framework of analytic concepts through written assignments.
- Communicate a complex understanding of content matter of a major discipline of study through oral presentations and class discussions.
- Explain the importance of historical consciousness of the major discipline of study in understanding the broader picture of society through a final project.
- APPLY COMPLEX CRITICAL THINKING SKILLS TO READ AND WRITE EFFECTIVELY AS SELF-RELIANT, EVALUATIVE READERS AND WRITERS (SLO #2).
- Express ideas clearly and completely in a variety of written formats.
- Utilize correct and appropriate conventions of mechanics, usage, and style in written communication.
- Comprehend main ideas and reasonably interpret written information in the form of primary documents.
- Compose and apply properly documented sources of information.
- Define and identify various theoretical perspectives across the discipline of history through reading primary and secondary sources (SLO #3).
- Generate significant open-ended questions about United States history, and critically analyze primary and secondary sources to construct historical arguments and perspectives that inform one’s own life.
- Demonstrate an understanding of the interconnectedness between United States history and global history to foster active citizenship as well as applying historical knowledge and historical thinking to contemporary issues.
- Identify, explain, and evaluate the major historical forces in United States history since 1945.
- Evaluate and analyze diverse experiences and perspectives in United States history through an examination of conflicting narratives and power imbalances.

HIST 495 Independent Studies in History

| Units: | 1 - 3 |
| Hours: | 54 - 162 hours LAB |
| Prerequisite: | None. |
| Transferable: | CSU |
| Catalog Date: | June 1, 2020 |

An independent studies project involves an individual student or small group of students in study, research, or activities beyond the scope of regularly offered courses. See the current catalog section of “Special Studies” for full details of Independent Studies.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO #1: Actively engage in intellectual inquiry beyond that required in order to pass a course of study (College Wide Learning Outcome – Area 4).
- Discuss and outline a proposal of study (that can be accomplished within one semester term) with a supervising instructor qualified within the discipline.
- Design an independent study (to be completed individually or by collaboration of a small group) to foster special knowledge, skills, and experience that are not available in any one regularly scheduled course.
- Use information resources to gather discipline-specific information.
- SLO #2: Utilize modes of analysis and critical thinking to apply theoretical perspectives and/or concepts in the major discipline of study to significant problems and/or educational activities (College Wide Learning Outcome – Area 3).
- Analyze and apply the knowledge, skills and experience that are involved in the independent study to theoretical perspectives and/or concepts in the major discipline of study.
- Explain the importance of the major discipline of study in the broader picture of society.
- SLO #3: Communicate a complex understanding of content matter of the major discipline of study (College Wide Outcome – Area 3).
- Demonstrate competence in the skills essential to mastery of the major discipline of study that are necessary to accomplish the independent study.
- SLO #4: Identify personal goals and pursue these goals effectively (College Wide Outcome – Area 4).
- Utilize skills from the “academic tool kit” including time management, study skills, etc., to accomplish the independent study within one semester term.
CRC offers the basic grammar and conversation courses in Hmong. Students will be able to understand the spoken language, to speak with reasonable fluency, and to write at their speaking level.

Hmong (HMONG)

HMONG 401 Elementary Hmong

Units: 4  
Hours: 54 hours LEC; 54 hours LAB  
Prerequisite: None.  
Transferable: CSU; UC (UC Transfer Credit: Corresponds to two years of high school study)  
General Education: CSU Area C2; IGETC Area 6  
Catalog Date: June 1, 2020

This course will provide an introduction to the Hmong language at the elementary level, which is characterized by an emerging ability to understand and produce appropriate responses in high-frequency situation utilizing learned materials, standardized messages, phrases and expressions including terms for addressing, numbers, time, dates, days, weather, and kinship terms. Speaking and writing will be comprehensible to a sympathetic listener, including a native speaker used to interacting with non-native speakers. Verbal and written expression is limited to short, culturally appropriate communication. Students will also acquire knowledge of the geography, culture and people of regions where Hmong is spoken as well as Hmong-speakers’ contributions to North American and world-wide cultures.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO#1 PRODUCE AND COMPREHEND BASIC COURTESIES AND SIMPLE CONVERSATIONS IN HMONG.
- Understand short spoken dialogues and answer simple questions, such as greetings, identifying people, using numbers, telling time, days of the week, and weather descriptions.
- Respond orally using core vocabulary phrases and expressions.
- Incorporate basic learned materials, such as phrases and expressions, in a daily life situations.
- SLO#2 DEMONSTRATE ABILITY TO COMMUNICATE IN WRITING USING LEARNED GRAMMATICAL FORMS.
- Write and describe a list from materials read or heard.
- Write simple sentences about biographical information, telling time and calendar, and describing weather and activities.
- SLO#3 ANALYZE AND INTERPRET WRITTEN MATERIAL.
- Comprehend a reading selection based on familiar topics, such as greetings, biographical information, telling time and calendar, and describing weather and activities.

HMONG 402 Elementary Hmong II
This is the second course in the Elementary Hmong sequence. It is designed for students who have completed Hmong 401 and provides refinement of skills learned in Hmong 401. Students will gain increased accuracy and ability to understand and produce appropriate responses in high frequency situations utilizing learned materials. Speaking and writing will be comprehensible to a sympathetic listener. Verbal and written expression will be limited to short, culturally appropriate communication on a broader scale than at the 401 level. Students will acquire a knowledge of the geography, culture, and people of regions where Hmong is spoken and of Hmong speakers' contributions to North American and world cultures.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- **SLO #1: PRODUCE AND COMPREHEND BASIC COURTESIES AND SIMPLE CONVERSATIONS IN HMONG.**
  - Understand short spoken dialogues and answer simple questions on familiar topics such as color and clothing, shopping habit, food, body and health, hobbies, directions, and traveling.
  - Initiate and maintain conversations in various familiar situations and respond using core vocabulary phrases and expressions.
  - Incorporate basic learned materials in daily life situations to communicate needs, goals, and wishes in accurate and appropriate cultural terms.
  - Understand the basic language structure of Hmong and produce recognizable speech.
  - Describe and compare people, places and things.

- **SLO #2: DEMONSTRATE ABILITY TO COMMUNICATE IN WRITING USING LEARNED GRAMMATICAL FORMS.**
  - Describe or summarize information based on written or oral materials.
  - Supply specific biographical information and daily activities.
  - Write simple and complex sentences about color and clothing, food and eating habits, body and health, hobbies, directions, and traveling.

- **SLO #3: ANALYZE AND INTERPRET WRITTEN MATERIALS.**
  - Comprehend a reading selection based on familiar topics, such as clothing, food, body and health, hobbies, directions, and traveling.
  - Comprehend a selection of written texts on learned topics and reply to content questions in Hmong.

Units: 4
Hours: 72 hours LEC
Prerequisite: Hmong 401 with a grade of "C" or better
Transferable: CSU, UC
General Education: CSU Area C2; IGETC Area 6
Catalog Date: June 1, 2020
Designated specifically for academically accomplished students or those with the potential for high academic achievement, CRC's Honors program provides enhanced General Education study opportunities supporting intellectual growth, scholarly relationships with peers, and faculty-student engagement beyond that generally associated with lower-division undergraduate programs. Honors Program participation supports transfer and scholarship opportunities at select transfer colleges and universities including UCLA, in whose Transfer Alliance Partnership CRC is a member. Honors Program students receive enhanced access to career and academic advising as well as enhanced opportunities for scholarship, including the opportunity to pursue their own original research.

Honors (HONOR)

HONOR 340 Honors Seminar: Political Campaign Communication

Same As: COMM 480
Units: 3
Hours: 54 hours LEC
Prerequisite: None.
Enrollment Limitation: Enrollment is limited to Honors Program students. Details about the Honors Program can be found in the Cosumnes River College Catalog.
Transferable: CSU; UC
General Education: AA/AS Area V(b); CSU Area D7; IGETC Area 4G
Catalog Date: June 1, 2020

What do pundits, politicians and the public have in common? The ability to impact political campaign communication. This seminar-style course will introduce students to the effects of political campaign communication on public opinion and election results. Using timely data, students will evaluate news media, debate presidential debates, and analyze campaign messages using qualitative and quantitative approaches. This course is intended for the honors student interested in learning about political communication, rhetorical criticism, and techniques for writing for academic audiences. Enrollment is limited to Honors Program students. Details about the Honors Program can be found in the front of the Catalog and on the CRC website. This course is the same as COMM 480, and only one may be taken for credit.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- EXPRESS IDEAS CLEARLY IN WELL-ORGANIZED WRITTEN MESSAGES (SLO #1).
- Express ideas clearly and completely in a variety of written formats.
- Utilize correct and appropriate conventions of mechanics, usage, and style in written communication.
- Comprehend main ideas and reasonably interpret written information.
- Compose and apply properly documented sources of information.
- UTILIZE MODES OF ANALYSIS AND CRITICAL THINKING IN A DISCIPLINE OF STUDY AS APPLIED TO SIGNIFICANT ISSUES AND/OR PROBLEMS (SLO #2).
- Contrast historical campaign communication with contemporary examples.
Distinguish between quantitative and qualitative theoretical approaches in research of political communication.

Analyze the critical process by differentiating between “maxims” that guide critical invention.

Compare and contrast different rhetorical approaches. Analyze contemporary pieces of rhetorical criticism and consider applications for current political messages.

Analyze reasoning processes to evaluate issues, value judgments or conclusions that determine the quality, validity, and/or reliability of information.

Construct an accurate and/or logical interpretation of reasoning while applying a framework of analytic concepts.

Explain the importance of the study of political campaign communication in the broader picture of society.

ACTIVELY ENGAGE IN INTELLECTUAL INQUIRY BEYOND THAT REQUIRED IN ORDER TO PASS A COURSE OF STUDY (SLO #3).

Apply information and resources necessary to develop academically and personally.

Utilize skills from one’s “academic tool kit” including time management, study skills, etc.

RECOGNIZE THE ETHICAL DIMENSIONS OF DECISIONS AND ACTIONS (SLO #4).

Demonstrate the ability to engage in ethical reasoning necessary to exercise responsibility as an ethical individual, professional, local and global citizen.

ARTICULATE AN AWARENESS OF A VARIETY OF PERSPECTIVES WITHIN A DISCIPLINE AND THE RELEVANCE OF THESE PERSPECTIVES TO ONE’S OWN LIFE (SLO #5). This includes the ability to:

- Collect and critically evaluate media messages. Focusing on news mediums (e.g. television, radio, newspapers, the Internet), assess the role of the media and its impact on campaign communication.

- Contrast and assess the effectiveness of candidate messages. Construct rhetorical visions expressed in the campaign communication of presidential (and possibly other) candidates.

- Debate the presidential debates. Analyze the presidential candidates’ positions on political issues and performance effectiveness.

- Assess voter reaction to the political debates and other forms of campaign communication. Select common themes communicated in focus groups research as a way to interpret public opinion.

- Design and construct a critical paper evaluating some aspect of political campaign communication.

- Consider the implications of writing for an academic audience.

HONOR 341 Honors Seminar: Persuasion within Social Issues

Same As: COMM 482

Units: 3

Hours: 54 hours LEC

Prerequisite: ENGWR 300, ENGWR 480, or HONOR 375 with a grade of "C" or better, or placement through the assessment process.

Enrollment Limitation: Enrollment is limited to Honors Program students.

Transferable: CSU; UC (UC Transfer Credit Limitation: HONOR 341 and COMM 482 combined: maximum credit, 1 course)

General Education: CSU Area A3; IGETC Area 1B

Catalog Date: June 1, 2020

This seminar-style course will introduce students to the fundamental theories and techniques of persuasion as they occur in various communication contexts, including commercial, interpersonal, public and mass media. A series of writing assignments will focus on the skills of critical thinking, persuasion, and the sophistication of argumentative essay skills. Essays of advanced composition shall be evaluated for their quality in both critical thinking and composition. The writing assignments will apply theoretical models of critical thinking and communication studies to rhetoric, examining message production, analyzing messages, and exploring the fields of electronic and print media, advertising (product campaign), political campaign strategy, and ideological campaign techniques for mass communication. Students explore ethical considerations of persuasive communication, learn about types of reasoning, and identify fallacious arguments as they occur in persuasion. Students will focus on the design and organization of persuasive messages within a speech format for an individual or group presentations for a live audience. This course offers honors students the opportunity to study, critique, discuss and present advanced topics to focus on the impact of persuasive attempts within ethical, social and political issues.

Access to a computer with online capabilities may be required and computer access is available on campus. Enrollment is limited to Honors Program students. Details about the Honors Program can be found in the front of the Catalog and on the CRC website. As COMM 315, Persuasion, has a similar basis as this Honors course, this course is not open to a student that has received credit for COMM 315, Persuasion. This course is the same as COMM 482 and only one may be taken for credit.

Student Learning Outcomes
Upon completion of this course, the student will be able to:

- **COMPOSE IDEAS CLEARLY IN EFFECTIVE, APPROPRIATE AND WELL-ORGANIZED WRITTEN MESSAGES (SLO #1).**

- Use advanced lower-division composition techniques that address essay structure, continuity, emphasis and subtlety, elements of style, grammar as stylistic technique, audience, and persuasive essay writing.

- Apply the advanced use of clarity (agent-action-goal) and coherence (concentration, focus, maintenance, clear orientation and subject control), concision and emphasis to develop writing skills appropriate for a sophisticated style of English.

- Compose arguments cogently in a number of modes, including but not limited to making proposals, providing evaluation, and explanation of positions and the existence of causal and/or correlation relationships.

- Design and organize persuasive messages within a speech format for an individual or group presentations for a live audience.

- **ANALYZE AND FORMULATE CRITICAL THINKING WITHIN THE EVIDENCE AND REASONING OF SPOKEN AND WRITTEN MESSAGES (SLO #2).**

- Identify, review, and utilize methods of persuasion for messages designed within a specific content issue or arena, such as a series of public service announcements for a social issue (such as anti-drug messages, or environmental green issues, or human civil rights, etc), and/or political campaign or public office speeches, and other website or multimedia presentations.

- Understand the nature of critical thinking and quality composition.

- Apply the theoretical foundations for argument analysis, persuasion and essay construction of induction, deduction, analysis, synthesis, sound reasoning, and fallacy identification within the readings and writing of persuasive communication messages.

- Analyze and respond to competing points of views to determine the stances of the authors on the subjects as well to express individual stances logically and effectively.

- **ASSESS INDIVIDUAL RESPONSIBILITY WITHIN ONE'S ABILITY TO INFLUENCE ETHICAL, EFFECTIVE AND APPROPRIATE COMMUNICATION AMONG DIVERSE SETTINGS AND PEOPLE (SLO #3).**

- Employ critical thinking and writing skills in reflection about multi-cultural diversity issues, ethics, and politics in terms of the effectiveness and appropriateness of persuasive communication.

- **DEFINE AND IDENTIFY VARIOUS THEORETICAL PERSPECTIVES ACROSS THE DISCIPLINE OF COMMUNICATION STUDIES (SLO #4).**

- Analyze persuasive messages, including identifying and explaining the persuasive components or strategies used to effect change.

- Identify persuasive strategies and their theoretical foundations as they exist in a variety of communication contexts (e.g., interpersonal compliance-gaining, commercial advertising, political rhetoric and campaigning, public speaking, mass media, etc.).

- Differentiate between humanistic and social science approaches to persuasion.

- Determine and evaluate criteria for the development of successful persuasive campaigns, focusing on a specific set of message designs in a specified content, such as a series of public service announcements in multimedia presentation, website information, published and/or transcribed speeches, and/or publication of printed materials.

- Define and identify various theoretical perspectives across the discipline of Communication Studies within written and verbal messages prepared to present analysis of persuasive techniques and strategies to the other students participating in an Honors seminar-style format.

---

**HONOR 350 Honors Seminar: Introduction to Critical Theory**

**Same As:** FMS 488  
**Units:** 3  
**Hours:** 54 hours LEC  
**Prerequisite:** None.  
**Transferable:** CSU; UC  
**General Education:** AA/AS Area I; CSU Area C2; IGETC Area 3B  
**Catalog Date:** June 1, 2020

This course investigates questions of interpretation and representation in film, literature, media, and culture. Students examine contemporary critical and cultural theory, then apply these theories in analyzing a variety of texts from the Shakespearean play to the science fiction horror film. Theories introduced include, but are not limited to, semiotics, psychoanalysis, rhetorical criticism, gender theory, and postmodernism. Students intending to transfer into arts, film, literature, humanities, and cultural studies programs will find this course particularly useful in understanding the critical language of the university. Enrollment is limited to Honors Program students. Details about the Honors Program can be found in the front of the Catalog and on the CRC website. This course is the same as FMS 488, and only one may be taken for credit.
Upon completion of this course, the student will be able to:

- EXPRESS IDEAS CLEARLY IN WELL-ORGANIZED WRITTEN MESSAGES (SLO #1, College Wide SLO – Area 1, and General Education SLO C5a – English Composition). This includes the ability to:
  - Express ideas clearly and completely in a variety of written formats.
  - Utilize correct and appropriate conventions of mechanics, usage, and style in written communication.
  - Comprehend main ideas and reasonably interpret written information.
  - Compose and apply properly documented sources of information.
- UTILIZE MODES OF ANALYSIS AND CRITICAL THINKING IN A DISCIPLINE OF STUDY AS APPLIED TO SIGNIFICANT ISSUES AND/OR PROBLEMS (SLO #2; College Wide SLO Area 3). This includes the ability to:
  - Construct an accurate and/or logical interpretation of reasoning while applying a framework of analytic concepts.
- ACTIVELY ENGAGE IN INTELLECTUAL INQUIRY BEYOND THAT REQUIRED IN ORDER TO PASS A COURSE OF STUDY (SLO #3, College Wide SLO – Area 4). This includes the ability to:
  - Apply information and resources necessary to develop academically and personally.
  - Utilize skills from one’s “academic tool kit” including time management, study skills, etc.
- RECOGNIZE THE ETHICAL DIMENSIONS OF DECISIONS AND ACTIONS (SLO #4, College Wide SLO – Area 5). This includes the ability to:
  - Demonstrate the ability to engage in ethical reasoning necessary to exercise responsibility as an ethical individual, professional, local and global citizen.
- ARTICULATE AN AWARENESS OF A VARIETY OF PERSPECTIVES WITHIN A DISCIPLINE AND THE RELEVANCE OF THESE PERSPECTIVES TO ONE’S OWN LIFE (SLO #5, College Wide SLO – Area 2). This includes the ability to:
  - Understand, evaluate, and apply critical theory, theory's relationship to art and culture, its role in interpreting literary and visual arts, and examining ideology and representations of gender and ethnicity.
  - Apply current theory to the analysis and criticism of film, literature, and media.
  - Understand, evaluate and apply the basic concepts of semiotics, post-structuralism, psychoanalysis, gender theory, and postmodernism and their relationship to/influence on art and politics.

HONOR 352 Honors Seminar: The Films of Alfred Hitchcock

Same As: FMS 489
Units: 3
Hours: 54 hours LEC
Prerequisite: None.
Transferable: CSU; UC
General Education: AA/AS Area I
Catalog Date: June 1, 2020

This seminar studies the work of Alfred Hitchcock from the perspective of the key concepts in film theory. Students will investigate the films and criticism of one of the greatest and strangest directors, the self-styled master of suspense. This seminar takes a close reading of Hitchcock's most important films and the most significant writing on the director's work. For students interested in film, media, art, literature, and the humanities, the course examines Hitchcock's visual style, thematic concerns, and directorial techniques, and introduces the major critical approaches to cinema studies. Enrollment is limited to Honors Program students. Details about the Honors Program can be found in the front of the Catalog and on the CRC website. This course is the same as FMS 489, and only one may be taken for credit.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- EXPRESS IDEAS CLEARLY IN WELL-ORGANIZED WRITTEN MESSAGES (SLO #1, College Wide SLO – Area 1, and General Education SLO C5a – English Composition). This includes the ability to:
  - Express ideas clearly and completely in a variety of written formats.
Utilize correct and appropriate conventions of mechanics, usage, and style in written communication.

Comprehend main ideas and reasonably interpret written information.

Compose and apply properly documented sources of information.

UTILIZE MODES OF ANALYSIS AND CRITICAL THINKING IN A DISCIPLINE OF STUDY AS APPLIED TO SIGNIFICANT ISSUES AND/OR PROBLEMS (SLO #2; College Wide SLO Area 3). This includes the ability to:

Construct an accurate and/or logical interpretation of reasoning while applying a framework of analytic concepts.

ACTIVELY ENGAGE IN INTELLECTUAL INQUIRY BEYOND THAT REQUIRED IN ORDER TO PASS A COURSE OF STUDY (SLO #3, College Wide SLO – Area 4). This includes the ability to:

Apply information and resources necessary to develop academically and personally.

Utilize skills from one’s “academic tool kit” including time management, study skills, etc.

ARTICULATE AN AWARENESS OF A VARIETY OF PERSPECTIVES WITHIN A DISCIPLINE AND THE RELEVANCE OF THESE PERSPECTIVES TO ONE’S OWN LIFE (SLO #4, College Wide SLO – Area 2). This includes the ability to:

Identify the stylistic, narrative, and thematic concerns in the director’s work.

Understand Hitchcock’s contribution to the cinematic language (pure cinema, point of view, montage, mise-en-scene) and genre (the melodrama and the thriller).

Read, understand, evaluate, and compare the key critical appraisals of the director by Modelski, Wood, Spoto, Truffaut and others.

Apply critical theory (auteur, feminist, psychoanalytic, semiotic) in the analysis of the films and their cultural implications.

Participate in the seminar mode of learning, including seminar discussion and presentation of a creative and original paper of critical value to the study of Hitchcock.

HONOR 364 Honors Seminar: Philosophy of the Martial Arts

This course provides an introduction to the philosophical views that have traditionally been associated with the practice of martial arts and explores the interplay between those views and that practice. It also provides an introduction to those contemporary philosophical issues that arise in the context of present day analytic philosophical reflection on the nature and practice of martial arts. The course thus provides both the opportunity to appreciate the eastern philosophical underpinnings of an activity that has become part of mainstream American Culture and the opportunity to experience the rigorous application of contemporary analytic academic philosophical methodology. Details about the Honors Program can be found in the front of the Catalog and on the CRC website. Enrollment is limited to Honors Program students. This course is the same as PHIL 485 and only one may be taken for credit.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- Employ the general and transferable critical thinking and communication abilities developed by the rigorous study of academic philosophy (SLO 1).
- Demonstrate the ability to engage in upper-division work in the discipline of Philosophy.
- Apply the basic methodology of contemporary analytic philosophy (e.g. assess, critique, deduce, evaluate, research, support, justify, analyze, debate, defend, detect, distinguish, examine, etc.) to understand traditional Asian, as well as contemporary American, martial arts.
- Recognize and explain the fundamental ethical, metaphysical, and epistemological tenets of Confucianism, Buddhism, and Taoism (SLO 2).
- Describe and explain the influence of the fundamental ethical, metaphysical, and epistemological tenets of Confucianism, Buddhism, and Taoism on the traditional study of (Asian) martial arts.
- Demonstrate the ability to navigate a seminar environment (SLO 3).

Same As: PHIL 485
Units: 3
Hours: 54 hours LEC
Prerequisite: None.
Transferable: CSU; UC
General Education: CSU Area C2; IGETC Area 3B
Catalog Date: June 1, 2020
HONOR 366 Recent United States History - Honors

This course is an introduction to the study of American history from 1945 to the present day. It is an honors course that uses an intensive instructional methodology designed to challenge motivated students and cultivate advanced critical thinking skills. Particular emphasis will be placed on the role played by complex interrelationships of political, economic, social, and cultural forces in United States history after World War II, and the role played by multiple ethnic groups as well. This course is not open to students who have completed HIST 314. Enrollment is limited to Honors Program students. Details about the Honors Program can be found in the front of the Catalog and on the CRC website.

This course is the same as HIST 485 and only one may be taken for credit.

Upon completion of this course, the student will be able to:

- ANALYZE REASONING PROCESSES TO EVALUATE ISSUES, VALUE JUDGMENTS, OR CONCLUSIONS THAT DETERMINE THE QUALITY, VALIDITY, AND/OR RELIABILITY OF INFORMATION (SLO #1).
- Construct an accurate and/or logical interpretation of reasoning while applying a framework of analytic concepts through written assignments.
- Communicate a complex understanding of content matter of a major discipline of study through oral presentations and class discussions.
- Explain the importance of historical consciousness of the major discipline of study in understanding the broader picture of society through a final project.
- APPLY COMPLEX CRITICAL THINKING SKILLS TO READ AND WRITE EFFECTIVELY AS SELF-RELIANT, EVALUATIVE READERS AND WRITERS (SLO #2).
- Express ideas clearly and completely in a variety of written formats.
- Utilize correct and appropriate conventions of mechanics, usage, and style in written communication.
- Comprehend main ideas and reasonably interpret written information in the form of primary documents.
- Compose and apply properly documented sources of information.
- DEFINE AND IDENTIFY VARIOUS THEORETICAL PERSPECTIVES ACROSS THE DISCIPLINE OF HISTORY THROUGH READING PRIMARY AND SECONDARY SOURCES (SLO #3).
- Generate significant open-ended questions about United States history, and critically analyze primary and secondary sources to construct historical arguments and perspectives that inform one’s own life.
- Demonstrate an understanding of the interconnectedness between United States history and global history to foster active citizenship as well as applying historical knowledge and historical thinking to contemporary issues.
- Identify, explain, and evaluate the major historical forces in United States history since 1945.
- Evaluate and analyze diverse experiences and perspectives in United States history through an examination of conflicting narratives and power imbalances.

HONOR 367 Introduction to Government: United States – Honors
This course analyzes the U.S. government's historic origins, philosophical and theoretical justification, constitutional structures and how these institutions work. It examines and describes the procedural aspects of the political system including holding elections, campaigning, voting, lobbying, legislating, executing and adjudicating law. It provides an analysis of contemporary problems and issues. It also describes California state and local governments' constitutional base, structures and functions, political process, problems and issues. Conducted in a seminar format, this course emphasizes participatory classroom styles of learning and the material used is more substantial and sophisticated. In addition, there are extensive research projects on American institutions, political processes, and political behavior designed to challenge and motivate. This course is not open to students who have completed POLS 301. Enrollment is limited to Honors Program students. Details about the Honors Program can be found in the front of the Catalog and on the CRC website.

This course is the same as POLS 481. This course, under either name, may be taken only one time for credit.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO 1: UTILIZE MODES OF ANALYSIS AND CRITICAL THINKING IN THE STUDY OF AMERICAN GOVERNMENT AS APPLIED TO SIGNIFICANT ISSUES AND/OR PROBLEMS.
  - Describe the nature of government and its theoretical foundations and functions.
  - Relate American political thought, the Constitution, and governing institutions to one another.
  - Identify and explain the structures and functions of the United States and California governments prescribed by their respective constitutions.
  - Compare and contrast the federal, state and local governments with respect to their political foundations, functions, and contemporary problems.
  - Explain the civil liberties and civil rights of individuals as articulated in the United States Constitution and federal court decisions.
  - Identify and evaluate political processes within the United States and California, including the development of political ideologies, voting behavior and other forms of political participation.

- SLO 2: ACTIVELY ENGAGE IN INTELLECTUAL INQUIRY AND CRITICAL THINKING BEYOND THAT REQUIRED IN ORDER TO PASS A COURSE OF STUDY IN AMERICAN DEMOCRACY.
  - Analyze complex readings and processes as they apply to contemporary issues in American Politics.
  - Illustrate and appraise the relationship between national, state, and local governments and evaluate the effectiveness of the federal system.
  - Discuss and analyze contemporary political issues and operations in the United States and California.

- SLO 3: RECOGNIZE THE ETHICAL DIMENSIONS OF DECISIONS AND ACTIONS.
  - Hypothesize the conditions under which various political outcomes are likely to occur and provide theoretical explanations for said outcomes.

- SLO 4: ARTICULATE AN AWARENESS OF THE VARIETY OF PERSPECTIVES WITHIN POLITICAL SCIENCE AND THE RELEVANCE OF THESE PERSPECTIVES TO ONE'S OWN LIFE.
  - Evaluate and explain how the American system affects the student's life in terms of freedoms, restraints, and public policy.
  - Analyze the role of culture, diversity, and ideology in shaping public opinion and public policy in the United States and California.

- SLO 5: EXPRESS IDEAS CLEARLY IN WELL-ORGANIZED WRITTEN MESSAGES
  - Express ideas competently, using appropriate grammar, in a variety of written formats.

HONOR 375 Honors College Composition
This course offers the honors student a challenging course that will develop skills in critical thinking, reading, and writing. It asks students to critically analyze, compare, and evaluate various complex works. The course is designed to help students demonstrate, in both argumentative and expository prose, complex critical thinking, effective organization, precise diction, and sophisticated style; at least one of those essays requires research and appropriate MLA documentation. Essays written during the term will total at least 8,000 words. Throughout the course, fluency and correctness are emphasized. This course is not open to students who have successfully passed ENGWR 300 or ESLW 340. This course is the same as ENGWR 480. This course, under either name, may be taken one time for credit.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- Compose carefully reasoned and stylistically sophisticated college-level essays using a variety of rhetorical strategies and applying appropriate citations and formatting standards (SLO #1; Engl. Prog. SLO #1; Honors Prog. SLO #1 and #5).
- Use pre-writing, drafting, revision, and editing/proofreading to create essays.
- Write focused, thoughtful thesis statements.
- Support opinions in writing through careful, critical thinking.
- Compose stylistically sophisticated essays using a variety of approaches, such as comparison/contrast, classification, definition, narration, description, causal analysis.
- Construct a carefully reasoned argument in writing that considers audience and opposition.
- Build coherence and unity in writing at three levels: sentence, paragraph, and essay.
- Organize written texts logically and creatively without dependence on formulaic prescriptions.
- Apply complex critical thinking skills by defining issues as well as researching, evaluating, and synthesizing sources to support a thesis (SLO #2; Engl. Prog. SLO #2 and Engl. Prog. SLO #3; Honors Prog. SLO #3 and #4).
- Appraise and use a variety of research techniques.
- Evaluate sources.
- Research and incorporate sources effectively and meaningfully in writing.
- Summarize, paraphrase, and directly quote outside sources as support for his or her ideas and/or represent a belief held by the opposition.
- Use MLA documentation format correctly.
- Critically analyze, compare, and evaluate various complex works (SLO #3; Engl. Prog. SLO #4; Honors Prog. SLO #2 and #5).
- Annotate and analyze complex written texts and respond thoughtfully to them.
- Analyze and evaluate the 3-fold rhetorical concerns of audience, writer, and message in written texts.
- Question an author's claim and support.
- Critique his or her own and other student writing.
- Apply the conventions of standard written English employing a variety of sentence structures and college-level diction (SLO #4; Engl. Prog. SLO #5; Honors Prog. SLO #1).
- Use clear and varied sentences to demonstrate overall mastery of the conventions of standard written English.
- Analyze his or her own and other student style and diction.
HONOR 378 Honors - Literature Adapted into Film

This course analyzes the process, challenges, failures, and successes of adapting literary and stage material into film. It compares faithful and unfaithful adaptations through reading the original texts and viewing the adapted films with an awareness of their historical and cultural contexts. The course examines intention, creative distinctions, as well as limits and strengths of each medium. This course requires at least one research essay proposing and justifying details for an adaptation and including appropriate MLA documentation. This course is the same as ENGLT 488. This course, under either name, may be taken one time for credit.

Upon completion of this course, the student will be able to:

- CRITICALLY ANALYZE, COMPARE, AND EVALUATE VARIOUS WORKS OF LITERATURE AND FILM (SLO#1; PSLO #4 and #1; Honors Prog. SLO #2 and #5). Outcome may be evaluated by all or some of the following criteria:
  - Annotate and analyze written texts and respond thoughtfully to them.
  - Analyze and summarize films and respond thoughtfully to them.
  - Determine themes, plot structure, characters, and symbols used in written works and films.
  - Question a director's intention and effectiveness of the director's choices.
  - Compare and contrast elements of adaptations (such as theme for example) to the corresponding elements in the original texts.
  - Construct criteria for judging strengths and weaknesses of adaptations.
  - Appraise the successes and failures of adaptations.
  - Assess the effects of historical and/or social context for each work studied.
  - Critique his or her own and other student writing.
- APPLY COMPLEX CRITICAL THINKING SKILLS TO READ AND WRITE EFFECTIVELY AS SELF-RELIANT, EVALUATIVE READERS AND WRITERS (SLO#2; PSLO #2 and #3; Honors Prog. SLO #2 and #5). Outcome may be evaluated by all or some of the following criteria:
  - Demonstrate awareness of the effects of literature on the reader through textual analysis, classroom discussion, and response papers.
  - Apply terminology from literary studies.
  - Analyze and interpret elements of literature.
  - Appraise the strengths and weaknesses inherent in the genres of fiction, non-fiction, and drama.
  - Evaluate literary texts in cultural context, as cultural and artistic expressions in their historical and social background.
  - Compose interpretive essays based on the literature.
  - Propose his or her own plan of adapting a literary work into film and justify the choices made in this proposal.
- ANALYZE, CRITIQUE, AND EXPRESS IDEAS EFFECTIVELY AS SELF-RELIANT, EVALUATIVE VIEWERS OF FILMS BY APPLYING COMPLEX CRITICAL THINKING SKILLS (SLO#3; PSLO #2 and #4; Honors Prog. SLO #2 and #5). Outcome may be evaluated by all or some of the following criteria:
  - Apply terminology from film studies and critical theories.
  - Analyze and the interpret elements of film.
  - Appraise the strengths and weaknesses inherent in the genres of film
  - Evaluate films based on concepts such as narrative modes, genre conventions, and production exigencies.
  - Evaluate films in cultural context, as cultural and artistic expressions in their historical and social background.
  - Compose interpretive essays based on the literature.
• ASSESS ISSUES AS WELL AS RESEARCH, EVALUATE, AND SYNTHESIZE SOURCES TO SUPPORT A THESIS BY APPLYING COMPLEX CRITICAL THINKING SKILLS (SLO#4; PSLO #2, #3 and #5; Honors Prog. SLO # 3 and #4). Outcome may be evaluated by all or some of the following criteria:

• Evaluate and justify his or her own choices made in a proposed adaptation of a literary work.
• Integrate details from research to support his or her own choices made in the proposed adaptation.
• Appraise and use a variety of research techniques.
• Evaluate sources.
• Research and incorporate sources effectively and meaningfully in writing.
• Summarize, paraphrase, and directly quote outside sources as support for his or her ideas and/or represent a belief held by the opposition.
• Use MLA documentation format correctly.

HONOR 385 Honors Seminar in Genetics

This course offers honors students the opportunity to study, critique, and discuss advanced topics in genetics such as genetically modified foods, whole-genome rapid sequencing, gene therapies for human disease, and a variety of reproductive technologies. Furthermore, this course includes the study of Mendelian inheritance, the roles of chromosomes and genes in human disease, how genes direct development, the relationship between genes, environment and behavior, and the contribution of genes to human diversity. Students will engage with each other to discuss ethical, legal and social issues during class discussions, and analyze scientific literature in written reports. Enrollment is limited to Honors students. Details about the Honors Program can be found in the Catalog and on the CRC website. This course is the same as BIOL 485. This course, under either name, may be taken a total of one time for credit.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

• SLO 1: SOLVE GENETICS PROBLEMS BY APPLYING PRINCIPLES OF INHERITANCE.
  Solve genetics problems by applying Mendelian principles to single and two gene problems with and without dominance.
  Solve genetics problems involving sex linkage.
• SLO 2: INTEGRATE MOLECULAR GENETICS AND CELL BIOLOGY TO EXPLAIN THE BASIS OF HUMAN GENETIC TRAITS.
  Relate the functions of cellular organelles to specific human genetic disorders.
  Describe the structure and functions of DNA, RNA and proteins.
  Relate DNA, RNA and proteins to the development of human characteristics.
  Examine the interaction between genes and the environment.
  Use relevant genetic concepts to assess the contribution of genetic variation and environmental variation to variation in human phenotypes.
• SLO 3: RECOGNIZE THE IMPORTANCE OF GENE THERAPY, GENETIC ENGINEERING, AND BIOTECHNOLOGY ON HUMAN HEALTH.
  Describe the role of genes in human diseases (like cancer).
  Communicate how advances in recombinant DNA technology and biotechnology (e.g. gene therapy and genetic engineering) can be used to treat genetic diseases in humans, and modify other organisms for human use.
  Understand how modern DNA sequencing and genome databases are being used to change medical practices and better human health.
• SLO 4: GATHER RELEVANT INFORMATION AND USE IT TO EVALUATE THE SCIENTIFIC VALIDITY OF INFORMATION PRESENTED BY THE MEDIA AND OTHER SOURCES.
  Distinguish between scientific hypotheses, inferences, and speculation.
Identify and analyze the scientific basis of modern genetic technologies.

Review current scientific literature, and evaluate the effectiveness of the research.

Present written and/or oral reports which address background information, procedures, results, and interpretation of data from scientific literature.

Examine current ethical and social issues in human genetics.

**HONOR 391 Honors Seminar in Mathematics - Introduction to Mathematical Proof**

- **Same As:** MATH 483
- **Units:** 1
- **Hours:** 18 hours LEC
- **Prerequisite:** MATH 370 with a grade of "C" or better
- **Transferable:** CSU; UC
- **Catalog Date:** June 1, 2020

Honors Seminars in Mathematics are special one-unit intensive courses for academically accomplished students or those with the potential for high academic achievement. This particular course will study various methods of mathematical proof in a seminar setting, and will be particularly useful to students planning to study calculus, differential equations, and linear algebra. Topics include: deductive reasoning, proof by axioms, proofs of conditional and biconditional statements, proofs by contrapositive and contradiction, and proof by mathematical induction. Studies will include homework, discussions, oral presentations and lectures. Students will be expected to do independent problem solving and present their solutions to the class. Enrollment is limited to Honors Program students (see catalog). This course is the same as MATH 483. This course, under either name, may be taken one time for credit. This course will be offered in spring semester only.

**Student Learning Outcomes**

Upon completion of this course, the student will be able to:

- SLO 1: EXAMINE METHODS OF PROOF
  - Prove statements using axioms
  - Prove statements using deductive reasoning
  - Prove conditional statements
  - Prove biconditional statements
  - Prove statements using the contrapositive
  - Prove statements using contradiction
  - Prove statements using mathematical induction

**HONOR 392 Honors Seminar in Mathematics - Topics in Number Theory**

- **Same As:** MATH 484
- **Units:** 1
- **Hours:** 18 hours LEC
- **Prerequisite:** MATH 370 with a grade of "C" or better
- **Transferable:** CSU; UC
- **Catalog Date:** June 1, 2020

Honors Seminars in Mathematics are special one-unit intensive courses for academically accomplished students or those with the potential for high academic achievement. This particular course will study various topics in the field of number theory in a seminar setting. Topics include: the integers and their properties; finding integer solutions to Diophantine equations (equations with more variables than equations); and cryptography (the study of how secret codes are created and broken). Studies will include homework, discussions, oral presentations and lectures. Students will be expected to do independent problem solving and present their solutions to the class. Enrollment is limited to Honors Program students (see catalog). This course is the same as MATH 484. This course, under either name, may be taken one time for credit. This course will be offered in spring semester only.

**Student Learning Outcomes**
Upon completion of this course, the student will be able to:

- **SLO 1: EXAMINE THE PROPERTIES OF THE INTEGERS**
  - Examine divisibility
  - Examine prime numbers
  - Calculate the greatest common divisor
  - Examine the fundamental theorem of arithmetic
  - Prove theorems involving the integers
- **SLO 2: EXAMINE DIOPHANTINE EQUATIONS**
  - Examine the Euclidean algorithm
  - Solve linear Diophantine equations
  - Prove theorems involving Diophantine equations
- **SLO 3: EXAMINE LINEAR CONGRUENCES**
  - Examine modular arithmetic
  - Examine the properties of congruences
  - Solve congruence equations
  - Prove theorems involving linear congruences
- **SLO 4: EXAMINE CRYPTOLOGY**
  - Examine the theory of cryptology
  - Examine encoding messages
  - Examine decoding messages
  - Prove theorems involving cryptology

**HONOR 393 Introduction to Probability and Statistics - Honors**

This course is an introduction to probability and statistics designed for students in the honors program. Topics include elementary principles and applications of descriptive statistics, counting principles, elementary probability principles, probability distributions, estimation of parameters, hypothesis testing, linear regression and correlation, and ANOVA. Scientific calculators with two-variable statistical capabilities may be required for this class. This honors section uses an intensive instructional methodology designed to challenge motivated students. This course is the same as STAT 480 and only one may be taken for credit.

**Student Learning Outcomes**

Upon completion of this course, the student will be able to:

- **SLO 1: ORGANIZE, DISPLAY, DESCRIBE AND COMPARE REAL DATA SETS.**
- Recognize data types and data sources: develop basic statistical terminology including population parameters & sample statistics; identify common sampling methods used for obtaining data and identify advantages & disadvantages of each; recognize bias in sampling; compare principles of good experimental design
- Organize and display data appropriately by preparing tables and graphs.
Analyze data by computing measures of central tendency, measures of dispersion, and measures of position.

Analyze bivariate data for linear trends using the least-squares regression model and the correlation coefficient.

SLO 2: DISTINGUISH BETWEEN PROBABILITY MODELS APPROPRIATE TO DIFFERENT CHANCE EVENTS AND CALCULATE PROBABILITY ACCORDING TO THESE METHODS

Compute probabilities using sample spaces, the addition & multiplication rules, conditional probability, and complements.

Develop and apply probability distributions for discrete random variables; compute probabilities and expected value.

Analyze both discrete and continuous probability distributions by considering areas under the graph of a function or a histogram.

Use the normal and binomial probability distributions to compute probabilities.

Develop and apply sampling distributions for the sample mean and sample proportion.

SLO 3: APPLY INFERENTIAL STATISTICAL METHODS TO MAKE PREDICTIONS, DRAW CONCLUSIONS ABOUT HYPOTHESES AND COMPARE POPULATIONS.

Create and interpret confidence interval estimates for population mean and population proportion based on appropriate probability models.

Select the appropriate hypothesis test, perform the necessary computations and comparisons to test hypotheses about one population mean or one population proportion and explain the conclusion of the test.

Create and interpret confidence interval estimates for the difference in two population means (independent and dependent sampling) or two population proportions.

Select the appropriate hypothesis test, perform the necessary computations and comparisons to test hypotheses about two-population means (independent & dependent sampling), more than two population means (ANOVA), and two or more population proportions (Chi-Sq. tests) and explain the conclusion of the test.

Test significance of correlation and make predictions based on linear trends using the least-squares regression model.

SLO 4: USE TECHNOLOGY TO PERFORM STATISTICAL COMPUTATIONS, PREDICTIONS AND HYPOTHESIS TESTSeducation, psychology, life science, health science and education.

SLO 5: USE APPROPRIATE STATISTICAL TECHNIQUES TO ANALYZE AND INTERPRET APPLICATIONS OF DATA including all of the following: business, economics, social sciences, psychology, life science, health science and education.

SLO 6 (HONORS PROGRAM SLO 1): EXPRESSION OF IDEAS: EXPRESS IDEAS CLEARLY IN WELL-ORGANIZED WRITTEN MESSAGES (SLO #1, College Wide SLO – Area 1, and General Education SLO C5a – English Composition).

Express ideas clearly and completely in a variety of written formats.

Utilize correct and appropriate conventions of mechanics, usage, and style in written communication.

Comprehend main ideas and reasonably interpret written information.

Compose and apply properly documented sources of information.

SLO 7 (HONORS PROGRAM SLO 2): ANALYSIS AND CRITICAL THINKING: UTILIZE MODES OF ANALYSIS AND CRITICAL THINKING IN A DISCIPLINE OF STUDY AS APPLIED TO SIGNIFICANT ISSUES AND/OR PROBLEMS (SLO #2, College Wide SLO Area 3).

Analyze reasoning processes to evaluate issues, value judgments or conclusions that determine the quality, validity, and/or reliability of information.

Construct an accurate and/or logical interpretation of reasoning while applying a framework of analytic concepts.

Communicate a complex understanding of content matter of a major discipline of study.

Explain the importance of the major discipline of study in the broader picture of society.

SLO 8 (HONORS PROGRAM SLO 3): INTELLECTUAL INQUIRY: ACTIVELY ENGAGE IN INTELLECTUAL INQUIRY BEYOND THAT REQUIRED IN ORDER TO PASS A COURSE OF STUDY (SLO #3, College Wide SLO – Area 4).

Apply information and resources necessary to develop academically and personally.

Utilize skills from one’s “academic tool kit” including time management, study skills, etc.

SLO 9 (HONORS PROGRAM SLO 4): ETHICAL REASONING: RECOGNIZE THE ETHICAL DIMENSIONS OF DECISIONS AND ACTIONS (SLO #4, College Wide SLO – Area 5).

Demonstrate the ability to engage in ethical reasoning necessary to exercise responsibility as an ethical individual, professional, local and global citizen.

SLO 10 (HONORS PROGRAM SLO 5): ARTICULATE AN AWARENESS OF A VARIETY OF PERSPECTIVES WITHIN A DISCIPLINE AND THE RELEVANCE OF THESE PERSPECTIVES TO ONE’S OWN LIFE (SLO #5, College Wide SLO – Area 2).
Horticulture | Cosumnes River College

These CRC programs offer students the opportunity to blend the disciplines of horticulture, construction, drafting and business into a unique professional opportunity. A wide variety of employment opportunities are available in the Sacramento area for students completing the associate’s degree or one of the certificate programs. The continued growth of the area and the need for specialized training are creating a demand for qualified individuals. A student majoring in a degree option program should, upon completion, be able to meet the standards imposed by local industries for proper placement within the selected job area of the student’s choice. It should, however, be noted that each employment situation may require that additional standards be met.

Associate Degrees

A.S. in General Agriculture

Agriculture is a vital component of our local, state, and national economies and offers many exciting employment opportunities. In addition to the production of a wide range of valuable agricultural commodities, the Sacramento region is home to numerous multi-national agricultural corporations and statewide governmental agencies. It is also a center for international agricultural trade and commerce.

This program is designed for students majoring in Agriculture while also allowing the student to select courses that fit his/her individual needs and desires.

As a General Agriculture major, you will:

*Study a general agriculture curriculum representing all of the departments of the Cosumnes River College agriculture program including: agriculture business, horticulture, welding, veterinary technology and plant science.

*Develop your leadership and communication skills.

*Identify the agricultural career you are most interested in and build a course of study to better qualify you for a profession.

HIGHLIGHTS

*As the only community college agriculture program in the Sacramento region, the CRC General Agriculture program provides an excellent opportunity for individuals who wish to pursue a career in agriculture and receive a General Agriculture Associate of Science degree.

*The faculty in this program works closely with the five California agricultural degree offering universities to provide a quality program for students interested in agriculture business, management and economics.

*The Sacramento region is fortunate to have some of the best high school agriculture programs in California. The faculty in the CRC Ag program works closely with these feeder schools to articulate coursework and facilitate the successful transition of agriculture students from high school to the university.

*Internships in agriculture are available for students interested in work experience opportunities.

NOTE TO TRANSFER STUDENTS: If you are interested in transferring to a four-year college or university to pursue a bachelor’s degree in this major, it is critical that you meet with a CRC counselor to select and plan the courses for your major. Schools vary widely in terms of the required preparation. The courses that CRC requires for an Associate’s degree in this major may be different from the requirements needed for the Bachelor’s degree.

1 This major requires that you complete all courses in the required program plus one area of concentration.

The General Agriculture Associate in Science (A.S.) degree may be obtained by completion of the required program, plus general education requirements, plus sufficient electives to meet a 60-unit total. See CRC graduation requirements.

Student Learning Outcomes

Upon completion of this program, the student will be able to:

- PSLO 1: Demonstrate knowledge and hands-on experience in the basic concepts of all aspects of agriculture.
- PSLO 2: Demonstrate the ability to logically breakdown aspects of a project/problem and be able to resolve an issue in the agriculture industry.
- PSLO 3: Demonstrate independent & group learning expressing effective communication skills, both orally & written.
- PSLO 4: Participate in leadership opportunities to develop life-long learning traits.

Career Information

Management; Supervision; Finance; Insurance; Government; Marketing; Distribution; International Trade; Sales and Service; Nursery Management and Operations; Park Maintenance; Landscape Design, Teaching, Communication; Contracting & Maintenance; Fertilizer & Insecticide Application; Research; Retail/Wholesale; Estimator; Consultant; Government Agency employee; Welding Technician; Inspection; Welding Engineering; Sculpting; Home/Handicraft & Hobby; Construction; Trucking & Automotive. Some positions, however, require a four-year degree for which CRC's program is a good base for transfer.

A.S. in Horticulture, Sustainable Landscape

A variety of professional career opportunities are available to those who wish to provide professional landscape installation and/or support services. Landscapers design, install, and maintain private and public outdoor spaces in which people live, work, and play. The Sustainable Landscape A.S. Degree concentrates on those courses that develop the knowledge, skills, and attitudes essential to creating, constructing, and maintaining functional and sustainable landscapes, green spaces, and irrigation systems, as well as for careers in arboriculture, and landscape material, supply, and specialty services. The courses of this degree focus on sound horticultural science and principles, plant identification, proper soil development and management, sustainable landscape and irrigation design, water conservation, sustainable construction and landscape and turf maintenance practices, tree care, integrated pest management, licensing and certification, and horticultural business practices.

A minimum of 6 units from the following:

A minimum of 2 units from the following:

Total Units: 39

1Horticulture 100 at American River College meets the Hort 303 course requirement.
2Horticulture 322 at American River College meets the Hort 340 course requirement.

The Horticulture, Sustainable Landscape Associate in Science (A.S.) degree may be obtained by completion of the required program, plus general education requirements, plus sufficient electives to meet a 60-unit total. See CRC graduation requirements.

Student Learning Outcomes

Upon completion of this program, the student will be able to:

- PSLO 1: Demonstrate a fundamental understanding of basic horticultural principles and practices.
- PSLO 2: Demonstrate a fundamental understanding of soils, soil development, soil building and preparation, and sustainable soil management.
- PSLO 3: Demonstrate a fundamental understanding of plant identification, selection, use, and maintenance of plant material best suited for conventional and sustainable landscapes.
- PSLO 4: Demonstrate a fundamental understanding of basic landscape design principles and practices.
- PSLO 5: Demonstrate proficiency at implementing sustainable landscape construction principles and practices to install landscapes and landscape systems.
- PSLO 6: Demonstrate proficiency at implementing sustainable tree care, landscape maintenance, and integrated pest management principles and practices to care for and maintain landscapes and green spaces.
- PSLO 7: Demonstrate proficiency at implementing the principles and practices of irrigation design and installation to design, install, and manage water efficient irrigation systems.

Career Information

Students who complete the Sustainable Landscape A.S. degree may find employment in a wide range of areas including landscape contracting, landscape construction and installation, landscape and grounds maintenance, turf management, arboriculture and tree care, parks and recreation, landscape irrigation and water management, landscape design and consulting, nurseries and garden centers, landscape pest management, horticulture materials supply and power equipment servicing, and/or in a variety of other horticultural specialties.

Certificates of Achievement

Horticulture, General Horticulture Certificate
This program provides students with the essential knowledge and skills for entry level employment in the Horticulture industry. Students gain core knowledge and skills in basic plant science, soil science, integrated pest management, and plant identification and use. Students then complete two advanced horticulture courses of their choice. This is the base certificate in a stackable series that leads to an additional certificate or degree in Horticulture.

1Horticulture 100 at American River College meets the HORT 303 course requirement.

2Horticulture 322 at American River College meets the HORT 340 course requirement.

Student Learning Outcomes

Upon completion of this program, the student will be able to:

- **PSLO 1**: Demonstrate a fundamental understanding of basic horticultural principles and practices.
- **PSLO 2**: Demonstrate the knowledge and skills required to perform basic landscape and nursery operations.
- **PSLO 3**: Demonstrate the knowledge and skills required to design and implement a successful integrated pest management program.
- **PSLO 4**: Demonstrate the ability to identify selected plant material and make appropriate recommendations for its use in the landscape.
- **PSLO 5**: Demonstrate knowledge and skills in one or more horticulture specialties through advanced coursework, and/or a combination of courses, work experience in horticulture, or independent studies in horticulture.
A multitude of entry-level opportunities await those who earn a certificate in General Horticulture. Students may find gainful employment opportunities in landscape construction and maintenance, irrigation systems installation and maintenance, landscape planning, tree care, wholesale or retail nursery sales and support, landscape materials sales and/or services, or other specialty areas in Horticulture.

Horticulture, Sustainable Irrigation and Water Management Technology Certificate

The certificate in Sustainable Irrigation and Water Management Technology concentrates on those courses that develop the knowledge, skills, and attitudes essential to designing, installing, and managing water efficient irrigation systems that are compliant with current California state and local ordinances. The required courses are designed to develop a strong foundational understanding of basic botany and plant growth requirements, and provide advanced education and training in sound principles of soil/water relationship testing and evaluation, soil development and management, proper sprinkler and drip irrigation design, irrigation systems troubleshooting and retrofitting, and irrigation systems management for water conservation. Students will have the opportunity to become QWEL (Qualified Water Efficient Landscaper) certified through this certificate program. QWEL is an EPA WaterSense Partnership program.

Student Learning Outcomes

Upon completion of this program, the student will be able to:

- PSLO 1: Demonstrate a fundamental understanding of basic horticultural principles and practices.
- PSLO 2: Demonstrate the knowledge and skills required to sustainably manage landscape soils.
- PSLO 3: Demonstrate the knowledge and skills required to perform basic tasks related to landscape irrigation systems design, installation, and maintenance.
- PSLO 4: Demonstrate the knowledge and skills required to perform advanced tasks related to sustainable irrigation systems design, installation, retrofitting, and troubleshooting.
- PSLO 5: Demonstrate the knowledge and skills required to perform advanced tasks related to landscape water use efficiency and sustainable water management.

Career Information
Students who complete a certificate in Sustainable Irrigation and Water Management Technology can find employment opportunities in sprinkler and surface/subsurface irrigation design, consultation, installation, maintenance and irrigation/water management. Students may be self-employed, or find employment with landscape and/or irrigation design firms, landscape maintenance companies, golf courses, parks departments, water agencies, or other water/water service providers. This certificate will also prepare students for advanced training and certification through industry sponsored programs such as the Irrigation Association's (IA) Certified Irrigation Designer, Certified Irrigation Contractor, Certified Water Auditor, and Certified Water Manager programs, as well as the California Landscape Contractors Association (CLCA) Water Management Certification program.

Horticulture, Sustainable Landscape Design Certificate

The certificate in Sustainable Landscape Design concentrates on those courses that develop the knowledge, skills, and attitudes essential to creating landscape and irrigation designs that make best use of local resources including soil, water, and construction materials. The courses of this certificate focus on sound horticultural science and principles, proper soil development and management, sustainable landscape and irrigation design, water conservation, sustainable landscape construction and maintenance practices, and integrated pest management.

^1Horticulture 100 at American River College meets the Hort 303 course requirement.

^2Horticulture 322 at American River College meets the Hort 340 course requirement.

Student Learning Outcomes

Upon completion of this program, the student will be able to:

- PSLO 1. Demonstrate a fundamental understanding of basic horticultural principles and practices.
- PSLO 2. Demonstrate a fundamental understanding of soils, soil development, soil building and preparation, and sustainable soil management.
- PSLO 3. Demonstrate a fundamental understanding of plant identification, selection, and use of plant material best suited for sustainable landscapes.
- PSLO 4. Demonstrate a fundamental understanding of basic landscape design principles and practices.
- PSLO 5. Demonstrate a fundamental understanding of hydraulics and irrigation design, installation, and water management principles and practices.
Career Information

The certificate in Sustainable Landscape Design provides a strong horticulture foundation, along with the specialized skills and technical knowledge to prepare students for employment opportunities in the field of sustainable landscape planning and irrigation design. Students who complete a certificate in Sustainable Landscape Design find employment in landscape and irrigation design, planning, consultation, installation management, and water systems management. Students may be self-employed, or find employment with landscape design firms, landscape contractors, landscape maintenance firms, or other related service providers. Students will have the opportunity to become QWEL (Qualified Water Efficient Landscaper) certified through this certificate program. QWEL is an EPA WaterSense Partnership program. This certificate will also prepare students for advanced training and certification through industry sponsored programs such as the Irrigation Association (IA) Certified Water Auditor and Certified Water Manager programs.

Horticulture, Sustainable Landscape Certificate

A variety of professional career opportunities are available to those who wish to provide professional landscape installation and/or support services. Landscapers design, install, and maintain private and public outdoor spaces in which people live, work, and play. The Sustainable Landscape Certificate concentrates on those courses that develop the knowledge, skills, and attitudes essential for entry-level careers in developing, constructing, and maintaining functional and sustainable landscapes, green spaces, and irrigation systems, as well as careers in tree care, and landscape material, supply, and specialty services. The courses in this certificate focus on sound horticultural science and principles, plant identification, proper soil development and management, sustainable landscape and irrigation design, water conservation, sustainable construction and landscape maintenance, tree care, and integrated pest management.

\(^1\)Horticulture 100 at American River College meets the Hort 303 course requirement.

Student Learning Outcomes

Upon completion of this program, the student will be able to:

- PSLO 1: Demonstrate a fundamental understanding of basic horticultural principles and practices.
• PSLO 2: Demonstrate a fundamental understanding of soils, soil development, soil building and preparation, and sustainable soil management.

• PSLO 3: Demonstrate a fundamental understanding of plant identification, selection, use, and maintenance of plant material best suited for sustainable landscapes.

• PSLO 4: Demonstrate proficiency at implementing the principles and practices of Integrated Pest Management for sustainable landscapes.

• PSLO 5: Demonstrate proficiency at implementing the principles and practices of sustainable landscape construction, sustainable landscape maintenance, or arboriculture to install and/or maintain sustainable landscapes.

• PSLO 6: Demonstrate proficiency at implementing the principles and practices of irrigation design and water efficiency to design, install, and manage landscape irrigation systems.

Career Information

Students who complete a certificate in Landscape Technology may find entry-level employment in a wide range of areas including landscape contracting, landscape construction and installation, landscape and grounds maintenance, turf management, tree care, parks and recreation, landscape irrigation, landscape design and consulting, nurseries and garden centers, landscape pest management, and horticulture materials supply and power equipment servicing.

Plant-Based Nutrition and Sustainable Agriculture Certificate

The Plant-Based Nutrition and Sustainable Agriculture Certificate Program brings farm-to-fork into the classroom. It provides the science that supports the benefits of whole plant-based foods to the health of the individual as well as the environment. Students will gain knowledge in the function of plant-based foods towards the treatment and prevention of chronic diseases. The program addresses the environmental and social concerns with strategies and principles of sustainable agriculture. Students will master the theories and skills of plant-based food preparation bringing the food to the fork and into everyday food choices.

Contact the CRC Nutrition and Foods, Horticulture, and/or Ag Counselor regarding transferable courses.

Student Learning Outcomes

Upon completion of this program, the student will be able to:

• PSLO 1: Demonstrate independent learning and effective communication skills.

• Demonstrate responsibility for personal action and choices.

• Communicate effectively both orally and in writing.

• PSLO 2: Explain the principles of nutrition and its effect on health.

• Relate the dietary causes of chronic diseases.

• Evaluate the role of plant-based foods on health and the environment.

• PSLO 3: Demonstrate a fundamental understanding of health behaviors on nutritional and health status.

• Schematize the effects of personal food choice on health, the environment and public policy.

• PSLO 4: Basic and advanced plant science/horticulture skills development and improvement.
This course covers the laws, regulations, and safety requirements for individuals preparing to obtain a Qualified Applicator's Certificate (QAC) in California Department of Pesticide Regulation (CDPR) category Q or a Qualified Applicator's License (QAL) in CDPR category B. This course will also cover the requirements and process of obtaining a Maintenance Gardener Pest Control Business License. Topics include pesticide safety and application, pesticide modes of action, pesticide regulation, applicator licensing and certification, accepted standards for integrated pest management, and the methods and practices of preventing and controlling common landscape weeds, invertebrate and vertebrate pests, nematodes, and infectious and noninfectious plant diseases. Environmental concerns regarding pesticide resistance, surface and groundwater contamination, and other exposures will be covered. Field trips may be required.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- Demonstrate and apply the theories of sustainable and organic agriculture.
- Demonstrate a fundamental understanding of soils, soil development, soil building and preparation and sustainable soil management.
- Demonstrate a fundamental understanding of hydraulics and irrigation design, installation, and water management principles and practices.
- Create agriculture design concepts based on sound, sustainable soil management, water conservation, construction and maintenance, and integrated pest management best practices.
- PSLO 5: Effectively and accurately prepare and analyze raw ingredients and prepared foods.
- Evaluate food through sensory evaluation of texture, taste, color, presentation, smell and umami.
- Identify optimal cooking procedures/heat transfer to maximize nutrient content as well as the quality of the ingredients and dish as a whole.
- Analyze quality defects in cooked products and specify possible errors in techniques or ingredient selection.
- PSLO 6: Implement proper sanitary and safety techniques.
- Demonstrate a fundamental understanding of soils, soil development, soil building and preparation and sustainable soil management.
- Demonstrate a fundamental understanding of hydraulics and irrigation design, installation, and water management principles and practices.
- Create agriculture design concepts based on sound, sustainable soil management, water conservation, construction and maintenance, and integrated pest management best practices.
- Utilize kitchen tools/equipment appropriately.

Career Information

In restaurants, food service facilities, farms, urban farms, sustainable/organic farms, school garden, health education. Some of these career options may require more than the certificate and two years of college study. Classes beyond the associate degree may be required to fulfill some career options or for preparation for transfer to a university program.

Horticulture (HORT)

HORT 105 Pest Control Licensing or Certification

Units: 2
Hours: 36 hours LEC
Prerequisite: None.
Advisory: HORT 300, HORT 303, PLTS 300, or PLTS 332
Catalog Date: June 1, 2020

This course covers the laws, regulations, and safety requirements for individuals preparing to obtain a Qualified Applicator's Certificate (QAC) in California Department of Pesticide Regulation (CDPR) category Q or a Qualified Applicator's License (QAL) in CDPR category B. This course will also cover the requirements and process of obtaining a Maintenance Gardener Pest Control Business License. Topics include pesticide safety and application, pesticide modes of action, pesticide regulation, applicator licensing and certification, accepted standards for integrated pest management, and the methods and practices of preventing and controlling common landscape weeds, invertebrate and vertebrate pests, nematodes, and infectious and noninfectious plant diseases. Environmental concerns regarding pesticide resistance, surface and groundwater contamination, and other exposures will be covered. Field trips may be required.
Demonstrate a fundamental understanding of the safe and efficient use of pesticides, adjuvants, and neutralizers.

SLO 3: Demonstrate a fundamental understanding of California pesticide laws and regulations.

Evaluate the requirements and process for obtaining a Qualified Applicators Certificate

Evaluate the requirements and process for obtaining a Maintenance Gardener Pest Control Business License.

Demonstrate a fundamental understanding of the exams and testing procedures of the California Department of Pesticide Regulation (DPR).

Demonstrate a fundamental understanding of license and certificate maintenance requirements and procedures.

SLO 4: Demonstrate a fundamental understanding of integrated pest management (IPM).

Demonstrate the ability to identify weed, invertebrate, and vertebrate pests, as well as nematodes and disease causing pathogens visually or through symptom identification.

Demonstrate the ability to identify beneficial organisms affecting pest management decisions.

Demonstrate a fundamental understanding of invertebrate pest prevention and management.

Demonstrate a fundamental understanding of weed pest prevention and management.

Demonstrate a fundamental understanding of disease prevention and management.

Demonstrate a fundamental understanding of nematode prevention and management.

Demonstrate a fundamental understanding of vertebrate pest prevention and management.

SLO 5: Demonstrate a fundamental understanding of pesticides and pesticide function and use.

Differentiate pesticide categories and modes of action.

Assess various pesticide formulations and methods of application.

Demonstrate a fundamental understanding of pesticide storage, transportation, and disposal.

Explain the legal requirements of pesticide labels, material safety data sheets, and the worker safety standard with regards to the legal obligations of the end-user.

SLO 6: Demonstrate a fundamental understanding of pesticide application equipment and use.

Assess various types of pesticide application equipment.

Calculate appropriate amounts of pesticide material to apply to a given landscape area.

Examine methods for calibrating pesticide application equipment.

Discuss the approved methods for cleaning and neutralizing pesticide application equipment.

SLO 7: Demonstrate a fundamental understanding of business and professional standards in pest management.

Compile a list of requirements for registering a license with the county Department of Agriculture.

Demonstrate a fundamental understanding and ability to complete and file pesticide application reports as required by each county Department of Agriculture.

Demonstrate success on practice certification and licensing exams.

Recognize and explain the standard practices of various types of landscape construction/maintenance businesses, including estimating and bidding procedures, business practices, and working with state agencies.

**HORT 300 Introduction to Horticulture**

- **Units:** 3
- **Hours:** 54 hours LEC
- **Prerequisite:** None.
- **Transferable:** CSU; UC
- **General Education:** AA/AS Area IV
- **Catalog Date:** June 1, 2020

Introduction to Horticulture is a general, entry level course into environmental horticulture with an emphasis on basic plant science, plant use and care, and the landscape and nursery industries. Topics include basic botany, cultural practices, propagation, structures and layout, pest management, planting, container gardening, plant identification, turfgrass installation and care, and a survey of career opportunities.
Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO 1: Demonstrate independent learning and effective communication skills.
- Operate independently by attending or logging into class regularly.
- Utilize time management effectively and prioritize tasks to meet deadlines.
- Demonstrate effective oral and written communication.
- SLO 2: Demonstrate a fundamental understanding of the California horticulture industry.
- Identify the major markets of the horticulture industry and verify how these markets function in their county in the state of California.
- Identify and evaluate the various horticultural occupations and the associated employment requirements and opportunities.
- Identify and evaluate common practices of various horticultural business types.
- SLO 3: Demonstrate a fundamental understanding of scientific investigation and basic botany as it relates to gardening and landscaping.
- Apply the Scientific Method of research to appropriate horticulture and/or agriculture applications.
- Assess the role of plant cells, cells structures, and basic genetics in vegetative development, plant growth, and plant production.
- Recognize the major structures of plants and explain the function of each major plant structure.
- Identify and explain the requirements of plant growth.
- Utilize effectively plant identification and botanical terminology.
- Assess plant propagation through sexual and asexual methods.
- SLO 4: Demonstrate a fundamental understanding of soils and water in the garden/landscape.
- Explain soil development and structure, and describe sustainable soil maintenance practices.
- Formulate soils and container media.
- Evaluate various plant species and nutritional needs, and explain how to measure, mix, and apply fertilizers.
- Evaluate soil-water relationships.
- Assess water efficient irrigation methods and estimate watering needs.
- SLO 5: Demonstrate a fundamental understanding of common horticultural practices.
- Identify common horticulture tools and equipment.
- Identify common horticulturally related injuries when using tools incorrectly, and explain the safe and effective use of common horticulture tools and equipment.
- Identify the various types of horticultural structures and uses.
- Describe the methods utilized to plant and care for horticultural crops.
- Compare various cultural practices, and the resulting effect of each on plant health and development.
- Describe the process of plant selection and use.
- Recognize symptoms and signs of plant diseases and pests, and identify pest damage.
- Identify and explain common integrated pest management practices.
- Identify and explain common turf installation and maintenance practices.
- Identify and explain common pruning methods and practices.
- Identify and explain common sustainable landscape design methods.
- Describe the methods utilized in interiorscaping and indoor plant establishment and care.
- Identify and explain common vegetable and flower gardening practices.
- Formulate appropriate solutions for various garden/landscape scenarios.
HORT 302 Soils, Soil Management, and Plant Nutrition

This course provides a basic knowledge of the physical, chemical, and biological properties of soils. The course includes factors of: fundamental soil properties, soil and plant relationships, principles of soil formation, fertilizers and soil management, salinity, pH, erosion management, and non-agricultural uses. Field trips may be required. This course is the same as PLTS 310, and only one may be taken for credit.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO 1: Demonstrate independent learning and effective communication skills.
  - Operate independently by attending and / or logging into class regularly when the course is offered online or an online component is utilized as part of the course.
  - Utilize time management effectively and prioritize tasks to meet deadlines.
  - Demonstrate effective oral and written communication.

- SLO 2: Demonstrate a fundamental understanding of the physical and chemical properties of soils
  - Apply the Scientific Method of research through soils and plant specific laboratory applications.
  - Compare the textural classes of soil through laboratory analysis.
  - Explain the role of soil structure and evaluate the effects of tillage management in soil productivity.
  - Analyze the physical, chemical, and biological properties of soils, and understand their formation and how they are reservoirs for nutrients, water, and microscopic life.
  - Assess the physical and chemical properties of soil through laboratory analysis.

- SLO 3: Demonstrate a fundamental understanding of the role of soil in plant nutrition.
  - Identify the chemical elements necessary for plant growth through laboratory analysis.
  - Diagnose common chemical deficiency and toxicity symptoms.
  - Examine common cultural practices utilized to keep a soil's nutritional elements the in an adequate supply and proper balance.
  - Validate the fundamentals of plant nutrition through laboratory analysis.

- SLO 4: Demonstrate a fundamental understanding of best soil management practices in sustainable horticulture.
  - Explain why our soils, as a natural resource, must be managed and preserved.
  - Demonstrate how to effectively manage the physical, chemical, and biological properties of soils for sustained productivity.
  - Examine the methods and means of utilizing organic matter to improve soil structure, support soil biology, and to maintain and stimulate soil health.
  - Analyze the effects of soil compaction in crop production and horticultural situations, and explain common methods utilized to alleviate soil compaction.
  - Analyze the effects of soil erosion in crop production and horticultural situations, and explain common methods utilized to prevent soil erosion.
  - Explain why irrigated soils must be managed in special ways to preserve its productivity.
  - Explain the effects of salts and high sodium levels on soil structure, pH, drainage, and plant productivity.
  - Validate the fundamentals of soil management through laboratory analysis.
HORT 303 Integrated Pest Management

This course is a study of local plant pests including weeds, diseases, invertebrates, and vertebrates. It includes recognition of symptoms and causes, life cycle of the pests, host and habitat relationships, and the integrated pest management strategies and best management practices to achieve control. Field trips may be required. This course is the same as PLTS 332, and only one may be taken for credit.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO 1: Demonstrate independent learning and effective communication skills.
  - Operate independently by attending or logging into class regularly.
  - Utilize time management effectively and prioritize tasks to meet deadlines.
  - Demonstrate effective oral and written communication.

- SLO 2: Demonstrate a fundamental understanding of jobsite safety and effective and efficient work habits.
  - Validate and demonstrate safety consciousness in work dress/apparel, tool use, jobsite demeanor, and personal protective equipment use.
  - Assess jobsite hazards, reduce work related risks, and influence others to work in a safe and efficient manner.
  - Select appropriate personal protective equipment for a given pesticide.
  - Demonstrate the safe and efficient use of pesticide application equipment.

- SLO 3: Assess, evaluate, and implement the principles and practices of integrated pest management.
  - Evaluate the economic significance of plant pest problems in horticulture.
  - Assess the reasons conventional pest control options are no longer desirable.
  - Demonstrate the ability to diagnose and analyze pest damage, recommend integrated pest management strategies, and select proper control measures.
  - Identify insects and closely related plant pests, common diseases and abiotic plant disorders, weed species, and beneficial organisms as evident from existing signs and symptoms.
  - Compare and contrast various methods of conventional and integrated pest management strategies.
  - Demonstrate the ability to safely and accurately prepare pesticide application equipment.
  - Demonstrate the ability to safely and efficiently operate pesticide application equipment through the application of pesticide materials during a simulated exercise.
  - Formulate a seasonal pest management plan using the principles of integrated pest management.

- SLO 4: Demonstrate a fundamental understanding of licensing and/or certification, and business and professional standards in integrated pest management.
  - Analyze landscape pest management professions and identify and explain requirements for employment and/or licensing or certification.
  - Recognize and explain the benefits of additional/supplemental licensing and certification through state agencies and professional associations.
  - Examine and explain the California state Department of Pesticide Regulation laws and regulations, and the CDPR rules governing the Qualified Applicator’s Certificate and Landscape Maintenance Gardener’s pesticide license.
  - Validate and demonstrate the importance of professionalism in the landscape industry, and described the professional industry associations and certification programs.
  - Recognize and explain the standard practices of various types of landscape construction/maintenance businesses, including estimating and bidding procedures, business practices, and working with state agencies.
HORT 305 Plant Identification-Fall Selections

This course is the identification and study of the growth habits, cultural practices, and ornamental uses of landscape and indoor plants adapted to climates of California. Plants emphasized will come from the current California Association of Nurseries and Garden Centers (CANGC) and California Landscape Contractors Association (CLCA) certification exams plant lists. The focus will be on those plants best observed and studied during California’s fall and/or winter seasons. Field trips may be required.

Upon completion of this course, the student will be able to:

- **SLO 1:** Demonstrate independent learning and effective communication skills.
  - Operate independently by attending or logging into class regularly.
  - Utilize time management effectively and prioritize tasks to meet deadlines.
  - Demonstrate effective oral and written communication.

- **SLO 2:** Demonstrate a fundamental understanding of jobsite safety and effective and efficient work habits.
  - Validate and demonstrate safety consciousness in work dress/apparel, tool use, jobsite demeanor, and personal protective equipment use.
  - Assess jobsite hazards, reduce work related risks, and influence others to work in a safe and efficient manner.
  - Select appropriate personal protective equipment for given landscape operations.
  - Identify potential hazards created by improper pruning and training and/or poor cultural practices.

- **SLO 3:** Assess, evaluate, and implement the principles and practices of plant identification and use.
  - Recognize, explain, and utilize the binomial method of plant nomenclature.
  - Recognize, explain, and utilize plant identification and botanical terminology.
  - Identify by leaf, bark, flower, fruit, and growth habit those plants best observed and studied during California’s fall and/or winter seasons.
  - Examine, compare, and explain soil requirements and ecology of different plants.
  - Analyze the various uses of plants in the home and commercial landscape.
  - Propose landscape uses for those plants possessing desirable characteristics during California’s fall and/or winter seasons.
  - Identify plants whose requirements fit selected criteria.
  - Examine, formulate, and utilize plant keys to identify those plants best observed and studied during California’s fall and/or winter seasons.
  - Assemble a professional herbarium utilizing collected and preserve plant materials, scans, and/or pictures.
  - Recognize ideal characteristics of plants best observed and studied during California’s fall and/or winter seasons, and select quality plant material from nursery stock.
  - Evaluate plant health and identify plant damage caused by pests, diseases, environmental conditions, nutritional deficiencies, or poor cultural practices.
  - Examine, evaluate, and compare computerized plant selection software programs.
  - Develop a plant characteristics key for future design work.

- **SLO 4:** Demonstrate a fundamental understanding of licensing and/or certification, and business and professional standards as related to plant identification in horticulture.
  - Recognize and explain the benefits of additional/supplemental licensing and certification through state agencies and professional associations.

3 Units: 36 hours LEC; 54 hours LAB
Prerequisite: None.
Advisory: HORT 300
Transferable: CSU; UC (HORT 305 and 306 combined: maximum transfer credit is one course)
C-ID: C-ID AG - EH 112L
Catalog Date: June 1, 2020
- Validate and demonstrate the importance of professionalism in the landscape industry, and described the professional industry associations and certification programs.

**HORT 306 Plant Identification-Spring Selections**

**Units:** 3  
**Hours:** 36 hours LEC; 54 hours LAB  
**Prerequisite:** None.  
**Advisory:** HORT 300  
**Transferable:** CSU; UC (HORT 305 and 306 combined: maximum transfer credit is one course)  
**C-ID:** C-ID AG - EH 108L  
**Catalog Date:** June 1, 2020

This course is the identification and study of the growth habits, cultural practices, and ornamental uses of landscape and indoor plants adapted to climates of California. Plants emphasized will come from the current California Association of Nurseries and Garden Centers (CANGC) and California Landscape Contractors Association (CLCA) certification exams plant lists. The focus will be on those plants best observed and studied during California’s spring and/or summer seasons. Field trips may be required.

**Student Learning Outcomes**

Upon completion of this course, the student will be able to:

- **SLO 1:** Demonstrate independent learning and effective communication skills.
  - Operate independently by attending or logging into class regularly.
  - Utilize time management effectively and prioritize tasks to meet deadlines.
  - Demonstrate effective oral and written communication.

- **SLO 2:** Demonstrate a fundamental understanding of jobsite safety and effective and efficient work habits.
  - Validate and demonstrate safety consciousness in work dress/apparel, tool use, jobsite demeanor, and personal protective equipment use.
  - Assess jobsite hazards, reduce work related risks, and influence others to work in a safe and efficient manner.
  - Select appropriate personal protective equipment for given landscape operations.
  - Identify potential hazards created by improper pruning and training and/or poor cultural practices.

- **SLO 3:** Assess, evaluate, and implement the principles and practices of plant identification and use.
  - Recognize, explain, and utilize the binomial method of plant nomenclature.
  - Recognize, explain, and utilize plant identification and botanical terminology.
  - Identify by leaf, bark, flower, fruit, and growth habit those plants best observed and studied during California’s spring and/or summer seasons.
  - Examine, compare, and explain soil requirements and ecology of different plants.
  - Analyze the various uses of plants in the home and commercial landscape.
  - Propose landscape uses for those plants possessing desirable characteristics during California’s spring and/or summer seasons.
  - Identify plants whose requirements fit selected criteria.
  - Examine, formulaic, and utilize plant keys to identify those plants best observed and studied during California’s spring and/or summer seasons.
  - Assemble a professional herbarium utilizing collected and preserve plant materials, scans, and/or pictures.
  - Recognize ideal characteristics of plants best observed and studied during California’s spring and/or summer seasons, and select quality plant material from nursery stock.
  - Evaluate plant health and identify plant damage caused by pests, diseases, environmental conditions, nutritional deficiencies, or poor cultural practices.
  - Examine, evaluate, and compare computerized plant selection software programs.
  - Develop a plan characteristics key for future design work.

- **SLO 4:** Demonstrate a fundamental understanding of licensing and/or certification, and business and professional standards as related to plant identification in horticulture.
Recognize and explain the benefits of additional/supplemental licensing and certification through state agencies and professional associations.

Validate and demonstrate the importance of professionalism in the landscape industry, and described the professional industry associations and certification programs.

HORT 307 Plant Identification - Sustainable and CA Native Selections

Units: 3
Hours: 36 hours LEC; 54 hours LAB
Prerequisite: None.
Advisory: HORT 300
Transferable: CSU; UC
Catalog Date: June 1, 2020

This course is the identification and study of the growth habits, cultural practices, and ornamental uses of California native plants, as well as plant material appropriate for sustainable landscaping. Plants emphasized will come from the current California Native Plant Society (CNPS), California Association of Nurseries and Garden Centers (CANGC), and California Landscape Contractors Association (CLCA) plant lists. Field trips may be required.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO 1: Demonstrate independent learning and effective communication skills.
  - Operate independently by attending or logging into class regularly.
  - Utilize time management effectively and prioritize tasks to meet deadlines.
  - Demonstrate effective oral and written communication.
- SLO 2: Demonstrate a fundamental understanding of jobsite safety and effective and efficient work habits.
  - Validate and demonstrate safety consciousness in work dress/apparel, tool use, jobsite demeanor, and personal protective equipment use.
  - Assess jobsite hazards, reduce work related risks, and influence others to work in a safe and efficient manner.
  - Select appropriate personal protective equipment for given landscape operations.
  - Identify potential hazards created by improper pruning and training and/or poor cultural practices.
- SLO 3: Assess, evaluate, and implement the principles and practices of plant identification and use.
  - Recognize, explain, and utilize the binomial method of plant nomenclature.
  - Recognize, explain, and utilize plant identification and botanical terminology.
  - Identify by leaf, bark, flower, fruit, and growth habit of California native and sustainable plant material.
  - Examine, compare, and explain soil requirements and ecology of different plants.
  - Analyze the various uses of plants in the home and commercial landscape.
  - Propose landscape uses for California native and sustainable plant material possessing desirable characteristics.
  - Identify plants whose requirements fit selected criteria.
  - Examine, formulate, and utilize plant keys to identify California native and sustainable plant material.
  - Assemble a professional herbarium utilizing collected and preserve plant materials, scans, and/or pictures.
  - Recognize ideal characteristics of California native and sustainable plant material, and select quality plant material from nursery stock.
  - Evaluate plant health and identify plant damage caused by pests, diseases, environmental conditions, nutritional deficiencies, or poor cultural practices.
  - Examine, evaluate, and compare computerized plant selection software programs.
  - Develop a plant characteristics key for future design work.
SLO 4: Demonstrate a fundamental understanding of licensing and/or certification, and business and professional standards as related to plant identification in horticulture.

Recognize and explain the benefits of additional/supplemental licensing and certification through state agencies and professional associations.

Validate and demonstrate the importance of professionalism in the landscape industry, and described the professional industry associations and certification programs.

**HORT 312 Plant Propagation**

**Units:** 3

**Hours:** 36 hours LEC; 54 hours LAB

**Prerequisite:** None.

**Advisory:** HORT 300

**Transferable:** CSU

**C-ID:** C-ID AG - EH 116L

**Catalog Date:** June 1, 2020

Plant Propagation is a study and practice of the sexual and asexual reproduction of landscape plant species. The emphasis of Horticulture 312 will be on the preparation and use of propagating and planting mediums, planting, transplanting, fertilizing, propagation facility pest and disease control, propagation structure utilization and site layout. Additional topics include the maintenance of common tools and equipment, and the laws and regulations pertaining to plant propagation and nursery production.

**Student Learning Outcomes**

Upon completion of this course, the student will be able to:

- **SLO 1:** Demonstrate independent learning and effective communications skills.

- Operate independently by attending or logging into class regularly if and when an online component is integrated into this course.

- Utilize time management effectively and prioritize tasks to meet deadlines.

- Communicate effectively (orally and/or written).

- **SLO 2:** Demonstrate a fundamental understanding of jobsite safety and effective and efficient work habits.

- Validate and demonstrate safety consciousness in work dress/apparel, tool use, jobsite demeanor, and personal protective equipment use.

- Assess jobsite hazards, reduce work related risks, and influence others to work in a safe and efficient manner.

- Identify and safely use specialized nursery tools and equipment.

- **SLO 3:** Demonstrate a fundamental understanding of the wholesale and retail nursery industry.

- Identify and assess the major markets of the nursery industry and verify how these markets function within the local horticulture industry and in the county and state economy.

- Identify and evaluate the various nursery occupations and the associated employment requirements.

- Explain the industry accepted cultural practices utilized in the production, growth, and care of nursery and container stock.

- Assess and exhibit the personal skills (attitude, work habits, etc.) for successful employment in the wholesale and retail nursery industry.

- Evaluate and describe the various types of wholesale plant production industries.

- Analyze and assess the major federal and state laws governing plant propagation and protection.

- **SLO 4:** Demonstrate a fundamental understanding of plant propagation principles and practices.

- Evaluate and explain the effect of temperature, water, humidity, and fertility on plant growth.

- Assess and describe the principles of sexual and asexual plant reproduction.

- Compare the various propagation methods and select the most appropriate method for a given plant species.
Create and implement a propagation program, and grow plants from propagation stage to salable size including:

- Mastering the procedures of plant propagation including seed, cuttings, layering, and division;
- Practicing the procedures of plant propagation including budding, grafting, and micro-propagation;
- Calculating the proper timing for the various propagation and production techniques appropriate to the plant species and propagation method;
- Formulating and preparing specialized planting and propagating media;
- Calculating, measuring, blending, and applying fertilizers;
- Planting and transplanting a variety of plants into appropriate containers.

Select and explain common integrated pest management procedures for common garden, landscape, and greenhouse pests.

Devise and implement a marketing plan, and demonstrate proper merchandising techniques.

Identify common propagation, nursery, and landscape tools and equipment, and demonstrate the ability to use and maintain nursery tools and equipment.

Create a retail nursery layout plan.

Evaluate and select appropriate methods used to construct nursery facilities.

Demonstrate various methods of plant propagation.

**HORT 313 Sustainable Agriculture**

**Units:** 3
**Hours:** 36 hours LEC; 54 hours LAB
**Prerequisite:** None.
**Transferable:** CSU; UC
**General Education:** AA/AS Area IV
**Catalog Date:** June 1, 2020

This course provides a comprehensive study of sustainable agriculture that addresses many environmental and social concerns while providing innovative and economically viable techniques for growers. It integrates the theoretical aspects of sustainable agriculture, principles and practices with field-based laboratory and participatory learning of sustainable agriculture practices. This course may include field trips.

**Student Learning Outcomes**

Upon completion of this course, the student will be able to:

- **SLO 1:** Demonstrate independent learning and effective communication skills.
- Demonstrate responsibility for personal actions and choices.
- Communicate effectively both orally and in writing.
- **SLO 2:** Demonstrate basic and advanced plant science/horticulture skills development and improvement.
- Demonstrate and apply the theories of sustainable and organic agriculture.
- Demonstrate a fundamental understanding of soils, soil development, soil building and preparation and sustainable soil management.
- Demonstrate a fundamental understanding of hydraulics and irrigation design, installation, and water management principles and practices.
- Create agriculture design concepts based on sound, sustainable soil management, water conservation, construction and maintenance, and integrated pest management best practices.
- Describe the development and dissemination of modern agricultural technologies and land use practices.
- Detail the extent of agricultural land use today and how trends in human population growth have and may continue to place additional demands upon agricultural ecosystems.
- Explain the agro-ecosystem, environmental quality and human health risks associated with the technologies and land use practices common in modern US agriculture.
- Explain the differences and similarities of several types of sustainable agriculture.
- Describe the basic plant anatomy and physiology as it relates to crop production.
- Explain and apply the scientific method to sustainable agriculture production practices.
This course covers the fundamentals of landscape construction, including soil preparation, paving and construction materials, hand and power tool use, turf and plant installation, plan reading, estimating, and bid preparation. It will emphasize approved traditional industry construction methods, as well as sustainable alternative and techniques. Local codes and state requirements will also be covered. This course is an initial step in preparation for the California State C-27 Landscape Contractor License exam. Field trips may be required.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- **SLO 1:** Demonstrate independent learning and effective communication skills.
  - Operate independently by attending or logging into class regularly.
  - Utilize time management effectively and prioritize tasks to meet deadlines.
  - Demonstrate effective oral and written communication.

- **SLO 2:** Demonstrate a fundamental understanding of jobsite safety and effective and efficient work habits.
  - Validate and demonstrate safety consciousness in work dress/apparel, tool use, jobsite demeanor, and personal protective equipment use.
  - Assess jobsite hazards, reduce work related risks, and influence others to work in a safe and efficient manner.
  - Select appropriate hand and/or power tools for a variety of landscape projects.
  - Demonstrate the safe and efficient use of hand, power, and powder-actuated tools to construct wood, masonry, and concrete projects.
  - Demonstrate the safe and efficient use of gas/fuel powered landscape equipment.

- **SLO 3:** Assess, evaluate, and implement the principles and practices of sustainable landscape construction.
  - Select appropriate soil preparation methods for various soil conditions.
  - Select and utilize appropriate measuring and leveling devices to alter landforms, establish finish grades, calculate proper slope, and control drainage and runoff.
  - Analyze and explain the fundamentals of construction material selection, including the use of recycled materials.
  - Analyze and explain the fundamentals of walk, deck, patio, and fence construction.
  - Analyze and explain the fundamentals of water feature installation.
  - Analyze and explain the fundamentals of landscape lighting design and installation.
  - Plan and install a water efficient, automated irrigation system.
  - Compare and appraise the use of seed, sprigs, sod, and artificial turf as a means of lawn establishment.
  - Explain and demonstrate the steps required when installing lawn seed, sod, and artificial turf.
  - Examine and select the appropriate shrub and tree planting method and staking system for a given slope, environment, and soil condition.
  - Utilize a complete set of landscape plans to estimate material quantities, material and supply costs, and labor costs.
  - Analyze a complete set of landscape plans, and prepare a construction estimate and/or bid.

- **SLO 4:** Demonstrate a fundamental understanding of state contractor licensing, supplemental certification, and business and professional standards in the landscape industry.
  - Analyze landscape professions and identify and explain licensing requirements.
  - Recognize and explain the requirements and procedures for procuring a C-27 landscape contracting license.
  - Recognize and explain the benefits of additional/supplemental licensing and certification through state agencies and professional associations.
Examine and explain the California state contracting laws and regulations, and the California State License Board rules governing the C-27 landscape contractor's specialty license.

Validate and demonstrate the importance of professionalism in the landscape industry, and described the professional industry associations and certification programs.

Recognize and explain the standard practices of various types of landscape construction/maintenance businesses, including estimating and bidding procedures, business practices, and working with state agencies.

**HORT 324 Sustainable Landscape Maintenance**

**Units:** 3
**Hours:** 36 hours LEC; 54 hours LAB
**Prerequisite:** None.
**Advisory:** HORT 300 with a grade of "C" or better
**Transferable:** CSU
**Catalog Date:** June 1, 2020

This course is a study of sustainable landscape maintenance and management of exterior and interior residential and commercial landscapes, parks, highways, and public buildings. Topics include planting and transplanting, pruning, water conservation and use, sustainable plant nutrition and soils management, integrated pest management, and the safe operation and maintenance of power equipment for the trade. Field trips may be required.

**Student Learning Outcomes**

Upon completion of this course, the student will be able to:

- **SLO 1**: Demonstrate independent learning and effective communication skills.
  - Operate independently by attending or logging into class regularly.
  - Utilize time management effectively and prioritize tasks to meet deadlines.
  - Demonstrate effective oral and written communication.

- **SLO 2**: Demonstrate a fundamental understanding of jobsite safety and effective and efficient work habits.
  - Validate and demonstrate safety consciousness in work dress/apparel, tool use, jobsite demeanor, and personal protective equipment use.
  - Assess jobsite hazards, reduce work related risks, and influence others to work in a safe and efficient manner.
  - Select appropriate hand and/or power tools for a variety of landscape maintenance activities.
  - Demonstrate the safe and efficient use of gas/fuel powered landscape equipment.
  - **SLO 3**: Assess, evaluate, and implement the principles and practices of sustainable landscape maintenance.
    - Select appropriate soil preparation methods for various soil conditions.
    - Analyze soil conditions and formulate a sustainable program of soil maintenance and improvement through the use of organic amendments.
    - Recognize and demonstrate the appropriate management strategies, including mowing, fertilizing, watering, and pest management for a given turf species.
    - Evaluate and discuss the steps required in the renovation and repair of a given turf planting.
    - Evaluate and describe basic pruning systems applied to shade trees, shrubs, vines, perennials, roses, and fruit trees.
    - Utilize irrigation and water auditing techniques and select equipment to correctly irrigate, schedule, and conserve water in the landscape.
    - Recognize inappropriate irrigation equipment and/or faulty irrigation components and make basic repairs, replacements, and/or adjustments to a system.
    - Design a water efficient irrigation schedule based on landscape environments and microclimates.
    - Demonstrate the ability to program a variety of commonly used irrigation controllers.
    - Discuss and demonstrate the proper steps and planting various container grown, balled and burlapped, bare-root, groundcover, and bedding plants.
    - Analyze landscape plantings and select appropriate staking/guying systems.
Evaluate plant health, and identify symptoms of plant damage by common pests, diseases, and abiotic factors.

Analyze and discuss integrated pest management strategies for controlling selected weeds, insect pests, and diseases.

Identify common landscape weeds, insect pests, and diseases, and propose an integrated pest management plan.

Select, mix, and safely apply pesticides according to label directions, and in accordance with state and federal laws and regulations, through properly calibrated application equipment.

Utilize a complete set of landscape plans to estimate required maintenance activities, material, supply, and labor costs, and create an annual maintenance calendar of operations for a selected landscape.

Analyze a complete set of landscape plans or an actual landscape site, and prepare a maintenance estimate and/or bid.

SLO 4: Demonstrate a fundamental understanding of licensing and/or certification, and business and professional standards in the landscape industry.

Analyze landscape maintenance professions and identify and explain requirements for employment and/or licensing or certification.

Recognize and explain the benefits of additional/supplemental licensing and certification through state agencies and professional associations.

Examine and explain the California state Department of Pesticide Regulation laws and regulations, and the CDPR rules governing the Qualified Applicator's Certificate and Landscape Maintenance Gardener’s pesticide license.

Validate and demonstrate the importance of professionalism in the landscape industry, and described the professional industry associations and certification programs.

Recognize and explain the standard practices of various types of landscape construction/maintenance businesses, including estimating and bidding procedures, business practices, and working with state agencies.

HORT 340 Landscape and Irrigation Graphics and Design

This course is the study of technical drafting skills and freehand graphics, including line quality, lettering, and organization of the design space as it relates to landscape and irrigation design. It includes hand drafting techniques, plant database software, introduction to Computer-Aided Drafting and Design (CADD) for landscape, and the use of a variety of graphics skills and media. Irrigation design for landscapes studies water hydraulics, irrigation equipment, including irrigation heads, pipes, pumps, controllers and valves, and water conservation. The course includes preparing landscape and irrigation plans, plan presentation, and reprographics. Field trips may be required.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO 1: Demonstrate independent learning and effective communication skills.
- Operate independently by attending class regularly.
- Utilize time management effectively and prioritize tasks to meet deadlines.
- Demonstrate effective oral, written, and graphic communication.
- SLO 2: Assess, evaluate, and implement the principles and practices of water efficient landscape design through graphic presentation.
- Assess and apply the use of drafting equipment and techniques as they relate to landscape design and landscape architecture.
- Assess and evaluate plant data software, plant materials web sites, and landscape CADD programs.
- Demonstrate a basic understanding of local architectural requirements and covenants, codes, and restrictions, and assess the needs of the client.
- Produce graphic representations of various landscape elements and systems to scale.
- Analyze the existing landscape through systematic site and environmental data collection.
- Appraise the landscape design potential of a site utilizing site inventory and analysis data.
• Employ the basic principles of irrigation design
• Identify and correctly apply sprinkler components for a landscape irrigation design.
• Produce an irrigation design that complies with water conservation regulations for our industry.
• Create landscape design concepts utilizing the principles of water efficient landscape design.
• Develop the components included in a set of landscape plans and construction drawings.
• Create an elevation view of a landscape design.
• Create and present a full set of landscape drawings based on a client's criteria, needs and budget.
• Create a portfolio of design work.

HORT 350 Landscape Irrigation

Units: 3
Hours: 36 hours LEC; 54 hours LAB
Prerequisite: None.
Advisory: HORT 300 and 340; Hort 322 from ARC with a grade of "C" or better satisfies the Hort 340 advisory.
Transferable: CSU
Catalog Date: June 1, 2020

This course prepares students to design, install and maintain water efficient landscape irrigation systems. Topics include current California State water use regulations and ordinances, water supply, basic hydraulics, component identification and terminology, system layout, pipe sizing, water application devices, valves, and controllers. Students can earn QWEL (Qualified Water Efficient Landscaper) certification by achieving a passing score on the final exam. (Minimum passing score will be announced in class). Field trips may be required.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

• SLO 1: Demonstrate independent learning and effective communication skills.
  Operate independently by attending and / or logging into class regularly when the course is offered online or an online component is utilized as part of the course.
  Utilize time management effectively and prioritize tasks to meet deadlines.
  Demonstrate effective oral and written communication.
  Demonstrate the ability to read and interpret irrigation plans.
  Utilize appropriate graphic irrigation symbols and terminology in irrigation design.
• SLO 2: Demonstrate a fundamental understanding of water sources, delivery systems, and how water is utilized in the landscape.
  Explain and analyze California’s water storage and delivery system.
  Evaluate the percent of the state’s developed water supply used for landscape irrigation.
  Explain how irrigation water is made available to plants through the soil.
  Identify professional organizations and certification pertaining to landscape irrigation.
• SLO 3: Demonstrate a fundamental understanding of landscape irrigation system components and hydraulics.
  Identify system components on an irrigation plan.
  Explain the basic concepts of water pressure, flow, velocity, and friction loss.
  Calculate static and dynamic water pressure and flow at key points in a system.
  Explain the function of backflow prevention devices and assess the proper application for each device.
  Appraise the major types of sprinkler heads, valves, and controllers.
• SLO 4: Demonstrate a fundamental understanding of irrigation design, installation, and troubleshooting.
  Select the proper irrigation equipment for a given application.
  Calculate sprinkler head spacing for uniform application and precipitation rates.
- Arrange irrigation laterals and calculate pipe size based on application, water pressure, and flow velocity.
- Identify and select pipe fittings.
- Design and construct an irrigation system utilizing industry approved equipment and techniques.
- Devise a water-efficient program and manage controller system operation.
- Evaluate the need for pumping/filtering irrigation water from city mains and private wells.
- Measure irrigation system efficiency.
- Diagnose and solve irrigation system problems.
- Prepare and present a cost estimate for an irrigation system.

**HORT 351 Drip and Subsurface Irrigation**

**Units:** 2  
**Hours:** 27 hours LEC; 27 hours LAB  
**Prerequisite:** None.  
**Advisory:** HORT 300, 340, and 350  
**Transferable:** CSU  
**Catalog Date:** June 1, 2020

This course prepares students to design, install and maintain water efficient, surface and subsurface drip irrigation systems. Topics include component identification and terminology, system layout, pipe sizing, water application equipment. Field trips may be required.

**Student Learning Outcomes**

Upon completion of this course, the student will be able to:

- SLO 1: Demonstrate independent learning and effective communication skills.
- Operate independently by attending and / or logging into class regularly when the course is offered online or an online component is utilized as part of the course.
- Utilize time management effectively and prioritize tasks to meet deadlines.
- Demonstrate effective oral and written communication.
- Utilize appropriate graphic irrigation symbols and terminology in irrigation design.
- SLO 2: Demonstrate a fundamental understanding of surface and subsurface micro-irrigation (drip) system components and hydraulics.
- Identify system components on an irrigation plan.
- Explain the basic concepts of water pressure, flow, velocity, and friction loss in drip systems.
- Calculate static and dynamic water pressure and flow at key points in a system.
- Explain the function of backflow prevention devices and assess the proper application for each device.
- Appraise the major types of drip tubing, emitters, and other micro-irrigation application devices.
- SLO 4: Demonstrate a fundamental understanding of surface and subsurface micro-irrigation (drip) design, installation, and troubleshooting.
- Select the proper micro-irrigation equipment for a given application.
- Calculate emitter spacing for uniform application and precipitation rates.
- Arrange irrigation laterals and calculate pipe size based on application, water pressure, and flow velocity.
- Identify and select drip fittings.
- Design and construct a micro-irrigation system utilizing industry approved equipment and techniques.
- Devise a water-efficient program and manage controller system operation.
- Evaluate the need for pressure regulation and filtering of irrigation water from city mains and private wells.
- Measure micro-irrigation system efficiency.
Diagnose and solve micro-irrigation system problems.
Prepare and present a cost estimate for a micro-irrigation system.

**HORT 353 Sustainable Water Management**

**Units:** 3
**Hours:** 36 hours LEC; 54 hours LAB
**Prerequisite:** HORT 350 with a grade of "C" or better; Hort 105 from ARC with a grade of "C" or better satisfies the HORT 350 prerequisite.
**Advisory:** HORT 300
**Transferable:** CSU
**Catalog Date:** June 1, 2020

This course prepares students to maintain and manage water efficient landscape irrigation systems utilizing the latest irrigation technology including water efficient application equipment, traditional and smart controllers, and environmental sensors. Topics include the review of the current California State Model Water Efficient Landscape Ordinance, inspection and performance assessment of irrigation systems, determining sprinkler precipitation and consumption rates, calculating water budgets, assessing soil/water relationships of the landscape, installing smart controllers and environmental sensors, controller programming, developing water schedules, and irrigation system management for efficient water use. Students can earn QWEL (Qualified Water Efficient Landscaper) certification by achieving a passing score on the final exam. (Minimum passing score will be announced in class). Field trips may be required.

**Student Learning Outcomes**

Upon completion of this course, the student will be able to:

- SLO 1: Demonstrate independent learning and effective communication skills.
- Operate independently by attending and / or logging into class regularly if an online component is utilized as part of the course.
- Utilize time management effectively and prioritize tasks to meet deadlines.
- Demonstrate effective oral and written communication.
- Demonstrate the ability to read and interpret irrigation plans and equipment manuals.
- Utilize appropriate graphic irrigation symbols and terminology used in irrigation design.
- SLO 2: Demonstrate a fundamental understanding of current model water efficient landscape standards.
- Analyze and explain the current California State Model Water Efficient Landscape Ordinance.
- Analyze and explain current local ordinances regulating the use of water in the landscape.
- Identify professional organizations and certification pertaining to efficient landscape irrigation.
- SLO 3: Demonstrate a fundamental understanding of landscape irrigation system performance and factors that affect performance.
- Evaluate and assess irrigation system water demand, precipitation rate, and coverage.
- Calculate landscape irrigation coefficients and landscape evapotranspiration.
- Calculate a water budget.
- Evaluate the soil/water relationships for a landscape and determine water infiltration and percolation rates.
- Assess methods of water capture.
- SLO 4: Demonstrate a fundamental understanding of the use, installation, programming, and management of water efficient landscape irrigation equipment.
- Evaluate and assess the latest models of water efficient sprinkler heads and micro-irrigation application devices.
- Select the proper water application devices for a given landscape site.
- Evaluate and assess the latest models of water efficient controllers and environmental sensors.
- Demonstrate the ability to install various models of water efficient controllers and environmental sensors.
- Demonstrate the ability to program various models of water efficient controllers and sensor input devices.
- Demonstrate the ability to program various models of traditional controllers for water efficient operation.
• Evaluate soil moisture content and perform system adjustments as required to maintain system efficiency.
• Evaluate real-time evapotranspiration data and perform system adjustments as required to maintain system efficiency.
• Analyze system flow rates and calculate water usage.

HORT 360 Introduction to Tree Care and Urban Forestry

Units: 3
Hours: 36 hours LEC; 54 hours LAB
Prerequisite: None.
Advisory: HORT 300 with a grade of “C” or better
Transferable: CSU
Catalog Date: June 1, 2020

This course is an introductory study and application of the principles and practices of tree care and urban forestry. This course will focus on tree biology, tree identification, plant health care, soils, plant nutrition, planting, worker safety, climbing, pruning, and the safe and effective use of tree-care tools and equipment. This course prepares the student to obtain a Certified Arborist designation through the International Society of Arboriculture. Field trips may be required.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

• SLO 1: Demonstrate independent learning and effective communication skills.
  • Operate independently by attending class regularly.
  • Utilize time management effectively and prioritize tasks to meet deadlines.
  • Demonstrate effective oral and written communication.
• SLO 2: Demonstrate a fundamental understanding of the California Tree Care industry.
  • Support urban forestry and the environmental, economic, aesthetic, and social benefits of trees.
  • Analyze the various costs associated with establishing and maintaining landscape trees and how value can be placed on the urban forest as a resource.
  • Research the various careers in Arboriculture and Urban Forestry and associated employment requirements and opportunities.
• SLO 3: Demonstrate a fundamental understanding of scientific investigation and basic botany as it relates to trees and tree care.
  • Apply the Scientific Method of research to appropriate Arboriculture and Urban Forestry applications.
  • Recognize the major structures of trees and explain their function.
  • Investigate plant growth requirements.
  • Explain how water, minerals, and nutrients are necessary for tree health and growth.
  • Describe the basic composition of a tree’s vascular system and explain how water, minerals, carbohydrates, and plant growth regulators are transported within this system.
  • Describe how all plants are classified and how scientific names are based on the classification system.
  • Explain how plant characteristics such as growth habit, texture, and color can be used in tree identification.
  • Demonstrate the ability to identify trees based on a tree’s physical characteristics.
• SLO 4: Demonstrate a fundamental understanding of soils, soil management, plant nutrition, and water management in tree care.
  • Explain the relationship among soil moisture, absorption of essential elements, and plant growth.
  • Explain the importance of irrigation and water management for urban landscapes.
  • Assess the advantages and disadvantages of different landscape irrigation systems and recommend appropriate and efficient methods for specific landscape scenarios.
  • Describe the essential elements for plant and tree growth, the different methods of fertilizer application, and the advantages and disadvantages of each.
SLO 5: Demonstrate a fundamental understanding of common tree care practices.
Formulate criteria for selecting healthy, vigorous planting stock.
Validate how using proper planting techniques can improve tree survival and accelerate establishment.
Demonstrate and explain the techniques and procedures used to plant and transplant trees.
Assess the procedures and techniques used in tree pruning.
Explain how trees respond to pruning and describe the effects of severe or improper pruning.
Identify and discuss various tree hazards.
Distinguish when a tree might be helped by the installation of cables, guys, bracing rods, and/or props.
Describe the various physiological disorders and injuries that can affect trees.
Recognize symptoms and signs of plant diseases and identify the cause of plant damage.
Classify treatments that are appropriate for common tree disorders and injuries.
Explain the concept of Compartmentalization of Decay in Trees (CODIT).
Explain the philosophy of Plant Health Care (PHC) and describe its relationship with Integrated Pest Management (IPM).

SLO 6: Demonstrate a fundamental understanding of safe and effective tree care operations.
Identify common horticulture and tree care tools and equipment.
Identify appropriate safety standards and safety equipment for tree care operations.
Identify common injuries when using tools incorrectly and explain the safe and effective use of common horticulture tools and equipment.
Identify the tools, ropes, and knots used for climbing and working in trees.
Demonstrate the ability to safely and effectively use appropriate tools and equipment in tree care operations.

HORT 495 Independent Studies in Horticulture

Units: 1 - 3
Hours: 54 - 162 hours LAB
Prerequisite: None.
Transferable: CSU
Catalog Date: June 1, 2020

An independent studies project involves an individual student or small group of students in study, research, or activities beyond the scope of regularly offered courses. See the current catalog section of "Special Studies" for full details of Independent Studies.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO #1: Actively engage in intellectual inquiry beyond that required in order to pass a course of study (College Wide Learning Outcome – Area 4).
- Discuss and outline a proposal of study (that can be accomplished within one semester term) with a supervising instructor qualified within the discipline.
- Design an independent study (to be completed individually or by collaboration of a small group) to foster special knowledge, skills, and experience that are not available in any one regularly scheduled course.
- Use information resources to gather discipline-specific information.
- SLO #2: Utilize modes of analysis and critical thinking to apply theoretical perspectives and/or concepts in the major discipline of study to significant problems and/or educational activities (College Wide Learning Outcome – Area 3).
- Analyze and apply the knowledge, skills and experience that are involved in the independent study to theoretical perspectives and/or concepts in the major discipline of study.
- Explain the importance of the major discipline of study in the broader picture of society.
- SLO #3: Communicate a complex understanding of content matter of the major discipline of study (College Wide Outcome – Area 3).
Demonstrate competence in the skills essential to mastery of the major discipline of study that are necessary to accomplish the independent study.

SLO #4: Identify personal goals and pursue these goals effectively (College Wide Outcome – Area 4).

Utilize skills from the "academic tool kit" including time management, study skills, etc., to accomplish the independent study within one semester term.

This course provides students with opportunities to develop marketable skills in preparation for employment in their major field of study or advancement within their career. It is designed for students interested in work experience and/or internships in transfer level degree occupational programs. Course content includes understanding the application of education to the workforce; completion of required forms which document the student's progress and hours spent at the work site; and developing workplace skills and competencies. Appropriate level learning objectives are established by the student and the employer. During the semester, the student is required to participate in a weekly orientation and 75 hours of related paid work experience, or 60 hours of unpaid work experience for one unit. An additional 75 or 60 hours of related work experience is required for each additional unit. Work Experience may be taken for a total of 16 units when there are new or expanded learning objectives. Only one Work Experience course may be taken per semester.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- **DEMONSTRATE AN UNDERSTANDING AND APPLICATION OF PROFESSIONAL WORKPLACE BEHAVIOR IN A FIELD OF STUDY RELATED ONE'S CAREER.(SLO 1)**
  - Understand the effects time, stress, and organizational management have on performance.
  - Demonstrate an understanding of consistently practicing ethics and confidentiality in a workplace.
  - Examine the career/life planning process and relate its relevancy to the student.
  - Demonstrate an understanding of basic communication tools and their appropriate use.
  - Demonstrate an understanding of workplace etiquette.

- **DESCRIBE THE CAREER/LIFE PLANNING PROCESS AND RELATE ITS RELEVANCY TO ONE’S CAREER.(SLO 2)**
  - Link personal goals to long term achievement.
  - Display an understanding of creating a professional first impression.
  - Understand how networking is a powerful job search tool.
  - Understand necessary elements of a résumé.
  - Understand the importance of interview preparation.
  - Identify how continual learning increases career success.

- **DEMONSTRATE APPLICATION OF INDUSTRY KNOWLEDGE AND THEORETICAL CONCEPTS AS WRITTEN IN LEARNING OBJECTIVES IN PARTNERSHIP WITH THE EMPLOYER WORK SITE SUPERVISOR.(SLO 3)**
Human Services  
| Cosumnes River College

This CRC program prepares students for employment as para-professionals with agencies such as youth group homes, youth and family services agencies, schools, probation, welfare, and mental health departments.

Dean  
Collin Pregliasco

Associate Degrees

A.A. in Chemical Dependency Studies Degree

The program in Chemical Dependency Studies centers around the specific skills and abilities necessary to provide comprehensive drug and alcohol counseling. Course work include the twelve counselor core function applications in addiction screening, intake, assessment, orientation, counseling, crisis intervention, consultation, client education, client rights, confidentiality, professional ethics and reports and record keeping.

Students must complete a minimum of 255 internship hours for HSER 498.

The Chemical Dependency Studies Degree Associate in Arts (A.A.) degree may be obtained by completion of the required program, plus general education requirements, plus sufficient electives to meet a 60-unit total. See CRC graduation requirements.

Student Learning Outcomes

Upon completion of this program, the student will be able to:

- Evaluate the components of a quality chemical dependency counseling program
- Demonstrate the twelve essential counseling skills as they apply to chemical dependency and recovery processes
- Utilize counseling strategies based on examination of scientific theories of addiction
- Identify the community resources used in assisting clients with addiction issues
- Appraise and apply the knowledge of California Professional Codes of Ethics for Drug and Alcohol counselors
- Evaluate one's own values and attitudes as they apply to ethical decision making
- Demonstrate appropriate interpersonal and social skills in interactions with a diverse population using principles of equity, justice, and inclusion

Career Information

Substance Abuse Counselor; Mental Health Social Worker; Social Worker; Child and Family Counselor; Child Protective Worker; Adult Protective Worker; Employee Assistance Counselor

A.A. in Human Services, General

This CRC program prepares students for employment as para-professionals with agencies such as youth group homes, youth and family services agencies, schools, probation, welfare, and mental health departments.

Highlights include:
* Individual and group counseling
* Interviews with employers
* Employment training, including resumes, cover letters, and interviews

This degree is designed for persons who are seeking careers as youth group home workers, family welfare and health agencies workers, count or state eligibility workers, and other para-professional positions. Graduates will have a broad range of human service skills, including group counseling, client interviewing, communication, problem solving, and employment.

Note to Transfer Students:
If you are interested in transferring to a four-year college or university to pursue a bachelor's degree in this major, it is critical that you meet with a CRC counselor to select and plan the courses for your major. Schools vary widely in terms of the required preparation. The courses that CRC requires for an Associate's degree in this major may be different from the requirements needed for the Bachelor's degree.

1Students must complete a minimum of 108 internship hours for HSER 498.

**Student Learning Outcomes**

Upon completion of this program, the student will be able to:

- compete for employment as paraprofessionals with agencies such as youth group homes; youth and family service agencies; schools; probation, welfare and mental health departments.

**Career Information**

Peer Support Group Facilitator; Youth Group Home Worker; Family, Welfare, and Health Agencies Worker; Consumer Consultant; County or State Eligibility Worker; Conflict Containment Workers

**Human Services (HSER)**

**HSER 300 Introduction to Human Services**

- **Units:** 3
- **Hours:** 54 hours LEC
- **Prerequisite:** None.
- **Advisory:** Eligibility for ENGWR 300 or equivalent skills demonstrated through the assessment process.
- **Transferable:** CSU
- **Catalog Date:** June 1, 2020

This course is a comprehensive overview of the field of Human Services in private and public agencies. This course includes learning of agency functions and worker activities through reading, class discussion, and class speakers. The emphasis of this course is understanding the roles and skills of associate professionals such as health workers, activity directors for the elderly, and adolescent and child welfare assistants.

**Student Learning Outcomes**

Upon completion of this course, the student will be able to:

- SLO-1: Develop a comprehensive overview of the field of Human Services in both the public and private sector.
- discuss the role of the Human Services worker in a variety of environments and populations.
- understand diverse client populations served by Human Services workers.
- explain the career possibilities in the field of Human Services.
- analyze the core principles and values, communication skills, and self-care in Human Services.

**HSER 302 Introduction to Psychology of Human Relations**

- **Units:** 3
- **Hours:** 54 hours LEC
- **Prerequisite:** None.
- **Transferable:** CSU
- **General Education:** AA/AS Area III(b); CSU Area E1
- **Catalog Date:** June 1, 2020
This course is an introduction to attitudes, values, and methods that enhance communication skills in human relations. It is required for all students in the Human Services major and open to all students.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- Demonstrate appropriate physical, tonal and verbal interpersonal responses in an individual or group counseling setting (SLO 1).  
- Students will be able to define a contradiction between client's spoken words and between client's spoken words, body language and attitude in an interpersonal setting.  
- Students will be able to identify the differences between poor responses and effective responses.  
- Describe the innate emotional basis influencing the individual response patterns of different persons which affect how they respond to their environment. (SLO 2)  
- Utilize the introspective approach to specific human relations topics. (SLO 3)

HSER 304 Introduction to Counseling Children

Units: 3  
Hours: 54 hours LEC  
Prerequisite: None.  
Transferable: CSU  
Catalog Date: June 1, 2020  

A study of the tools children use daily to cope with feelings, adjust to changes, overcome disappointment and trauma, make sense out of the world around them and grow in their various relationships. Children's play medium will be experienced, with special emphasis on the importance of imagination and the use of fantasy. Assignments will require association with children.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- demonstrate understanding of children's issues.
- demonstrate understanding of the role and importance of play and fantasy.
- demonstrate understanding of the role of family dynamics and its influence upon the child's behavior and adaption.
- demonstrate ability to effectively use children's techniques with children: storytelling, puppets, art, active play, sand play, clay, table games, and puzzles.

HSER 340 Introduction to Chemical Dependency

Units: 3  
Hours: 54 hours LEC  
Prerequisite: None.  
Transferable: CSU  
Catalog Date: June 1, 2020  

A survey course that examines the psychological and physiological effects of chemical dependency on the individual. Also included is an analysis of the effects of substance abuse on the family; the sociological and economic conditions contributing to substance abuse, and a description of communication efforts at prevention and treatment.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO 1: DEVELOP AN UNDERSTANDING OF THE PSYCHOLOGICAL AND PHYSIOLOGICAL EFFECTS OF ALCOHOL AND OTHER DRUGS OF ADDICTION ON THE HUMAN BODY AND HUMAN BEHAVIOR.
- SLO 2: DEVELOP AN UNDERSTANDING OF INTERVENTION AND TREATMENT PLANS FOR ALCOHOL AND DRUGS OF ADDICTION.
- develop a comprehensive understanding of the physiological, sociological, economical and historical conditions contributing to substance abuse.
- describe the psychological and physiological progression of substance abuse.
identify the key components of assessment and recovery programs for alcoholism and drug abuse including AA, NA, ALANON, ACA, private and public in/outpatient therapy.

- identify the family dynamics inherent in substance abuse situations, including ACA and co-dependency issues.
- develop an understanding of prevention and treatment efforts used in the field of chemical dependency

HSER 341 Physiology and Pharmacology: Alcohol & Other Drugs

**Units:** 3  
**Hours:** 54 hours LEC  
**Prerequisite:** HSER 340 with a grade of “C” or better  
**Transferable:** CSU  
**Catalog Date:** June 1, 2020

This course is a study of the chemical composition of alcohol, and the mechanism of action of alcohol and other psychoactive drugs in the human body including opiates, stimulants, depressants, psychotherapeutics, and psychedelics. The physiological and psychological mechanisms associated with tolerance, habituation, and withdrawal that occur during the addiction phase of drug use will be studied.

**Student Learning Outcomes**

Upon completion of this course, the student will be able to:

- SLO 1: DEVELOP AN UNDERSTANDING OF THE PSYCHOLOGICAL AND PHYSIOLOGY EFFECTS OF ALCOHOL AND OTHER DRUGS OF ADDICTION ON THE HUMAN BODY AND HUMAN BEHAVIOR.
- SLO 2: DEVELOP AN UNDERSTANDING OF INTERVENTION AND TREATMENT PLANS FOR ALCOHOL AND DRUGS OF ADDICTION.
- compare the effects of each class of psychoactive drugs upon the human body.
- define the biological, social, and psychological implications of psychoactive drug use, misuse, and abuse.
- describe the effects of psychoactive drugs on behavior.
- analyze treatment issues and challenges.
- compare intervention and treatment approaches.
- examine alternatives to drug use.

HSER 342 Alcoholism: Intervention, Treatment & Recovery

**Units:** 3  
**Hours:** 54 hours LEC  
**Prerequisite:** HSER 341 with a grade of “C” or better  
**Transferable:** CSU  
**Catalog Date:** June 1, 2020

This course is a study and evaluation of techniques used in the treatment of chemical dependency. Topics include intervention, individual and group counseling, detoxification, twelve-step programs, therapeutic communities, and aftercare programs.

**Student Learning Outcomes**

Upon completion of this course, the student will be able to:

- SLO 1: DEVELOP AN UNDERSTANDING OF TREATMENT OPTIONS FOR DRUG AND ALCOHOL ADDICTION.
- analyze drug and alcohol use, misuse, abuse, and addiction
- compare various theories of drug and alcohol addiction
- differentiate treatment issues of drug and alcohol use, misuse, abuse, and addiction
- describe treatment methods and counseling approaches of drug and alcohol use, misuse, abuse, and addiction
HSER 350 Employment Skills in Human Services

This course is an introduction to interviewing and counseling with adults and children; family system dynamics; family and drug interventions; crisis intervention training; court mandated reporting laws; code of ethics and conduct; and laws pertaining to counseling minors and other client populations within the Human Services field.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO-1: Implement those skills required of a working professional in the helping profession.
- SLO-2: Comply with reporting laws for children and adults in the helping profession, as well as duty to care and harm to self or others.
- SLO-3: Comply with the professional code of ethics and standards of practice in the helping profession.
- SLO-4: Understand and implement the protocol for crisis intervention, mental health assessment, and client treatment planning.
- SLO-5: Understand and put into practice the concepts of client confidentiality and limits to confidentiality as they pertain to the helping profession.

HSER 360 Techniques of Interviewing and Counseling

This course is a survey of effective interviewing and counseling techniques as applied to the paraprofessional experiences of counselor aides, group counselor aides, mental health workers, social service technicians, case management workers, and other human service related fields. This course is an integral part of the Human Services curriculum.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO 1: Demonstrate the ability to provide basic empathetic responses in a dyad setting as described in the course text and simulated situations including case management.
- SLO 2: Demonstrate the techniques of interviewing and counseling appropriate for helpers in social service agency settings
- Construct and express basic empathetic responses in a dyad setting in dealing with a variety of human problems
- Demonstrate appropriate approaches in dealing with a variety of human problems
- Demonstrate awareness of your own reactions based on past experiences, reactions to clients and reactions to client’s experiences.
- Develop a case file for case management and follow-up services.
- Write case histories, summaries of case conferences of paraprofessional counseling sessions, and develop appropriate goal setting and follow-up services after interviews with clients.

HSER 362 Practices in Human Services
This course provides advanced study and lecture of the helping profession in settings that include: public and/or private agencies that provide mental health services; corrections and rehabilitation; alcohol and other drugs; and child/adolescent treatment services. This is a lecture-based course that integrates both the theory and concepts of the helping profession, as well as discussion of the practical application of experiences in the field. Student evaluation is competency-based.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO-1: Develop an understanding of the function of a community based organization (CBO), and put into practice those skills learned in the classroom.
- Show evidence of understanding agency structure, intake, documentation, and case management skills.
- Demonstrate insight and the understanding of working with a diverse client population.
- Demonstrate a working knowledge of community resources and the proper referral process.
- Demonstrate the necessary competencies for successful employment in the field of human services by knowing the concepts of confidentiality, by knowing and utilizing sound clinical judgment in responding to ethical dilemma, and by responding appropriately to crisis.

HSER 364 Techniques of Group Counseling

This course provides an overview of basic group counseling and facilitation skills including ethical issues as used by Human Services paraprofessionals. Topics explored will include communication skills within group dynamics, theories of group counseling, best practices guidelines and diversity issues. Laboratory exercises will include group work with outside groups and evaluation methods.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO 1: DEVELOP AN OVERVIEW OF THE TECHNIQUES AND SKILLS NEEDED FOR GROUP COUNSELING FACILITATION.
- SLO 2: DEMONSTRATE MULTIPLE GROUP COUNSELING TECHNIQUES
- categorize the general goals of the group counseling experience
- assess and discuss ethical and professional issues in group experiences
- compare and identify the rights of group participants and/or obligations of group facilitators
- distinguish the theoretical and practical orientations with which they feel most successful as group facilitators
- list areas of growth in self-understanding and in communicating with others

HSER 494 Topics in Human Services

This course provides an overview of basic group counseling and facilitation skills including ethical issues as used by Human Services paraprofessionals. Topics explored will include communication skills within group dynamics, theories of group counseling, best practices guidelines and diversity issues. Laboratory exercises will include group work with outside groups and evaluation methods.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO 1: DEVELOP AN OVERVIEW OF THE TECHNIQUES AND SKILLS NEEDED FOR GROUP COUNSELING FACILITATION.
- SLO 2: DEMONSTRATE MULTIPLE GROUP COUNSELING TECHNIQUES
- categorize the general goals of the group counseling experience
- assess and discuss ethical and professional issues in group experiences
- compare and identify the rights of group participants and/or obligations of group facilitators
- distinguish the theoretical and practical orientations with which they feel most successful as group facilitators
- list areas of growth in self-understanding and in communicating with others

HSER 494 Topics in Human Services

This course provides an overview of basic group counseling and facilitation skills including ethical issues as used by Human Services paraprofessionals. Topics explored will include communication skills within group dynamics, theories of group counseling, best practices guidelines and diversity issues. Laboratory exercises will include group work with outside groups and evaluation methods.
This course is an exploration of those topics and issues which are most relevant for future and present workers in human services. Emphasis will be on those issues which are not consistently covered by other required human services courses. These issues may include: chemical dependency, interventions in poverty, stress management, child neglect and abuse, patient rights, and organization for advocacy.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- analyze the most up-to-date information in areas which community human services employers feel are necessary exposure for students seeking employment within the agency. (SLO #1)

HSER 495 Independent Studies in Human Services

Units: 1 - 3  
Hours: 54 - 162 hours LAB  
Prerequisite: None.  
Transferable: CSU  
Catalog Date: June 1, 2020

An independent studies project involves an individual student or small group of students in study, research, or activities beyond the scope of regularly offered courses. See the current catalog section of "Special Studies" for full details of Independent Studies.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO #1: Actively engage in intellectual inquiry beyond that required in order to pass a course of study (College Wide Learning Outcome – Area 4).
- Discuss and outline a proposal of study (that can be accomplished within one semester term) with a supervising instructor qualified within the discipline.
- Design an independent study (to be completed individually or by collaboration of a small group) to foster special knowledge, skills, and experience that are not available in any one regularly scheduled course.
- Use information resources to gather discipline-specific information.
- SLO #2: Utilize modes of analysis and critical thinking to apply theoretical perspectives and/or concepts in the major discipline of study to significant problems and/or educational activities (College Wide Learning Outcome – Area 3).
- Analyze and apply the knowledge, skills and experience that are involved in the independent study to theoretical perspectives and/or concepts in the major discipline of study.
- Explain the importance of the major discipline of study in the broader picture of society.
- SLO #3: Communicate a complex understanding of content matter of the major discipline of study (College Wide Outcome – Area 3).
- Demonstrate competence in the skills essential to mastery of the major discipline of study that are necessary to accomplish the independent study.
- SLO #4: Identify personal goals and pursue these goals effectively (College Wide Outcome – Area 4).
- Utilize skills from the "academic tool kit" including time management, study skills, etc., to accomplish the independent study within one semester term.

HSER 498 Work Experience in Human Services

Units: 1 - 4  
Hours: 60 - 300 hours LAB  
Prerequisite: None.  
Enrollment Limitation: Students must be in a paid or unpaid internship, volunteer position or job related to career goals in Human Services.  
Transferable: CSU  
General Education: AA/AS Area III(b)  
Catalog Date: June 1, 2020
This course provides students with opportunities to develop marketable skills in preparation for employment in their major field of study or advancement within their career. It is designed for students interested in work experience and/or internships in transfer level degree occupational programs. Course content includes understanding the application of education to the workforce; completion of required forms which document the student's progress and hours spent at the work site; and developing workplace skills and competencies. Appropriate level learning objectives are established by the student and the employer. During the semester, the student is required to participate in a weekly orientation and 75 hours of related paid work experience, or 60 hours of unpaid work experience for one unit. An additional 75 or 60 hours of related work experience is required for each additional unit. Work Experience may be taken for a total of 16 units when there are new or expanded learning objectives. Only one Work Experience course may be taken per semester.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- **DEMONSTRATE AN UNDERSTANDING AND APPLICATION OF PROFESSIONAL WORKPLACE BEHAVIOR IN A FIELD OF STUDY RELATED ONE’S CAREER.**(SLO 1)
  - Understand the effects time, stress, and organizational management have on performance.
  - Demonstrate an understanding of consistently practicing ethics and confidentiality in a workplace.
  - Examine the career/life planning process and relate its relevancy to the student.
  - Demonstrate an understanding of basic communication tools and their appropriate use.
  - Demonstrate an understanding of workplace etiquette.

- **DESCRIBE THE CAREER/LIFE PLANNING PROCESS AND RELATE ITS RELEVANCY TO ONE’S CAREER.**(SLO 2)
  - Link personal goals to long term achievement.
  - Display an understanding of creating a professional first impression.
  - Understand how networking is a powerful job search tool.
  - Understand necessary elements of a résumé.
  - Understand the importance of interview preparation.
  - Identify how continual learning increases career success.

- **DEMONSTRATE APPLICATION OF INDUSTRY KNOWLEDGE AND THEORETICAL CONCEPTS AS WRITTEN IN LEARNING OBJECTIVES IN PARTNERSHIP WITH THE EMPLOYER WORK SITE SUPERVISOR.**(SLO 3)
Human/Career Development courses are designed to assist students with recognizing their full potential through developing self awareness, educational management and lifelong independent career planning skills. Instruction includes obtaining skills necessary to succeed in college and make positive and productive work/life decisions.

Human/Career Development (HCD)

HCD 89 Study Strategies Lab

| Units: | 0.5 - 1 |
| Hours: | 27 - 54 hours LAB |
| Prerequisite: | None. |
| Catalog Date: | June 1, 2020 |

This course will provide non-traditional instructional support for students with disabilities who are enrolled in other college classes. Graded on a credit/no credit basis. This is an open-entry, open-exit class that can be taken for 0.5-1.0 units.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- identify and utilize pertinent learning strategy skills from the following areas (research methods; textbook reading strategies; note taking strategies; organization of written assignments; editing and proofing of papers; test preparation and test-taking strategies; and time management.) (SLO #1)
- utilize lab time to complete homework assignments, accessing peer and tutorial support when necessary.
- learn how to advocate for themselves and to use DSPS Program services and accommodations.

HCD 110 Building Foundations for Success

| Units: | 3 |
| Hours: | 54 hours LEC |
| Prerequisite: | None. |
| General Education: | AA/AS Area III(b) |
| Catalog Date: | June 1, 2020 |

This course provides success strategies and support services to entry level students. The strategies and support services are threaded through three critical areas that enhance student success: academic skills, personal life management, and educational navigation.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- Learn beginning level student success strategies (SLO #1)
- Apply appropriate strategies for time management, goal setting, and note taking.
- Analyze attitudes toward studying and current study habits.
- Recognize personal learning styles.
- Apply study techniques to enhance classroom success.
- Apply test-taking strategies to prepare for and take exams.
- Develop analytical and problem solving skills with regard to circumstances occurring in personal, educational, and workplace environments.
- Demonstrate an ability to create a lifestyle balance plan.
- Demonstrate ability to apply, at a basic level, principles and practices of stress management.
- Apply techniques to improve and enhance physical and emotional wellness.
- Identify healthy support networks.
- Identify him- or her-self through communication and understanding as a racial person in a diverse state.
- Identify college programs and services.
- Describe her or his rights and responsibilities as a college student.
- Demonstrate an understanding of college procedures and policies (e.g. petitioning, probation, withdrawing, etc.).

HCD 112 College Survival

| Units: | 0.25 - 1 |
| Hours: | 4.5 - 18 hours LEC |
| Prerequisite: | None. |
| General Education: | AA/AS Area III(b) |
| Catalog Date: | June 1, 2020 |

The purpose of this course is to help the entry-level college student develop the confidence, knowledge, and skills necessary to become successful in college. Topics covered in College Survival include campus resources, academic planning, self-esteem and motivation, assertiveness and interpersonal relationships, as well as the principles of time and stress management.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- Demonstrate skills in the application of the universal tools utilized by all successful learners (SLO #1).
- Learn how to set personal and academic goals and maintain the motivation to achieve them.
- Develop a personalized student educational plan (SEP).
- Identify the locations and become knowledgeable about the services provided by the critical student support service programs.
- Explain the principles and tools of time and stress management and demonstrate skill in the application of the techniques of time and stress management.
- Learn and practice the basic skills needed to be appropriately assertive and develop and maintain positive interpersonal relationships.

HCD 122 Study Skills

| Units: | 1 |
| Hours: | 18 hours LEC |
| Prerequisite: | None. |
| General Education: | AA/AS Area III(b) |
| Catalog Date: | June 1, 2020 |

This course covers specific study skills strategies. It provides the opportunity to analyze attitudes toward studying, and current study skill habits. Topics include specific learning styles, strategies for time management, goal setting, note-taking, memory improvement, reading skills, and how to prepare for, and take exams.
Upon completion of this course, the student will be able to:

- SLO: Understand the skills, attitudes and abilities needed to be an informed and successful college student.
- Demonstrate appropriate time management and goal setting skills.
- Describe personal learning style and how it impacts study methods.
- Apply note-taking methodology and incorporate these techniques into lecture notes.
- Learn how to utilize the Survey, Question, Read, Recite & Write, Review (SQ4R) reading technique and know how to systematically mark and take study notes on a college level textbook.
- Recognize the components of memorization and then employ memory and concentration techniques.
- Demonstrate test-taking strategies including how to prepare for, and take exams.
- Demonstrate the ability to use basic library resources.

**HCD 132 Career Exploration**

**Units:** 1
**Hours:** 18 hours LEC
**Prerequisite:** None.
**General Education:** AA/AS Area III(b)
**Catalog Date:** June 1, 2020

Students learn how to balance career and personal life when making career decisions, become skilled in the use of career information resources, understand the nature of the changing labor market, and when appropriate, acquire job search skills. Topics covered include assessment of values, skills, interests, and personality factors relevant to career and life planning. Student will gain insight into the relationship between career and academic/educational planning. Career assessments may be required.

**Student Learning Outcomes**

Upon completion of this course, the student will be able to:

- Analyze principles of decision making (SLO1).
- Apply decision making principles to career planning.
- Describe personal decision-making style.
- Describe relevant aspects of career and life planning (SLO2).
- Identify her/his interests, personal characteristics, skills and work values and how those relate to career and life planning.
- Explain the organization of the world of work.
- Demonstrate skills in researching accurate and current occupational information (SLO3).
- Demonstrate ability to use Career Services.
- Use appropriate resources to obtain information about the changing labor market and its impact upon career planning strategies.
- Distinguish between primary and secondary sources of labor market information.
- Describe the goal-setting process and apply to life and career planning (SLO4).
- Identify occupations/occupational clusters consistent with her/his interests, skills, work values, personal characteristics.
- Identify a major or majors that are consistent with occupations/occupational clusters.
- Create, or update, as appropriate, an educational plan consistent with occupational goals.

**HCD 310 College Success**

**Units:** 1
**Hours:** 18 hours LEC
**Prerequisite:** AA/AS Area III(b)
**General Education:** AA/AS Area III(b)
**Catalog Date:** June 1, 2020

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- Analyze principles of decision making (SLO1).
- Apply decision making principles to career planning.
- Describe personal decision-making style.
- Describe relevant aspects of career and life planning (SLO2).
- Identify her/his interests, personal characteristics, skills and work values and how those relate to career and life planning.
- Explain the organization of the world of work.
- Demonstrate skills in researching accurate and current occupational information (SLO3).
- Demonstrate ability to use Career Services.
- Use appropriate resources to obtain information about the changing labor market and its impact upon career planning strategies.
- Distinguish between primary and secondary sources of labor market information.
- Describe the goal-setting process and apply to life and career planning (SLO4).
- Identify occupations/occupational clusters consistent with her/his interests, skills, work values, personal characteristics.
- Identify a major or majors that are consistent with occupations/occupational clusters.
- Create, or update, as appropriate, an educational plan consistent with occupational goals.
This course is designed to assist students in obtaining the skills and knowledge necessary to reach their educational objectives. Topics to be covered include: motivation and discipline, memory development, time management, communication skills, career planning, study skills and techniques, question-asking skills and personal issues that face many college students. Campus resources and information competency will also be covered. It is highly recommended for first time college students; however, continuing students also benefit from this course. The course may be offered for specific populations. Career and/or Learning Styles assessments may be required, and a field trip may be required.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- DEVELOP SELF DISCOVERY AND UNDERSTANDING (SLO #1)
  - Evaluate various self-discovery assessment techniques
  - Analyze learning styles such as auditory, visual and kinesthetic
- DEVELOP CRITICAL THINKING AND LIFE PLANNING SKILLS (SLO #2)
  - Demonstrate critical and creative thinking skills
  - Apply effective time management, study skills and life planning techniques
  - Incorporate interpersonal relationship skills and conflict resolution strategies
  - Differentiate factors involved in life planning and career decision making
- LOCATE AND UTILIZE CAMPUS RESOURCES (SLO #3)
  - Identify and investigate various campus resources, including programs and support services
  - Demonstrate information competency

HCD 320 Skills for Online Student Success

This course is designed to familiarize students with the skills required to succeed in an online course. Students will explore how to use various Internet tools to effectively learn in an online environment. Topics include online course equipment needs; using a word processor to support class assignments; sending email attachments; effective use of discussion groups, email, and synchronous chat sessions; researching on the Internet; evaluating Internet sources; working collaboratively online. This course is graded on a pass/no pass basis.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- USE THE COLLEGE’S LEARNING MANAGEMENT SYSTEM (LMS). (SLO #1)
  - locate content available within the college's LMS.
  - contribute to online discussion taking place within the college's LMS.
  - complete assessments conducted using tools available in the college's LMS.
- DEMONSTRATE SKILLS THAT SUPPORT SUCCESS IN AN ONLINE LEARNING ENVIRONMENT. (SLO #2)
  - create a personal schedule that includes time for online coursework.
  - conceive an online identity through regular participation in class discussion.
  - cooperate effectively in online group activities.
• ASSESS ONLINE LEARNING ISSUES. (SLO #3)

• recommend guidelines for ethical behavior in an online learning environment.

• analyze information found online.

• evaluate the effects of emerging technologies on the online learning environment.

HCD 340 Job Search Portfolio Development

This course is designed to help students create a job search portfolio for their internship or job search and to assist students in developing successful job search strategies. Through assignments, practice interviews and in-class activities, students will create and finalize necessary documents for a job search portfolio and participate in a series of mock interviews.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

• DEVELOP EFFECTIVE JOB SEARCH MARKETING TOOLS AND EVALUATION SKILLS BY ANALYZING VARIOUS JOB SEARCH APPROACHES.

• Develop a personal job search portfolio including an application, cover letter, resume, letters of reference, work samples, certificates/awards and other examples of accomplishments.

• Demonstrate successful presentation, interviewing and negotiating skills.

This course provides students with opportunities to develop marketable skills in preparation for employment and assists students in learning about the world of work. Course content includes understanding the application of education to the workforce, developing workplace skills and competencies. The content of this course covers the orientation materials and meets the orientation requirement for Work Experience 198, 298 and 498 at Cosumnes River College.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

• DEMONSTRATE AN UNDERSTANDING AND APPLICATION OF PROFESSIONAL WORKPLACE BEHAVIOR.(SLO 1)

• Understand the effects time, stress, and organizational management have on performance.

• Demonstrate an understanding of consistently practicing ethics and confidentiality in a workplace.

• Demonstrate an understanding of basic communication tools and their appropriate use.

• Demonstrate an understanding of workplace etiquette.

• DESCRIBE THE CAREER/LIFE PLANNING PROCESS AND RELATE ITS RELEVANCY TO ONE'S CAREER.(SLO 2)

• Link personal goals to long term achievement.

• Display an understanding of creating a professional first impression.

• Understand how networking is a powerful job search tool.
HCD 362 Work/Life Management

Units: 2
Hours: 36 hours LEC
Prerequisite: None.
Transferable: CSU
Catalog Date: June 1, 2020

This course explores planning for personal work/life management. Includes training in life problem-solving with relationship to personal, educational, and workplace productivity. Topics include exploration of one’s own values, interests and abilities; stress reduction, wellness, and leisure; building family and social support; and educational and career management. The course will provide activities which will assist students with decision-making, goal setting, and learning to use tools for dealing with change.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO #1: DEVELOP ANALYTICAL AND DECISION-MAKING SKILLS TO EVALUATE PRESENT CIRCUMSTANCES AND FUTURE POSSIBILITIES.
- Discuss the changing nature of today's workforce, its impact and lifestyles.
- SLO #2: IDENTIFY OCCUPATIONAL, PERSONAL, AND EDUCATIONAL GOALS.
- Demonstrate knowledge and application of organizational strategies for effective time and personal management.
- Demonstrate the ability to construct an individual work/lifestyle balance plan.

HCD 382 Learning Strategies for College and Life

Units: 3
Hours: 54 hours LEC
Prerequisite: None.
Transferable: CSU
General Education: AA/AS Area III(b) (effective Summer 2020)
Catalog Date: June 1, 2020

This course provides a universal learning environment that supports students with specific learning differences, through adaptive strategies and techniques essential for achieving academic and personal success. Topics include adaptive technology, organization, learning modalities, time management, memory development, motivation, note-taking, personal wellness, study skills, testing techniques, and critical thinking methods. Also covered are communication approaches, personal and academic barriers, and disability awareness. Additionally, campus/community resources, college regulations, and proficiency expectations are covered.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO 1: EVALUATE INDIVIDUAL STRENGTHS AND WEAKNESSES FOR LEARNING, AND DESCRIBE STRATEGIES AND APPROPRIATE EDUCATIONAL INTERVENTIONS TO FACILITATE ACADEMIC SUCCESS.
- Describe the rationale behind specific learning strategies and accommodations.
- Identify and apply strategies for academic and personal success: life planning skills, organization, time management, self-advocacy, general and adaptive technology, critical thinking, interpersonal communication, and personal wellness.
- Locate and utilize applicable campus and community resources, online resources, and study groups.
- SLO 2: DEMONSTRATE KNOWLEDGE OF CAMPUS POLICIES AND PROCEDURES.
- SLO 3: ANALYZE THE PSYCHOLOGY OF MOTIVATION AND GOAL SETTING TO CHANGE MOTIVATION AND SET APPROPRIATE EDUCATIONAL AND LIFE GOALS.
- SLO 4: EXAMINE THE HUMAN MEMORY SYSTEM AND APPLY MEMORY STRATEGIES COMPATIBLE WITH PERSONAL LEARNING STYLE.
HCD 495 Independent Studies in Human Career Development

An independent studies project involves an individual student or small group of students in study, research, or activities beyond the scope of regularly offered courses. See the current catalog section of “Special Studies” for full details of Independent Studies.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- **SLO #1:** Actively engage in intellectual inquiry beyond that required in order to pass a course of study (College Wide Learning Outcome – Area 4).
- Discuss and outline a proposal of study (that can be accomplished within one semester term) with a supervising instructor qualified within the discipline.
- Design an independent study (to be completed individually or by collaboration of a small group) to foster special knowledge, skills, and experience that are not available in any one regularly scheduled course.
- Use information resources to gather discipline-specific information.
- **SLO #2:** Utilize modes of analysis and critical thinking to apply theoretical perspectives and/or concepts in the major discipline of study to significant problems and/or educational activities (College Wide Learning Outcome – Area 3).
- Analyze and apply the knowledge, skills and experience that are involved in the independent study to theoretical perspectives and/or concepts in the major discipline of study.
- Explain the importance of the major discipline of study in the broader picture of society.
- **SLO #3:** Communicate a complex understanding of content matter of the major discipline of study (College Wide Outcome – Area 3).
- Demonstrate competence in the skills essential to mastery of the major discipline of study that are necessary to accomplish the independent study.
- **SLO #4:** Identify personal goals and pursue these goals effectively (College Wide Outcome – Area 4).
- Utilize skills from the “academic tool kit” including time management, study skills, etc., to accomplish the independent study within one semester term.

HCD 1000 Supervised Tutoring

This course offers individualized tutoring designed to assist students to increase their success in college courses. Students may enroll for support of more than one college course per semester. Content will vary depending upon the adjunct course. Attention will be given to essential study skills and utilization of campus learning resources. May be repeated in subsequent semesters.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- Provide a method of instruction which involves a student tutor and assists one or more students who need special supplemental instruction in the subject or skill.
- demonstrate essential study skills.
- effectively utilize available campus learning resources.
• demonstrate a positive attitude toward continued learning in the subject area.
Humanities | Cosumnes River College

This program offers an interdisciplinary approach to the study of classical, modern, American and non-Western humanities. Cultural understanding and sensitivity are fostered by examining arts, philosophy, religion, politics and social events in cultural context. CRC offers an A.A. Degree in Interdisciplinary Studies, Humanities. Students interested in pursuing a degree in Humanities can find further information in the Interdisciplinary Studies Program.

Associate Degrees

A.A. in American Studies

American Studies is the study of American culture, which includes an exploration of the arts, ideas, skills and institutions in US society.

Highlights include:
- A broad foundation for a variety of career or transfer opportunities in the study of culture
- Professional, student-centered, diverse and innovative staff committed to providing the best possible American Studies education
- A diverse set of course offerings which allows students to select based on their interests

Note to Transfer Students:
If you are interested in transferring to a four-year college or university to pursue a bachelor's degree in this major, it is critical that you meet with a CRC counselor to select and plan the courses for your major. Schools vary widely in terms of the required preparation. The courses that CRC requires for an Associate's degree in this major may be different from the requirements needed for the Bachelor's degree.

Catalog Date: June 1, 2020

The American Studies Associate in Arts (A.A.) degree may be obtained by completion of the required program, plus general education requirements, plus sufficient electives to meet a 60-unit total. See CRC graduation requirements.

Student Learning Outcomes

Upon completion of this program, the student will be able to:

- PSLO 1: Synthesize multiple disciplines focusing on U.S. society, such as history, art appreciation, music appreciation, and philosophy to achieve cultural literacy.
- PSLO 2: Practice college level critical thinking and writing in the interdisciplinary courses within the American Studies major.
- PSLO 3: Evaluate cross-cultural links between multiple disciplines focusing on U.S. society, with an emphasis on commonalities of cultural expression between different subcultures in the U.S.
- PSLO 4: Develop a foundation for cultural pluralism, a rejection of previous personal prejudices, and knowledge of and comfort with others unlike themselves.

Career Information

Research; Archivist; Education; Historian; Law; Politics Some career options may require more than two years of college study. Classes beyond the associate degree may be required to fulfill some career options or for preparation for transfer to a university program.

A.A. in Humanities
Humanities is the study of culture. This CRC major is intended for students who wish a general background in the areas of humanities or social science at the community college level. Several options are offered in specific interest areas but all are intended to give the student an interdisciplinary foundation for further study or an overview of the area chosen. Students who also wish to transfer to a four-year college should plan their programs to meet general education and lower division major requirements. All students are encouraged to consult with a counselor.

Highlights include:
* A valuable foundation for a variety of career or transfer opportunities
* Diversified and talented faculty
* Overview of theoretical and cultural principles

Note to Transfer Students:
If you are interested in transferring to a four-year college or university to pursue a bachelor's degree in this major, it is critical that you meet with a CRC counselor to select and plan the courses for your major. Schools vary widely in terms of the required preparation. The courses that CRC requires for an Associate's degree in this major may be different from the requirements needed for the Bachelor's degree.

The Humanities Associate in Arts (A.A.) degree may be obtained by completion of the required program, plus general education requirements, plus sufficient electives to meet a 60-unit total. See CRC graduation requirements.

Student Learning Outcomes

Upon completion of this program, the student will be able to:

- PSLO 1: Synthesize multiple disciplines such as history, art appreciation, music appreciation, and philosophy to achieve cultural literacy.
- PSLO 2: Use the interdisciplinary nature of Humanities courses to facilitate college level proficiency in critical thinking and writing.
- PSLO 3: Evaluate cross-cultural links between multiple Humanities disciplines, emphasizing commonalities of human expression between different cultures and shared ideas about the human experience.
- PSLO 4: Develop a greater understanding and tolerance of cultures other than the student's own by exposing the student to artistic materials not from their own culture or time period.

Career Information

Archivist; Librarian; Research; Teacher; Law; Administrator; Attorney; Historian; Foreign Service Some career options may require more than two years of college study. Classes beyond the associate degree may be required to fulfill some career options or for preparation for transfer to a university program.

Humanities (HUM)

HUM 300 Classical Humanities

Units: 3
Hours: 54 hours LEC
Prerequisite: None.
Transferable: CSU, UC
General Education: AA/AS Area I; CSU Area C2; IGETC Area 3B
Catalog Date: June 1, 2020

The course focuses upon Western culture in its attempt to interpret human experience and identity. The course examines basic human values as exemplified in the arts, philosophy and history. Emphasis is on the Greeks, the Romans, and the Judeo-Christian tradition up to the end of the Middle Ages.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO #1: Identify different artistic styles based on their historical periods, philosophical and or world view.
- Objective 1a: Identify the specific form of art (i.e., sculpture, architecture, literature).
- Objective 1b: Identify the subject matter of the art work and place it in a social and historical context.
- SLO #2: Use methodological skills when interpreting art.
- Objective 2a: Apply concepts of composition, subject, and execution when examining art from different disciplines.
- Objective 2b: Relate the above information to historical change, whether it be technological (i.e., a new technique) or social (i.e., a new understanding of man in the universe).
- SLO #3: Relate different art forms to each other using and understanding if the historical period in which they are created (i.e., a student might be asked to relate 5th century B.C. Greek ideas about perfection to the philosophy of Plato, the Parthenon and classic statuary.)
- Objective 3a: Describe how three works of art in different media each describe the basic ideas of their time.
SLO #4: Use the methodology developed above and apply it to the contemporary culture.

HUM 301 Introduction to the Humanities

Upon completion of this course, the student will be able to:

- SLO 1: Identify art conceptually (What is art?)
  - Objective 1a: Identify the artistic form of a work of art.
  - Objective 1b: Evaluate and analyze the subject of a work of art.
  - Objective 1c: Interpret and criticize a work of art.

- SLO 2: Apply methodologies to analyze a work of visual art (painting, sculpture, mixed media).
  - Objective 2a: Evaluate the principles of composition to different forms of the visual arts.
  - Objective 2b: Compare the elements of three examples from the visual arts (i.e., line, color, texture).
  - Objective 2c: Examine three examples of visual arts identifying their commonalities and differences.

- SLO 3: Apply methodologies to analyze a work of Literary Art.
  - Objective 3a: Identify genres.
  - Objective 3b: Analyze three different literary pieces that share a common theme.
  - Objective 3c: Compare literature and the visual arts.

- SLO 4: Apply methodologies to analyze a work of music or dance.
  - Objective 4a: Identify the elements of music or dance.
  - Objective 4b: Evaluate musical structures (for example what is Sonata Form?) or components of dance structures.
  - Objective 4c: Compare common musical forms or dance forms using themes from two different time periods or cultures.

- SLO 5: Explore the interrelationships between the arts and historic, scientific and philosophic changes.
  - Objective 5a: Evaluate two works of art to historic events (for example the conquests of Alexander the Great and WWI).
  - Objective 5b: Evaluate two works of art to advances in science (for example the work of Sir Issac Newton and Albert Einstein).
  - Objective 5c: Compare two works of art in the context of philosophy (for example the Philosopher Plato of 5th century BC and the Philosopher Jean Paul Sartre of the 20th century AD).

- SLO 6: Interpret contemporary forms of artistic expression.
  - Objective 6a: Apply critical and analytical skills to artistic forms of expression from the student's own culture and another that is contemporary (i.e., a culture not the student's own).
  - Objective 6b: Relate a contemporary work of art to recent historic events, scientific or philosophical changes.
  - Objective 6c: Evaluate the connection between current events and artistic expression.

HUM 310 Modern Humanities
This course focuses upon Western culture in its attempt to interpret human experience and identity. The course examines basic human values as exemplified in the arts, philosophy, and history. Emphasis is on the Renaissance, the Baroque period, and the Modern World.

**Student Learning Outcomes**

Upon completion of this course, the student will be able to:

- **SLO #1**: Identify and analyze different artistic styles based on their historical periods, philosophical and or scientific world view.
  
  - Objective 1a: Identify the specific form of art (i.e., music, painting).
  - Objective 1b: Analyze the subject of the art work and place it in a social and historical context.

- **SLO #2**: Apply methodological skills when interpreting art.
  
  - Objective 2a: Apply concepts of composition, subject, and execution when examining art from different disciplines (i.e., a painting, a film, a photograph).
  - Objective 2b: Relate these concepts to historical change, whether it be technological (i.e., a new technique) or social (i.e., a new understanding of man and his place in the universe).

- **SLO #3**: Compare and contrast different art forms to each other using an understanding of historical period, philosophical outlook (i.e., the ideas of Plato compared to the modern ideas of Karl Marx).
  
  - Objective 3a: Describe how three works of art in different media each describe the basic ideas of their time (i.e., relate a poem, a piece of music and a painting to ideas of Romanticism and the philosophy of Rousseau).

- **SLO #4**: Identify and explain the methodology developed for earlier time periods to the works of art from contemporary culture.
  
  - Objective 4a: Identify the major artistic forces of contemporary culture (i.e., Mass Media and advertising).
  - Objective 4b: Relate artistic works to contemporary philosophical or political understanding (i.e., Existentialism in the 20th century or Postmodern culture in the 21st).

---

**HUM 320 Asian Humanities**

The focus of the course is on ancient Indian, Chinese and Japanese cultures to interpret human experience and identity. The quest for truth is traced in a variety of forms of humanistic self-expression—literature, art, music, philosophy and history.

**Student Learning Outcomes**

Upon completion of this course, the student will be able to:

- Analyze the intersection of art and the development of society in ancient India, China and Japan. (SLO 1)
  
  - 1a. Critique major aspects of arts analysis using specific works of visual art (art, sculpture, architecture).
  - 1b. Assess specific parameters of a social movement.
  - 1c. Diagnose the connection between a specific work of art and a specific social event or movement.

- Criticize specific philosophical and political contributions to ancient Indian, Chinese and Japanese societies. (SLO 2)
  
  - 2a. Critique major aspects of literature (philosophical and political writings).
  - 2b. Research specific parameters of political movements.
  - 2c. Diagnose the relationship between specific political and philosophical writings and the social movements those writings foster.
Analyze the intersection between economics and the development of identity in India, China and Japan. (SLO 3)

3a. Research basic economic principles.

3b. Diagnose the relationship between economics and the development of racial identities, gender identities and caste identities.

HUM 324 Global Islam: Culture and Civilization

Units: 3
Hours: 54 hours LEC
Prerequisite: None.
Transferable: CSU; UC
General Education: AA/AS Area I; AA/AS Area VI; CSU Area C2; IGETC Area 3B
Catalog Date: June 1, 2020

The course is an introduction to global Islamic cultures from the 7th century to contemporary times, with emphasis on religious/philosophic concepts, and their expression in literature and the arts. Focus is placed upon Arab, Persian, African, Asian and American contributions. Students may be required to attend a live performance or museum visit.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- EXPRESS INTELLECTUAL AWARENESS AND UNDERSTANDING OF FUNDAMENTAL ASPECTS OF ISLAMIC CULTURE AND CIVILIZATION, AND EXAMINE THEIR RELIGIOUS AND CULTURAL IMPACT UPON WORLD CIVILIZATIONS AND THE WEST AND THE EAST (SLO 1).
  - Recognize and discuss elements of concepts of beliefs, religious tradition and practice, political leadership and succession, within the faith of Islam.
  - Demonstrate understanding of diverse Muslim global cultures and their impact upon world civilizations and modernity.
  - ANALYZE CONCEPTS OF TOLERANCE, JIHAD, WAR AND PEACE WITHIN THE RELIGION OF ISLAM, IDEALLY AND IN HUMAN PRACTICE (SLO 2).
  - Contrast and compare the topics.
  - Apply the argument, weighing the religious ideal with the human practice within the Islamic/Muslim context in medieval and contemporary times.
  - DIFFERENTIATE ISLAMIC AND AMERICAN DEFINITIONS OF RACE, ETHNICITY, GENDER, CLASS, RELIGIOUS AND NON-RELIGIOUS DIFFERENCES (SLO 3).
  - Research, analyze and compare definitions.
  - Create and compose evaluative essays, papers, reports based upon English language and Quranic meanings.
  - IDENTIFY AND RECOGNIZE THE CONTRIBUTIONS OF ARTISTS, POETS, AND WRITERS OF BOTH GENDERS WITHIN THE MULTICULTURAL HERITAGE OF ISLAM (SLO 4).
  - Review, assess, and examine creative works of art and architecture, poetic examples and writings from the Middle East, Asia, Africa, Europe and Muslims in America spanning the 7th century C.E. to contemporary times, a period of 1500 years.
  - DEVELOP CRITICAL THINKING SKILLS NECESSARY FOR FORMULATING AN ANALYTICAL FRAMEWORK RELEVANT TO THE STUDY OF THE GLOBAL CULTURES AND HISTORY OF ISLAM (SLO 5).
  - Research topics to formulate and apply to an analytical framework relevant to the study of the global cultures and history of Islam.
  - Write evaluative essays and papers to apply to an analytical framework relevant to the study of the global cultures and history of Islam.
  - Design book and oral reports of works relevant to the study of the global cultures and history of Islam.
  - Compare and contrast current societal issues in the light of past history.
  - Analyze and contrast cultural components within two separate geographic regions of the Muslim world.
  - Critique and interpret cross-cultural comparative aspects of Islamic and Arab history in the Middle East, and the Muslim historical legacy in Africa, China, South Asia, and within the American experience.
  - IDENTIFY, EVALUATE, AND WEIGH ACHIEVEMENTS OF MUSLIM THEOLOGIANS AND PHILOSOPHERS WITHIN HISTORICAL PERIODS OF NARROW INTERPRETATION AND CREATIVE THOUGHT (SLO 6).
- Define Islamic religious and philosophic systems and critique their effect upon representative art, literary and musical forms.

- OUTLINE THE INTELLECTUAL LEGACY OF LEARNING AND RESEARCH IN MUSLIM URBAN CENTERS DURING THE ABBASID, ANDALUSIAN PERIODS AND CONTEMPORARY TIMES (SLO 7).

- Locate and describe the centers of learning in Baghdad, Cordoba, Samarkand, Alexandria from the 8th Cent. C.E. into the 21st Century and their transmission of knowledge across cultures.

**HUM 331 Latin American Humanities**

**Units:** 3  
**Hours:** 54 hours LEC  
**Prerequisite:** None.  
**Transferable:** CSU, UC  
**General Education:** AA/AS Area I; AA/AS Area VI; CSU Area C2; IGETC Area 3B  
**Catalog Date:** June 1, 2020

This interdisciplinary course focuses on understanding the cultures, societies, economics, politics and artistic expressions of Mexico, Central America and South America. The quest for understanding culture includes an exploration of literature, art, architecture, music, theatre, history, philosophy, politics, race, gender, and class. Emphasis is placed on Pre-Contact, Post-Conquest and Colonial, Post-Independence, Contemporary and Diasporic Latin American humanistic expressions of culture.

**Student Learning Outcomes**

Upon completion of this course, the student will be able to:

- analyze the intersection of art and the development of society in Latin America (Mexico, Central America and South America)- SLO 1
- critique major aspects of arts analysis using specific works of visual art (art, sculpture, architecture)
- assess specific parameters of a social movement
- diagnose the connection between a specific work of art and a specific social event or movement
- criticize specific philosophical and political contributions to Latin American societies - SLO 2
- critique major aspects of literature (philosophical and political writings)
- research specific parameters of political movements
- diagnose the relationship between specific political and philosophical writings and the social movements those writings foster
- evaluate the pattern of language origins and the effects of European colonialism on cultural development in Latin America - SLO 3
- explain colonial movements from Europe to Mexico, Central America and South America
- integrate understanding of the impact of European colonialism on language and indigenous sovereignty
- evaluate race, class and gender through language and the legacies of colonialism
- analyze the intersection between economics and the development of race, gender and class - SLO 4
- research basic economic principles
- diagnose the relationship between economics (indigenous and colonial) and the development of racial identities, gender identities and class inequalities

**HUM 332 American Humanities**

**Units:** 3  
**Hours:** 54 hours LEC  
**Prerequisite:** None.  
**Transferable:** CSU, UC  
**General Education:** AA/AS Area I; AA/AS Area VI; CSU Area C2; IGETC Area 3B  
**Catalog Date:** June 1, 2020
This course examines ideas and values about the American experience in the 20th century by analyzing the literature, art, music, philosophy and history of the past 100 years. The course draws upon the arts of African American, Native American, Asian American, Anglo and Latino cultures as avenues for understanding issues of race, ethnicity, class, and gender as they intersect with mainstream American values in the past 100 years. Students may be required to attend a live performance or museum exhibition.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO #1: synthesize material from various sources and art forms and discuss them in the Historical context of 20th century America in the form of comparison and contrast essays.
  
  Objective 1a: Apply concepts of composition, subject and execution when examining art from different historical periods

- SLO #2: demonstrate an understanding of the history and artistic expression of at least three of the following groups; African American, Native American, Asian American, Anglo or Latino cultures.

- SLO #3: identify major artistic works and important persons of the 20th century.

- SLO #4: analyze the role of ethnicity, ethnocentrism and privilege its impact on American culture and students lives in a series of "hands on" exercises.

- SLO #5: compare and contrast the role of the United States as a leader of civil rights, women's, and minority rights on the world scene after the 1960's with its role in the world today.

- SLO #6: express their own first person experience of the Multi-cultural experience with the historical perspective of the last 100 years

HUM 339 African American Humanities

Units: 3
Hours: 54 hours LEC
Prerequisite: None.
Transferable: CSU; UC
Catalog Date: June 1, 2020

This course examines African American experience in the United States through the products of culture created by Black Americans. The course synthesizes the production of music, art, literature, politics and philosophy to understand historic and contemporary influences and experiences of African American identity and expression. Students may be required to attend and analyze at least one live performance of the arts (music, theater, dance) or museum.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO #1: Identify and analyze different artistic styles based on their historical periods, philosophical and or scientific world views.

  Objective 1a: Identify the specific form of cultural production (i.e., arts, ideas, skills and institutions).

  Objective 1b: Analyze the subject of the art work and place it in a social and historical context.

- SLO #2: Apply methodological skills when interpreting art.

  Objective 2a: Apply concepts of composition, subject, and execution when examining cultural production from different disciplines (i.e., a painting, a film, a photograph).

  Objective 2b: Relate these concepts to historical change, whether it be technological (i.e., a new technique) or social (i.e., a new movement).

- SLO #3: Compare and contrast different art forms to each other using an understanding of historical period, philosophical outlook (i.e., the ideas of Phillis Wheatley compared to the contemporary ideas of Nikki Giovanni).

  Objective 3a: Describe how three works of art in different media each describe the basic ideas of their time (i.e., relate a poem, a piece of music and a painting to ideas of the Civil Rights era).

- SLO #4: Identify and analyze the methodology developed for earlier time periods to the works of art from contemporary culture.

  Objective 4a: Evaluate the major artistic forces of contemporary Black artists.

  Objective 4b: Relate artistic works to contemporary philosophical or political understanding (i.e., Black Lives Matter or the rise of Black women in political discourse).
HUM 370 Women and the Creative Imagination

This course examines the creative powers of women throughout the history of art from antiquity to the present. The course offers an interdisciplinary perspective on the contributions of women artists as evidenced in literature and the visual and performing arts. Using gender as the primary lens of analysis, this course seeks to uncover the broader contexts of female experience by probing the relationship women artists had to the historical periods in which they lived and worked. Students may be required to attend a live performance or museum visit.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- **SLO 1:** Interpret through an historical lens the products of culture (arts, ideas, skills and institutions) associated with women.
  - Objective 1a: Evaluate the religious, historical, cultural, economic and technological factors that impact the lives of women artists.
  - Objective 1b: Analyze significant art forms produced by women.
  - Objective 1c: Compare and contrast the artworks created by women artists.
- **SLO 2:** Apply methodological skills when interpreting art.
  - Objective 2a: Apply concepts of composition, subject, and execution when examining art from different disciplines (i.e., a painting, a film, a photograph).
  - Objective 2b: Relate these concepts to historical change, whether it be technological (i.e., a new technique) or social (i.e., a new understanding of man and his place in the universe).
  - Objective 2c: Utilize a feminist critique when interpreting products of culture.
- **SLO 3:** Analyze cultural products by women across time and geography.
  - Objective 3a: Compare and contrast contemporary artists from different regions of the globe.
  - Objective 3b: Evaluate cultural production in relation to regional history and culture.

HUM 495 Independent Studies in Humanities

This course involves an individual student or small group of students in study, research, or activities beyond the scope of regularly offered courses. See the current catalog section of “Special Studies” for full details of Independent Studies.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- **SLO #1:** Actively engage in intellectual inquiry beyond that required in order to pass a course of study (College Wide Learning Outcome – Area 4).
  - Discuss and outline a proposal of study (that can be accomplished within one semester term) with a supervising instructor qualified within the discipline.
- **SLO #3:** Design an independent study (to be completed individually or by collaboration of a small group) to foster special knowledge, skills, and experience that are not available in any one regularly scheduled course.
  - Use information resources to gather discipline-specific information.
• SLO #2: Utilize modes of analysis and critical thinking to apply theoretical perspectives and/or concepts in the major discipline of study to significant problems and/or educational activities (College Wide Learning Outcome – Area 3).

• Analyze and apply the knowledge, skills and experience that are involved in the independent study to theoretical perspectives and/or concepts in the major discipline of study.

• Explain the importance of the major discipline of study in the broader picture of society.

• SLO #3: Communicate a complex understanding of content matter of the major discipline of study (College Wide Outcome – Area 3).

• Demonstrate competence in the skills essential to mastery of the major discipline of study that are necessary to accomplish the independent study.

• SLO #4: Identify personal goals and pursue these goals effectively (College Wide Outcome – Area 4).

• Utilize skills from the “academic tool kit” including time management, study skills, etc., to accomplish the independent study within one semester term.
Interdisciplinary Studies  
| Cosumnes River College

This CRC major is intended for students who wish a general background across several academic disciplines at the community college level. Several areas of interest are offered, but all are intended to supply the student with an interdisciplinary foundation for further study and an overview of the interest area chosen.

Students who also wish to transfer to a four-year college should plan their programs to meet general education and lower division major requirements. All students are encouraged to consult with a counselor.

Dean  
 (916) 691-7142

Associate Degrees

A.A. in Interdisciplinary Studies, Ethnic Studies

This CRC major is intended for students who wish a general background in the areas of humanities or social science at the community college level. Several options are offered in specific interest areas but all are intended to give the student an interdisciplinary foundation for further study or an overview of the area chosen. Students who also wish to transfer to a four-year college should plan their programs to meet general education and lower division major requirements. All students are encouraged to consult with a counselor.

Highlights include:
* A valuable foundation for a variety of career or transfer opportunities  
* Diversified and talented faculty  
* Overview of theoretical and cultural principles

Note to Transfer Students:
If you are interested in transferring to a four-year college or university to pursue a bachelor's degree in this major, it is critical that you meet with a CRC counselor to select and plan the courses for your major. Schools vary widely in terms of the required preparation. The courses that CRC requires for an Associate's degree in this major may be different from the requirements needed for the Bachelor's degree.

A.A. in Liberal Arts - Arts and Humanities

The Associate Degree in Liberal Arts - Arts and Humanities is designed for students who wish a broad knowledge of the arts and humanities. Students must satisfactorily complete 60 units of collegiate coursework with a "C" (2.0) grade point average in curriculum that the district accepts toward this degree.

Note: If you plan to transfer to a CSU, consider an Associates in Arts for Transfer degree such as the Art History, Art Design, History, Music, Spanish, Studio Arts or Theatre Arts AA-T rather than this degree. Please see a counselor for assistance with selecting the most appropriate transfer courses (i.e. 300 or higher numbered courses). If you plan to transfer to a UC campus or a private college or university, please see a counselor to determine if this degree is the most appropriate choice.

**Total Units:** | **18** |

*The Liberal Arts - Arts and Humanities Associate in Arts (A.A.) degree may be obtained by completion of the required program, plus general education requirements, plus sufficient electives to meet a 60-unit total. See CRC graduation requirements.*

**Student Learning Outcomes**

Upon completion of this program, the student will be able to:

- Demonstrate an appreciation of artistic endeavors, cultural expressions, ideas and/or institutions through nonempirical, analytic, interpretive studies and critical thinking projects. (PSLO 1)

- Articulate the development of and relationships between different civilizations, cultural traditions, ideas and/or institutions through the application of non-empirical, analytical reasoning. (PSLO 2)

- Evaluate critically the analyses and interpretations by others (including significant historical or contemporary analyses and interpretations) of arts, ideas, skills (including language), and/or institutions. (PSLO 3)

- Express clearly her or his own analyses and interpretations of arts, ideas, skills (including language), and/or institutions, and will properly use the vocabulary appropriate to the field. (PSLO 4)

**A.A. in Liberal Arts - Communication and Writing**

The Associate Degree in Liberal Arts - Communication and Writing is designed for students who wish a broad knowledge of communication studies and writing. Students must satisfactorily complete 60 units of collegiate coursework with a “C” (2.0) grade point average in curriculum that the district accepts toward this degree.

Note: If you plan to transfer to a CSU, consider completing an Associates in Arts for Transfer degree such as the Communications Studies, English, or Journalism AA-T rather than this degree. Please see a counselor for assistance with selecting the most appropriate transfer courses (i.e. 300 or higher numbered courses). If you plan to transfer to a UC campus or a private college or university, please see a counselor to determine if this degree is the most appropriate choice.

The Liberal Arts - Communication and Writing Associate in Arts (A.A.) degree may be obtained by completion of the required program, plus general education requirements, plus sufficient electives to meet a 60-unit total. See CRC graduation requirements.

Student Learning Outcomes

Upon completion of this program, the student will be able to:

- Conduct audience analysis to design an appropriate purpose, topic, style and speech structure within formal presentations. Express their ideas clearly in well-organized written messages. (PSLO 1)
- Construct an effective presentation to a specific topic by collecting relevant information and employing credible evidence with proper documentation. (PSLO 2)
- Determine and use appropriate communications technologies to convey information. (PSLO 3)
- Use correct and appropriate conventions of mechanics, usage, and style in written communication. (PSLO 4)

A.S. in Liberal Arts - Math and Science

The Associate Degree in Liberal Arts - Math and Science is designed for students who wish a broad knowledge of mathematics and the sciences. Students must satisfactorily complete 60 units of collegiate coursework with a “C” (2.0) grade point average in curriculum that the district accepts toward this degree.

Note: If you plan to transfer to the CSU after completing this degree, consider an Associates in Science for Transfer degree such as the Biology, Geography, Geology, Math, or Physics AS-T rather than this degree. Please see a counselor for assistance with selecting the most appropriate transfer courses (i.e. 300 or higher numbered courses). If you plan to transfer to a UC campus or a private college or university, please see a counselor to determine if this degree is the most appropriate choice.

Total Units: 18

The Liberal Arts - Math and Science Associate in Science (A.S.) degree may be obtained by completion of the required program, plus general education requirements, plus sufficient electives to meet a 60-unit total. See CRC graduation requirements.

Student Learning Outcomes
Upon completion of this program, the student will be able to:

- Explain the core perspectives of the scientific method and apply it to at least one scientific discipline. (PSLO 1)
- Solve introductory problems of a conceptual and/or quantitative nature in at least one scientific discipline. (PSLO 2)
- Apply accurately the basic vocabulary and concepts of at least one scientific discipline verbally and in writing. (PSLO 3)
- Recognize the use and misuse of scientific concepts in society including politics and the media. (PSLO 4)
- Use appropriate quantitative skills at college level to solve problems applicable to occupational and personal activities. (PSLO 5)

A.A. in Liberal Arts - Social and Behavioral Sciences

The Associate Degree in Liberal Arts - Social and Behavioral Sciences is designed for students who wish a broad knowledge of social and behavioral sciences. Students must satisfactorily complete 60 units of collegiate coursework with a "C" (2.0) grade point average in curriculum that the district accepts toward this degree.

Note: If you plan to transfer to a CSU after completing this Liberal Arts - Social and Behavioral Sciences degree, please consider an Associate in Arts for Transfer degree such as the Anthropology, Communication Studies, Early Childhood Education, Geography, History, Psychology or Sociology AA-T rather than this degree. See a counselor for assistance with selecting the most appropriate transfer courses (i.e. 300 or higher numbered courses). If you plan to transfer to a UC campus or a private college or university, please see a counselor to determine if this degree is the most appropriate choice.

The Liberal Arts - Social and Behavioral Sciences Associate in Arts (A.A.) degree may be obtained by completion of the required program, plus general education requirements, plus sufficient electives to meet a 60-unit total. See CRC graduation requirements.

**Student Learning Outcomes**

Upon completion of this program, the student will be able to:

- Apply accurately the basic vocabulary and concepts of at least one social or behavioral science discipline verbally and in writing. (PSLO 1)
- Examine the possible causes and suggest solutions to introductory problems of a conceptual nature using the methods of at least one social or behavioral scientific discipline. (PSLO 2)
- Recognize the use and misuse of social and behavioral science concepts in society including politics and the media. (PSLO 3)
- Describe both verbally and in writing the role of diverse ethnic, religious and social groups in American political, economic and social development. (PSLO 4)
**Interdisciplinary Studies (INDIS)**

**INDIS 310 Mathematics, Computer Information Science, Engineering and Science Achievement**

This course introduces the student to MESA and to the skills needed for academic success in mathematics, computer information science, engineering, and science. The course covers college resources and transfer processes as they relate to the study of math and science. The course is intended for students who will transfer to universities in a calculus-based major (biology, computer science, chemistry, engineering, mathematics, physics, etc.). This is the first 1/2 unit of a 1 unit combination of courses that will provide academic and career support to MESA students and other students in math-based majors who wish to develop study skills specific to those disciplines. (INDIS 311 or 312 complete the combination.) This course is graded on a Pass/No-Pass basis only.

**Student Learning Outcomes**

Upon completion of this course, the student will be able to:

- effectively communicate the campus and MESA resources pertinent to the MESA transfer student. (SLO 1)
- describe the basic elements of the MESA/CCCP program.
- describe the basic elements of counseling, internships, the transition center, and financial aid.
- describe the university transfer process for STEM (Science Technology Engineering Mathematics) majors. (SLO 2)
- discuss the structure and culture of four-year college math, CIS, engineering, and science programs.
- outline the logistics involved in completing Associates and Bachelor degrees in math, CIS, engineering, and science.

**INDIS 311 Academic Skills for a Career in Engineering, Computer Information Science, Mathematics, Physics and Related Disciplines**

This course introduces the MESA student to academic skills and career exploration needed for advanced study toward a career in Mathematics, Engineering, Computer Information Science, Architecture, and Physics. This course will provide an overview of careers in engineering, math, computer information science, architecture, and physics, including the education, type of work conducted by professionals, and employment opportunities in these fields. The course is the second 1/2 unit of a 1 unit package of courses (see INDIS 310) that will provide academic and career support to MESA students. This course is graded on a pass/no-pass basis only.

**Student Learning Outcomes**

Upon completion of this course, the student will be able to:

- understand educational and career opportunities in the fields of engineering, mathematics, Computer Information Science (CIS), architecture, and physics. (SLO 1)
- describe the education needed for careers in engineering, mathematics, CIS, architecture, and physics.
- describe the work conducted by professionals in engineering, mathematics, CIS, architecture, and physics.
- summarize employment opportunities in engineering, mathematics, CIS, architecture, and physics.
INDIS 312 Academic Skills for a Career in Chemistry, Biology and Related Disciplines

This course introduces the MESA student to academic skills and career exploration needed for advanced study toward a career in Biology, Chemistry, and related fields - including dentistry, medicine, pharmacy, and veterinary medicine. This course will provide an overview of careers in Biology, Chemistry, and related fields, including the education, type of work conducted by professionals, and employment opportunities. The course is the second 1/2 unit of a 1 unit package of courses (see INDIS 310) that will provide academic and career support to MESA students. This course is graded on a pass/no-pass basis only.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- understand educational and career opportunities in biology, chemistry, and related fields. (SLO 1)
- describe the education needed for careers in biology, chemistry, and related fields.
- describe the work conducted by professionals in biology, chemistry, and related fields.
- summarize employment opportunities in biology, chemistry, and related fields.

INDIS 313 Freshman Seminar

This course will assist new college students in achieving academic success. Topics covered will include discipline-specific academic language and culture, the value and demands of a college education, problem solving strategies, the use of technology in education, academic integrity, campus resources and services, and life during and after college. The course will introduce students to one or more academic disciplines or areas of study, and discuss the academic and professional expectations and experiences of those disciplines.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO #1 - Navigate college processes and access resources
- understand the academic language of a community college
- understand the roles and functions of various campus resources and services including tutoring options
- SLO #2 - Demonstrate an awareness of the factors and skills needed to promote college success
- identify their own strengths and barriers as related to college success
- develop strategies to promote their own success in college
- SLO #3 - Demonstrate an understanding of the appropriate use of technology and active learning
- SLO #4 - Demonstrate an understanding of academic and/or career options available upon completion of community college in a specific discipline or broader area of study
- SLO #5 - Apply appropriately the basic language and practices of a specific academic discipline or broader area of study.
- SLO #6 – Examine their own individual behavior and choices as related to college and career and the potential effects on their physiological, psychological and social development and well-being.
INDIS 350 Life and Culture in Study Abroad

This course is designed to allow students to acquire a level of global competence while enrolled in the Los Rios Study Abroad program. Global competence is a continuing process of acquiring specific economic, historical, and geo-political knowledge which support the intercultural communication skills and authentic lived experiences that allow a person to function in another culture, and result in attitudes of cultural appreciation and interdependence. While participating in a specific Study Abroad program the student will have opportunities to study and generally survey the host country's historical, cultural, and geopolitical influences, as well as the societal structures to develop an understanding and appreciation of the host culture as different from U.S. American culture.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- Identify aspects of social, physical, and/or emotional well-being for the community while considering present and future conditions in society [SLO #1].
- Incorporate specific cultural, geopolitical, economic, and social knowledge into academic and personal contexts for an understanding of global competence.
- Analyze personal beliefs, values and attitudes about the host culture that the student had prior to an intercultural experience and aspects of ethnocentric behavior that can occur within intercultural communication and relations.
- Demonstrate an understanding of concepts of physical and emotional wellness to make wise lifestyle choices and will develop these skills and competencies to understand themselves as whole persons (integral to their environment) [SLO #2].
- Identify, analyze, articulate and describe the affects of intercultural experiences upon physical and emotional wellness while immersed in a country different than one's native country.
- Appreciate visual, historical and experiential cultural products of cultures different from the student's own.
- Identify and explain aspects of culture shock and techniques to cope and reduce its affects on physical and emotional wellness.
- Describe the value of international travel as a part of lifelong learning and personal wellness.
- Participate in the larger community beyond campus in a positive manner demonstrating an understanding of personal responsibility in the larger context [SLO #3; College-wide SLO].
- Undertake thoughtful consideration of divergent points of view and utilize multiple perspectives in considering information.
- Develop a foundation for cultural pluralism, a rejection of previous personal prejudices, and knowledge of and comfort with others unlike one's self.
Journalism | Cosumnes River College

The Journalism program is designed to train students in the writing, reporting and critical thinking skills required for jobs in the news media or for transfer to a journalism program at a four-year institution.

Associate Degrees for Transfer

A.A.-T. in Journalism

The Journalism AA-T degree offers students the opportunity to take courses in media theories, news writing and reporting, and writing for publication, which readies them for the courses that offer hands-on experience at the award-winning, student-produced publications: The Connection, a biweekly print newspaper, and www.thecrcconnection.com, the daily online news outlet.

The Journalism AA-T degree is for students who have a goal of transferring to the California State University to attain a Bachelor of Arts or Science in Journalism for the purpose of becoming journalism or communications professionals. Some students pursuing this degree may plan to minor in journalism at a CSU. Lower-division requirements for the major and minor in Journalism may be completed through the Journalism AA-T degree.

The Journalism AA-T degree may be obtained by completing a total of 60 transferable semester units with a minimum 2.0 GPA, to include either the California State University General Education Breadth pattern or the Intersegmental General Education Transfer Curriculum; students must also earn a grade of C or better in all the courses for the major as described in the Required Program. Upon successful completion of the degree requirements, students will be guaranteed admission to the CSU system with junior status and will not have to repeat lower division coursework. Students are encouraged to meet with a counselor to develop their educational plans as degree options and general education requirements vary for each university.

The Associate in Arts in Journalism for Transfer (AA-T) degree may be obtained by completion of 60 transferable, semester units with a minimum 2.0 GPA, including (a) the major or area of emphasis described in the Required Program, and (b) either the Intersegmental General Education Transfer Curriculum (IGETC) or the California State University General Education-Breadth Requirements.

**Student Learning Outcomes**

Upon completion of this program, the student will be able to:

- Write clear and concise stories that adhere to journalistic conventions.
- Conduct research and evaluate information using appropriate methods.
- Demonstrate an understanding of basic news and feature writing in print, broadcast, and on-line media.
- Evaluate their own work and that of others for accuracy, fairness, appropriate style, and grammatical correctness.
- Produce news and feature articles, photographs, and/or multimedia packages for publication in a newspaper or on-line publication.
- Understand and apply the principles of the First Amendment and other laws appropriate to professional practice.
- Apply ethical principles in pursuit of truth, accuracy, fairness, and diversity.
- Identify and explain the processes, elements, history, theory, and effects of modern mass media in society.

**Career Information**

The AA-T degree in Journalism can provide students with the foundational knowledge necessary for transfer to a 4-year Bachelor of Arts (BA) degree program. Career opportunities for students who have earned BS or BA degrees in Journalism include but are not limited to: news reporter, news editor, broadcast news writer, broadcast news producer, online news editor, online news producer, advertising copy writer, public relations representative. Some careers may require additional training. NOTE TO TRANSFER STUDENTS: The Associate Degree for Transfer program is designed for students who plan to transfer to a campus of the California State University (CSU). Other than the required core, the courses you choose to complete this degree will depend to some extent on the selected CSU for transfer. In addition, some CSU-GE Breadth or IGETC requirements can also be completed using courses required for this associate degree for transfer major (known as “double-counting”). Meeting with a counselor to determine the most appropriate course choices will facilitate efficient completion of your transfer requirements. For students wishing to transfer to other universities (UC System, private, or out-of-state), the Associate Degree for Transfer may not provide adequate preparation for upper-division transfer admissions; it is critical that you meet with a CRC counselor to select and plan the courses for the major, as programs vary widely in terms of the required preparation.

**Associate Degrees**

**A.A. in Journalism**

The Journalism program is designed to train students in the writing, reporting and critical thinking skills required for jobs in the news media or for transfer to a journalism program at a four-year institution.
Highlights include:
* Hands-on experience publishing the college's award-winning newspaper, The Connection. The newspaper showcases students' work in writing, photography, editing, graphic illustration and publication design
* Hands-on experience producing the newspaper's award-winning website. The website allows students to publish breaking news, showcase photo galleries, and post audio and video clips to accompany stories.
* Instruction and practice in desktop publishing, digital photography and graphics applications in the department's Macintosh laboratory or in the campus PC computer laboratory
* Opportunities to attend state journalism conferences, compete for awards in writing, photography, editing and graphic art, and qualify for scholarships
* Opportunities for internships at newspapers, magazines, websites, broadcast television stations, and in public relations firms

Note to Transfer Students:
If you are interested in transferring to a four-year college or university to pursue a bachelor's degree in this major, it is critical that you meet with a CRC counselor to select and plan the courses for your major. Schools vary widely in terms of the required preparation. The courses that CRC requires for an Associate's degree in this major may be different from the requirements needed for the Bachelor's degree.

The Journalism Associate in Arts (A.A.) degree may be obtained by completion of the required program, plus general education requirements, plus sufficient electives to meet a 60-unit total. See CRC graduation requirements.

Student Learning Outcomes

Upon completion of this program, the student will be able to:

- PSLO 1: Write clear and concise stories that adhere to journalistic conventions.
- PSLO 2: Conduct research and evaluate information using appropriate methods.
- PSLO 3: Demonstrate an understanding of basic news and feature writing in print, broadcast, and on-line media.
- PSLO 4: Evaluate their own work and that of others for accuracy, fairness, appropriate style, and grammatical correctness.
Journalism (JOUR)

JOUR 300 Newswriting and Reporting

Introductory course in basic news writing and reporting. Course concentrates on fundamental writing techniques for mass media. Course also emphasizes the legal and ethical responsibilities of the news media with critical analysis of current news reporting practices.

Upon completion of this course, the student will be able to:

- **SLO #1**: Apply the basic skills of news writing and reporting in clear, concise stories.
- **SLO #2**: Write stories in the inverted pyramid format.
- **SLO #3**: Apply knowledge of grammar and Associated Press Style to create mass media products that conform to journalistic conventions.
- **SLO #4**: Conduct interviews, research topics, and observe events.
- **SLO #5**: Analyze news stories for the appropriate use of sources, data, and evidence.
- **SLO #6**: Recognize and seek out the information needed to produce balanced stories.
- **SLO #7**: Demonstrate an understanding of basic news writing, feature writing, and reporting in print, broadcast, and online media.
- **SLO #8**: Write and report a news story and feature story for print, broadcast, and online media.
- **SLO #9**: Assess and apply the principles of the First Amendment and other laws appropriate to professional practice.
- **SLO #10**: Write and report stories that are free of libel.
- **SLO #11**: Apply ethical principles in pursuit of truth, accuracy, fairness, and diversity.
- **SLO #12**: While news gathering, respect issues of privacy, avoid conflicts of interest, and adhere to professional standards of conduct.
- **SLO #13**: Apply the principles of news judgment to assignments.
- **SLO #14**: Rank information appropriately in stories; emphasize key facts in leads, stories, and headlines.

Career Information

Career Options: Journalist; Newspaper Reporter; Magazine Editor; Editor; Columnist; Desktop Publishing Specialist; Public Information Officer; Web Writer/Editor/Producer; Script Writer; Copy Writer; Broadcast News Writer; Broadcast News Producer. Some career options may require more than two years of college study. Classes beyond the associate degree may be required to fulfill some career options or for preparation for transfer to a university program.

Journalism (JOUR)

Introductory course in basic news writing and reporting. Course concentrates on fundamental writing techniques for mass media. Course also emphasizes the legal and ethical responsibilities of the news media with critical analysis of current news reporting practices.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- **SLO #1**: Apply the basic skills of news writing and reporting in clear, concise stories.
- **SLO #2**: Write stories in the inverted pyramid format.
- **SLO #3**: Apply knowledge of grammar and Associated Press Style to create mass media products that conform to journalistic conventions.
- **SLO #4**: Conduct interviews, research topics, and observe events.
- **SLO #5**: Analyze news stories for the appropriate use of sources, data, and evidence.
- **SLO #6**: Recognize and seek out the information needed to produce balanced stories.
- **SLO #7**: Demonstrate an understanding of basic news writing, feature writing, and reporting in print, broadcast, and online media.
- **SLO #8**: Write and report a news story and feature story for print, broadcast, and online media.
- **SLO #9**: Assess and apply the principles of the First Amendment and other laws appropriate to professional practice.
- **SLO #10**: Write and report stories that are free of libel.
- **SLO #11**: Apply ethical principles in pursuit of truth, accuracy, fairness, and diversity.
- **SLO #12**: While news gathering, respect issues of privacy, avoid conflicts of interest, and adhere to professional standards of conduct.
- **SLO #13**: Apply the principles of news judgment to assignments.
- **SLO #14**: Rank information appropriately in stories; emphasize key facts in leads, stories, and headlines.
JOUR 301 Advanced Newswriting and Reporting

This course focuses on interpretive news writing with emphasis on public affairs, specialized reporting, mastery of fundamental reporting techniques, an introduction to feature and editorial writing, and an introduction to the tools of multimedia reporting.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO #1: Produce news stories using advanced writing formats and techniques.
- Write stories using narrative, descriptive, and anecdotal leads.
- Write stories using the Wall Street Journal formula.
- SLO #2: Critically analyze and apply information from complex sources, including public opinion polls, medical studies, and government budgets.
- Complete exercises in computer-assisted reporting.
- SLO #3: Construct opinion stories and editorial pieces.
- Evaluate and apply rhetorical arguments in opinion and editorial pieces.
- SLO #4: Assemble in-depth stories, profiles, and reviews.
- SLO #5: Evaluate the methods of investigative reporting.
- Assess investigative stories for their use of sources, research, and credibility.
- SLO #6: Assess and apply the principles of the First Amendment and other laws appropriate to professional practice.
- Write and report stories that are free of libel.
- SLO #7: Apply ethical principles in pursuit of truth, accuracy, fairness, and diversity.
- While news gathering, respect issues of privacy, avoid conflicts of interest, and adhere to professional standards of conduct.
- SLO#8: Produce stories using audio, video, and other multimedia tools.

JOUR 310 Mass Media and Society

Survey of the mass media: history, philosophy, structure and trends, as well as theories which help to explain effects and the importance of mass communications as a social institution. Exploration of economics, technology, law, ethics, and social issues, including cultural and ethnic diversity. This course is the same as RTVF 300, and only one may be taken for credit. (C-ID JOUR 100)

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- apply the basic vocabulary and concepts of mass communication verbally and in clear, concise English (SLO #1 GE Vb a).
- define the various roles of mass media professionals.
- compare and contrast the origins, development, functions and effects of various mass media.
- research critically, filter the results and present them in a cogent manner (SLO #2).
- evaluate the possible causes and suggest solutions to introductory problems of a conceptual nature using the methods appropriate to the study of Mass communication (SLO #3/GE Vb b).
- analyze the economics of the mass media.
- assess the impact of media messages on various audiences.
- recognize the use and misuse of social and behavioral science concepts in society including politics and the media (SLO #4/GE Vb c).
- identify basic media theories and their application to contemporary media use and behavior.
- predict future roles and developments in mass media.
- analyze, interpret, and exercise critical judgment in the evaluation of media productions (SLO #5).
- create a simple content analysis of a media product.
- demonstrate that with the power of a communicator, comes moral and ethical responsibility (SLO #6).
- explain and analyze the legal and ethical rights, regulations and responsibilities of the media in America.

### JOUR 320 Race and Gender in the Media

Units: 3  
Hours: 54 hours LEC  
Prerequisite: None.  
Transferable: CSU; UC  
General Education: AA/AS Area V(b); AA/AS Area VI; CSU Area D3; IGETC Area 4C  
Catalog Date: June 1, 2020

This course examines the roles of ethnic minorities and women in American society as depicted, documented and distorted in the mass media. Students will study ethnic, racial and gender issues in mass media content, development, policy, and professions, including media stereotypes, contributions of diverse groups to the media and mass communications as an agent of social change.

### Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO #1: Evaluate mass media theories, concepts, and practices as they relate to gender, race, and class constructs.
- Analyze the economics of the mass media.
- Assess media messages that depict race, gender, and class.
- SLO #2: Evaluate cultural stereotypes in media content and the role of ethnocentrism in reporting.
- Analyze stereotypes in news stories, films, music, and other media products.
- SLO #3: Examine how prejudice and racism have shaped the American experience, media content, and policy.
- Analyze government and mass media policies that have influenced class and inequity.
- SLO #4: Examine the contributions of American Indians, African-Americans, Hispanics and Latinos, Asian Americans and other diverse groups in America to the art and development of broadcasting, film, newspapers, magazines, and recordings.
- SLO #5: Analyze social issues such as the Civil Rights movement, Japanese internment, and women's rights by reviewing and evaluating media documentation.

### JOUR 330 Computer Familiarization

Same As: CISC 302  
Units: 2  
Hours: 36 hours LEC  
Prerequisite: None.  
Advisory: BUSTEC 302  
Transferable: CSU  
General Education: AA/AS Area III(b)  
Catalog Date: June 1, 2020
This is an introductory course to provide general knowledge on how computers work, computer terminology and the impact of computers on society and the work environment. Beginning level hands-on instruction using an operating system, word processing software, spreadsheet software, database software, email and the Internet will be emphasized. Students will be reading and interpreting written and oral instructions of a technical nature. This course is the same as CISC 302, and only one may be taken for credit. See “Cross-Listed Courses” in the catalog.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO1: DESCRIBE BASIC HARDWARE AND SOFTWARE REQUIREMENTS FOR A PERSONAL COMPUTER
  - Identify different hardware required for input, output, processing and storage of data on a personal computer
  - Apply appropriate log on techniques to access lab computers and online course management software
- SLO2: UTILIZE OPERATING SYSTEM TO EFFECTIVELY MANAGE PROGRAMS, FILES AND FOLDERS
  - Demonstrate ability to retrieve, create, copy, move and delete files and folders within a file management hierarchy
  - Locate and launch programs successfully
- SLO3: DIFFERENTIATE BETWEEN, AND APPLY BASIC CONCEPTS FOR BUSINESS APPLICATION SOFTWARE
  - Define and correctly select appropriate program for a given task
  - Demonstrate ability with word processing commands and features such as cursor movement, entering text; formatting including setting margins, line spacing, bold, centering, underlining, changing font typeface and size; inserting clip art; saving, printing, retrieving, and editing a file; spelling checker
  - Demonstrate ability with spreadsheet commands and features such as cursor movement; entering text, values and formulas; formatting including changing column widths, bold, centering, underlining, changing font typeface and size, formatting numbers with dollar signs; inserting and deleting rows and columns; saving, printing, retrieving, and editing a file; spelling checker
  - Demonstrate ability with database commands and features such as creating a database, creating tables, creating fields, setting field widths, positioning fields, entering data through tables or forms, designing forms, formatting forms, creating reports, displaying records, changing page orientation, saving, and printing
- SLO4: COMMUNICATE, SHARE, AND ACCESS INFORMATION ELECTRONICALLY
  - Utilize e-mail commands and features to communicate appropriately, sending and receiving messages, including attachments.
  - Operate search engines, browsers, and related web tools to effectively find information on the World Wide Web
  - Evaluate web sites for accuracy based on specific criteria

JOUR 335 Introduction to Desktop Publishing

Same As: CISA 330
Units: 2
Hours: 27 hours LEC; 27 hours LAB
Prerequisite: None.
Advisory: JOUR 330; CISC 302 or 310; and CISA 305
Transferable: CSU
Catalog Date: June 1, 2020

This course provides an overview of desktop publishing (DTP) and a major desktop publishing application program. It includes page layout skills needed to produce newsletters, brochures, flyers, reports, and marketing material on the computer. Additionally it covers importing graphics and text, using palette menus, layers, master pages, and working with graphic and text frames.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO #1: Create professional-looking documents using desktop publishing software.
  - Import, assemble, format, and arrange text and graphics working with frames and layers.
- SLO #2: Demonstrate effective visual communication by applying elements of design, composition, and presentation in published material.
  - Create commonly used printed marketing documents such as brochures, flyers, business cards, stationery and newsletters.
JOUR 336 Intermediate Desktop Publishing

This course builds upon previous desktop publishing software concepts and study. Topics include working with color, applying styles, importing and linking graphics, tabs and tables, and working with transparency effects. It also covers producing long documents and book features, output and exporting to PDF format, and creating interactive documents for online use. This course is the same as CISA 331, and only one may be taken for credit.

Upon completion of this course, the student will be able to:

- SLO #1: Demonstrate knowledge of advanced elements of design, composition, and presentation. Create, import, modify and enhance tables; create and modify styles; create and apply swatches, gradients and tints; and apply opacity, effects, color blends and transparency effects to visually enhance documents.
- SLO #2: Create professional-looking documents in print, PDF, and online format using desktop publishing software.
- Combine multiple documents into a book format, export and generate a document into an Adobe PDF format, and convert a print document into an online format.

JOUR 340 Writing for Publication

This is an introductory course in writing nonfiction for publication. Emphasis will be on developing magazine articles that sell; finding ideas; analyzing magazines; writing query letters; researching and interviewing; organizing, writing and illustrating articles. Individual and class criticism of student work will be featured. This course is the same as ENGWR 330, and only one may be taken for credit.

Upon completion of this course, the student will be able to:

- SLO #1: Be self-reliant, evaluative readers and writers, able to use critical thinking skills to read and write effectively in academic and workplace settings.
- Identify and define problems or issues for possible publication.
- Collect, analyze, and evaluate information synthesizing and developing conclusions.
- Demonstrate research and marketing skills to find the most appropriate print or online publications to market articles.
- Become aware of audience and focus articles toward a particular print or online publication.
- SLO #2: Obtain the necessary reading and writing skills for university-level courses.
- Select and organize information from various sources effectively.
- Compose, edit, and illustrate salable articles for print and online publications.
- SLO #3: Develop academic literacy skills, to utilize reading and writing processes, to find and comprehend information, and to apply that knowledge in myriad rhetorical situations.
- Conduct interviews and research to collect, evaluate, and synthesize information.
- Assess and select ideas for articles and books.
- SLO #4: Assess and apply the principles of the First Amendment and other laws appropriate to professional practice.
Write articles that are free of libel.

SLO #5: Apply ethical principles in pursuit of truth, accuracy, fairness, and diversity.

Demonstrate writing and marketing skills to successfully write magazine articles and find the most appropriate print or online publications to market them.

While researching and gathering information, respect issues of privacy, avoid conflicts of interest, adhere to professional standards of conduct, and respect diverse viewpoints.

**JOUR 351 Public Relations Writing and Media Techniques**

| Units:     | 3 |
| Hours:     | 54 hours LEC |
| Prerequisite: | None. |
| Transferable: | CSU |
| C-ID:      | C-ID JOUR 150 |
| Catalog Date: | June 1, 2020 |

This course is a study of the practice of public relations (PR); planning PR campaigns; preparing promotional messages for newspapers, magazines, radio, television, and online; using public relations techniques in business, education, entertainment, social service and other fields.

**Student Learning Outcomes**

Upon completion of this course, the student will be able to:

- SLO #1: Evaluate the role of the public relations practitioner in PR firms, corporations, and public information offices.
- SLO #2: Assess the effectiveness of various public relations strategies.
- Critically analyze public relations case studies for effectiveness of strategies that are used.
- SLO #3: Evaluate the relationship between public relations practitioners and the mass media.
- Identify and analyze messages disseminated through mass media that have been shaped by public relations practitioners.
- SLO #4: Design and implement a public relations campaign.
- Identify an audience, craft an appropriate message, produce media products, and execute a campaign.
- SLO #5: Create public relations tools, including press releases, brochures, newsletters, and press kits.
- SLO #6: Assess and apply the principles of the First Amendment and other laws appropriate to professional practice.
- Produce press releases, brochures, and newsletters that are free of libel.
- SLO #7: Apply ethical principles in pursuit of truth, accuracy, fairness, and diversity.
- While researching and gathering information, respect issues of privacy, avoid conflicts of interest, adhere to professional standards of conduct, and respect diverse viewpoints.

**JOUR 355 Media Writing**

| Units:     | 1 |
| Hours:     | 18 hours LEC |
| Prerequisite: | None. |
| Advisory:  | ENGWR 101 with a grade of "C" or better; or eligibility for ENGWR 300 as demonstrated through the assessment process. |
| Transferable: | CSU |
| Catalog Date: | June 1, 2020 |

An introduction to writing copy for advertising, public relations, and publications. This course covers writing techniques and copy preparation for brochures, newsletters, in-house publications, press releases, display advertising, websites, and other visual presentations.

**Student Learning Outcomes**

Upon completion of this course, the student will be able to:
JOUR 404 Editing and Production

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO #1: Apply the conventions of journalism to prepare work for publication.
- SLO #2: Apply the principles of news judgment to stories and layouts.
- SLO #3: Demonstrate an understanding of appropriate production practices for a publication.
- SLO #4: Construct visually attractive and readable news pages, in print or online.
- SLO #5: Assess and apply the principles of the First Amendment and other laws appropriate to professional practice.
- SLO #6: Apply ethical principles in pursuit of truth, accuracy, fairness, and diversity.
- While editing, respect issues of privacy, avoid conflicts of interest, and adhere to professional standards of conduct.
This course focuses on writing and producing student news media, using the school newspaper The Connection and its online companion www.thecrcconnection.com, as a practical laboratory that produces a journalistic product for distribution to a college-wide audience. Students will work primarily in one of the following areas: researching, writing, and editing articles for the two publications; taking photographs and creating graphic illustrations; developing multimedia stories; or designing pages. Ethical and legal aspects of communication are also covered.

**Student Learning Outcomes**

Upon completion of this course, the student will be able to:

- SLO#1: Produce work suitable for publication in print and/or online.
- Report and write stories for publication using multiple sources OR
- Design newspaper pages and advertisements using up-to-date design and desktop publishing software OR
- Take and prepare photographs for publication for print and online OR
- Report and produce news content, such as photo slideshows, videos, audio clips, and multimedia, using digital technology.
- SLO#2: Apply the principles of news judgment to assignments.
- Rank information appropriately in stories; emphasize key facts in leads, stories, photo captions, and headlines.
- SLO#3 Understand the role of the student press as a member of the campus community.
- SLO #4: Demonstrate an understanding of production processes while working under deadline pressure in the college newsroom.
- Meet required deadlines for publication.
- Plan and adhere to a production process.
- SLO #5: Assess and apply the principles of the First Amendment and other laws appropriate to professional practice.
- Write and report stories that are free of libel; respect issues of copyright when publishing photos.
- SLO #6: Apply ethical principles in pursuit of truth, accuracy, fairness, and diversity.
- While news gathering, respect issues of privacy, avoid conflicts of interest, and adhere to professional standards of conduct.
- SLO #7: Evaluate their own work and that of others for accuracy, appropriate style, and grammatical correctness.
- SLO #8 develop an electronic portfolio of at least 10 writing, design, photo, or multimedia stories published in the student publications.

**JOUR 411 College Media Production II**

This course builds on experience gained in Journalism 410. During this second-semester course, students focus on intermediate writing and production skills, using the school newspaper The Connection and its online companion www.thecrcconnection.com, as a practical laboratory. Students will work in at least two of the following areas: researching, writing, and editing articles for the two publications; taking photographs and creating graphic illustrations; developing multimedia stories; or designing pages. Ethical and legal aspects of communication are also covered.

**Student Learning Outcomes**

Upon completion of this course, the student will be able to:
SLO#1: Produce intermediate work suitable for publication in print and/or online.
Report and write stories for publication using multiple sources AND/OR
Design newspaper pages and advertisements using up-to-date design and desktop publishing software AND/OR
Take and prepare photographs for publication for print and online AND/OR
Report and produce news content, such as photo slideshows, videos, audio clips, and multimedia, using digital technology AND/OR
Assign and edit stories, photos, or multimedia elements for publication in print or online.

SLO#2: Apply the principles of news judgment to assignments.
Rank information appropriately in stories; emphasize key facts in leads, stories, photo captions, and headlines.

SLO#3: Demonstrate an understanding of production processes while working under deadline pressure in the college newsroom.
Meet required deadlines for publication.

SLO #4: Assess and apply the principles of the First Amendment and other laws appropriate to professional practice.
Write and report stories that are free of libel AND/OR edit stories that are free of libel; respect issues of copyright when publishing photos.

SLO #5 Develop an intermediate electronic portfolio of 14 assignments that includes work in at least two of these areas: writing, editing, design, photo, or multimedia assignments published in student publications.

JOUR 412 College Media Production III

Units: 3
Hours: 36 hours LEC; 54 hours LAB
Prerequisite: JOUR 300 and 411 with grades of "C" or better
Transferable: CSU
Catalog Date: June 1, 2020

This course builds on the experience gained in Journalism 411. During this third-semester course, students focus on advanced intermediate writing and production skills, using the school newspaper The Connection and its online companion www.thecrcconnection.com, as a practical laboratory. Students will work in at least three of the following areas: researching, writing, and editing articles for the two publications; taking photographs and creating graphic illustrations; developing multimedia stories; or designing pages. Ethical and legal aspects of communication are also covered.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO#1: Produce advanced intermediate work suitable for publication in print and/or online.
- Report and write stories for publication using multiple sources AND/OR
- Design newspaper pages and advertisements using up-to-date design and desktop publishing software AND/OR
- Take and prepare photographs for publication for print and online AND/OR
- Report and produce news content, such as photo slideshows, videos, audio clips, and multimedia, using digital technology AND/OR
- Assign and edit stories, photos, or multimedia elements for publication in print or online.

- SLO #2: Evaluate their own work and that of others for accuracy, fairness, appropriate style, grammatical correctness, and news judgment.

- SLO #3: Plan and execute a production process while working under deadline pressure in the college newsroom.

- SLO #4: Assess and apply the principles of the First Amendment and other laws appropriate to professional practice.

- Write, report, and/or edit stories that are free of libel AND/OR
- Respect issues of copyright when publishing photos.

- SLO #5: Apply ethical principles in pursuit of assignments.

- While news gathering, respect issues of privacy; avoid conflicts of interest, and adhere to professional standards of conduct.
JOUR 413 College Media Production IV

Units: 3
Hours: 36 hours LEC; 54 hours LAB
Prerequisite: JOUR 412 with a grade of "C" or better
Transferable: CSU
Catalog Date: June 1, 2020

This course builds on the experience gained in Journalism 412. During this fourth-semester course, students focus on advanced writing and production skills, using the school newspaper The Connection and its online companion www.thecrcconnection.com, as a practical laboratory. Students will produce work in each of the following areas: researching, writing, and editing advanced and in-depth articles for the two publications; taking photographs and creating graphic illustrations; developing multimedia stories; and designing pages. Ethical and legal aspects of communication and media leadership/management are also covered and students should serve in leadership roles.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO #1: Produce advanced work suitable for publication in print and/or online.
- Report, write, and edit advanced stories for publication using multiple sources AND/OR
- Design newspaper pages and advertisements using up-to-date design and desktop publishing software AND/OR
- Take and prepare photographs for publication for print and online AND/OR
- Report and produce news content, such as photo slideshows, videos, audio clips, and multimedia, using digital technology.
- SLO #2: Evaluate their own work and that of others for accuracy, fairness, appropriate style, grammatical correctness, and news judgment.
- SLO #3: Plan, assign, and execute a production process while working under deadline pressure in the college newsroom.
- SLO #4: Assess and apply the principles of the First Amendment and other laws appropriate to professional practice.
- Write, report, and/or edit stories that are free of libel AND/OR
- Respect issues of copyright when publishing photos.
- SLO #5: Apply ethical principles in pursuit of assignments.
- While news gathering, respect issues of privacy, avoid conflicts of interest, and adhere to professional standards of conduct.
- SLO #6: Develop an advanced electronic portfolio of 22 assignments that includes work in all of these areas: writing, editing, design, and multimedia assignments published in student publications.

JOUR 420 College Media Production Lab I

Units: 0.5 - 3
Hours: 27 - 162 hours LAB
Prerequisite: ENGWR 101 with a grade of "C" or better, or placement through the assessment process.
Corequisite: JOUR 404 and 410
Transferable: CSU
Catalog Date: June 1, 2020

This lab course helps students improve their writing, editing, photography, design, and computer skills as an addition to their enrollment in College Media Production I (JOUR 410) and/or Editing and Production (JOUR 404).

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO #1 Apply journalistic principles to hands-on assignments.
- Report and write stories for publication using multiple sources OR
- Design newspaper pages and advertisements using desktop publishing software OR
- Take and prepare photographs for publication for print and online OR
- Report and produce news content, such as photo slideshows, videos, audio clips, and multimedia.
- SLO#2 Assess and apply the essential skills of layout and design.
- Write and edit headlines for the print and online publications.
- SLO#3 Develop a digital portfolio of up to ten writing, photo, editing, or design pieces published in student publications, depending on the number of units in which the student is enrolled.

**JOUR 421 College Media Production Lab II**

- **Units:** 0.5 - 3
- **Hours:** 27 - 162 hours LAB
- **Prerequisite:** JOUR 420 with a grade of "C" or better
- **Corequisite:** JOUR 411
- **Transferable:** CSU
- **Catalog Date:** June 1, 2020

This lab course helps students build on skills gained in Journalism 410 and 420. During this second-semester course, students will continue to improve their skills in at least two of the following areas: writing, editing, photography, design, and web production skills as an addition to their enrollment in College Media Production II (JOUR 411).

**Student Learning Outcomes**

Upon completion of this course, the student will be able to:

- SLO#1 Apply intermediate journalistic principles to hands-on assignments.
- Report and write stories for publication using multiple sources AND/OR
- Design newspaper pages and advertisements using desktop publishing software AND/OR
- Take and prepare photographs for publication for print and online AND/OR
- Report and produce news content, such as photo slideshows, videos, audio clips, and multimedia.
- SLO#2 Assess and apply the essential skills of intermediate layout and design.
- Design pages that adhere to the principles of modular design.
- SLO#3 Develop a digital portfolio of up to 12 writing, photo, editing, or design pieces published in student publications.

**JOUR 422 College Media Production Lab III**

- **Units:** 0.5 - 3
- **Hours:** 27 - 162 hours LAB
- **Prerequisite:** JOUR 421 with a grade of "C" or better
- **Corequisite:** JOUR 412
- **Transferable:** CSU
- **Catalog Date:** June 1, 2020

This lab course helps students build on skills gained in Journalism 411 and 421. During this third-semester course, students will continue to improve their skills in at least three of the following areas: writing, editing, photography, design, and web production skills as an addition to their enrollment in College Media Production III (JOUR 412).

**Student Learning Outcomes**

Upon completion of this course, the student will be able to:

- SLO#1 Apply advanced intermediate journalistic principles to hands-on assignments.
- Report and write stories for publication using multiple sources AND/OR
- Design newspaper pages and advertisements using desktop publishing software AND/OR
• Take and prepare photographs for publication for print and online AND/OR
• Report and produce news content, such as photo slideshows, videos, audio clips, and multimedia.
• SLO#2 Assess and apply the essential skills of advanced intermediate layout and design.
• Design pages that adhere to the principles of modular design.
• SLO#3 Develop an advanced intermediate digital portfolio of up to 14 writing, photo, editing, or design pieces published in student publications.

JOUR 423 College Media Production Lab IV

Units: 0.5 - 3
Hours: 27 - 162 hours LAB
Prerequisite: JOUR 422 with a grade of "C" or better
Transferable: CSU
Catalog Date: June 1, 2020

This lab course helps students build on skills gained in Journalism 412 and 422. During this fourth-semester course, students will continue to improve their skills in at least four of the following areas: writing, editing, photography, design, and web production skills as an addition to their enrollment in College Media Production IV (JOUR 413).

Student Learning Outcomes

Upon completion of this course, the student will be able to:

• SLO#1 Apply advanced journalistic principles to hands-on assignments.
• Report and write stories for publication using multiple sources AND/OR
• Design newspaper pages and advertisements using desktop publishing software AND/OR
• Take and prepare photographs for publication for print and online AND/OR
• Report and produce news content, such as photo slideshows, videos, audio clips, and multimedia.
• SLO#2 Assess and apply the essential skills of advanced layout and design.
• Design pages that adhere to the principles of modular design.
• SLO#3 Develop an advanced digital portfolio of up to 16 writing, photo, editing, or design pieces published in student publications.

JOUR 495 Independent Studies in Journalism

Units: 1 - 3
Hours: 54 - 162 hours LAB
Prerequisite: None.
Transferable: CSU
Catalog Date: June 1, 2020

An independent studies project involves an individual student or small group of students in study, research, or activities beyond the scope of regularly offered courses. See the current catalog section of "Special Studies" for full details of Independent Studies.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

• SLO #1: Actively engage in intellectual inquiry beyond that required in order to pass a course of study (College Wide Learning Outcome – Area 4).
• Discuss and outline a proposal of study (that can be accomplished within one semester term) with a supervising instructor qualified within the discipline.
• Design an independent study (to be completed individually or by collaboration of a small group) to foster special knowledge, skills, and experience that are not available in any one regularly scheduled course.
• Use information resources to gather discipline-specific information.
- SLO #2: Utilize modes of analysis and critical thinking to apply theoretical perspectives and/or concepts in the major discipline of study to significant problems and/or educational activities (College Wide Learning Outcome – Area 3).

- Analyze and apply the knowledge, skills and experience that are involved in the independent study to theoretical perspectives and/or concepts in the major discipline of study.

- Explain the importance of the major discipline of study in the broader picture of society.

- SLO #3: Communicate a complex understanding of content matter of the major discipline of study (College Wide Outcome – Area 3).

- Demonstrate competence in the skills essential to mastery of the major discipline of study that are necessary to accomplish the independent study.

- SLO #4: Identify personal goals and pursue these goals effectively (College Wide Outcome – Area 4).

- Utilize skills from the “academic tool kit” including time management, study skills, etc., to accomplish the independent study within one semester term.

### JOUR 498 Work Experience in Journalism

This course provides students with opportunities to develop marketable skills in preparation for employment in their major field of study or advancement within their career. It is designed for students interested in work experience and/or internships in transfer level degree occupational programs. Course content includes understanding the application of education to the workforce; completion of required forms which document the student's progress and hours spent at the work site; and developing workplace skills and competencies. Appropriate level learning objectives are established by the student and the employer. During the semester, the student is required to participate in a weekly orientation and 75 hours of related paid work experience, or 60 hours of unpaid work experience for one unit. An additional 75 or 60 hours of related work experience is required for each additional unit. Work Experience may be taken for a total of 16 units when there are new or expanded learning objectives. Only one Work Experience course may be taken per semester.

### Student Learning Outcomes

Upon completion of this course, the student will be able to:

- **DEMONSTRATE AN UNDERSTANDING AND APPLICATION OF PROFESSIONAL WORKPLACE BEHAVIOR IN A FIELD OF STUDY RELATED ONE’S CAREER.**

- Understand the effects time, stress, and organizational management have on performance.

- Demonstrate an understanding of consistently practicing ethics and confidentiality in a workplace.

- Examine the career/life planning process and relate its relevancy to the student.

- Demonstrate an understanding of basic communication tools and their appropriate use.

- Demonstrate an understanding of workplace etiquette.

- **DESCRIBE THE CAREER/LIFE PLANNING PROCESS AND RELATE ITS RELEVANCY TO ONE’S CAREER.**

- Link personal goals to long term achievement.

- Display an understanding of creating a professional first impression.

- Understand how networking is a powerful job search tool.

- Understand necessary elements of a résumé.

- Understand the importance of interview preparation.

- Identify how continual learning increases career success.

- **DEMONSTRATE APPLICATION OF INDUSTRY KNOWLEDGE AND THEORETICAL CONCEPTS AS WRITTEN IN LEARNING OBJECTIVES IN PARTNERSHIP WITH THE EMPLOYER WORK SITE SUPERVISOR.**
Kinesiology and Athletics  
| Cosumnes River College

The Cosumnes River College Kinesiology program offers a wide variety of classes, including Fitness, Dance, Aquatics, Individual Sports, Team Sports, Intercollegiate Athletics, and Kinesiology classes.

Associate Degrees for Transfer

A.A.-T. in Kinesiology

The Associate in Arts in Kinesiology for Transfer Degree (AA-T) is designed to meet common lower-division requirements for a major in Kinesiology at California State University (CSU) campuses by completion of 60 transferable semester units with a minimum 2.0 GPA, to include either the California State University General Education Breadth pattern or the Intersegmental General Education Transfer Curriculum; students must earn a grade of C or better in all the courses for the major as described in the Required Program. Upon successful completion of the degree requirements, students will be guaranteed admission to the CSU system with junior status and will not have to repeat lower division coursework. Students are encouraged to meet with a counselor to develop their educational plans as degree options and general education requirements vary for each university.

Catalog Date: June 1, 2020

Total Units: 23

Select a maximum of one (1) course from any three (3) of the following areas for a maximum of three units: Aquatics (FITNS 440); Fitness (FITNS 308, 380, 381, 390, 406); Individual Sports (PACT 310); Team Sports (TMAC 302, 320, 330).

The Associate in Arts in Kinesiology for Transfer (AA-T) degree may be obtained by completion of 60 transferable, semester units with a minimum 2.0 GPA, including (a) the major or area of emphasis described in the Required Program, and (b) either the Intersegmental General Education Transfer Curriculum (IGETC) or the California State University General Education-Breadth Requirements.

Student Learning Outcomes

Upon completion of this program, the student will be able to:

- utilize the theories of biomechanics and exercise physiology and apply them to sport and fitness pedagogy.
- discuss how sociological, psychological, historical, and philosophical factors influence the field of kinesiology and sport.
- evaluate the unique and overlapping roles of each body system in promoting homeostasis and how such body systems adapt to the demands of activity and sport.
- evaluate anatomical and physiological information and apply findings to decision making.
- assess and measure improvements in fitness levels through a comprehensive analysis of aerobic capacity, body composition, muscular endurance, and flexibility.
- define and understand how to properly execute fitness and sport training techniques.
- FOR STUDENTS CHOOSING THE STAT 300 or PSYC 330 OPTION: use the concepts of descriptive statistics to display and analyze univariate and bivariate data.
- FOR STUDENTS CHOOSING THE CHEM 305 OPTION: apply the basic terminology and nomenclature of elements and compounds relevant to the human body and metabolism.
- FOR STUDENTS CHOOSING THE PHYS 350 OPTION: solve conceptual problems in classical mechanics, fluids, mechanical waves, and thermodynamics.

Career Information

The AA-T in Kinesiology can provide students with the foundational knowledge necessary for transfer to a 4-year Bachelor of Science (BS) or Bachelor of Arts (BA) degree program. Career opportunities for students who have earned BS or BA degrees in Kinesiology include but are not limited to: exercise physiologist, physical therapy aide, health consultant, personal trainer, recreation director, referee, group fitness instructor, health club manager, athletic coach, activities director, K-12 physical educator, public health educator, swimming pool manager, cardiac rehabilitation technician, or corporate fitness director. Some careers may require additional training. NOTE TO TRANSFER STUDENTS: The Associate Degree for Transfer program is designed for students who plan to transfer to a campus of the California State University (CSU). Other than the required core, the courses you choose to complete this degree will depend to some extent on the selected CSU for transfer. In addition, some CSU-GE Breadth or IGETC requirements can also be completed using courses required for this associate degree for transfer major (known as “double-counting”). Meeting with a counselor to determine the most appropriate course choices will facilitate efficient completion of your transfer requirements. For students wishing to transfer to other universities (UC System, private, or out-of-state), the Associate Degree for Transfer may not provide adequate preparation for upper-division transfer admissions; it is critical that you meet with a CRC counselor to select and plan the courses for the major, as programs vary widely in terms of the required preparation.

Associate Degrees
A.A. in Physical Education

The Cosumnes River College Physical Education program offers a wide variety of physical education classes, including Fitness, Dance, Aquatics, Self Defense, Individual Sports, Team Sports, Intercollegiate Athletics, and Physical Education Theory classes. The program in Physical Education outlined below is typical of lower-division requirements for four-year colleges and universities (though some requirements tend to vary from college to college). For specific requirements, students should refer to a catalog of the college of their choice. Students are also advised to see a counselor before selecting the courses best aligned with their transfer institution.

Note to Transfer Students:
If you are interested in transferring to a four-year college or university to pursue a bachelor's degree in this major, it is critical that you meet with a CRC counselor to select and plan the courses for your major. Schools vary widely in terms of the required preparation. The courses that CRC requires for an Associate's degree in this major may be different from the requirements needed for the Bachelor's degree.

Highlights include:
* A wide variety of physical education options
* Outstanding facilities that include a state of the art fitness center, competitive aquatic facilities, baseball stadium, state of the art community and athletic center, second gymnasium, soccer/football stadium
* 2 FIFA sized soccer fields with scoreboards, softball stadium, 8 championship tennis courts and numerous physical education fields.

Physical Education
NOTE: The University of California has a limitation on the number of units of physical education courses that can be transferred. The California State University System has no such limitation, but there are restrictions placed on the number of physical education units that can be applied toward the major and general education. See a counselor for specific course limitations.

All activity classes are open to both men and women unless noted within the course title. Students may be concurrently enrolled in more than one physical education activity class; however, no more than two of the same physical education activity classes may be taken by a student in the same semester.

The prefixes ADAPT, DANCE, FITNESS, PACT, TMACt, and SPORT refer to courses which may be used to satisfy the physical education graduation requirement. Beginning classes concentrate on fundamental skills, rules, scoring, equipment, dress, etiquette and basic strategy. Intermediate classes continue efforts on skill development while concentrating on strategy and competitive play.

Activity courses may be taken up to four times in each activity area, unless otherwise identified (e.g. four Tennis, four Aerobics, four Weight Training, etc.).

Courses with the "PET" prefix are open to students interested in the physical education major and in the theoretical aspects of sports activity. PET courses do not meet the physical education graduation requirement; however, they are all transferable. Some "PET" courses have a unit limitation to the UC system. See a counselor for specific course limitations.

Athletics
Academic Advising for Athletes

10 intercollegiate athletic opportunities for student participation:
* For Men: Baseball, Basketball, Soccer, Tennis
* For Women: Basketball, Soccer, Softball, Tennis, Volleyball, Water Polo

Cosumnes River College is a member of the Bay Valley Conference which includes community colleges located in the San Francisco Bay Area and the interior valleys of Northern California. The Bay Valley Conference is a member of the Community College League of California - Commission on Athletics (COA) and adheres to all rules and regulations governing community college athletics within the State of California.

In order to participate in intercollegiate athletics, both men and women must fulfill the requirements of the Los Rios Community College District and the Athletic Constitution of the Commission on Athletics. These requirements are very exacting and the athletes are advised to become thoroughly familiar with them in order to avoid eligibility problems. The athletic director is familiar with the eligibility requirements and would be available to answer specific questions.

Students who have not competed in intercollegiate athletics are deemed scholastically eligible for their first season of competition. In order to maintain eligibility, an athlete must participate in Cosumnes River College's Athletic Academic Advising. This Academic Advising Program requires athletes to:
* Meet with an athletic academic counselor annually and complete a Student Educational Plan (SEP).
* Maintain at least a 2.0 cumulative Grade Point Average (GPA), attend classes regularly and complete all assigned course work.
* Successfully complete 24 units between the first and second season of participation in a specific sport, of which 18 units must be in General Education or degree specific classes.
* Maintain active enrollment in a minimum of 12 units during the semester of competition. Nine of these 12 units must be General Education or degree specific.

Field Study Classes at Cosumnes River College:
Nature is often the best classroom! Come learn outside in Cosumnes River College's field study courses. These classes consist of short classroom sessions followed by extended trips to some of the most unique and beautiful environments in California, including Big Sur, Monterey Bay, Mt. Lassen, Point Reyes, Yosemite and more! These short-term classes are offered by several departments, including Biology, Geography, Geology, Photography, and Physical Education. For more information about specific classes, consult the class schedule or visit the Los Rios Field Study Consortium website at: www.losrios.edu/fieldstudy.

Catalog Data: June 1, 2020
Adapted Physical Education (ADAPT)

ADAPT 300 Adapted Physical Education

In adapted physical education, the instructor works under the recommendation/direction of the student's physician. Class activities are adapted or modified to meet individual needs. Each student performs at an individual level of ability without pressure or competition. Students with both temporary and permanent disabilities are served as well as students with major health problems. Students must have a physician's statement indicating (a) the disability, (b) specific restrictions, and (c) recommended activities.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO #1: Evaluate, analyze, and accurately assess fitness levels appropriate for student's limitations or disabilities
- Evaluate and measure improvements in the basic components of fitness including body composition, body measurements, training heart rate zone, range of motion, muscular strength and balance in a pre and post fitness assessment.
- Comprehend and recognize improvements in the fitness levels.
• Evaluate and modify fitness programs throughout the semester to maintain maximum benefits from their workouts

• SLO #2: Distinguish between and discuss the value of overall fitness as it relates to daily living.

• Identify individual fitness objectives

• Analyze which skills are appropriate to the abilities and limitations.

• Judge safe habits for participation within their limits of their disabilities.

• SLO #3: Utilize knowledge to develop, design and implement individual exercise programs.

• Distinguish, choose and use proper terminology associated with fitness.

• Differentiate and understand the proper use of equipment in class.

• Explain and demonstrate coordinated loco motor skills appropriate for individual abilities.

• Develop and improve gross and fine motor skills complimentary to their abilities.

ADAPT 332 Adapted Aquatics

Units: 1
Hours: 9 hours LEC; 27 hours LAB
Prerequisite: None.
Transferable: CSU; UC
General Education: AA/AS Area III(a); CSU Area E2
Catalog Date: June 1, 2020

This physical education class is a personal water safety and fitness class adapted for individuals who are physically challenged. The class will be tailored for the individual’s abilities and needs. Topics covered will include stroke mechanics, water safety, movement through water, and the use of water for resistive exercises.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

• SLO #1: Analyze and examine various methods of water exercises including swimming, and perform them within their individual limitations.

• Explain and demonstrate the fundamental techniques of hydrodynamics.

• Examine and evaluate the different water exercises to improve general fitness levels.

• Develop, revise and improve swimming strokes or methods of moving through the water considering specific physical challenges.

• Relate, understand and use the water to develop or increase psycho motor skills especially in the areas of balance, spatial awareness and kinesthetic sense.

• SLO #2: Identify and practice safety strategies to be used in and around the pool.

• Analyze and demonstrate personal water safety skills that correspond to specific physical limitations.

• Distinguish and use correct swimming terminology.

• Recognize, appraise, and implement the correct use of aquatic equipment used in class.

ADAPT 333 Adapted Shallow Water Aerobics

Units: 1
Hours: 9 hours LEC; 27 hours LAB
Prerequisite: None.
Transferable: CSU; UC
General Education: AA/AS Area III(a); CSU Area E2
Catalog Date: June 1, 2020

Although swimming skills are not needed, it is suggested that students are comfortable in an aquatic environment.
This class is designed for individuals who are physically challenged and uses the resistance of the water for low impact weight bearing exercise. It will be tailored to each student's individual abilities. The class will include exercises in shallow water; working on cardiovascular endurance and fitness, muscular strength and endurance as well as increase overall flexibility. Students must have a doctor's recommendation on file. No swimming skills are needed or required as students will be in shallow water and use equipment to help with flotation.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO #1: Examine and analyze various methods of exercise, in shallow water, and perform them within their individual abilities.
- Demonstrate and understand the fundamental techniques of hydrodynamics as it relates to this course.
- Demonstrate, understand and use proper form and technique for shallow water aerobic exercise.
- SLO #2: Identify and practice water safety strategies to be used in and around the pool.
- Demonstrate, modified if necessary, water safety strategies as they relate to their specific disability or challenge.
- SLO #3: Evaluate measurable improvements in aerobic fitness levels.
- Learn and analyze fitness assessments, assess them as they relate to their individual fitness goals and apply them appropriately in order to reach their individual fitness goals.

ADAPT 334 Adapted Deep Water Aerobics

This course is designed to allow students with disabilities or challenges, the opportunity to improve their overall fitness through a no-impact, non-weight bearing class in the water. In this class, cardiovascular exercises and endurance will be stressed. Additionally, due to the resistance of the water, students will improve their overall strength and flexibility.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO #1. Discuss, analyze and understand methods of exercising in deep water and demonstrate skills within their individual abilities.
- Comprehend basic hydrodynamics as well as viscosity, hydrostatic pressure and buoyancy as they relate to exercising in deep water.
- Demonstrate and use proper form and technique, adjusted as need be for each individual student, for deep aqua exercise.
- Discuss, understand and use proper spinal and body alignment with respect to the flotation belt and other equipment used in this class.
- SLO #2. Identify and practice strategies related to safety in and around a pool environment, especially in the deep water.
- Demonstrate, modified if necessary, water safety strategies as they relate to each student's individual challenge, abilities and/or needs.
- Discuss and understand strategies use in case of an emergency for classmates around them in the water.
- SLO #3. After taking the initial fitness assessment, develop individual fitness goals and apply appropriate training principle for achieving those goals.
- Demonstrate understanding of aerobic vs anaerobic exercise and the benefit for using both while working out.
- Develop and improve workout coordination, intensity and duration as the semester progresses, especially cardiovascular endurance.
- Distinguish and use correct deep water exercise terminology.
ADAPT 336 Motor Development for the Physically Challenged

This course gives the student individual instruction which promotes and develops overall physical fitness and psychomotor skills. This activity class for the physically challenged includes exercises in flexibility, strength development, aerobic activity and relaxation training. Students must have a doctor's recommendation on file.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- **SLO #1:** Evaluate, analyze, and accurately assess current fitness levels.
- Evaluate and measure improvements in the basic components of fitness including body composition, body measurements, target heart rate training, flexibility, muscular strength, endurance, and balance through a pre and post test assessment.
- Measure and calculate blood pressure, resting, ambient and training heart rates and their relationships of these to fitness, exercise and individual disabilities.
- **SLO #2:** Select biomechanical movements and apply the understanding of those movements related to physical activity in order to create an effective and efficient exercise program according to individual needs.
- Distinguish the association between fitness and wellness as it pertains to individual physical challenges.
- Discuss, develop, and demonstrate improved physiological skills appropriate to individual challenged abilities including flexibility, range of motion, muscular strength and endurance and aerobic development.
- Explain and demonstrate improvement in psychomotor development which includes speed, agility, perceptual motor functions, balance, kinesthetic sense, spatial awareness and relationships and hand to eye and foot to eye coordination.
- Identify and recognize muscles and their movements in order to distinguish which types of exercises can be best implemented.
- Appraise the correct use of equipment in class.
- Examine the proper use of terminology related to psychomotor and physiological development.
- Construct an ongoing exercise plan to meet individual needs.

ADAPT 339 Walk and Wheel

This course is designed for students who are disabled and/or physically challenged and want to participate in a general physical education activity course. Individualized walking or wheeling programs are designed to enhance cardiovascular and cardio-respiratory endurance. The course also includes specific exercises for muscular strength, muscular endurance, and flexibility. Small group games and activities are included to promote fitness and fun.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- **SLO #1:** Evaluate personal physical limitation(s) and/or challenge(s), devise a plan and comprehend the importance of living as actively as possible.
- Critique their beginning and end of the semester fitness assessment to determine current fitness levels.
- Recognize and summarize improvements in fitness levels at mid-term and the conclusion of the semester.
ADAPT 495 Independent Studies in Adapted Physical Education

Upon completion of this course, the student will be able to:

- SLO #1: Actively engage in intellectual inquiry beyond that required in order to pass a course of study (College Wide Learning Outcome – Area 4).
- Discuss and outline a proposal of study (that can be accomplished within one semester term) with a supervising instructor qualified within the discipline.
- Design an independent study (to be completed individually or by collaboration of a small group) to foster special knowledge, skills, and experience that are not available in any one regularly scheduled course.
- Use information resources to gather discipline-specific information.
- SLO #2: Utilize modes of analysis and critical thinking to apply theoretical perspectives and/or concepts in the major discipline of study to significant problems and/or educational activities (College Wide Learning Outcome – Area 3).
- Analyze and apply the knowledge, skills and experience that are involved in the independent study to theoretical perspectives and/or concepts in the major discipline of study.
- Explain the importance of the major discipline of study in the broader picture of society.
- SLO #3: Communicate a complex understanding of content matter of the major discipline of study (College Wide Outcome – Area 3).
- Demonstrate competence in the skills essential to mastery of the major discipline of study that are necessary to accomplish the independent study.
- SLO #4: Identify personal goals and pursue these goals effectively (College Wide Outcome – Area 4).
- Utilize skills from the “academic tool kit” including time management, study skills, etc., to accomplish the independent study within one semester term.

Dance (DANCE)

DANCE 310 Jazz Dance I

| Units: | 1 |
| Hours: | 54 hours LAB |
| Course Family: | Jazz Dance Technique (http://crc.losrios.edu/course-families#id_100032) |
| Prerequisite: | None. |
| Transferable: | CSU; UC |
| General Education: | AA/AS Area III(a); CSU Area E2 |
| Catalog Date: | June 1, 2020 |
This physical education course covers barre and center floor warm-ups, exercises, jazz techniques, isolations, walks and turns. This course explores variation of styles in ethnic, lyrical and modern jazz dance given in combinations and offers students the opportunity for exploration and improvisation using jazz steps learned in class. This class is for students with no or very little dance training.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO #1: employ jazz dance as an activity that will promote fitness and wellness in the student's life.
- identify the role that jazz dance has in maintaining health and well-being.
- demonstrate the ability to relieve stress and enjoy life through dance.
- demonstrate an improvement in several areas of fitness, but most notably in cardiovascular fitness, coordination, and flexibility.
- SLO #2: demonstrate skills and dance movements in jazz dance.
- demonstrate body control through proper technique and exercises requiring balance, flexibility, agility, endurance, strength and coordination.
- demonstrate a kinesthetic awareness of placement.
- analyze shape, rhythm, time/texture and quality into space.
- create an atmosphere for self-expression in jazz.
- define, practice and assume a degree of skill of specific jazz techniques, including floor stretches, center barre isolation progression, jazz walk combinations, turns, jazz adage, hops, jumps, leaps, stage presence, and beginning jazz combinations.
- SLO #3: demonstrate an ability to work cooperatively with others to achieve physical, social, and mental skills through participation in jazz dance.
- illustrate the ability to socialize and work with others to practice and perform jazz dance routines.
- illustrate the ability to respect other students in the class and value the contribution they make to the group effort of creating a dance routine.
- SLO #4: develop an appreciation and understanding of jazz dance as an art form and how it relates to other types of dance and forms.
- relate the history and cultural significance of jazz dance in society.
- contrast and compare jazz dance choreographers and dancers past and present.
- develop a better understanding of dance as a performer.

DANCE 312 Jazz Dance II

| Units: | 1 |
| Hours: | 54 hours LAB |
| Course Family: | Jazz Dance Technique (http://crc.losrios.edu/course-families#id_100032) |
| Prerequisite: | DANCE 310 with a grade of "C" or better; or one year of beginning training determined by the professor per an evaluation for the level of proficiency. |
| Transferable: | CSU; UC |
| General Education: | AA/AS Area III(a); CSU Area E2 |
| Catalog Date: | June 1, 2020 |

This beginning/intermediate dance class continues the fundamental jazz skills learned in the previous level with further focus on proper technique including alignment, balance, multiple turns, leaps, and more complex combinations. This course is for students with some previous dance training.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO #1: employ jazz dance as an activity that will promote fitness and wellness in the student's life
- identify the role that jazz dance has in maintaining health and well being.
- demonstrate the ability to relieve stress and enjoy life through dance.
- demonstrate an improvement in several areas of fitness, but most notably in cardiovascular fitness, coordination, and flexibility.
• SLO #2: demonstrate beginning/intermediate skills and dance movements in jazz dance.
• demonstrate body control through proper technique and exercises requiring balance, flexibility, agility, endurance, strength and coordination.
• demonstrate a kinesthetic awareness of placement.
• analyze shape, rhythm, time/texture and quality into space.
• create an atmosphere for self expression in jazz.
• define, practice and assume a degree of skill of specific jazz techniques, including floor stretches, centre barre isolation progression, jazz walk combinations, turns, jazz adage, hops, jumps, leaps, stage presence, and beginning/intermediate jazz combinations.
• SLO #3: demonstrate an ability to work cooperatively with others to achieve physical, social, and mental skills through participation in jazz dance.
• illustrate the ability to socialize and work with others to practice and perform jazz dance routines.
• illustrate the ability to respect other students in the class and value the contribution they make to the group effort of creating a dance routine.
• SLO #4: develop an appreciation and understanding of jazz dance as an art form and how it relates to other types of dance and forms.
• relate the history and cultural significance of jazz dance in society.
• contrast and compare jazz dance choreographers and dancers past and present.
• develop a better understanding of dance as a performer.

DANCE 313 Jazz Dance III

Units: 1
Hours: 54 hours LAB
Course Family: Jazz Dance Technique [Link](http://crc.losrios.edu/course-families#id_100032)
Prerequisite: DANCE 312 with a grade of "C" or better; or two years of beginning toward intermediate skills of jazz dance, determined by the professor per an evaluation for the level of proficiency.
Transferable: CSU; UC
General Education: AA/AS Area III(a); CSU Area E2
Catalog Date: June 1, 2020

This intermediate dance class continues with the fundamental jazz skills learned in the previous level with a further focus on proper technique while performing more complex combinations and exploring different rhythms and styles. This course is for students with previous dance training.

Student Learning Outcomes

Upon completion of this course, the student will be able to:
• employ jazz dance as an activity that will promote fitness and wellness in the student's life. (SLO 1)
• identify the role that jazz dance has in maintaining health and well being.
• identify the role that jazz dance has in maintaining health and well being.
• demonstrate an improvement in several areas of fitness, but most notably in cardiovascular fitness, coordination, and flexibility.
• demonstrate intermediate skills and dance movements in jazz dance. (SLO 2)
• demonstrate body control through proper technique and exercises requiring balance, flexibility, agility, endurance, strength and coordination.
• demonstrate a kinesthetic awareness of placement.
• analyze shape, rhythm, time/texture and quality into space.
• analyze shape, rhythm, time/texture and quality into space.
- define, practice and assume a degree of skill of specific jazz techniques, including floor stretches, center barre isolation progression, jazz walk combinations, turns, jazz adage, hops, jumps, leaps, stage presence, and intermediate jazz combinations.
- demonstrate an ability to work cooperatively with others to achieve physical, social, and mental skills through participation in jazz dance. (SLO 3)
- illustrate the ability to socialize and work with others to practice and perform jazz dance routines.
- illustrate the ability to respect other students in the class and value the contribution they make to the group effort of creating a dance routine.
- develop an appreciation and understanding of jazz dance as an art form and how it relates to other types of dance and forms. (SLO 4)
- relate the history and cultural significance of jazz dance in society.
- contrast and compare jazz dance choreographers and dancers past and present.
- develop a better understanding of dance as a performer.

DANCE 314 Jazz Dance IV

Units: 1
Hours: 54 hours LAB
Course Family: Jazz Dance Technique (http://crc.losrios.edu/course-families#id_100032)
Prerequisite: DANCE 313 with a grade of "C" or better; or training at a level of intermediate skills of jazz dance, determined by the professor per an evaluation for the level of proficiency.
Transferable: CSU; UC
General Education: AA/AS Area III(a); CSU Area E2
Catalog Date: June 1, 2020

This intermediate/advanced dance class offers the opportunity for students to create a personal jazz style using the techniques learned in the previous levels. This course explores variation of styles in ethnic, lyrical and modern given in combinations and offers students the opportunity for exploration and improvisation using jazz steps learned in class. This class is for high intermediate to advanced dance students only.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- employ jazz dance as an activity that will promote fitness and wellness in the student's life. (SLO 1)
- identify the role that jazz dance has in maintaining health and well being.
- demonstrate the ability to relieve stress and enjoy life through dance.
- demonstrate an improvement in several areas of fitness, but most notably in cardiovascular fitness, coordination, and flexibility.
- demonstrate intermediate/advanced skills and dance movements in jazz dance. (SLO 2)
- demonstrate body control through proper technique and exercises requiring balance, flexibility, agility, endurance, strength and coordination.
- demonstrate a kinesthetic awareness of placement.
- analyze shape, rhythm, time/texture and quality into space.
- create an atmosphere for self expression in jazz.
- define, practice and assume a degree of skill of specific jazz techniques, including floor stretches, center barre isolation progression, jazz walk combinations, turns, jazz adage, hops, jumps, leaps, stage presence, and intermediate/advanced jazz combinations.
- demonstrate an ability to work cooperatively with others to achieve physical, social, and mental skills through participation in jazz dance. (SLO 3)
- illustrate the ability to socialize and work with others to practice and perform jazz dance routines.
- illustrate the ability to respect other students in the class and value the contribution they make to the group effort of creating a dance routine.
- develop an appreciation and understanding of jazz dance as an art form and how it relates to other types of dance and forms. (SLO 4)
- relate the history and cultural significance of jazz dance in society.
contrast and compare jazz dance choreographers and dancers past and present.

develop a better understanding of dance as a performer.

DANCE 320 Ballet I

This course covers the fundamentals of beginning ballet technique. Basic terminology, coordination, alignment and execution of beginning ballet technique will be addressed. Students will experience a typical ballet class beginning with exercises at the barre, developed exercises in the center and across the floor exercises. Students will gain strength, agility, flexibility, coordination and balance. Students will also acquire knowledge of ballet history and repertory. Students will present their semester-long study of beginning ballet in a final showcase performance. This course is for students with no to very little dance experience.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO #1: Employ ballet as an activity that will promote fitness and wellness in the student's life.
- Relate the role that ballet has in maintaining health and well-being.
- Demonstrate an improvement in several areas of fitness, but most notably in coordination, agility, strength, balance and flexibility.
- SLO #2: Demonstrate beginning level knowledge of ballet terms and techniques.
- Identify and properly execute beginning barre, center, and across the floor exercises.
- Analyze and safely execute introductory ballet movement patterns.
- Apply beginning level ballet terminology to the execution of ballet positions and techniques.
- SLO #3: Develop an appreciation and understanding of ballet as an art form and how it relates to other types of dance and forms.
- Discuss the historical and traditional foundations of ballet.
- Relate the historical and cultural significance of ballet in society.

DANCE 321 Ballet II

This course is a continuation of beginning ballet technique with a progression in barre, center, and across the floor exercises. Fundamentals of beginning ballet are addressed with greater emphasis on strength and coordination. Students will further develop their ballet skills, movement vocabulary, and sequence construction while advancing their knowledge of ballet history and repertory. Students will present their semester-long study of Level II ballet in a final performance. This course is recommended for students who have successfully completed Ballet I and are at a high beginner or intermediate level.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO #1: Employ ballet as an activity that will promote fitness and wellness in the student's life.
- Relate the role that ballet has in maintaining health and well being.
- Demonstrate an improvement in several areas of fitness, but most notably in strength and coordination.
- SLO #2: Identify and properly execute Level II barre, center, and across the floor exercises.
- Analyze and safely execute Level II ballet movement patterns.
- SLO #3: Demonstrate an ability to work cooperatively with others to achieve physical, social, and mental skills through participation in ballet.
- Collaborate and construct beginning level adagio and allegro sequences.
- Illustrate the ability to respect other students in the class and value the contribution they make to the group effort of creating a sequence.
- SLO #4: Develop an appreciation and understanding of ballet as an art form and how it relates to other types of dance and forms.
- Discuss the historical and traditional foundations of ballet.
- Evaluate ballet as a culturally significant art form in contemporary society.

**DANCE 322 Ballet III**

| Units: | 1 |
| Hours: | 54 hours LAB |
| Course Family: | Ballet Technique [Link](http://crc.losrios.edu/course-families#id_100033) |
| Prerequisite: | DANCE 321 (Ballet II) with a grade of "C" or better; or one year of beginning training with skills that properly execute Level II barre, center, and across the floor exercises, determined by the professor per an evaluation for the level of proficiency. |
| Transferable: | CSU |
| General Education: | AA/AS Area III(a) (effective Summer 2020) |
| Catalog Date: | June 1, 2020 |

This course is a progression of ballet from Dance 321 with an emphasis on technique in barre exercises to improve extensions, center exercises to improve balance and across the floor combinations to challenge the dancer with more complex steps and difficult combinations. This course is recommended for students who have successfully completed Ballet II with a grade of "C" or better or are at an intermediate level to be determined by the instructor.

**Student Learning Outcomes**

Upon completion of this course, the student will be able to:

- SLO#1 Employ ballet as an activity that will promote fitness and wellness in the student's life.
- Demonstrate an improvement in several areas of fitness, most notably in strength, coordination and balance.
- SLO#2 Identify and properly execute Level III barre, center, and across the floor exercises.
- Analyze and safely execute Level III ballet movement patterns and combinations.
- SLO#3 Demonstrate an ability to work cooperatively with other students to achieve physical, social and communication skills through participation in ballet.
- Collaborate and construct intermediate adagio and allegro sequences.
- SLO#4 Develop an appreciation and understanding of ballet as an art form and how it relates to other types of dance.
- Discuss the historical and traditional foundations of ballet as a culturally significant art form in contemporary society.

**DANCE 330 Modern Dance I**

| Units: | 1 |
| Hours: | 54 hours LAB |
| Course Family: | Modern Dance Technique [Link](http://crc.losrios.edu/course-families#id_100034) |
| Prerequisite: | None. |
| Transferable: | CSU; UC (* All PE Activity courses: combined maximum transfer credit, 4 units) |
| General Education: | AA/AS Area III(a); CSU Area E2 |
| Catalog Date: | June 1, 2020 |
This beginning class offers an introduction to basic dance movement and the basic elements of music and rhythm. This course includes rhythmic, isolated and expressive movement as well as elemental concepts of space, time and force. This course is for students with little or no previous dance training.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO #1: employ modern dance as an activity that will promote fitness and wellness in life.
- demonstrate an improvement in several fitness components including muscular strength, muscular endurance, flexibility, coordination, and cardiovascular conditioning.
- recognize the benefits physically of participation in dance, including the impact on overall health.
- SLO #2: demonstrate skills and dance movements in modern dance.
- perform basic modern dance movements safely and with an improved degree of skill and kinesthetic awareness.
- learn modern dance terminology and how it relates to modern dance movement.
- analyze and synthesize movement fundamentals, dance routines, rhythms, and various styles.
- apply their own creative expression to modern dance movement.
- SLO #3: demonstrate an ability to work cooperatively with others to achieve a desired creative outcome through modern dance.
- analyze and problem solve in a group through participation in choreography of modern dance in-class performances.
- SLO #4: develop an appreciation and understanding of modern dance as an art form and how it relates to other types of dance and art forms.
- identify and relate the history and development of modern dance.
- contrast and compare modern dance to various dance forms.

DANCE 332 Modern Dance II

This beginning/intermediate modern dance class continues with the fundamental modern dance skills learned in the previous level. This course includes rhythmic, isolated and expressive movement. Concepts of space, time and force as related to dance will be discussed. Various cultural and contemporary dances will be explored. This course is for students who have successfully completed Modern Dance I or have previous dance training.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO #1: employ modern dance as an activity that will promote fitness and wellness in life.
- demonstrate an improvement in several fitness components including muscular strength, muscular endurance, flexibility, coordination, and cardiovascular conditioning.
- recognize the benefits physically of participation in dance, including the impact on overall health.
- SLO #2: demonstrate beginning/intermediate skills and dance movements in modern dance.
- perform beginning/intermediate modern dance movements safely and with an improved degree of skill and kinesthetic awareness.
- recall modern dance terminology and relate to modern dance movement.
- analyze and synthesize movement fundamentals, dance routines, rhythms, and various styles.
- apply their own creative expression to modern dance movement.
**DANCE 333 Modern Dance III**

**Units:** 1  
**Hours:** 54 hours LAB  
**Course Family:** [Modern Dance Technique](http://crc.losrios.edu/course-families#id_100034)  
**Prerequisite:** DANCE 332 with a grade of "C" or better; or have training at a beginning-intermediate level in modern dance, as determined by the professor per an evaluation for the level of proficiency.  
**Transferable:** CSU; UC  
**General Education:** AA/AS Area III(a); CSU Area E2  
**Catalog Date:** June 1, 2020

This intermediate modern dance class continues to develop fundamental modern dance skills learned in the previous level. The class focuses on proper technique with more complex combinations. The students will perform various types of styles including cultural and contemporary dance. This course is for students who have successfully completed Modern Dance II or have previous dance training.

**Student Learning Outcomes**

Upon completion of this course, the student will be able to:

- **SLO #1:** employ intermediate modern dance as an activity that will promote fitness and wellness in life.
- **SLO #2:** demonstrate an improvement in several fitness components including muscular strength, muscular endurance, flexibility, coordination, and cardiovascular conditioning.
- **SLO #3:** recognize the benefits physically of participation in dance, including the impact on overall health.
- **SLO #4:** demonstrate skills and dance movements in modern dance.
- **SLO #5:** perform intermediate modern dance movements safely and with an improved degree of skill and kinesthetic awareness.
- **SLO #6:** recall modern dance terminology and relate to modern dance movement.
- **SLO #7:** analyze and synthesize movement fundamentals, dance routines, rhythms, and various styles.
- **SLO #8:** apply their own creative expression to modern dance movement.
- **SLO #9:** demonstrate an ability to work cooperatively with others to achieve a desired creative outcome through modern dance.
- **SLO #10:** analyze and problem solve in a group through participation in choreography of modern dance in-class performances.
- **SLO #11:** develop an appreciation and understanding of modern dance as an art form and how it relates to other types of dance and art forms.
- **SLO #12:** identify and relate the history and development of modern dance.
- **SLO #13:** contrast and compare modern dance to various dance forms.

**DANCE 334 Modern Dance IV**
This intermediate/advanced modern dance class continues to develop fundamental modern dance skills learned in the previous level. The class focus is on proper technique while performing complex combinations and developing a personal style. This course creates an opportunity for self-discovery, self-discipline and self-expression in the art form of modern dance. Creative assignments will be given in improvisation and movement communication and expression utilizing problem-solving techniques. This course is for students who have successfully completed Modern Dance III or have previous dance training.

**Student Learning Outcomes**

Upon completion of this course, the student will be able to:

- SLO #1: employ modern dance as an activity that will promote fitness and wellness in life.
- SLO #2: demonstrate an improvement in several fitness components including muscular strength, muscular endurance, flexibility, coordination, and cardiovascular conditioning.
- SLO #3: recognize the benefits physically of participation in dance, including the impact on overall health.
- SLO #4: demonstrate skills and dance movements in modern dance.
- SLO #5: recall modern dance terminology and relate to modern dance movement.
- SLO #6: analyze and synthesize movement fundamentals, dance routines, rhythms, and various styles.
- SLO #7: apply their own creative expression to modern dance movement.
- SLO #8: analyze and problem solve in a group through participation in choreography of modern dance in-class performances.
- SLO #9: develop an appreciation and understanding of modern dance as an art form and how it relates to other types of dance and art forms.
- SLO #10: identify and relate the history and development of modern dance.
- SLO #11: contrast and compare modern dance to various dance forms.

---

**DANCE 351 Urban Hip Hop I**

Upon completion of this course, the student will be able to:

- SLO #1: implement Hip Hop dance skills, steps, and choreographed dance movements.
- SLO #2: select, adapt and demonstrate a warm up that is designed to support the body.
DANCE 352 Urban Hip Hop II

Units: 1
Hours: 54 hours LAB
Course Family: Hip Hop Technique and Competition (http://crc.losrios.edu/course-families#id_100036)
Prerequisite: DANCE 351 with a grade of "C" or better; or one year of beginning training determined by the professor per an evaluation for the level of proficiency.
Transferable: CSU; UC
General Education: AA/AS Area III(a); CSU Area E2
Catalog Date: June 1, 2020

This course builds on the skills introduced with Urban Hip Hop I. Skills, steps, and hip hop dance combinations will progress in difficulty. Students will have more opportunity to explore freestyle movement and participate in session work. The emphasis of this class will cover the progression of hip hop dance beginning with break dance through the current trends of today.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO #1: research the progression of hip hop dance beginning with break dance through the current trends of today
- Compare and contrast the old school moves with the new school moves.
- Categorize the various styles within hip hop dance and distinguish the individual steps that belong to each style.
- SLO #2: explore freestyle movement and participate in session work.
- Originate dance combinations building on the steps taught in class.
- Express emotion with musical interpretation with freestyle dance.
- Execute a three-minute dance at performance level.

DANCE 353 Urban Hip Hop III

Units: 1
Hours: 54 hours LAB
Course Family: Hip Hop Technique and Competition (http://crc.losrios.edu/course-families#id_100036)
Prerequisite: DANCE 352 with a grade of "C" or better; or an intermediate level of training in Hip Hop dance, as determined by the professor per an evaluation for the level of proficiency.
Transferable: CSU; UC
General Education: AA/AS Area III(a); CSU Area E2
Catalog Date: June 1, 2020

This course builds on the skills and steps learned in Urban Hip Hop I and II. Level III dance combinations will be taught covering various styles within hip hop dance. Students will work in groups to create a final presentation that expands a teacher-choreographed dance into a full length performance piece that utilizes choreographic elements and adds student choreography. The emphasis of this class will be on choreographic styles.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO #1: demonstrate an understanding of choreographic Hip Hop Styles.
- Integrate choreographic elements into a hip hop combination and extend it into a three minute performance quality dance.
- Express personal style and emotion when creating hip hop choreography.
- associate hip hop steps with their cultural and historical origins.
- demonstrate 3 Level III hip hop dance combinations.
- identify the choreographic styles of combinations taught and recognize these styles in other choreography.
- SLO #2: develop intermediate level Hip Hop dance skills.
- state the names of 10 or more level III hip hop steps.
- execute with appropriate technique and style at least 10 intermediate level skills or steps.

DANCE 354 Urban Hip Hop IV

| Units: | 1 |
| Hours: | 54 hours LAB |
| Course Family: | Hip Hop Technique and Competition (http://crc.losrios.edu/course-families#id_100036) |
| Prerequisite: | DANCE 353 with a grade of "C" or better; or an intermediate to advanced level of training in Hip Hop dance, as determined by the professor per an evaluation for the level of proficiency. |
| Transferable: | CSU; UC |
| General Education: | AA/AS Area II(a); CSU Area E2 |
| Catalog Date: | June 1, 2020 |

This is an intermediate level course that builds on the skills learned in Urban Hip Hop levels I-III. Students will be introduced to freestyle movement and the elements of cyphering and battling. Musicality, emotion, and storytelling are explored as students develop their own artistry within freestyle movement. The emphasis of this class will be on utilizing intermediate level skills with freestyle movement.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO #1: express freestyle movement and the elements of cyphering and battling
- experiment with musicality, emotion, and storytelling in freestyle hip hop dance.
- correlate movement with the movement of other dancers while battling.
- evaluate the movement of other dancers and 'bite', 'burn', or 'kill off' their opponent while battling.
- compare and contrast the freestyle battling elements of one-on-one, two-on-two, and crew battling.
- SLO #2: combine intermediate level Hip Hop skills and steps to freestyle dancing, cyphering, and battling.
- practice and apply intermediate level hip hop skills with freestyle movement.
- develop original intermediate level skills, tricks, steps, bites, burns and kill-offs to incorporate with freestyle movement.

DANCE 386 Dance History

| Units: | 3 |
| Hours: | 54 hours LEC |
| Prerequisite: | None. |
| Transferable: | CSU; UC |
| General Education: | AA/AS Area I; AA/AS Area VI; CSU Area C1; IGETC Area 3A |
| Catalog Date: | June 1, 2020 |

This comprehensive study of the history, evolution and culture of dance as an art form encompasses ballet, modern, African and social dance. The analysis of various styles of dance commences with social order, expression and the power of dance in a culture.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO #1: Examine and discuss dance as a performing art derived from many different forms, styles and cultures throughout history.
- Analyze how dance was considered a function of cleansing, cathartic release and the proper education of a good citizen in the early Greek society.
- Examine the history of ballet, the oldest form of Western dance.
Develop an understanding of modern dance dating back to the early 1900's and how it continues to evolve and change to present day.

Examine the components of jazz dance including movements from ballet, modern, African and street dance.

SLO #2 Develop a world view of dance with strong ethnic identities in many different areas of the world.

Identify different ways of looking at cross-cultural dance.

Assess the chronology of world history through dance and the development of traditions.

SLO #3 Analyze the cultural dynamics of political events, scientific advancements and religious ceremonies as it relates to dance history.

DANCE 410 Dance Composition and Production I

Units: 2
Hours: 18 hours LEC; 54 hours LAB
Course Family: Dance Composition and Production
Prerequisite: None.
Transferable: CSU; UC (* Any PE Activity courses combined: maximum credit, 4 units)
General Education: AA/AS Area III(a); CSU Area E2
Catalog Date: June 1, 2020

This course introduces students to the elements of choreography and the creative processes of composing dances. Students assume the roles of dancer and choreographer in developing improvisation, directing, and performance skills to produce and perform original group compositions. This course culminates in a final showcase performance designed to give students an opportunity to experience a college level dance production.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO #1: Employ dance as an activity that will promote fitness and wellness in their life.
- Apply fitness concepts to dance and understand the benefits of those components.
- SLO #2: Demonstrate basic knowledge of dance composition and production.
- Demonstrate beginning level technique for the creation of choreography.
- Identify the stages of the creative process: preparation, incubation, elaboration, presentation.
- Identify the elements of choreography.
- Understand the roles of the dancer and the choreographer.
- Understand general stage directions and operations of a dance production.
- SLO #3: Develop the ability to work collaboratively and individually to achieve a desired creative outcome.
- Analyze and solve choreographic challenges.
- Develop an appreciation for personal expression.
- Develop an appreciation for group creativity.
- SLO #4: Develop an appreciation for the creative processes involved in composing and producing dances of several styles and genres.
- Relate and reflect thoughtfully on the development of one's creative processes.
- Relate the creative processes of modern and contemporary choreographers.

DANCE 411 Dance Composition and Production II
This course provides an opportunity to explore the processes of composing and producing beginning to intermediate level choreography. Students will work in small groups to develop original compositions that demonstrate an understanding of choreographic forms and creative processes. This course culminates in a final showcase performance.

### Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO #1: Employ dance as an activity that will promote fitness and wellness in their life
- Apply fitness concepts to dance and understand the benefits of those components.
- SLO #2: Demonstrate beginning to intermediate knowledge of dance composition and production.
- Demonstrate beginning to intermediate level technique for the creation of choreography.
- Identify and develop the stages of the creative process: preparation, incubation, elaboration, presentation.
- Identify the elements of choreography.
- Identify choreographic devices.
- Understand the roles of the dancer and the choreographer.
- Understand the role of house and backstage attendants.
- Understand general stage directions and operations of a dance production.
- SLO #3: Develop the ability to work collaboratively and individually to achieve a desired creative outcome.
- Analyze and solve choreographic challenges.
- Develop an appreciation for personal expression.
- Develop an appreciation for group creativity.
- SLO #4: Develop an appreciation for the creative processes involved in composing and producing dances of several styles and genres.
- Relate and reflect thoughtfully on the development of one's creative processes.
- Relate the creative processes of modern and contemporary choreographers.

### DANCE 412 Dance Composition and Production III

This course provides an opportunity to explore the processes of composing and producing intermediate level choreography. Students will identify and integrate the contributions of modern and contemporary choreographers for the purpose of expanding their choreography skills. An emphasis on smaller compositions, for example, solos, duos, and trios will be included along with the roles of lighting and costume design. This course culminates in a final showcase performance.

### Student Learning Outcomes

Upon completion of this course, the student will be able to:
Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO #1: Employ dance as an activity that will promote fitness and wellness in their life.
- Apply fitness concepts to dance and understand the benefits of those components.
- SLO #2: Demonstrate intermediate knowledge of dance composition and production.
- Demonstrate intermediate level technique for the creation of choreography.
- Develop and evaluate the stages of the creative process: preparation, incubation, elaboration, presentation.
- Integrate the elements of choreography and choreographic devices to produce compositions.
- Employ and evaluate lighting and costuming design.
- SLO #3: Develop the ability to give and receive choreographic direction to achieve a desired creative outcome.
- Analyze and solve choreographic challenges in augmenting choreography.
- Demonstrate the ability to execute and project the choreographer's vision.
- SLO #4: Develop an appreciation for the creative processes involved in composing and producing dances of several styles and genres.
- Relate and reflect thoughtfully on the development of one's creative processes.
- Identify and apply choreographic techniques employed by modern and contemporary choreographers.
- Evaluate dance as a culturally significant art form in contemporary society.
Identify and apply choreographic techniques employed by modern and contemporary choreographers.
Evaluate dance as a culturally significant art form in contemporary society and from a cross-disciplinary perspective.

DANCE 495 Independent Studies in Dance

Units: 1 - 3
Hours: 54 - 162 hours LAB
Prerequisite: None.
Transferable: CSU
General Education: AA/AS Area III(a); CSU Area E2
Catalog Date: June 1, 2020

An independent studies project involves an individual student or small group of students in study, research, or activities beyond the scope of regularly offered courses. See the current catalog section of “Special Studies” for full details of Independent Studies.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO #1: Actively engage in intellectual inquiry beyond that required in order to pass a course of study (College Wide Learning Outcome – Area 4).
- Discuss and outline a proposal of study (that can be accomplished within one semester term) with a supervising instructor qualified within the discipline.
- Design an independent study (to be completed individually or by collaboration of a small group) to foster special knowledge, skills, and experience that are not available in any one regularly scheduled course.
- Use information resources to gather discipline-specific information.
- SLO #2: Utilize modes of analysis and critical thinking to apply theoretical perspectives and/or concepts in the major discipline of study to significant problems and/or educational activities (College Wide Learning Outcome – Area 3).
- Analyze and apply the knowledge, skills and experience that are involved in the independent study to theoretical perspectives and/or concepts in the major discipline of study.
- Explain the importance of the major discipline of study in the broader picture of society.
- SLO #3: Communicate a complex understanding of content matter of the major discipline of study (College Wide Outcome – Area 3).
- Demonstrate competence in the skills essential to mastery of the major discipline of study that are necessary to accomplish the independent study.
- SLO #4: Identify personal goals and pursue these goals effectively (College Wide Outcome – Area 4).
- Utilize skills from the “academic tool kit” including time management, study skills, etc., to accomplish the independent study within one semester term.

Fitness (FITNS)

FITNS 306 Aerobics: Cardio-Kickboxing

Units: 1
Hours: 54 hours LAB
Prerequisite: None.
Transferable: CSU; UC (Any or all PE Activity courses combined: maximum credit, 4 units)
General Education: AA/AS Area III(a); CSU Area E2
Catalog Date: June 1, 2020

This course emphasizes proper alignment, execution, and timing of faster paced movements from kickboxing, boxing, and aerobic dance to improve cardiovascular fitness. Various training methods will also be used to improve individual strength and flexibility.

Student Learning Outcomes

Upon completion of this course, the student will be able to:
FITNS 310 Aquatic Fitness I

Units: 1
Hours: 54 hours LAB
Course Family: Aerobic Water Fitness (http://crc.losrios.edu/course-families#id_100019)
Prerequisite: None.
Advisory: Although no swimming skills are needed or required, it is suggested that students are comfortable in an aquatic environment since the class will be taught in shallow and deep water.
Transferable: CSU; UC
General Education: AA/AS Area III(a); CSU Area E2
Catalog Date: June 1, 2020

This course is designed to improve student’s fitness level through the use of shallow and deep water exercise. The course will focus on using the resistance of the water for low or non-weight bearing exercise to improve cardiovascular fitness, muscular strength and endurance, and flexibility in shallow and deep water. Additionally, students will learn information related to overall health and fitness. No swimming skills are needed as flotation devices such as aqua joggers will be provided for deep water workouts.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO #1. Understand, describe and demonstrate knowledge of physical fitness as it relates to aquatic exercise.
- Analyze their pre and post semester fitness levels using the class assessment test.
- Demonstrate and use proper form and technique related to aquatic exercise.
- SLO #2. Formulate individual fitness goals, apply appropriate training principles toward acquisition of goals.
- Develop, improve and adapt workout intensity, duration and coordination throughout the course.
- Demonstrate understanding of aerobic vs. anaerobic aqua exercise and the need for both.
- SLO #3. Design an aqua-exercise workout to include emphasis in cardiovascular exercise, muscular strength and endurance, and a component to improve flexibility.

FITNS 314 Aquatic Fitness III- Deep Water Jogging

Units: 1
Hours: 54 hours LAB
Course Family: Aerobic Water Fitness (http://crc.losrios.edu/course-families#id_100019)
Prerequisite: None.
Advisory: Although no swimming skills are needed or required, it is strongly suggested that students enrolled in this class are comfortable in an aquatic environment, especially deep water.
Transferable: CSU; UC
General Education: AA/AS Area III(a); CSU Area E2
Catalog Date: June 1, 2020
This jogging/running course uses the resistance of deep water to build and/or improve muscular strength and endurance, cardiovascular fitness and increases flexibility while wearing a flotation belt to maintain a vertical position in the water. It is a fitness class for those individuals who want to improve their current fitness level with non-weight bearing exercise in the water.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO #1. Understand, demonstrate and discuss components of fitness as they relate to deep water jogging.
- Compare and contrast the difference of jogging and running in the water vs on land.
- SLO #2. Comprehend the relationship of different heart rates used in fitness training and how they relate to fitness level.
- Discuss, compute and understand their own resting, ambient, training and recovery heart rate several times throughout the semester and relate to current fitness level.
- Explain, understand and demonstrate the difference between aerobic and anaerobic running workouts in the water as well as the benefit of each in regard to fitness training.
- Demonstrate improvement in cardiovascular fitness, especially endurance throughout the course by increased jogging/running intensity and duration before a need to rest.
- SLO #3. Understand and use proper form, technique and mechanics in regard to jogging and running in deep water.
- Discuss and comprehend the principles of hydrostatic pressure and viscosity, as they relate to deep water jogging and running.
- Understand and demonstrate proper body alignment in the water with respect to the flotation belt used in this class.

FITNS 320 Body Fitness

| Units: | 1 |
| Hours: | 54 hours LAB |
| Prerequisite: | None. |
| Transferable: | CSU; UC |
| General Education: | AA/AS Area III(a); CSU Area E2 |
| Catalog Date: | June 1, 2020 |

This course is designed to assess and improve physical fitness levels, enhance weight control, and encourage a healthy attitude toward lifelong fitness. Students receive theories and practical activities involved in obtaining and maintaining a healthy weight and appropriate level of fitness.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO #1 Define and participate in regular physical conditioning program.
- Identify individual goals and objectives and develop diet and fitness plans based on those goals.
- Recognize, relate and appreciate the need for lifelong fitness conditioning.
- SLO#2 Analyze and accurately assess current fitness levels.
- Modify workouts as cardiovascular and strength levels improve.
- Evaluate fitness levels throughout the semester.
- SLO#3 Implement proper dietary strategies for weight control.
- Assess current nutrition habits with the use of food journals.
- Investigate current trends in nutrition and fallacies of fad diets.

FITNS 323 Fitness Ball
The fitness ball is a valuable tool for developing core strength (middle of your body), flexibility and balance. Because of the fitness ball’s inherent instability, the effect of traditional strength training exercises is intensified when performed in conjunction with the fitness ball. Students will learn to safely and effectively execute strengthening exercises for all the major muscle groups with and without hand weights, flexibility exercises, and balancing exercises. Specific topics and exercises may vary each semester depending on the needs of the students.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO #1: Evaluate fitness level in various components of fitness using standard tests and measurements.
- Establish a pre/mid/post training fitness profile as measured by fitness assessments.
- Measure an improvement in body composition, muscular endurance and flexibility as evidenced by the fitness assessments.
- SLO #2: Design, implement and evaluate a fitness program.
- Modify exercises to suit the changing needs and abilities of the individual as measured by instructor observation and responses to written classwork/homework.
- Conceptualize the kinesiology of exercises presented as assessed by written exams/homework.
- Create a personalized program for home use that addresses strength, flexibility and balance as measured by a fitness ball portfolio. The program will evolve as the student gains experience and skills.
- Understand safety guidelines for each exercise.
- Size and inflate the ball according to body dimensions.

FITNS 324 Mat Pilates

This beginning course is a unique methodology that offers improvement in core strength, posture and flexibility. Mat Pilates is designed to work with the deepest muscles with a sequence of fundamental exercises to achieve improved balance and position control while strengthening and toning the entire body.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO #1 Demonstrate an improvement in several areas of fitness.
- Increase in joint mobility.
- Gain greater strength and flexibility of the large and small muscles for core stabilization.
- SLO #2 Apply the Pilates method to a routine practice to create more challenges with endurance and range of motion.
- Improve strength, stamina, alignment and breath control.
- SLO #3 Create a personalized program for home use that addresses strength, flexibility and balance.
- Understand modifications to achieve safety using different patterns of movement.
- Build strength progressively with more challenges, coordination and increased intensity.
FITNS 326 Mat Pilates II

**Units:** 1  
**Hours:** 54 hours LAB  
**Prerequisite:** None.  
**Advisory:** FITNS 324  
**Transferable:** CSU; UC  
**General Education:** AA/AS Area III(a); CSU Area E2  
**Catalog Date:** June 1, 2020

This intermediate course is designed to improve core strength and overall body awareness using the unique methodology of Mat Pilates. Mat Pilates II will include a sequence of fundamental exercises with the addition of intermediate level exercises. The addition of equipment (i.e. fitness balls, resistance bands, etc.) will be introduced.

**Student Learning Outcomes**

Upon completion of this course, the student will be able to:

- SLO#1 Integrate basic mind/body skills using Mat Pilates exercises and techniques in a general group fitness setting.
- Gain muscular strength and endurance.
- Increase joint mobility.
- SLO#2 Apply and determine fitness goals, safety and effectiveness using the Pilates method.
- Improve general daily mobility.
- SLO#3 Comprehend and focus on proper spinal alignment and breathing techniques while demonstrating Mat Pilates exercises.
- SLO#4 Identify which muscles are used for core strength.

FITNS 327 Mat Pilates III

**Units:** 1  
**Hours:** 54 hours LAB  
**Prerequisite:** None.  
**Advisory:** FITNS 324 and 326  
**Transferable:** CSU; UC  
**General Education:** CSU Area E2  
**Catalog Date:** June 1, 2020

This course will use Mat Pilates training for muscle groups through controlled exercises taught at an advanced level. The advanced course is designed to improve in strength, posture, flexibility, and coordination. This course will include resistance methods of training and use of equipment (i.e. fitness balls, resistance bands, etc.) to help build strength and improve mobility.

**Student Learning Outcomes**

Upon completion of this course, the student will be able to:

- SLO #1: Students will demonstrate improvement in strength, posture, flexibility, and coordination.
- Increase muscular strength and endurance.
- SLO #2: Determine and apply fitness goals, safety, and effective technique using the Pilates method.
- Understand correct technique in order to improve daily mobility.
- SLO #3: Demonstrate the knowledge of various exercises and practical application in the study of Pilates at an advanced level.
- Develop an at home exercise routine at an advanced level.
- SLO #4: Focus of proper spinal alignment and breathing techniques via Mat Pilates exercises.
- Students will identify which muscle groups are used during each exercise.

FITNS 328 Thighs, Abs, and Gluteals (TAG)
This course is designed to be a workout specific to the thighs, abdominal and gluteal muscles included as part of the Cross Training family of Power Sculpting and Fitness Ball. This class will include workouts using a variety of calisthenics/exercises designed to enhance muscular strength and endurance, including core strength.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO #1: Evaluate strength and personal fitness levels for lower body and core training using standard fitness testing.
- Create an individual fitness profile determined by a pre-, mid- and post-fitness assessments.
- Analyze their fitness and flexibility levels and apply training methods to achieve fitness goals.
- Appraise improvements in body composition, muscular strength, muscular endurance and flexibility.
- SLO #2: Identify and apply exercises used in motion as related to lower body conditioning, core training and balance.
- Organize exercise variables using repetition, resistance, and time to train for desired outcome of muscular strength, endurance and balance when working specific muscle groups.
- Apply progressive exercises for improvement of muscular strength, muscular endurance, core training, and balance; including principles of frequency, intensity, duration and types of activities as components of exercise.
- SLO # 3: Understand and apply safety techniques, proper biomechanics to create efficiency of psychomotor skills and achieve maximum benefits in that exercise.
- Analyze and train using proper lifting and other locomotor movements.
- Utilize proper exercise technique during the warm up, workout, and cool down.
- Recognize and identify basic anatomy of specific muscles.
- Recall and discriminate major muscle groups in recruiting to perform specific types of exercises.

FITNS 331 Boot Camp Fitness

This course is designed to be a physically intense and challenging fitness class. Training exercises used during this class will include jogging, interval training, hill running training, obstacle courses, and performing a variety of calisthenics designed to enhance muscular strength and endurance. In addition, students will be challenged to understand and apply fitness training principles. The students will train individually, with a partner or in a team setting.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO #1: Evaluate strength and fitness levels for daily living using standard fitness testing.
- Create an individual fitness profile determined by a pre-, mid- and post-fitness assessments.
- Analyze their fitness levels and apply training methods to achieve fitness goals.
- Appraise improvements in aerobic capacity, body composition, muscular strength, muscular endurance and flexibility.
- Apply target heart rate and perceived exertion to evaluate the effectiveness of their workout sessions.
- SLO #2: Identify and apply exercises used in motion as related to conditioning.
- Apply their physical abilities in conducting various work-out sessions by training individually, with a partner, or as a team.
- SLO #3: Design, implement, and evaluate a weight training program for personal use.
- Design a personal heart rate training zone.
- Calculate a heart rate training zone.
- SLO #4: Understand and apply safety techniques and training etiquette to boot camp fitness.
- Analyze and train using proper walking, jogging, running and other locomotor movements.
- Utilize proper exercise technique during the warm up, workout, and cool down.

FITNS 339 Multi Sport Training for Fitness

| Units: | 1 |
| Hours: | 54 hours LAB |
| Prerequisite: | None. |
| Transferable: | CSU; UC (Any or all PE Activity courses combined: maximum credit, 4 units) |
| General Education: | AA/AS Area III(a); CSU Area E2 |
| Catalog Date: | June 1, 2020 |

This course covers multi-sport training, including swimming, cycling and running. This class is designed for the beginner triathlete or any student interested in cross training for fitness. The student will be taught how to develop improved techniques in all three activities. Students must supply their own road or mountain bike and helmet. This course may be taken four times for credit.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO #1: Apply basic knowledge and skill learned to participate in cross training or triathlons.
  - Operate a bicycle and maintain it in good working condition.
  - Practice proper biking form and tactical maneuvers on a bicycle.
  - Apply bicycle safety, etiquette and the rules of the road.
  - Demonstrate how to breathe properly while performing correct swimming techniques.
  - Design a progressive swimming workout that will prepare them to improve cardiovascularly.
  - Apply cross training principles to their total workout plan.
  - Use proper running form for maximum efficiency in training.
- SLO #2: Evaluate their own fitness level and create a training program to prepare for cross training for fitness or triathlons.
  - Employ fitness concepts to the training of the three sports involved.
  - Compare a pre, mid and post test to assess their fitness level.
  - Design a progressive biking workout that will prepare them to improve cardiovascularly.
  - Design a progressive running workout that will prepare them to improve cardiovascularly.
  - Design an overall workout for all three sports that meets their desired individual goals.
- SLO #3: Understand and apply the safety rules, etiquette rules and procedures within the sports of swimming, cycling, and running.
  - Create a plan for proper hydration, safety and mental strategies for each sport.
  - Relate to others in a positive manner within the fitness training community.

FITNS 348 High-Intensity Interval Training
This course is designed to be a physically intense and total body workout included as part of the Cross Training family of Boot Camp Fitness. This class will include workouts using running, obstacle courses, and performing a variety of calisthenics designed to enhance muscular strength and endurance used through high intensity intervals.

**Student Learning Outcomes**

Upon completion of this course, the student will be able to:

- **SLO #1:** Evaluate strength and personal fitness levels for high-intensity interval training using standard fitness testing.
- **SLO #2:** Create an individual fitness profile determined by a pre-, mid- and post-fitness assessments.
- **SLO #3:** Analyze their fitness levels and apply training methods to achieve fitness goals.
- **SLO #4:** Appraise improvements in aerobic capacity, body composition, muscular strength, muscular endurance, agility, power, speed, and flexibility.
- **SLO #5:** Apply target heart rate and perceived exertion to evaluate the effectiveness of their workout sessions.

**FITNS 352 Power Sculpting**

Power Sculpting is a non-impact conditioning course designed to enhance muscular fitness (muscular endurance and muscular strength), balance, and improve body composition by sculpting and defining muscles through the use of resistance equipment (other than weight machines), core training, calisthenics, and flexibility exercises.

**Student Learning Outcomes**

Upon completion of this course, the student will be able to:

- **SLO #1** Demonstrate an understanding of the process of determining the validity of fitness and health information using the scientific method and the relationship between scientific research and established knowledge.
- **SLO #2** Evaluate and measure improvement of one's own muscular fitness level by using the fitness components such as muscular strength, muscular endurance, body composition, body measurement and flexibility.
- **SLO #3** Utilize knowledge to design, develop, and implement an effective personalized fitness program.
- **SLO #4** Organize program variables (reps, resistance, time) to train for the desired outcome of muscular strength and/or muscular endurance when performing exercises that target specific muscle groups.
demonstrate proper technique in executing power sculpting exercises.

SLO #3 Understand biomechanical movement as applied to physical activity to create efficiency of psychomotor skills and achieve maximum benefits in that activity.

recognize and identify major muscles of the body and their movements/mechanics.

discriminate major muscle groups worked by each sculpting exercise to distinguish and develop/maintain their function in exercise.

select an appropriate stretch for a target muscle group.

FITNS 355 Workforce Fitness

This physical education course emphasizes concepts related to health, physical fitness and recreation as they relate to the industrial worker. Exercise programs will be designed to improve specific muscle groups impacted in the occupational setting.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO #1 Demonstrate an understanding of the process of determining the validity of fitness and health information using the scientific method and the relationship between scientific research and established knowledge.

- Demonstrate basic understanding of health and fitness. Students at various levels of knowledge and fitness will be challenged to improve to the next level.

- SLO #2 Utilize knowledge to design, develop, and implement an effective personalized fitness program.

- Apply and plan a personal fitness program using proper lifting techniques as well as the mechanics of lifting, pushing and carrying. Students at various levels of knowledge and fitness will be challenged to improve to the next level.

- Apply and plan a personal fitness plan using proper strength and cardiovascular training. Students at various levels of knowledge and fitness will be challenged to improve to the next level.

- SLO #3 Recognize motivational techniques and apply them to enable the student to create lifestyle changes in fitness and health.

- Assess current habits and apply behavioral modification procedures to ensure healthier choices. Students at various levels of knowledge and fitness will be challenged to improve to the next level.

FITNS 380 Circuit Weight Training

Circuit Weight Training shall introduce the student to a fitness program of progressive resistive exercises designed to promote improvement in muscular strength and endurance, cardiovascular endurance, and flexibility, as well as, decrease in body fat percentage. The student will move in a prescribed circuit (alternating timed lifting with active recovery) utilizing machines, free weights, cardiovascular activities, and flexibility training.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO #1. develop fitness in the following areas: cardiovascular, muscular strength, muscular endurance and flexibility.

- analyze their current fitness levels and develop personalized goals for fitness improvement.

- apply fitness concepts in circuit training.
SLO#2. develop an understanding of cardiovascular fitness and how it applies to circuit training.

monitor heart rates during workouts.

FITNS 381 Weight Training

Units: 1
Hours: 54 hours LAB
Prerequisites: None.
Transferable: CSU; UC (Any or all PE Activity courses combined: maximum credit 4 units)
General Education: AA/AS Area III(a); CSU Area E2
Catalog Date: June 1, 2020

This physical education course is designed to develop fitness strength through weight training. Students will learn basic weight training techniques using the weight machines and basic free lifts. The student will be able to design and implement their own weight training program for future use after taking this class.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO #1 Evaluate strength and fitness levels using standard fitness testing.
- Identify goals and design weight training programs based upon personal goals as recorded on workout logs. Students will utilize the weight circuit when developing their program.
- Students will compare strength tests, analyze results, and formulate new strategies for meeting unattained goals.
- SLO #2 Identify concepts and differentiate between types of strength training programs
- Explain principles and concepts of progressive resistance training. Students will explore the weight circuit and how to best utilize it.
- Experiment with different types of training programs to find one which best suits individual needs
- SLO #3 Design, implement, and evaluate a personalized strength training program
- Conceptualize the kinesiology of lifts presented as assessed by written exam
- Modify exercises to suit changing levels of strength
- SLO #4 Recognize safety issues in weight training including spotting, collars, and class awareness.
- Demonstrate proper lifting techniques at each level as evaluated by the instructor.

FITNS 384 Weight Training II

Units: 1
Hours: 54 hours LAB
Course Family: Weight Training (http://crc.losrios.edu/course-families#id_100065)
Prerequisites: None.
Advisory: FITNS 381
Transferable: CSU; UC
General Education: AA/AS Area III(a); CSU Area E2
Catalog Date: June 1, 2020

This physical education course is designed to stress the proper guidelines, principles and techniques of weight lifting and the development of muscular strength and endurance at an intermediate level. The students will design and implement their own weight training program.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO #1 Evaluate muscular strength, muscular endurance and cardiorespiratory fitness levels using standard fitness testing.
- Identify goals and design weight training programs based upon personal goals as recorded on workout logs.
• Compare strength tests, analyze results, and formulate new strategies at an intermediate level.
• SLO #2 Identify and apply concepts and differentiate between types of strength training programs at an intermediate level.
• Explain principles and concepts of progressive resistance training at the intermediate level as it applies to their individual program.
• Experiment with different types of training programs to find one which best suits individual needs.
• SLO #3 Design, implement, and critique a personalized strength training program.
• Conceptualize the mechanics of lifts presented as assessed by written exam.
• Modify exercises to suit changing levels of strength.
• SLO #4 Demonstrate proper lifting techniques at an intermediate level as evaluated by the instructor.
• Practice safety in weight training including spotting, collars and class awareness.

FITNS 386 Weight Training III

Units: 1
Hours: 54 hours LAB
Course Family: Weight Training (http://crc.losrios.edu/course-families#id_100065)
Prerequisite: None.
Advisory: FITNS 384 with a grade of "C" or better
Transferable: CSU; UC
General Education: AA/AS Area III(a); CSU Area E2
Catalog Date: June 1, 2020

This physical education course is designed to stress the proper guidelines, principles and techniques of weight training and the development of muscular strength, endurance and power at an advanced level. More emphasis will be placed on free weights as the student progresses. The students will design and implement their own weight training program.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

• SLO #1: Evaluate muscular strength, muscular endurance and cardiorespiratory fitness levels using standard fitness testing.
• Identify goals and design weight training programs based upon personal goals as recorded on workout logs.
• Compare strength tests, analyze results, and formulate new strategies at an advanced level.
• SLO #2: Understand biomechanical movement and differentiate between types of strength training exercises at an advanced level.
• Apply advanced weight training principles and techniques to exercise routines.
• Experiment with different types of exercises and programs to find one which best suits individual goals.
• SLO #3: Design, implement, and analyze a personalized strength training program at an advanced level.
• Modify exercises to suit changing levels of strength.
• Demonstrate and evaluate stabilization, balance and core exercises to improve performance.
• Examine and demonstrate advanced strength and conditioning techniques to improve speed, agility and quickness.
• SLO #4: Demonstrate proper lifting techniques and form at an advanced level as evaluated by the instructor.
• Practice safety in weight training including spotting, collars, and class awareness.

FITNS 390 Basic Yoga

Units: 1
Hours: 54 hours LAB
Prerequisite: None.
Transferable: CSU; UC
General Education: AA/AS Area III(a); CSU Area E2
Catalog Date: June 1, 2020
This course in Yoga emphasizes breathing, stretching, and relaxing techniques. Yoga positions and philosophies are examined.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- **SLO#1** Utilize knowledge to design, develop and implement an effective personalized fitness program.
- identify and demonstrate hatha postures and classify yoga methods.
- develop a personalized yoga workout that can be modified to their strengths and weaknesses.
- **SLO#2** Understand biomechanical movement as applied to physical activity to create efficiency of psychomotor skills and achieve maximum benefits in that activity.
- Identify the major muscle groups.
- Improve flexibility for lifelong fitness.
- Identify and perform breathing patterns
- Explain duration and repetition guidelines associated with hatha yoga asana.
- **SLO#3** Enable the student to create lifestyle changes in fitness and health.
- apply and evaluate the benefits of yoga as a tool for stress reduction and improved range of motion.

FITNS 393 Yoga II

Units: 1
Hours: 54 hours LAB
Prerequisite: FITNS 390 with a grade of "C" or better
Transferable: CSU; UC
General Education: AA/AS Area III(a)
Catalog Date: June 1, 2020

Yoga is an East Indian method of mind/body exercise designed to stretch, strengthen, and enhance muscle tone through the practice of asanas (poses) and pranayama (breathing exercises). Yoga practice plus meditation helps decrease stress and increase energy levels while improving focus, concentration, and self-realization. The variety of health benefits a yoga practice offers are: for inner harmony, balance, and overall well-being, for spiritual connection and growth; or for stretching and strengthening a variety of muscle groups involved in a yoga practice. This course is designed to assist any and all of those goals through support and guidance in a safe and nurturing learning environment. Students will be required to purchase a yoga mat.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- **SLO#1** Utilize knowledge to design, develop and implement a progressive personal yoga session.
- Identify breath control practices for heating the body, calming the mind, balancing the emotions, soothing the nerves, and relaxing the body.
- **SLO#2** Understand biomechanical movement as applied to yoga movement to create efficiency of psychomotor skills and achieve maximum benefits of body and breath work.
- Safely and effectively execute asanas (poses) and pranayama (breathing exercises).
- **SLO#3** Enable the student to create lifestyle changes in fitness and health.
- Express a solid understanding of yogic principles, practices, history and philosophy.
- Describe meditation methods to improve concentration, focus and mood.

FITNS 394 Yoga III
This is an advanced yoga course that allows students to continue to explore and develop their yoga practice, and to learn a deeper focus for stress reduction and relaxation. This class is designed to advance the practice of the individual through stretching, strengthening, and enhancing muscle tone. This will be done through the practice of advance asanas (poses) and pranayama (breathing exercises). Yoga practice plus meditation helps decrease stress and increase energy levels while improving focus, concentration, and self-realization. Students will be required to purchase a yoga mat.

**Student Learning Outcomes**

Upon completion of this course, the student will be able to:

- **SLO #1:** Successfully perform asanas and pranayama and utilize yoga as a means to lifelong fitness, including an understanding and recognition of a yoga practice and training methods, and applying them to their own yoga practice. Explain and demonstrate the fundamental techniques of asanas.
- **SLO #2:** Choose, differentiate, and demonstrate the proper use and care of yoga props.
- **SLO #3:** Demonstrate proper form and technique of vinyasas, flow, balance postures and restorative yoga.
- **SLO #4:** Demonstrate proper form and technique of arm balance postures, headstands and handstand postures.
- **SLO #5:** SLO #2: Be comfortable in a group setting and with the social aspects of a group yoga practice.
- **SLO #6:** Understand the basic components of teaching a yoga session to a group.
- **SLO #7:** Analyze the correct posture technique of others in the class, demonstrate yoga assisting etiquette.
- **SLO #8:** Demonstrate the ability of self-reflection and assessment, assessment of peers, and constructive critiques of a yoga session.
- **SLO #9:** Arrange a music playlist that will aid in the flow of a yoga practice.
- **SLO #10:** SLO #3 express a solid understanding of yogic principles, practices, history and philosophy.
- **SLO #11:** Recount the 8 limbs of yoga and how they apply to the yogic lifestyle.
- **SLO #12:** Recount the 7 Chakras and how they apply to the yogic lifestyle.

This course is designed to improve cardiovascular fitness, muscle endurance, and flexibility. Weight management, nutritional guidelines and healthy living information will also contribute to overall health and wellness for the student in this course.

**FITNS 406 Walking and Jogging**

Upon completion of this course, the student will be able to:

- **SLO #1:** Demonstrate an understanding of the process of determining the validity of fitness and health information using the scientific method and the relationship between scientific research and established knowledge.
- **SLO #2:** Use critical thinking skills combined with course information to differentiate between valid scientific health and fitness products and non-effective health and fitness products.
- **SLO #3:** SLO #2: Utilize knowledge to design, develop, and implement an effective personalized fitness program.
- **SLO #4:** Evaluate and measure improvement of one’s own fitness level in the basic fitness components such as body composition, body measurement, target heart rate zone, and flexibility. Measure and calculate resting heart rate, maximum heart rate, and target heart rates.
- **SLO #5:** Comprehend and recognize improved levels of fitness through fitness testing and recognizing those improvements as each a separate component of fitness.
Practice proper biomechanical techniques for both walking and jogging to insure a safe workout to maximize the efficiency of the workout.

Establish an effective work-out program suited to the student's individual needs.

SLO #3: Recognize and analyze the implementation of fitness principles as related to weight management through walking and jogging for fitness.

Establish appropriate goals in fitness workouts and measure progress in those goals.

Utilize nutrition information, including caloric intake to enhance weight loss with exercise if that is the goal of the student.

FITNS 440 Swimming I

**Units:** 1  
**Hours:** 54 hours LAB  
**Course Family:** Swimming  
**Prerequisite:** None.  
**Transferable:** CSU; UC  
**General Education:** AA/AS Area III(a); CSU Area E2  
**Catalog Date:** June 1, 2020

This class provides the opportunity for students to become safe and comfortable in the water. Students will develop swimming skills on their front and back. Instruction will emphasize freestyle and backstroke as well as water safety. Each student will progress toward becoming an endurance swimmer for enhanced fitness.

**Student Learning Outcomes**

Upon completion of this course, the student will be able to:

- SLO #1: successfully swim and utilize swimming as a means to lifelong fitness, including an understanding and recognition of basic swimming techniques and training methods, and applying them to their own workouts.
- explain and demonstrate the fundamental techniques of hydrodynamics.
- choose and use the correct terminology associated with swimming.
- comprehend, recognize and demonstrate proper water safety techniques associated with maintaining personal water safety, treading and survival floating, and helping in an emergency.
- recognize, develop, practice and demonstrate proper stroke mechanics for the basic strokes on the front and back. Freestyle, kicking and sculling or finning, backstroke and/or elementary backstroke will be emphasized.
- choose, differentiate and demonstrate the proper use of the swimming equipment in class.
- SLO #2: be comfortable in the pool with swimming etiquette and the social aspects of group training.
- develop and improve their comfort level in and around the water.
- identify and judge correct lap lane usage.

FITNS 441 Swimming II

**Units:** 1  
**Hours:** 54 hours LAB  
**Prerequisite:** None.  
**Transferable:** CSU; UC  
**General Education:** AA/AS Area III(a); CSU Area E2  
**Catalog Date:** June 1, 2020

This course is designed for non-swimmers or those returning to swimming after a long absence. Topics include basic water adjustment skills, floats, glides, basic freestyle and backstroke. It is appropriate for those afraid or not comfortable in deep water or those unable to correctly or continuously swim 25 meters without stopping. Instruction will be given in the physical and psychological adjustment to water.

**Student Learning Outcomes**

Upon completion of this course, the student will be able to:
FITNS 442 Swimming III

The purpose of this course is to teach intermediate swimmers, who have mastered basic water acclimation, water safety, and basic swimming skills, swim training protocols and design, further refinement of stroke technique, proper diving technique, and development of cardiovascular capacity. Students will learn and refine the stroke techniques of freestyle, backstroke, and breaststroke. Students will learn flip turns for freestyle and backstroke. Students will be introduced to swim training and workout design.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO #1: successfully swim and utilize swimming as a means to lifelong fitness, including an understanding and recognition of basic swimming techniques and training methods, and applying them to their own workouts. explain and demonstrate the fundamental techniques of hydrodynamics.
- recognize, develop, practice, and demonstrate proper form and technique in the standard swimming strokes (freestyle, backstroke, and breaststroke).
- choose, differentiate, and demonstrate the proper use and care of swim training equipment.
- demonstrate proper form and technique of freestyle, backstroke, and breaststroke turns and breakouts.
- demonstrate proper form and technique of sculling and treading water.
- demonstrate proper understanding of diving safety, technique and practice progressions.
- demonstrate and intermediate swimming fitness level by completing a 500-yard swim test.
- SLO #2: be comfortable in the pool with swimming etiquette and the social aspects of group training.
- analyze the stroke technique of others in the class, demonstrate swimming etiquette of group training, including: self-reflection and assessment, assessment of peers, constructive critiques of training group performance.

FITNS 443 Swimming IV
This swim class is for advanced intermediate swimmers who want to learn or improve proper training technique specific to the four competitive strokes. Students will also develop or refine underwater efficiency related to increasing speed during entry into the water, turning and breakouts for all of the competitive strokes (free, back, breast and fly). Advanced training protocols, drills and workouts will be used.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO #1. Identify and demonstrate proper form and technique in the four competitive strokes of freestyle, backstroke, breaststroke and butterfly.
- Develop, adapt and/or improve swimming stroke mechanics and skills in the four competitive strokes.
- Develop and demonstrate proper form and technique of drilling, finning, sculling and treading water.
- SLO #2. Demonstrate proper form and technique of entry, turns and breakouts in freestyle, backstroke, breaststroke and butterfly.
- Develop and/or demonstrate understanding of proper diving safety, technique and practice progression for competitive swimming.
- Develop, adapt and/or improve technique of turns and breakouts for the four competitive strokes.
- SLO #3. Choose, differentiate and demonstrate proper use and care of swim training equipment.
- SLO #4. Create fitness level appropriate swim workouts.
- Evaluate, analyze and provide feedback to training partner on stroke technique and mechanics.

FITNS 444 Swimming V

Units: 1
Hours: 54 hours LAB
Course Family: Swimming (http://crc.losrios.edu/course-families#id_100018)
Prerequisite: FITNS 442 with a grade of “C” or better; Students must demonstrate the ability to swim in deep water and possess, at minimum, intermediate swimming skills using correct stroke mechanics and technique.
Transferable: CSU; UC
General Education: AA/AS Area III(a); CSU Area E2
Catalog Date: June 1, 2020

This swimming class emphasizes improvement in aerobic fitness. This is a self-paced overload method of training using a workout approach. Stroke efficiency, aerobic fitness, and personal improvement will be emphasized.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO #1 Define and participate in regular physical conditioning program in swimming.
- Develop, adapt and improve swimming stroke mechanics.
- Understand the correct terminology associated with swimming.
- SLO #2 Analyze and accurately assess current fitness levels through swimming.
- Comprehend, recognize and evaluate improved levels of fitness through swimming including cardiovascular development, muscular strength and endurance, and flexibility.
- Understand the relationship between resting, ambient and training heart rates and how to calculate each.
- SLO #3 Implement proper strategies for group swimming.
- Select and judge the proper method of group swimming as it pertains to lap lane methods.
* Choose and evaluate their preferred method of turning at the wall to ensure smooth transitions for continuous swimming.

FITNS 495 Independent Studies in Fitness

An independent studies project involves an individual student or small group of students in study, research, or activities beyond the scope of regularly offered courses. See the current catalog section of “Special Studies” for full details of Independent Studies.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO #1: Actively engage in intellectual inquiry beyond that required in order to pass a course of study (College Wide Learning Outcome – Area 4).
- Discuss and outline a proposal of study (that can be accomplished within one semester term) with a supervising instructor qualified within the discipline.
- Design an independent study (to be completed individually or by collaboration of a small group) to foster special knowledge, skills, and experience that are not available in any one regularly scheduled course.
- Use information resources to gather discipline-specific information.
- SLO #2: Utilize modes of analysis and critical thinking to apply theoretical perspectives and/or concepts in the major discipline of study to significant problems and/or educational activities (College Wide Learning Outcome – Area 3).
- Analyze and apply the knowledge, skills and experience that are involved in the independent study to theoretical perspectives and/or concepts in the major discipline of study.
- Explain the importance of the major discipline of study in the broader picture of society.
- SLO #3: Communicate a complex understanding of content matter of the major discipline of study (College Wide Outcome – Area 3).
- Demonstrate competence in the skills essential to mastery of the major discipline of study that are necessary to accomplish the independent study.
- SLO #4: Identify personal goals and pursue these goals effectively (College Wide Outcome – Area 4).
- Utilize skills from the “academic tool kit” including time management, study skills, etc., to accomplish the independent study within one semester term.

Kinesiology (KINES)

KINES 300 Introduction to Kinesiology

This introductory course presents an interdisciplinary approach to the study of human movement. It will provide students with an overview of the sub-disciplines in kinesiology, including the history, philosophy, sociology and psychology of sport; pedagogy; and motor behavior, biomechanics and physiology of physical activity. In addition, students will learn about career opportunities in teaching physical education, coaching, health and fitness, therapeutic exercise and sport management.

Student Learning Outcomes

Upon completion of this course, the student will be able to:
SLO #1: Recognize the types of knowledge concerning physical activity that are acquired through experience.
state the components and explain the importance of physical activity experiences.
describe the nature of subjective physical activity experiences.

SLO #2: Examine the categories of scholarly study of physical activity.
describe how philosophy fits into the field of kinesiology.
recognize the importance of the history of physical activity.
identify and analyze the key concepts of the sociology of physical activity.
understand and discuss the social-psychological factors that influence people's behavior and performance in physical activity.
understand and differentiate between the principles of motor learning, motor control and motor development.
explore how human movement biomechanics emerged; identify and apply the basic laws of physics to the structure and function of the human body.
understand adaptations in anatomy and physiology in response to physical activity.

SLO #3: Examine the various career opportunities in the field of kinesiology and its sub-disciplines.
compare and contrast the types of knowledge and skills essential for performing professional work in teaching, coaching, health and fitness, therapeutic exercise and sport management.
discuss how to prepare for the various career opportunities in kinesiology and its sub-disciplines.
determine what attitudes, values and goals are necessary for the various professions in kinesiology and its sub-disciplines.

KINES 301 Personal Wellness

Upon completion of this course, the student will be able to:

SLO #1: Utilize critical thinking skills to assess health information presented through lectures, assignments and other sources.
-Define the basic concepts of health and wellness.
-Identify the components of fitness.
-Evaluate the different ways to assess body composition.
-Distinguish between unhealthy and healthy stress.
-Analyze strategies useful in coping with stress.
-Evaluate and assess methods toward making responsible decisions.

SLO #2: Evaluate their current personal health status and devise programs designed to improve and/or maintain that status.
-Evaluate their current status of Wellness.
-Apply training principles to a fitness program and avoid fitness misconceptions.

SLO #3: Articulate the importance of lifestyle choices as a determinant toward disease prevention and leading a healthier, happier life.
-Measure and assess the effects of negative health habits and positive health habits on both short and long term health.
KINES 308 Women in Sport

Units: 3
Hours: 54 hours LEC
Prerequisite: None
Transferable: CSU; UC (UC Transfer Credit Limitation: KINES 300, 308, & 460 maximum credit, 8 units.)
Catalog Date: June 1, 2020

This course examines the relationship between women and sport, primarily in the United States, from multiple perspectives. Consideration is given to the cultural, economic, educational, legal, physiological and social influences on women in sport. Situating the ever-evolving roles that women assume in sport within a historical context, emphasis is placed on using the past to advise the present and effect change in the future. The course covers four broad areas: women's sport in historical context; the benefits and risks of participating in sport and physical activity; women, sport and social location; and women in the sport industry.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO #1: Identify key historical moments that created the foundation for women's sport in the present
- Understand the suspect science of female weakness
- SLO #2: Discuss how laws such as Title IX frame concepts of equality and equity.
- Understand the overview of Title IX's Legislative history
- Recognize the growth in athletic programs since Title IX.
- SLO #3: Describe the benefits and risks that women may experience as a result of participating in sport.
- Explain the concept of the Female Athlete Paradox.
- SLO #4: Discuss the influence that social status plays in affecting the opportunity for women to participate in sport, including gender, ethnicity, race, socioeconomic status, sexual orientation and identity, age and ability.
- Understand the sporting experiences of women of color in the United States.
- Examine sexual orientation and women's sport
- Explore culture, aging and the older woman.
- SLO #5: Summarize the physiological differences that exist between female and male athletes.
- Explain what those differences may be and may not be.
- Examine the effect of menstruation on athletic performance.
- SLO #6: Identify the changing roles of women working in the sport industry and the challenges and opportunities that they encounter.
- Describe the history of women in sports media.
- Explain the scarcity of women working in corporate sport.
- Merchandising and sporting goods targeted to female consumers.

KINES 416 Psychology of Sport
This course will explore current and historical concepts, theories, and techniques of sport and fitness psychology and the role these concepts play in the achievement of optimal performance in sports and in life.

**Student Learning Outcomes**

Upon completion of this course, the student will be able to:

- SLO #1: Demonstrate an understanding of the motivational techniques that will assist with performance and personal goals.
- Define sports psychology, explain the history of sport psychology, and explain the relevance of multiculturalism in sport and exercise.
- Explain how sport and exercise impact the mental processes that create consciousness, behavior, emotion, and intelligence.
- Evaluate and explain the impact of sport and exercise on society and self.
- SLO #2: Prepare necessary strategies that will build self-awareness and self-confidence.
- Identify how the use of sport and exercise concepts, theories, and techniques can improve the physiological well-being of self and society.
- Apply the appropriate tools and techniques to build self-confidence and self-image to enhance goal achievement in sport and exercise.
- SLO #3: Students will evaluate the various psychological skills and techniques, used in sport, that will enhance success in life both verbally and in writing.
- Observe and evaluate professionals engaged in sport training using techniques learned in class.
- Prepare a mental skills training program that can be used in any sport training setting.

---

**KINES 460 Sport in Society**

3 units: 54 hours LEC

**Units:** 3  
**Hours:** 54 hours LEC  
**Prerequisite:** None.  
**Transferable:** CSU; UC (UC Transfer Credit Limitation: KINES 300, 308, & 460 maximum credit, 8 units.)  
**General Education:** AA/AS Area V(b)  
**Catalog Date:** June 1, 2020

This course is an introduction to the examination of sport in contemporary society. The course analyzes sport as a social institution and examines sport’s interaction with politics, economics, education, religion, gender, race, media, and ethics. The course also focuses on the impact of sport on participants, spectators, and society as a whole.

**Student Learning Outcomes**

Upon completion of this course, the student will be able to:

- SLO #1: Define sport in society, explain the history of sport in society, and explain the relevance of sports in our society.
- Identify social problems related to sport and predict potential social problems related to sport in the future.
- Identify social benefits related to sport and predict potential social benefits related to sport in the future.
- Evaluate sport from both a functionalist and critical perspective.
- Review research to discover issues related to sport in society.
- Complete a research project or paper discussing a specific issue concerning society and sport using previous research and one’s own critical thinking.
- SLO #2: Identify and analyze the impact of religion, race, gender, social class, education, media, and politics on sport, sport’s participants, and sport’s spectators and vice versa.
- Compare and contrast public policies and ethical issues about sport and propose alternative solutions to these issues.
• Explain and apply various theories to sport.
• Debate the role society plays in influencing sport and the role sport plays in influencing individuals in society.
• Critique the impact of violent behavior in sport on society.
• Assess the relationship between sport and all levels of education.

KINES 495 Independent Studies in Physical Education

Theory

An independent studies project involves an individual student or small group of students in study, research, or activities beyond the scope of regularly offered courses. See the current catalog section of "Special Studies" for full details of Independent Studies.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

• SLO #1: Actively engage in intellectual inquiry beyond that required in order to pass a course of study (College Wide Learning Outcome – Area 4).
• Discuss and outline a proposal of study (that can be accomplished within one semester term) with a supervising instructor qualified within the discipline.
• Design an independent study (to be completed individually or by collaboration of a small group) to foster special knowledge, skills, and experience that are not available in any one regularly scheduled course.
• Use information resources to gather discipline-specific information.
• SLO #2: Utilize modes of analysis and critical thinking to apply theoretical perspectives and/or concepts in the major discipline of study to significant problems and/or educational activities (College Wide Learning Outcome – Area 3).
• Analyze and apply the knowledge, skills and experience that are involved in the independent study to theoretical perspectives and/or concepts in the major discipline of study.
• Explain the importance of the major discipline of study in the broader picture of society.
• SLO #3: Communicate a complex understanding of content matter of the major discipline of study (College Wide Outcome – Area 3).
• Demonstrate competence in the skills essential to mastery of the major discipline of study that are necessary to accomplish the independent study.
• SLO #4: Identify personal goals and pursue these goals effectively (College Wide Outcome – Area 4).
• Utilize skills from the “academic tool kit” including time management, study skills, etc., to accomplish the independent study within one semester term.

KINES 498 Work Experience in Physical Education

Units: 1 - 3
Hours: 54 - 162 hours LAB
Prerequisite: None.
Transferable: CSU
Catalog Date: June 1, 2020

Student Learning Outcomes

Students must be in a paid or unpaid internship, volunteer position or job related to career goals in Physical Education.

Transferable: CSU
General Education: AA/AS Area III(b)
Catalog Date: June 1, 2020
This course provides students with opportunities to develop marketable skills in preparation for employment in their major field of study or advancement within their career. It is designed for students interested in work experience and/or internships in transfer level degree occupational programs. Course content includes understanding the application of education to the workforce; completion of required forms which document the student's progress and hours spent at the work site; and developing workplace skills and competencies. Appropriate level learning objectives are established by the student and the employer. During the semester, the student is required to participate in a weekly orientation and 75 hours of related paid work experience, or 60 hours of unpaid work experience for one unit. An additional 75 or 60 hours of related work experience is required for each additional unit. Work Experience may be taken for a total of 16 units when there are new or expanded learning objectives. Only one Work Experience course may be taken per semester.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- DEMONSTRATE AN UNDERSTANDING AND APPLICATION OF PROFESSIONAL WORKPLACE BEHAVIOR IN A FIELD OF STUDY RELATED ONE'S CAREER (SLO 1)
  - Understand the effects time, stress, and organizational management have on performance.
  - Demonstrate an understanding of consistently practicing ethics and confidentiality in a workplace.
  - Examine the career/life planning process and relate its relevancy to the student.
  - Demonstrate an understanding of basic communication tools and their appropriate use.
  - Demonstrate an understanding of workplace etiquette.

- DESCRIBE THE CAREER/LIFE PLANNING PROCESS AND RELATE ITS RELEVANCY TO ONE'S CAREER (SLO 2)
  - Link personal goals to long term achievement.
  - Display an understanding of creating a professional first impression.
  - Understand how networking is a powerful job search tool.
  - Understand necessary elements of a résumé.
  - Understand the importance of interview preparation.
  - Identify how continual learning increases career success.

- DEMONSTRATE APPLICATION OF INDUSTRY KNOWLEDGE AND THEORETICAL CONCEPTS AS WRITTEN IN LEARNING OBJECTIVES IN PARTNERSHIP WITH THE EMPLOYER WORK SITE SUPERVISOR (SLO 3)

Personal Activity (PACT)

PACT 310 Badminton I

**Units:** 1  
**Hours:** 54 hours LAB  
**Prerequisite:** None.  
**Transferable:** CSU; UC (Any and all PE Activity courses combined: maximum transfer credit 4 units)  
**General Education:** AA/AS Area III(a); CSU Area E2  
**Catalog Date:** June 1, 2020

This course provides a review of basic fundamentals, techniques and rules. The emphasis is on skills and techniques such as play strategies for singles and doubles and shot selection for various play situations.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO#1: Play the game of badminton and apply rules, strategies, and techniques.
- Demonstrate the proper use and care of equipment.
- Demonstrate an appreciation for the proper etiquette required for badminton including sportsmanship.
- Employ proper safety techniques while practicing badminton.
- Demonstrate the proper technique used to grip a racket.
- Demonstrate the proper technique used to serve.
• Demonstrate the proper technique for an overhead and underhand clear.
• Demonstrate the proper technique for a drop shot.
• Demonstrate the proper technique for a drive shot.
• Demonstrate the proper body mechanics for executing a forehand stroke.
• Demonstrate the proper body mechanics for executing a backhand stroke.
• Express an understanding for the vocabulary terms used in badminton.
• Express an understanding for the rules and regulations for badminton.
• SLO#2: Understand the benefits of physical activity to their health and well being.
• Evaluate their fitness level for improvement during the course.
• SLO#3: Demonstrate appropriate social behavior by working independently and with others during physical activity.
• Gain an appreciation for cooperating with a partner in small groups.

PACT 311 Badminton II

Units: 1
Hours: 54 hours LAB
Course Family: Badminton (http://crc.losrios.edu/course-families#id_100021)
Prerequisite: None.
Transferable: CSU; UC
General Education: AA/AS Area III(a); CSU Area E2
Catalog Date: June 1, 2020

This course provides instruction in intermediate skills, techniques, and rules of badminton. It emphasizes skill and technique development beyond that of a beginning player, as well as intermediate strategies for singles and doubles.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

• SLO #1 Student will be able to effectively understand, execute and apply the required skill to effectively execute the shots required and understand the tactical approaches to the game to effectively compete at the game of badminton at a competitive level.
• effectively execute serves, drop shots, smashes, and backhand shots consistent with an intermediate-level badminton player.
• describe and apply rules and intermediate-level strategies of the game.
• evaluate the importance of sportsmanship in competitive situations.
• execute intermediate-level playing strategies by playing to personal strengths, while taking advantage of an opponent’s weaknesses.
• describe the benefits of badminton as a fitness activity.

PACT 390 Tennis I

Units: 1
Hours: 54 hours LAB
Course Family: Tennis (http://crc.losrios.edu/course-families#id_100022)
Prerequisite: None.
Transferable: CSU; UC (All PE Activity courses combined: maximum transfer credit 4 units)
General Education: AA/AS Area III(a); CSU Area E2
Catalog Date: June 1, 2020

This is a beginning tennis course. The course covers skills, rules, etiquette, and strategies of the game. The student will develop basic skills such as ground strokes, serving, volleying, elementary strategies, game rules, and basic knowledge of tennis strategies. The student will also engage in singles play and learn to improve in their play against an opponent. Playing tennis stimulates enjoyable, cooperative, and competitive modes of behavior and promotes awareness of physical activity for life long health and fitness. This course is designed for students with little or no prior tennis experience.
Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO #1: The student will identify, implement, and demonstrate competency in tennis techniques and tactics as they best apply to their respective skill level.
- Demonstrate and improve in basic strokes (forehand, backhand, volley, serves) and apply the proper grips for each stroke, as well as know basic rules, strategies and scoring for doubles and singles play.
- SLO #2: Understand and assemble a variety of conditioning drills and techniques associated with improving the physical skills required in tennis.
- Employ various training exercises to help condition a tennis athlete.
- SLO #3: Understand and apply mental strategies to effectively compete at their respective ability level.
- Learn and analyze basic position in relation to the ball.
- SLO #4: Relate to other players, instructors in a manner that is appropriate to tennis etiquette and respectful of all participants.
- Understand and apply tennis rules and regulations. Utilize proper tennis etiquette during game play.

PACT 391 Tennis II

Units: 1  
Hours: 54 hours LAB  
Prerequisite: None.  
Advisory: PACT 390 with a grade of "C" or better; Tennis II students should have some playing experience and basic tennis knowledge and skills.  
Transferable: CSU; UC  
Catalog Date: June 1, 2020

This course reviews basic fundamentals, techniques, rules, and social courtesies of tennis. Intermediate players are encouraged to take this course.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO #1: Apply the basic knowledge and skills learned to enjoy the sport of tennis.
- Understand and improve in more advanced strokes (forehand, backhand, serves, volleys) as well as understanding and implementing an advanced strategic and tactical play in both singles and doubles.
- SLO #2: Understand and assemble a variety of conditioning drills and techniques associated with improving the physical skills required in tennis.
- Be able to identify and employ various training exercises to help condition a tennis athlete.
- SLO #3: Understand and apply mental strategies to effectively compete at their respective ability level.
- Understand and analyze basic positioning and how to play to their individual respective strengths.
- SLO #4: Relate to other players, instructors in a manner that is appropriate to tennis etiquette and respectful of all participants.
- Understand and apply tennis rules and regulations. Utilize proper tennis etiquette during game play.

PACT 393 Tennis III

Units: 1  
Hours: 54 hours LAB  
Prerequisite: None.  
Advisory: PACT 391 with a grade of "C" or better; Tennis III students are recommended to have significant experience, preferably at the high school varsity level.  
Transferable: CSU; UC  
Catalog Date: June 1, 2020

Tennis III focuses on improving and refining the competitive physical and mental skills and techniques of the sport. Particular attention will be given to the strategic development of the overall player while refining racket strokes that set up and finish points. Hitting patterns, serving placement, and tactical movement will also be introduced and developed.
Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO #1: The student will identify, implement, and demonstrate competency in tennis techniques and tactics as they best apply to their respective skill level.
- Working towards mastery in advanced technical, strategic, physical and mental skills to become a competitive tennis player.
- SLO #2: Understand and assemble a variety of conditioning drills and techniques associated with improving the physical skills required in tennis.
- Develop a superior fitness level applying advance training techniques to help condition a superior tennis athlete.
- SLO #3: Understand and apply mental strategies to effectively compete at their respective ability level.
- Exhibit mastery of court position as well as learning techniques and shot patterns which will allow them to play to their own strengths, while taking advantage of their opponents' weaknesses in a competitive environment.
- SLO #4: Relate to other players, instructors in a manner that is appropriate to tennis etiquette and respectful of all participants.
- Understand and apply tennis rules and regulations. Utilize proper tennis etiquette during game play.

PACT 495 Independent Studies in Personal Activity

Units: 1 - 3
Hours: 54 - 162 hours LAB
Prerequisite: None.
Transferable: CSU; UC
General Education: AA/AS Area III(a); CSU Area E2
Catalog Date: June 1, 2020

An independent studies project involves an individual student or small group of students in study, research, or activities beyond the scope of regularly offered courses. See the current catalog section of "Special Studies" for full details of Independent Studies.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO #1: Actively engage in intellectual inquiry beyond that required in order to pass a course of study (College Wide Learning Outcome – Area 4).
- Discuss and outline a proposal of study (that can be accomplished within one semester term) with a supervising instructor qualified within the discipline.
- Design an independent study (to be completed individually or by collaboration of a small group) to foster special knowledge, skills, and experience that are not available in any one regularly scheduled course.
- Use information resources to gather discipline-specific information.
- SLO #2: Utilize modes of analysis and critical thinking to apply theoretical perspectives and/or concepts in the major discipline of study to significant problems and/or educational activities (College Wide Learning Outcome – Area 3).
- Analyze and apply the knowledge, skills and experience that are involved in the independent study to theoretical perspectives and/or concepts in the major discipline of study.
- Explain the importance of the major discipline of study in the broader picture of society.
- SLO #3: Communicate a complex understanding of content matter of the major discipline of study (College Wide Outcome – Area 3).
- Demonstrate competence in the skills essential to mastery of the major discipline of study that are necessary to accomplish the independent study.
- SLO #4: Identify personal goals and pursue these goals effectively (College Wide Outcome – Area 4).
- Utilize skills from the "academic tool kit" including time management, study skills, etc., to accomplish the independent study within one semester term.
SPORT 300 Baseball, Intercollegiate-Men

This course is for students who wish to participate in intercollegiate baseball. This course may be repeated a maximum of four times to meet California Community College Athletic Association requirements for eligibility.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO #1: Employ critical thinking skills by creating, planning, and evaluating success as participant on an athletic team.
- SLO #2: Compare advanced concepts of strategy pertaining to the game of baseball. Advanced students will be asked to assist those students with less skills and experience, and will be required to show improvement to the next level.
- SLO #3: Analyze simple game situations and apply correct strategy techniques. Advanced students will be asked to assist those students with less skills and experience, and will be required to show improvement to the next level.
- SLO #4: Prepare for successful transfer to four year institutions and participation in athletics.
- SLO #5: Identify the guidelines for academic success and athletic eligibility. Advanced students will be asked to assist those students with less skills and experience, and will be required to show improvement to the next level.
- SLO #6: Analyze baseball rules and regulations. Advanced students will be asked to assist those students with less skills and experience, and will be required to show improvement to the next level.
- SLO #7: Relate to teammates, coaches, and the competitive atmosphere in a manner that enhances their participation as well as the team environment. Develop the ability to participate in athletic competition at a high level.
- SLO #8: Experiment with basic skills in throwing, fielding, pitching, hitting and base running. Advanced students will be asked to assist those students with less skills and experience, and will be required to show improvement to the next level.
- SLO #9: Design an individual strength building through appropriate weight training for intercollegiate baseball. Advanced students will be asked to assist those students with less skills and experience, and will be required to show improvement to the next level.
- SLO #10: Examine common athletic injuries and develop injury prevention techniques. Advanced students will be asked to assist those students with less skills and experience, and will be required to show improvement to the next level.
- SLO #11: Create an atmosphere which develops responsible citizens and student athletes who represent the sport to themselves and others in a productive manner.

SPORT 301 Off Season Conditioning for Baseball

This course is designed to optimize sports performance and reduce risk of injury for the off-season intercollegiate athlete in the sport of baseball. Course content will include: sport specific skill development, sport specific strength training, cardiovascular conditioning, agility work, plyometric jump training, speed training and flexibility exercises. This course is designed to prepare students for intercollegiate baseball competition and may be repeated to meet requirements for CCCAA eligibility.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO #1: Evaluate strength and fitness levels for competition using standard fitness testing
• assess their fitness level for competition by applying the following fitness tests: body fat analysis, abdominal test, flexibility, and strength tests. Students of different levels (beginning/intermediate/advanced) will be challenged to improve their level of fitness and knowledge of conditioning concepts.

• demonstrate increased cardiovascular endurance, flexibility, strength, and muscle size. Students will be challenged to improve their level of fitness and knowledge of conditioning concepts. Advanced students will be encouraged to help the beginners.

• improve baseball fitness through weight training and aerobic conditioning. Students will be challenged to improve their level of fitness and knowledge of conditioning concepts.

• SLO #2 Identify and apply exercises used in motion as related to the sport.

• apply kinesiology principles of sport motion to the exercises needed to enhance their physical strength in that particular muscle group movement. Students be challenged to improve their level of fitness and knowledge of conditioning concepts.

• measure their improvement and apply needed resistance or intensity in order to maximize efficiency in their workout. Students will be challenged to improve their level of fitness and knowledge of conditioning concepts.

• improve in individual defensive and offensive basic skills. Students will be challenged to improve their level of fitness and knowledge of conditioning concepts.

• improve individual defense and understand its importance with regard to team defense. Students will be challenged to improve their level of fitness and knowledge of conditioning concepts.

• explain and demonstrate the defensive tactics of baseball. Students will be challenged to improve their level of fitness and knowledge of conditioning concepts.

• explain and demonstrate the offensive tactics of baseball. Students will be challenged to improve their level of fitness and knowledge of conditioning concepts.

• SLO #3 Design, implement, and evaluate a personalized training program for athletes

• describe the theory of conditioning as it relates to the development of individual programs. Students will be challenged to improve their level of fitness and knowledge of conditioning concepts.

• apply principles in cardiovascular fitness to enhance and support a training program. Students will be challenged to improve their level of fitness and knowledge of conditioning concepts.

• employ goal-setting techniques toward establishing their fitness program. Students will be challenged to improve their level of fitness and knowledge of conditioning concepts.

• SLO #4 Understand and apply safety techniques and etiquette to training.

• use proper safety procedures and techniques while training. Students will be challenged to improve their level of fitness and knowledge of conditioning concepts.

• illustrate proper etiquette and demonstrate an ability to relate to others while training. Students will be challenged to improve their level of fitness and knowledge of conditioning concepts.

SPORT 303 Pre-Season Conditioning for Baseball

0.5 - 3 Units:
27 - 162 hours LAB Hours:
None.
CSU; UC Prerequisite:
AA/AS Area III(a); CSU Area E2 Transferable:
June 1, 2020 General Education:
Catalog Date:

This course is designed to optimize sports performance and reduce risk of injury for the pre-season intercollegiate athlete in the sport of baseball. Course content includes sport-specific skill development, sport-specific strength training, cardiovascular conditioning, agility work, plyometric training, speed training, and flexibility exercises. This course designed to prepare students for participation in intercollegiate competition and may be repeated a maximum of four times to meet California Community College Athletic Association requirements for eligibility.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

• SLO #1: evaluate and improve strength and fitness levels for competition using standard fitness testing.

• assess their fitness level for competition by applying the following fitness tests: body fat analysis, abdominal test, flexibility, and strength tests.

• demonstrate increased cardiovascular endurance, flexibility, strength, and muscle size.
• improve baseball specific position-related fitness. Such as shoulder flexibility for pitchers.
• demonstrate the ability to evaluate and plan a fitness program to improve their fitness based upon needs associated with playing competitive baseball.
• SLO #2: Apply training techniques, exercises and efficiency in motion as related to the sport of baseball.
• apply principles of sport motion to the exercises needed to enhance their flexibility and physical strength in that specific muscle group.
• measure their improvement and apply needed resistance or intensity in order to maximize efficiency in their workout.
• improve individual position-specific defensive skills
• improve batting technique.
• understand and demonstrate the ability to implement effective offensive and defensive techniques and tactics in the sport of baseball.
• SLO #3 demonstrate the ability to become a productive and effective member of a team.
• problem solve in working out conflicts between individuals on the team to create a cooperative working atmosphere
• maintain composure in the face of adversity in baseball play.
• support teammates in achieving their goals on the team.

SPORT 311 Basketball, Intercollegiate-Men, Fall

Upon completion of this course, the student will be able to:

• SLO #1: prepare for successful transfer to four year institutions and participate in athletics.
• compose and demonstrate an appreciation for the sport of basketball.
• improve in advanced individual and team basketball skills.
• assess and demonstrate advanced concepts of basketball team tactics in both offense and defense.
• measure individual fitness level through conditioning for basketball.
• explain the importance of good study habits as they pertain to academic success to maintain good standing as a student and for athletic eligibility.
• design, demonstrate and practice strength building through weight training appropriate for intercollegiate basketball.
• SLO #2: develop the ability to utilize critical thinking skills, evaluate, plan and create success as participant on an athletic team.
• distinguish injury prevention techniques for common athletic injuries.
• describe and interpret basketball rules and regulations.
• explain and demonstrate the personal skills necessary to be a viable, contributing team player.
• SLO #3: relate to teammates, coaches, and the competitive atmosphere in a manner that enhances their participation as well as the team environment. Develop the ability to participate in athletic competition at a high level.
• examine and demonstrate an appreciation for the competitive nature of basketball.
• SLO #4: become a responsible, productive citizen who represents the sport to themselves and others in a productive manner.
• improve individual health habits including eating nutritiously, getting enough sleep, and avoiding negative health habits as they pertain to intercollegiate competition.
SPORT 312 Basketball, Intercollegiate-Men, Spring

This course is for students who wish to participate in intercollegiate basketball. This course may be repeated a maximum of four times to meet California Community College Athletic Association requirements for eligibility.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO #1: prepare for successful transfer to four year institutions and participate in athletics at the intercollegiate level of understanding and skill for basketball.
- compose and demonstrate an appreciation for the sport of basketball.
- improve in advanced individual and team basketball skills.
- assess and demonstrate advanced concepts of basketball team tactics in both offense and defense.
- measure individual fitness level through conditioning for basketball.
- explain the importance of good study habits as they pertain to academic success to maintain good standing as a student and for athletic eligibility.
- design, demonstrate and practice strength building through weight training appropriate for intercollegiate basketball.
- SLO #2: develop the ability to utilize critical thinking skills, evaluate, plan and create success as participant on an athletic team.
- distinguish injury prevention techniques for common athletic injuries.
- describe and interpret basketball rules and regulations.
- explain and demonstrate the personal skills necessary to be a viable, contributing team player.
- SLO #3: relate to teammates, coaches, and the competitive atmosphere in a manner that enhances their participation as well as the team environment. Develop the ability to participate in athletic competition at a high level.
- examine and demonstrate an appreciation for the competitive nature of basketball.
- SLO #4: become a responsible, productive citizen who represents the sport to themselves and others in a productive manner.
- improve individual health habits including eating nutritiously, getting enough sleep, and avoiding negative health habits as they pertain to intercollegiate competition.

SPORT 313 Off Season Conditioning for Basketball

This course is designed to prepare the collegiate basketball player for the competitive season and reduce risk of injury. Course content will include: collegiate level basketball-specific skill development, a solid aerobic conditioning plan, sport specific strength training, agility work, plyometrics, speed training and flexibility exercises as well as team play combination of activities designed to prepare the athlete both physically and mentally. This course is designed to prepare students for intercollegiate basketball competition and may be repeated a maximum of four times to meet California Community College Athletic Association requirements for eligibility.

Student Learning Outcomes
Upon completion of this course, the student will be able to:

- **SLO #1** Evaluate strength and fitness levels for competition using standard fitness testing.

  - assess their fitness level for competition by applying the following fitness tests: body fat analysis, abdominal test, flexibility, and strength tests. Students of different levels (beginning/intermediate/advanced) will be challenged to improve their level of fitness and knowledge of conditioning concepts. Advanced students will be encouraged to help the beginners.

  - demonstrate increased cardiovascular endurance, flexibility, strength, and muscle size. Students of different levels (beginning/intermediate/advanced) will be challenged to improve their level of fitness and knowledge of conditioning concepts. Advanced students will be encouraged to help the beginners.

  - improve basketball fitness through weight training and aerobic conditioning. Students of different levels (beginning/intermediate/advanced) will be challenged to improve their level of fitness and knowledge of conditioning concepts. Advanced students will be encouraged to help the beginners.

- **SLO #2** Identify and apply exercises used in motion as related to the sport.

  - apply kinesiology principles of sport motion to the exercises needed to enhance their physical strength in that particular muscle group movement. Students of different levels (beginning/intermediate/advanced) will be challenged to improve their level of fitness and knowledge of conditioning concepts. Advanced students will be encouraged to help the beginners.

  - measure their improvement and apply needed resistance or intensity in order to maximize efficiency in their workout. Students of different levels (beginning/intermediate/advanced) will be challenged to improve their level of fitness and knowledge of conditioning concepts. Advanced students will be encouraged to help the beginners.

  - improve in individual defensive and offensive basic skills. Students of different levels (beginning/intermediate/advanced) will be challenged to improve their level of fitness and knowledge of conditioning concepts. Advanced students will be encouraged to help the beginners.

  - explain and demonstrate the defensive tactics of basketball. Students of different levels (beginning/intermediate/advanced) will be challenged to improve their level of fitness and knowledge of conditioning concepts. Advanced students will be encouraged to help the beginners.

  - explain and demonstrate the offensive tactics of basketball. Students of different levels (beginning/intermediate/advanced) will be challenged to improve their level of fitness and knowledge of conditioning concepts. Advanced students will be encouraged to help the beginners.

- **SLO #3** Design, implement, and evaluate a personalized training program for athletes.

  - describe the theory of conditioning as it relates to the development of individual programs. Students of different levels (beginning/intermediate/advanced) will be challenged to improve their level of fitness and knowledge of conditioning concepts. Advanced students will be encouraged to help the beginners.

  - apply principles in cardiovascular fitness to enhance and support a training program. Students of different levels (beginning/intermediate/advanced) will be challenged to improve their level of fitness and knowledge of conditioning concepts. Advanced students will be encouraged to help the beginners.

  - employ goal-setting techniques toward establishing their fitness program. Students of different levels (beginning/intermediate/advanced) will be challenged to improve their level of fitness and knowledge of conditioning concepts. Advanced students will be encouraged to help the beginners.

- **SLO #4** Understand and apply safety techniques and training etiquette to training.

  - use proper safety procedures and techniques while training. Students of different levels (beginning/intermediate/advanced) will be challenged to improve their level of fitness and knowledge of conditioning concepts. Advanced students will be encouraged to help the beginners.

  - illustrate proper etiquette and demonstrate an ability to relate to others while training. Students of different levels (beginning/intermediate/advanced) will be challenged to improve their level of fitness and knowledge of conditioning concepts. Advanced students will be encouraged to help the beginners.

**SPORT 314 Pre-Season Conditioning for Basketball**
This course is designed to prepare the collegiate basketball player for the competitive season and reduce risk of injury. Course content will include: collegiate level basketball-specific skill development, a solid aerobic conditioning plan, sport specific strength training, agility work, plyometrics, speed training and flexibility exercises as well as team play combination of activities designed to prepare the athlete both physically and mentally. This course is designed to prepare students for intercollegiate basketball competition and may be repeated a maximum of four times to meet California Community College Athletic Association requirements for eligibility.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- **SLO #1** Evaluate strength and fitness levels for competition using standard fitness testing.
- **SLO #2** Identify and apply exercises used in motion as related to the sport.
- **SLO #3** Design, implement, and evaluate a personalized training program for athletes.
- **SLO #4** Understand and apply safety techniques and training etiquette to training.

- assess their fitness level for competition by applying the following fitness tests: body fat analysis, abdominal test, flexibility, and strength tests. Students of different levels (beginning/intermediate/advanced) will be challenged to improve their level of fitness and knowledge of conditioning concepts. Advanced students will be encouraged to help the beginners.
- demonstrate increased cardiovascular endurance, flexibility, strength, and muscle size. Students of different levels (beginning/intermediate/advanced) will be challenged to improve their level of fitness and knowledge of conditioning concepts. Advanced students will be encouraged to help the beginners.
- improve basketball fitness through weight training and aerobic conditioning. Students of different levels (beginning/intermediate/advanced) will be challenged to improve their level of fitness and knowledge of conditioning concepts. Advanced students will be encouraged to help the beginners.
- **SLO #2** Identify and apply exercises used in motion as related to the sport.
- apply kinesiology principles of sport motion to the exercises needed to enhance their physical strength in that particular muscle group movement. Students of different levels (beginning/intermediate/advanced) will be challenged to improve their level of fitness and knowledge of conditioning concepts. Advanced students will be encouraged to help the beginners.
- measure their improvement and apply needed resistance or intensity in order to maximize efficiency in their workout. Students of different levels (beginning/intermediate/advanced) will be challenged to improve their level of fitness and knowledge of conditioning concepts. Advanced students will be encouraged to help the beginners.
- improve in individual defensive and offensive basic skills. Students of different levels (beginning/intermediate/advanced) will be challenged to improve their level of fitness and knowledge of conditioning concepts. Advanced students will be encouraged to help the beginners.
- improve individual defense and understand its importance with regard to team defense. Students of different levels (beginning/intermediate/advanced) will be challenged to improve their level of fitness and knowledge of conditioning concepts. Advanced students will be encouraged to help the beginners.
- explain and demonstrate the defensive tactics of basketball. Students of different levels (beginning/intermediate/advanced) will be challenged to improve their level of fitness and knowledge of conditioning concepts. Advanced students will be encouraged to help the beginners.
- explain and demonstrate the offensive tactics of basketball. Students of different levels (beginning/intermediate/advanced) will be challenged to improve their level of fitness and knowledge of conditioning concepts. Advanced students will be encouraged to help the beginners.
- describe the theory of conditioning as it relates to the development of individual programs. Students of different levels (beginning/intermediate/advanced) will be challenged to improve their level of fitness and knowledge of conditioning concepts. Advanced students will be encouraged to help the beginners.
- apply principles in cardiovascular fitness to enhance and support a training program. Students of different levels (beginning/intermediate/advanced) will be challenged to improve their level of fitness and knowledge of conditioning concepts. Advanced students will be encouraged to help the beginners.
- employ goal-setting techniques toward establishing their fitness program. Students of different levels (beginning/intermediate/advanced) will be challenged to improve their level of fitness and knowledge of conditioning concepts. Advanced students will be encouraged to help the beginners.
- **SLO #4** Understand and apply safety techniques and training etiquette to training.
• Use proper safety procedures and techniques while training. Students of different levels (beginning/intermediate/advanced) will be challenged to improve their level of fitness and knowledge of conditioning concepts. Advanced students will be encouraged to help the beginners.

• Illustrate proper etiquette and demonstrate an ability to relate to others while training. Students of different levels (beginning/intermediate/advanced) will be challenged to improve their level of fitness and knowledge of conditioning concepts. Advanced students will be encouraged to help the beginners.

SPORT 316 Basketball, Intercollegiate-Women, Fall

This course is designed to increase sport performance and overall understanding of women's intercollegiate basketball concepts and strategic philosophies. Course content will include: collegiate level basketball-specific skill development, collegiate level offensive and defensive concepts, team specific basketball fundamentals, Team specific drills for individual improvement and sport specific agility work, plyometrics and speed training. This course is designed to prepare students for participation in intercollegiate competition and may be repeated a maximum of four times to meet California Community College Athletic Association requirements for eligibility.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO #1: Assess various practice situations and apply appropriate solution.
- Establish a pre/mid/post evaluation of practice and game situations.
- SLO #2: Demonstrate proper technique in sport-specific fundamentals.
- Measure improvements in techniques related to basketball skills such as dribbling, passing, shooting and defensive positioning.
- SLO #3: Demonstrate proper weight lifting techniques that are sport-specific to basketball.
- Maintain a weight lifting log to see the progression of strength throughout the class.
- Pre and post testing of weight lifting techniques will be given to see the progression of each student.
- SLO #4: Demonstrate proper body movement and control as it pertains to agility and footwork through basketball movements.
- Assessment will be given through scrimmage situations to help evaluate proper agility and footwork.

SPORT 350 Soccer, Intercollegiate-Men
Student Learning Outcomes

Upon completion of this course, the student will be able to:

- **SLO #1:** Apply and demonstrate an understanding of the technical knowledge of soccer.
  - Analyze and employ the correct technique for passing in the game of soccer.
  - Analyze and execute the correct technique for receiving in the game of soccer.
  - Analyze and execute the correct technique for shooting in the game of soccer.
  - Analyze and execute the correct technique for crossing in the game of soccer.
  - Analyze and execute the correct technique for dribbling in the game of soccer.
  - Analyze and execute the correct technique for trapping in the game of soccer.

- **SLO #2:** Apply and demonstrate an understanding of tactical knowledge of the game of soccer.
  - Analyze and execute a possession oriented offense.
  - Analyze and execute a playing out of the defensive third.
  - Analyze and execute playing through the middle third of the field.
  - Analyze and execute attacking third options and possibilities.
  - Analyze and execute the functional responsibilities of their positions.
  - Evaluate and solve soccer problems through tactical awareness and knowledge.
  - Analyze situations on the field and make the correct choice with the ball at the correct time.
  - Analyze and execute set plays both offensively and defensively.
  - Evaluate a correct response based on the strengths and weaknesses of the opponent.
  - Evaluate how to analyze a game both pre- and post-competition.

- **SLO #3:** Apply and demonstrate the physical skills that are required in the game of soccer.
  - Apply the process for acquiring appropriate fitness levels for intercollegiate soccer competition.
  - Recognize the difference between aerobic and anaerobic fitness as it pertains to their individual fitness levels.
  - Recognize the value of power, strength, speed and agility for the game of soccer.

- **SLO #4:** Apply and demonstrate the psychological skills needed in the game of soccer.
  - Demonstrate and execute visualization exercises.
  - Demonstrate and execute self control.
  - Demonstrate and execute mental toughness.
  - Value and demonstrate self confidence.
  - Value team confidence.
  - Analyze the four moments of the game; attacking, defending, transition and set plays.
This course is designed to prepare the collegiate soccer player for the competitive season and reduce the risk of injury. Course content will include: collegiate level soccer-specific skill and tactical development, a solid aerobic conditioning plan, sport specific strength training, agility work, plyometrics, speed training and flexibility exercises as well as team play combination of activities designed to prepare the athlete both physically and mentally. This course is designed to prepare students for intercollegiate soccer competition and may be repeated to meet requirements for CCCAA eligibility.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO #1 Evaluate strength and fitness levels for competition using standard fitness testing.
- assess their fitness level for competition by applying the following fitness tests: body fat analysis, abdominal seat, flexibility, and strength tests. Students will be challenged to improve their level of fitness and knowledge of conditioning concepts.
- demonstrate increased cardiovascular endurance, flexibility, strength, and muscle size. Students will be challenged to improve their level of fitness and knowledge of conditioning concepts.
- improve soccer fitness through weight training and aerobic conditioning. Students will be challenged to improve their level of fitness and knowledge of conditioning concepts. Advanced students will be encouraged to help the beginners.
- SLO #2 Identify and apply exercises used in motion as related to the sport.
- apply kinesiology principles of sport motion to the exercises needed to enhance their physical strength in that particular muscle group movement. Students will be challenged to improve their level of fitness and knowledge of conditioning concepts.
- measure their improvement and apply needed resistance or intensity in order to maximize efficiency in their workout. Students will be challenged to improve their level of fitness and knowledge of conditioning concepts.
- improve in individual defensive and offensive basic skills. Students will be challenged to improve their level of fitness and knowledge of conditioning concepts.
- SLO #3 Design, implement, and evaluate a personalized training program for athletes.
- describe the theory of conditioning as it relates to the development of individual programs. Students will be challenged to improve their level of fitness and knowledge of conditioning concepts.
- apply principles in cardiovascular fitness to enhance and support a training program. Students will be challenged to improve their level of fitness and knowledge of conditioning concepts.
- employ goal-setting techniques toward establishing their fitness program. Students will be challenged to improve their level of fitness and knowledge of conditioning concepts.
- use proper safety procedures and techniques while training. Students will be challenged to improve their level of fitness and knowledge of conditioning concepts.
- illustrate proper etiquette and demonstrate an ability to relate to others while training. Students will be challenged to improve their level of fitness and knowledge of conditioning concepts.

SPORT 352 Off-Season Conditioning for Women's Soccer

Units: 0.5 - 3
Hours: 27 - 162 hours LAB
Prerequisite: None.
Transferable: CSU; UC
General Education: AA/AS Area III(a); CSU Area E2
Catalog Date: June 1, 2020

The student must demonstrate intercollegiate athletic soccer skills as determined by a try-out conducted by the coaching staff to remain in the course.

The student must demonstrate intercollegiate athletic soccer skills as determined by a try-out conducted by the coaching staff to remain in the course.
This course covers off-season training and conditioning skills and techniques specific for intercollegiate soccer. Topics include skill development, strength training, cardiovascular conditioning, and speed training. Students will need to provide themselves with appropriate soccer attire, soccer cleats, and shin guards. This course may be repeated a maximum of four times to meet California Community College Athletic Association requirements for eligibility.

### Student Learning Outcomes

Upon completion of this course, the student will be able to:

- **SLO #1**: Evaluate strength and fitness levels for competition using standard fitness testing.
  - assess their fitness level for competition by applying the following fitness tests: body fat analysis, abdominal seat, flexibility, and strength tests. Students will be challenged to improve their level of fitness and knowledge of conditioning concepts.
  - demonstrate increased cardiovascular endurance, flexibility, strength, and muscle size. Students will be challenged to improve their level of fitness and knowledge of conditioning concepts.
  - improve soccer fitness through weight training and aerobic conditioning. Students will be challenged to improve their level of fitness and knowledge of conditioning concepts. Advanced students will be encouraged to help the beginners.

- **SLO #2**: Identify and apply exercises used in motion as related to the sport.
  - apply kinesiology principles of sport motion to the exercises needed to enhance their physical strength in that particular muscle group movement. Students will be challenged to improve their level of fitness and knowledge of conditioning concepts.
  - measure their improvement and apply needed resistance or intensity in order to maximize efficiency in their workout. Students will be challenged to improve their level of fitness and knowledge of conditioning concepts.
  - improve in individual defensive and offensive basic skills. Students will be challenged to improve their level of fitness and knowledge of conditioning concepts.
  - improve individual defense and understand its importance with regard to team defense. Students will be challenged to improve their level of fitness and knowledge of conditioning concepts. Advanced students will be encouraged to help the beginners.

- **SLO #3**: Design, implement, and evaluate a personalized training program for athletes.
  - describe the theory of conditioning as it relates to the development of individual programs. Students will be challenged to improve their level of fitness and knowledge of conditioning concepts.
  - apply principles in cardiovascular fitness to enhance and support a training program. Students will be challenged to improve their level of fitness and knowledge of conditioning concepts.
  - employ goal-setting techniques toward establishing their fitness program. Students will be challenged to improve their level of fitness and knowledge of conditioning concepts.
  - use proper safety procedures and techniques while training. Students will be challenged to improve their level of fitness and knowledge of conditioning concepts.
  - illustrate proper etiquette and demonstrate an ability to relate to others while training. Students will be challenged to improve their level of fitness and knowledge of conditioning concepts.

This course is for students who wish to participate in intercollegiate soccer. This course may be repeated a maximum of four times to meet California Community College Athletic Association requirements for eligibility.

### Student Learning Outcomes

Upon completion of this course, the student will be able to:

- **SLO #1**: Apply and demonstrate an understanding of the technical knowledge of soccer.
  - Recognize and execute the correct technique for passing in the game of soccer.
SPORT 357 Pre-Season Conditioning For Women's Soccer

Units: 0.5 - 3
Hours: 27 - 162 hours LAB
Prerequisite: None.
Transferable: CSU; UC (All PE Activity courses: combined maximum transfer credit, 4 units)
General Education: AA/AS Area III(a); CSU Area E2
Catalog Date: June 1, 2020

This course is designed to increase sport performance and overall understanding of intercollegiate soccer concepts and strategic philosophies. Course content will include: collegiate level soccer-specific skill development, collegiate level offensive and defensive concepts, team specific soccer fundamentals, team specific drills for individual improvement and sport specific agility work, plyometrics and speed training. This course is designed to prepare students for intercollegiate soccer competition and may be repeated a maximum of four times to meet California Community College Athletic Association requirements for eligibility.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- Assess various practice situations and apply appropriate solutions (SLO 1)
Demonstrate and apply intercollegiate offensive and defensive philosophies (SLO 2)
Demonstrate proper technique in sport-specific fundamentals
Demonstrate an improved level of agility and speed training

SPORT 358 Pre-Season Conditioning for Men's Soccer

Units: 0.5 - 3
Hours: 27 - 162 hours LAB
Prerequisite: None.
Transferable: CSU; UC (All PE activity courses combined: maximum credit, 4 units)
General Education: AA/AS Area III(a); CSU Area E2
Catalog Date: June 1, 2020

This course is designed to increase sport performance and overall understanding of intercollegiate soccer concepts and strategic philosophies. Course content will include: collegiate level soccer-specific skill development, collegiate level offensive and defensive concepts, team specific soccer fundamentals, Team specific drills for individual improvement and sport specific agility work, plyometrics and speed training. This course may be repeated a maximum of four times to meet California Community College Athletic Association requirements for eligibility.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO #1: Apply and demonstrate proper footwork techniques specific to soccer.
- Analyze and employ the proficient advanced technique for dribbling in the game of soccer.
- Analyze and employ the proficient advanced technique for passing in the game of soccer.
- Analyze and employ the proficient advanced technique for receiving in the game of soccer.
- Analyze and employ the proficient advanced technique for crossing in the game of soccer.
- Analyze and employ the proficient advanced technique for shooting in the game of soccer.
- SLO #2: Apply and demonstrate endurance and strength needed in order to be competitive in soccer.
- Analyze and execute proficiently the training concepts for aerobic base training.
- Analyze and execute proficiently the training concepts for high intensity aerobic training.
- Analyze and execute proficiently the training concepts for speed endurance training.
- Analyze and execute proficiently the training concepts for speed training.
- Analyze and execute proficiently the training concepts for strength training.
- Analyze and execute proficiently the training concepts for core strength training.
- SLO #3: Apply and demonstrate proper form and techniques when executing various drills for soccer.
- Analyze and execute proficiently the technical concepts for training offense.
- Analyze and execute proficiently the technical concepts for training defense.
- Analyze and execute proficiently the technical concepts for training transition to offense.
- Analyze and execute proficiently the technical concepts for training transition to defense.
- SLO #4: Apply and demonstrate appropriate warm up and cool down procedures for injury prevention.
- Analyze and execute proficiently the training concepts for static warm ups and cooldowns.
- Analyze and execute proficiently the training concepts for dynamic warm ups and cooldowns.
- Analyze and execute proficiently the training concepts for neuromuscular control and balance.
- Analyze and execute proficiently the training concepts for plyometrics and agility.
- SLO #5: Apply and demonstrate proper technique in agility training.
- Analyze and execute proficiently the training concepts for agility training.
- Analyze and execute proficiently the training concepts for balance training.
- Analyze and execute proficiently the training concepts for coordination training.

**SPORT 365 Softball, Intercollegiate-Women**

Units: 3  
Hours: 175 hours LAB  
Prerequisite: None.  
Transferable: CSU; UC  
General Education: AA/AS Area III(a); CSU Area E2  
Catalog Date: June 1, 2020

This course is for students who wish to participate in intercollegiate softball. This course may be repeated a maximum of four times to meet California Community College Athletic Association requirements for eligibility.

**Student Learning Outcomes**

Upon completion of this course, the student will be able to:

- SLO #1: Develop the ability to utilize critical thinking skills, evaluate, plan, and create success as a participant on an athletic team.
- demonstrate knowledge of fast pitch softball rules.
- understand and apply strategies, both offensively and defensively, in competitive situations.
- SLO #2: Prepare for successful transfer to four year institutions and participate in athletics.
- identify the guidelines for academic success and athletic eligibility.
- SLO #3: Relate to teammates, coaches and the competitive atmosphere in a manner that enhances their participation as well as the team environment. Develop the ability to participate in athletic competition at a high level.
- improve both individual skill levels and team softball skills.
- evaluate and measure the skill levels, strengths, and weaknesses of other teams, in order to prepare for upcoming contests.
- apply off-season conditioning and strength training principles to the competitive environment.
- SLO #4: Become a responsible, productive citizen who represents the sport to themselves and others in a productive manner.
- examine the values of teamwork and demonstrate strategies to improve team cohesiveness and camaraderie.

**SPORT 366 Off Season Conditioning for Softball**

Units: 0.5 - 3  
Hours: 54 - 162 hours LAB  
Prerequisite: None.  
Enrollment Limitation: It is advised that athletes taking this course have participated at the varsity level in high school or competed on a summer travel ball team.  
Transferable: CSU; UC  
General Education: AA/AS Area III(a); CSU Area E2  
Catalog Date: June 1, 2020

This physical education course involves a combination of basic skills and strategy tactics with an emphasis on a fitness component for the sport of softball. The course will also offer a mental training component for peak performance. This course is designed to prepare students for intercollegiate softball competition and may be repeated a maximum of four times to meet California Community College Athletic Association requirements for eligibility.

**Student Learning Outcomes**

Upon completion of this course, the student will be able to:

- SLO #1: Demonstrate and increase proper muscular strength and endurance and cardiovascular endurance specific to the sport of softball.
- Perform weight lifting and/or body lifting techniques, develop core strengthening and flexibility. Apply and demonstrate speed, agility, and endurance training for the sport of softball.
• SLO #2 Comprehend, analyze and execute the basic fundamental skills as it relates to the sport of softball.

• Understand and properly perform the basic fundamentals of offense which consists of: • base-running; lead-offs and jumps, rounding bases, steals, tags, sliding • short game; bunts: sacrifice, sneaky, squeeze, fake slap sacrifice, slaps: left handed and right handed • hitting: proper stance, mechanics and handling of the bat, contact points, balance, extension

• Understand and properly perform the basic fundamentals of defense which consists of: • throwing; overhead, ¾, side arm, underhand tosses, crow hops, quick-hands • fielding: ground balls, fly balls, back hands, forehands, line drives, bunt pick up, short hops • pitching: proper grip and spins for fast ball, change up, drop, rise, curve, screw • catching: receiving, framing, blocking

• SLO #3 Combine the basic softball skills and distinguish which skills are most appropriate for specific softball game situations and apply the appropriate solutions.

• Understand and properly perform the fundamentals and strategy for the middle infield and corner position play which consists of:
  - steal coverage, position play dependent on batters, rundown, relay, bag coverage, tags vs. force outs, throws and catches on the run, communication between fielders, 1st and 3rd situations, slap defense, pick offs, back ups etc.
  - understanding and performing offensive situational play and strategies which consist of: hit and runs, bunt and runs, delay and straight steals, distinguishing out situations, squeeze, sacrifice, sneaky, slap placement, reading hit ball situations, tag ups, identify, recall and apply signs to each situation.

• SLO #4 Evaluate and perform peak performance techniques relevant to softball.

• Identify and formulate appropriate goals for softball skills and personal improvement. Recognize and become aware of self-talk, non-verbal language and the elements in one’s control. Employ and demonstrate the proper refocus techniques and perform a personally constructed routine to aid in refocusing for peak performance.

• SLO #5 Identify and develop ways to support, lead, and communicate amongst teammates in order for the team to succeed as a unit towards a common goal.

• Develop listening skills and provide feedback to coaches and teammates while performing basic softball skills, game strategy and the mental game. Demonstrate proper etiquette and sportsmanship during practice and competition. Participate in and contribute to team building activities.

SPORT 368 Pre-Season Conditioning for Softball

Units: 0.5
Hours: 27 hours LAB
Prerequisite: None.
Enrollment Limitation: Once enrolled, the student must demonstrate intercollegiate athletic skills as determined by the coaching staff to remain enrolled in this course. It is advised that athletes taking this course have participated at the varsity level in high school or competed on a summer travel ball team.
Transferable: CSU; UC
General Education: AA/AS Area III(a); CSU Area E2
Catalog Date: June 1, 2020

This physical education course involves a combination of basic skills and strategy tactics with an emphasis on a fitness component for the sport of softball. Student Learning Outcomes

Upon completion of this course, the student will be able to:

• SLO #1 Demonstrate and increase proper muscular strength and endurance and cardiovascular endurance specific to the sport of softball.

• Perform weight lifting and/or body lifting techniques, develop core strengthening and flexibility. Apply and demonstrate speed, agility, and endurance training for the sport of softball.

• SLO #2 Comprehend, analyze and execute the basic fundamental skills as it relates to the sport of softball.
Understand and properly perform the basic fundamentals of offense which consists of: • base-running; lead-offs and jumps, rounding bases; steals, tags, sliding; short game; bunts: sacrifice, sneaky, squeeze, fake slap sacrifice, slaps: left handed and right handed; hitting: proper stance, mechanics and handling of the bat, contact points, balance, extension

Understand and properly perform the basic fundamentals of defense which consists of: • throwing: overhand, ¾, side arm, underhand tosses, crow hops, quick-hands • fielding: ground balls, fly balls, back hands, forehands, line drives, bunt pick up, short hops • pitching: proper grip and spins for fast ball, change up, drop, rise, curve, screw • catching: receiving, framing, blocking

SLO #3 Combine the basic softball skills and distinguish which skills are most appropriate for specific softball game situations and apply the appropriate solutions.

Understand and properly perform the fundamentals and strategy for the middle infield and corner position play which consists of: steal coverage, position play dependent on batters, rundowns, relay, bag coverage, tags vs. force outs, throws and catches on the run, communication between fielders, 1st and 3rd situations, slap defense, pick offs, back-ups etc.

Understand and properly perform the basic fundamentals and strategy for left, center, and right field position play which consists of: reading the play, cutting angles, backing up bases, diving, relays, differentiating ground ball tactics according to the situation, communication between fielders, slap defense etc.

Understand and properly perform strategy and play for the catching position which consists of: • reading relays, calling pitches, dealing with 1st and 3rds, steals, squeezes, sacrifices, rundown, pick-offs, pitch outs, base coverage, tags etc.

Understand and properly perform strategy and play for the pitching position which consists of back-ups, moving the ball, reading signs, bag coverage, legal vs. non-legal pitches, reading bunt situations, pitch-outs and tags.

Understand and properly perform offensive situational play and strategies which consist of: hit and runs, bunt and runs, delay and straight steals, distinguishing out situations, squeeze, sacrifice, sneaky, slap placement, reading hit ball situations, tag ups, identify, recall and apply signs to each situation.

SLO #4 Evaluate and perform peak performance techniques relevant to softball.

Identify and formulate appropriate goals for softball skills and personal improvement. Recognize and become aware of self-talk, non-verbal language and the elements in ones control. Employ and demonstrate the proper refocus techniques and perform a personally constructed routine to aid in refocusing for peak performance.

SLO #5 Identify and develop ways to support, lead, and communicate amongst teammates in order for the team to succeed as a unit towards a common goal.

Develop listening skills and provide feedback to coaches and teammates while performing basic softball skills, game strategy and the mental game.

Demonstrate proper etiquette and sportsmanship during practice and competition. Participate in and contribute to team building activities.

SPORT 375 Swimming and Diving, Intercollegiate-Women

Units: 3
Hours: 175 hours LAB
Prerequisite: None.
Enrollment Limitation: Once enrolled, the student must demonstrate intercollegiate athletic skills as determined by the coaching staff to remain enrolled in this course
Transferable: CSU; UC (All PE Activity courses: combined maximum transfer credit, 4 units)
General Education: AA/AS Area III(a); CSU Area E2
Catalog Date: June 1, 2020

This is an advanced swimming and diving activity course that provides competition with other community college teams. Fundamentals, rules, team strategy, and aquatic skills appropriate to intercollegiate athletic competition are expected of competitors. This course is designed to prepare students for intercollegiate competition and may be repeated a maximum of four times to meet California Community College Athletic Association requirements for eligibility.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO #1: Develop the ability to utilize critical thinking skills, evaluate, plan and create success as a participant on an athletic team.
- improve in advanced swimming skills.
- explain and demonstrate advanced concepts in swimming technique.
- improve individual fitness level through conditioning for swimming.
- explain and demonstrate the personal skills necessary to be a viable, contributing team player.
**SPORT 376 Off Season Swim & Dive**

- **Units:** 0.5 - 3
- **Hours:** 27 - 162 hours LAB
- **Prerequisite:** None.
- **Enrollment Limitation:** Once enrolled, the student must demonstrate intercollegiate athletic skills as determined by the coaching staff to remain enrolled in this course.
- **Transferable:** CSU; UC (All PE Activity courses: combined maximum transfer credit, 4 units)
- **General Education:** AA/AS Area III(a); CSU Area E2
- **Catalog Date:** June 1, 2020

This course combines basic skills and stroke technique with an emphasis on a fitness component for the sport of swim and dive. It also offers a dry-land training component for peak performance. This course is designed to prepare students for intercollegiate swim and dive competition. This course is designed to prepare students for intercollegiate competition and may be repeated a maximum of four times to meet California Community College Athletic Association requirements for eligibility. The participant must adhere to CCCAA eligibility requirements.

**Student Learning Outcomes**

Upon completion of this course, the student will be able to:

- **SLO #1** Evaluate strength and fitness levels for competition using standard fitness testing.
- **SLO #2** Identify and apply exercises used in motion as related to the sport.
- **SLO #3** Design, implement, and evaluate a personalized training program for athletes.
- **SLO #4** Understand and apply safety techniques and training etiquette to training.

- **SLO #1:** Evaluate strength and fitness levels for competition using standard fitness testing.
  - assess their fitness level for competition by applying the following fitness tests: body fat analysis, abdominal test, flexibility, and strength tests. Students will be challenged to improve their level of fitness and knowledge of conditioning concepts.
  - demonstrate increased cardiovascular endurance, flexibility, strength, and muscle size. Students will again be challenged to improve their level of fitness and knowledge of conditioning concepts.
  - **SLO #2:** Identify and apply exercises used in motion as related to the sport.
  - apply and demonstrate speed, agility, and endurance training to the sport of swim and dive.
  - apply kinesiology principles of sport motion to the exercises needed to enhance their physical strength in that particular muscle group movement.
  - measure their improvement and apply needed resistance or intensity in order to maximize efficiency in their workout.
  - improve in their swimming technique to maximize efficiency and speed.
  - **SLO #3:** Design, implement, and evaluate a personalized training program for athletes.
  - describe the theory of conditioning as it relates to the development of individual programs.
  - apply principles in cardiovascular fitness to enhance and support a training program.
  - employ goal-setting techniques toward establishing their fitness program.
  - **SLO #4:** Understand and apply safety techniques and training etiquette to training.
  - use proper safety procedures and techniques while training.

- Employ goal-setting techniques toward establishing their fitness program.
- SLO #4 Understand and apply safety techniques and training etiquette to training.
- Use proper safety procedures and techniques while training.
- Illustrate proper etiquette and demonstrate an ability to relate to others while training.

SPORT 380 Tennis, Intercollegiate-Men

### Units:
3

### Hours:
175 hours LAB

### Prerequisite:
None.

### Advisory:
Athletes are expected to have high school experience.

### Transferable:
CSU; UC (All PE Activity courses: combined maximum transfer credit, 4 units)

### General Education:
AA/AS Area III(a); CSU Area E2

### Catalog Date:
June 1, 2020

This course covers fundamentals, rules, and individual and/or team strategy appropriate to intercollegiate athletic competition in tennis. It may be repeated a maximum of four times to meet California Community College Athletic Association requirements for eligibility.

### Student Learning Outcomes

Upon completion of this course, the student will be able to:

- Illustrate proper etiquette and demonstrate an ability to relate to others while training.
SLO#1 Students will apply and demonstrate an understanding of the technical knowledge of tennis
   - Demonstrate and execute a fundamental forehand stroke
   - Demonstrate and execute a fundamental backhand stroke
   - Demonstrate and execute a fundamental approach shot
   - Demonstrate and execute a fundamental volley and half volley
   - Demonstrate and execute a fundamental overhead
   - Demonstrate and execute a variety of serves including flat, slice, and kick serve.
   - Demonstrate and execute a variety of defensive strokes including lob and slice
   - Demonstrate consistency and accuracy utilizing all of the fundamental strokes in a variety of capacities
SLO#2 Students will apply and demonstrate an understanding of the tactical strategies in tennis for both singles and doubles play.
   - Recognize ball and court relationship relative to the highest percentage shot available
   - Understand how to set up a point both as a server and a returner
   - Improve position relative ball placement
   - Understand strategy relative to score and situation and make the correct play at the correct time
   - Evaluate opponent's strengths and weaknesses and make correct adjustments
   - Correctly execute offensive and defensive shots and movements at appropriate times
   - Execute plays, both singles and doubles, which gain tactical and psychological advantage
   - Formulate pre-game strategies, and analyze and summarize post game experiences
SLO#3 Relate to teammates, coaches, and opponents in a manner that enhances their participation as well as the overall team experience.
   - Understand positive reinforcement and utilize opportunities in matches and practices to support teammates
   - Evaluate emotional demeanor and utilize strategies to stay under control
   - Be gracious in both victory and defeat

SPORT 385 Tennis, Intercollegiate-Women

Units: 3
Hours: 175 hours LAB

SPORT 386 Off Season Conditioning for Tennis

Units: 0.5 - 3
Hours: 27 - 162 hours LAB
Prerequisite: None.
Transferable: CSU; UC
General Education: AA/AS Area III(a); CSU Area E2
Catalog Date: June 1, 2020

This course is designed to prepare the intercollegiate tennis player for the competitive season and reduce the risk of injury. Course content will include intercollegiate level tennis-specific skill development, a solid aerobic conditioning plan, sport specific - strength training, agility work, plyometrics, speed training and flexibility exercises and other activities designed to prepare the athlete both physically and mentally. This course is designed to prepare students for intercollegiate tennis competition and may be repeated to meet requirements for CCCAA eligibility.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO #1 Evaluate strength and fitness levels for competition using standard fitness testing.
- Assess their fitness level for competition by applying the following fitness tests: body fat analysis, abdominal test, flexibility, and strength tests. Students of different levels (beginning/intermediate/advanced) will be challenged to improve their level of fitness and knowledge of conditioning concepts.
- Demonstrate increased cardiovascular endurance, flexibility, strength, and muscle size. Students challenged to improve their level of fitness and knowledge of conditioning concepts.
- Improve tennis fitness through weight training and aerobic conditioning. Students will be challenged to improve their level of fitness and knowledge of conditioning concepts.
- SLO #2 Identify and apply exercises used in motion as related to the sport.
- Apply principles of kinesiology to the exercises needed to enhance their physical strength in that particular muscle group movement. Students of different levels (beginning/intermediate/advanced) will be challenged to improve their level of fitness and knowledge of conditioning concepts. Advanced students will be encouraged to help the beginners.
- Measure improvement and apply needed resistance or intensity in order to maximize efficiency in workouts. Students of different levels (beginning/intermediate/advanced) will be challenged to improve their level of fitness and knowledge of conditioning concepts. Advanced students will be encouraged to help the beginners.
improve in execution of basic fundamental skills. Students of different levels (beginning/intermediate/advanced) will be challenged to improve their level of fitness and knowledge of conditioning concepts. Advanced students will be encouraged to help the beginners.

Perform and execute various baseline shots directed to specific targets on the court. Students of different levels (beginning/intermediate/advanced) will be challenged to improve their level of fitness and knowledge of conditioning concepts. Advanced students will be encouraged to help the beginners.

explain and demonstrate tactics and strategies as they relate to both singles and doubles play. Students will be challenged to improve their level of fitness and knowledge of conditioning concepts. Advanced students will be encouraged to help the beginners.

explain and demonstrate the defensive strategies and tactics as they relate to successful tennis. Students of different levels (beginning/intermediate/advanced) will be challenged to improve their level of fitness and knowledge of conditioning concepts. Advanced students will be encouraged to help the beginners.

SLO #3 Design, implement, and evaluate a personalized training program for athletes.

describe the theory of conditioning as it relates to the development of individual programs. Students of different levels (beginning/intermediate/advanced) will be challenged to improve their level of fitness and knowledge of conditioning concepts. Advanced students will be encouraged to help the beginners.

apply principles in cardiovascular fitness to enhance and support a training program. Students of different levels (beginning/intermediate/advanced) will be challenged to improve their level of fitness and knowledge of conditioning concepts. Advanced students will be encouraged to help the beginners.

employ goal-setting techniques toward establishing their fitness program. Students of different levels (beginning/intermediate/advanced) will be challenged to improve their level of fitness and knowledge of conditioning concepts. Advanced students will be encouraged to help the beginners.

SLO #4 Understand and apply safety techniques and training etiquette to training.

use proper safety procedures and techniques while training. Students of different levels (beginning/intermediate/advanced) will be challenged to improve their level of fitness and knowledge of conditioning concepts. Advanced students will be encouraged to help the beginners.

illustrate proper etiquette and demonstrate an ability to relate to others while training. Students of different levels (beginning/intermediate/advanced) will be challenged to improve their level of fitness and knowledge of conditioning concepts. Advanced students will be encouraged to help the beginners.

SPORT 403 Pre-Season Conditioning for Volleyball

Units: 0.5 - 3
Hours: 27 - 162 hours LAB
Prerequisite: None.
Enrollment Limitation: Once enrolled, the student must demonstrate intercollegiate athletic skills as determined by the coaching staff to remain enrolled in this course. It is advised that athletes taking this course have participated at the varsity level in high school or competed on a club volleyball team.

Transferable: CSU; UC (All PE Activity courses: combined maximum transfer credit, 4 units)
General Education: AA/AS Area III(a); CSU Area E2
Catalog Date: June 1, 2020

This course involves a combination of skill development and tactical strategies with an emphasis on a fitness component for the sport of volleyball. The course will also offer a mental training component for peak performance. This course is designed to prepare students for intercollegiate volleyball competition and may be taken a maximum of four times to meet California Community College Athletic Association requirements for eligibility.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO #1 Evaluate strength and fitness levels for competition using standard fitness testing.
- assess their fitness level for competition by applying the following fitness tests: body fat analysis, abdominal test, flexibility, and strength tests.
- demonstrate increased cardiovascular endurance, flexibility, strength, and muscle size.
- improve volleyball fitness through weight training and aerobic conditioning.
- Students of different levels (beginning/intermediate/advanced) will be challenged to improve their level of fitness and knowledge of conditioning concepts.
Advanced students will be encouraged to help the beginners.

- SLO #2 Identify and apply exercises used in motion as related to the sport.
- apply principles of sport motion to the exercises needed to enhance their physical strength in that particular muscle group movement.
- measure their improvement and apply needed resistance or intensity in order to maximize efficiency in their workout.
- improve in individual defensive and offensive basic skills.
- improve individual defense and understand its importance with regard to team defense.
- explain and demonstrate the defensive tactics of volleyball.
- explain and demonstrate the offensive tactics of volleyball.
- Students of different levels (beginning/intermediate/advanced) will be challenged to improve their level of fitness and knowledge of conditioning concepts. Advanced students will be encouraged to help the beginners.

SPORT 405 Volleyball, Intercollegiate-Women

| Units: | 3 |
| Hours: | 175 hours LAB |
| Prerequisite: | None. |
| Transferable: | CSU; UC |
| General Education: | AA/AS Area III(a); CSU Area E2 |
| Catalog Date: | June 1, 2020 |

This course is for students who wish to participate in intercollegiate volleyball. This course may be repeated a maximum of four times to meet California Community College Athletic Association requirements for eligibility.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO#1: Apply and demonstrate an understanding of the technical knowledge of volleyball.
- Recognize and execute the correct technique of passing, setting, hitting, blocking, digging and serving.
- Recognize and practice situations of when to use a particular technique of a skill.
- SLO#2: Apply and demonstrate an understanding of strategic knowledge of the game of volleyball.
- Describe and employ transition offense.
- Examine strength and weaknesses of various defenses.
- Understand and apply the intricacies of an offense.
- SLO#3: Apply and demonstrate the physical training required to play volleyball.
- Use the process for acquiring appropriate fitness level for intercollegiate volleyball competition.
- Recognize the value of power, strength, speed and agility for the game of volleyball.
- SLO#4: Prepare for successful transfer to four year institutions and participate in athletics.
- Explain the importance of good study habits as they pertain to academic success to maintain good standing as a student and for athletic eligibility.
- Explain, demonstrate and practice strength building through weight training appropriate for intercollegiate volleyball.
- SLO #5: Develop the ability to utilize critical thinking skills, evaluate, plan and create success as a participant on an athletic team.
- Improve in advanced individual and team volleyball skills.
- Understand advanced concepts of volleyball.
- Explain and demonstrate the personal skills necessary to be a viable, contributing team player.
- Examine volleyball rules and regulations.
SPORT 406 Off Season Conditioning for Volleyball

Units: 0.5 - 3
Hours: 27 - 162 hours LAB
Prerequisite: None.
Enrollment Limitation: Once enrolled, the student must demonstrate intercollegiate athletic skills as determined by the coaching staff to remain enrolled in this course.
Transferable: CSU; UC
General Education: AA/AS Area III(a); CSU Area E2
Catalog Date: June 1, 2020

This course is designed to prepare the collegiate volleyball player for the competitive season and reduce risk of injury. Course content will include: Collegiate level volleyball-specific skill development, a solid aerobic conditioning plan, sport specific strength training, agility work, plyometric jump training, speed training and flexibility exercises as well as team play combination of activities designed to prepare the athlete both physically and mentally. This course is designed to prepare students for intercollegiate volleyball competition and may be repeated a maximum of four times to meet California Community College Athletic Association requirements for eligibility.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO #1 Evaluate strength and fitness levels for competition using standard fitness testing.
- Assess their fitness level for competition by applying the following fitness tests: body fat analysis, abdominal test, flexibility, and strength tests.
- Demonstrate increased cardiovascular endurance, flexibility, strength, and muscle size.
- Improve volleyball fitness through weight training and aerobic conditioning.
- Students of different levels (beginning/intermediate/advanced) will be challenged to improve their level of fitness and knowledge of conditioning concepts. Advanced students will be encouraged to help the beginners.
- SLO #2 Identify and apply exercises used in motion as related to the sport.
- Apply principles of sport motion to the exercises needed to enhance their physical strength in that particular muscle group movement.
- Measure their improvement and apply needed resistance or intensity in order to maximize efficiency in their workout.
- Improve in individual defensive and offensive basic skills.
- Improve individual defense and understand its importance with regard to team defense.
- Explain and demonstrate the defensive tactics of volleyball.
- Explain and demonstrate the offensive tactics of volleyball.
- Students of different levels (beginning/intermediate/advanced) will be challenged to improve their level of fitness and knowledge of conditioning concepts. Advanced students will be encouraged to help the beginners.
- SLO #3 Design, implement, and evaluate a personalized training program for athletes.
- Describe the theory of conditioning as it relates to the development of individual programs.
- Apply principles in cardiovascular fitness to enhance and support a training program.
- Employ goal-setting techniques toward establishing their fitness program.
Students of different levels (beginning/intermediate/advanced) will be challenged to improve their level of fitness and knowledge of conditioning concepts. Advanced students will be encouraged to help the beginners.

SLO #4 Understand and apply safety techniques and training etiquette to training.

Use proper safety procedures and techniques while training.

Illustrate proper etiquette and demonstrate an ability to relate to others while training.

Students of different levels (beginning/intermediate/advanced) will be challenged to improve their level of fitness and knowledge of conditioning concepts. Advanced students will be encouraged to help the beginners.

SPORT 495 Independent Studies in Sport

Units: 1 - 3
Hours: 54 - 162 hours LAB
Prerequisite: None.
Transferable: CSU; UC
General Education: AA/AS Area III(a); CSU Area E2
Catalog Date: June 1, 2020

An independent studies project involves an individual student or small group of students in study, research, or activities beyond the scope of regularly offered courses. See the current catalog section of “Special Studies” for full details of Independent Studies.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO #1: Actively engage in intellectual inquiry beyond that required in order to pass a course of study (College Wide Learning Outcome - Area 4).

- Discuss and outline a proposal of study (that can be accomplished within one semester term) with a supervising instructor qualified within the discipline.

- Design an independent study (to be completed individually or by collaboration of a small group) to foster special knowledge, skills, and experience that are not available in any one regularly scheduled course.

- Use information resources to gather discipline-specific information.

- SLO #2: Utilize modes of analysis and critical thinking to apply theoretical perspectives and/or concepts in the major discipline of study to significant problems and/or educational activities (College Wide Learning Outcome - Area 3).

- Analyze and apply the knowledge, skills and experience that are involved in the independent study to theoretical perspectives and/or concepts in the major discipline of study.

- Explain the importance of the major discipline of study in the broader picture of society.

- SLO #3: Communicate a complex understanding of content matter of the major discipline of study (College Wide Outcome - Area 3).

- Demonstrate competence in the skills essential to mastery of the major discipline of study that are necessary to accomplish the independent study.

- SLO #4: Identify personal goals and pursue these goals effectively (College Wide Outcome - Area 4).

- Utilize skills from the “academic tool kit” including time management, study skills, etc., to accomplish the independent study within one semester term.

Team Activity (TMACT)

TMACT 300 Soccer, Indoor

Units: 1
Hours: 54 hours LAB
Course Family: Soccer (http://crc.losrios.edu/course-families#id_100023)
Prerequisite: None.
Transferable: CSU; UC
General Education: AA/AS Area III(a); CSU Area E2
Catalog Date: June 1, 2020
The purpose of this course is to provide the student with beginning level knowledge and skills associated with indoor soccer. This course emphasizes defense, offense, passing, ball control, heading, and shooting. It covers the skills, strategy, and rules that govern the play of indoor soccer.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO #1: Apply and demonstrate an understanding of the technical knowledge of soccer.
  - Analyze and employ the correct technique for passing in the game of soccer.
  - Analyze and execute the correct technique for receiving in the game of soccer.
  - Analyze and execute the correct technique for shooting in the game of soccer.
  - Analyze and execute the correct technique for crossing in the game of soccer.
  - Analyze and execute the correct technique for dribbling in the game of soccer.
  - SLO #2: Apply and demonstrate basic understanding of tactical knowledge of the game of soccer.
  - Analyze and execute a basic offense.
  - Analyze and execute a basic defense.
  - Analyze and execute basic goalkeeping.
  - SLO #3: Apply and demonstrate the physical skills that are required in the game of soccer.
  - Recognize the difference between aerobic and anaerobic fitness as it pertains to fitness levels for indoor soccer.
  - Recognize the agility, balance, and coordination requirements as it pertains to indoor soccer.
  - Recognize the value of power, strength, speed involved in indoor soccer.
  - SLO #4 Recognize and apply the sociological and psychological skills needed in a team sport environment.
  - Demonstrate and execute self control.
  - Demonstrate and execute mental toughness.
  - Value and demonstrate self confidence.
  - Value team confidence.
  - Value the social aspects of a team sport environment.

TMACT 301 Indoor Soccer II

| Units: | 1 |
| Hours: | 54 hours LAB |
| Course Family: | Soccer (http://crc.losrios.edu/course-families#id_100023) |
| Prerequisite: | None. |
| Advisory: | TMACT 300; Student should have completed Indoor Soccer I, played 1 year of High School Varsity Soccer, completed 1 year of College Soccer, or satisfy the professor with a level of proficiency. |
| Transferable: | CSU; UC |
| General Education: | AA/AS Area III(a); CSU Area E2 |
| Catalog Date: | June 1, 2020 |

The purpose of this course is to provide the student with an intermediate level player environment to challenge the players knowledge and skills associated with indoor soccer. This course emphasizes an intermediate level of defending, attacking, and technical ability. It covers the skills, strategy, and rules that govern the play of indoor soccer. This class is not for beginners.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO #1: Apply and demonstrate an intermediate level of understanding of the technical aspects for indoor soccer.
  - Analyze and employ proficient technique for passing in the game of indoor soccer.
  - Analyze and execute proficient technique for receiving in the game of indoor soccer.
- Analyze and execute the proficient technique for shooting in the game of indoor soccer.
- Analyze and execute the proficient technique for crossing in the game of indoor soccer.
- Analyze and execute the proficient technique for dribbling in the game of soccer.
- SLO #2: Apply and demonstrate an intermediate level of tactical knowledge of the game for indoor soccer.
  - Analyze and execute an intermediate level for offense.
  - Analyze and execute an intermediate level for defense.
  - Analyze and execute an intermediate level for goalkeeping.
- SLO #3: Apply and demonstrate intermediate level of the physical skills that are required for the game of indoor soccer.
  - Recognize the difference between aerobic and anaerobic fitness as it pertains to intermediate fitness levels for indoor soccer.
  - Recognize the agility, balance, and coordination requirements as it pertains to intermediate levels for indoor soccer.
  - Recognize the value of power, strength, and speed involved at an intermediate level for indoor soccer.
- SLO #4 Recognize and apply the sociological and psychological skills needed in a team sport within an intermediate level environment.
  - Demonstrate and execute self control within the confines of an intermediate level environment.
  - Demonstrate and execute mental toughness within the confines of an intermediate level environment.
  - Value and demonstrate self-confidence within the confines of an intermediate level environment.
  - Value team confidence within the confines of an intermediate level environment.
  - Value the social aspects of a team sport environment within the confines of an intermediate level.

**TMACT 302 Soccer - Outdoor**

| Units: | 1 |
| Hours: | 54 hours LAB |
| Course Family: | Soccer (http://crc.losrios.edu/course-families#id_100023) |
| Prerequisite: | None. |
| Transferable: | CSU; UC |
| General Education: | AA/AS Area III(a); CSU Area E2 |
| Catalog Date: | June 1, 2020 |

The purpose of this course is to provide the student with beginning level knowledge and skills associated with outdoor soccer. This course emphasizes defense, offense, passing, ball control, heading, and shooting. It covers the skills, strategy, and rules that govern the play of outdoor soccer.

**Student Learning Outcomes**

Upon completion of this course, the student will be able to:

- SLO #1: Apply and demonstrate an understanding of the technical knowledge and skills of soccer.
- Analyze and employ the correct technique for passing in the game of soccer.
- Analyze and execute the correct technique for receiving in the game of soccer.
- Analyze and execute the correct technique for shooting in the game of soccer.
- Analyze and execute the correct technique for crossing in the game of soccer.
- Analyze and execute the correct technique for dribbling in the game of soccer.
- SLO #2: Apply and demonstrate basic understanding of tactical knowledge of the game of soccer.
- Analyze and execute a basic offense.
- Analyze and execute a basic defense.
- Analyze and execute basic goalkeeping.
- SLO #3: Apply and demonstrate the physical skills that are required in the game of soccer.
Recognize the difference between aerobic and anaerobic fitness as it pertains to fitness levels for soccer.

Recognize the agility, balance, and coordination requirements as it pertains to soccer.

Recognize the value of power, strength, and speed involved in soccer.

SLO #4 Recognize and apply the sociological and psychological skills needed in a team sport environment.

Demonstrate and execute self-control.

Demonstrate and execute mental toughness.

Value and demonstrate self-confidence

Value team confidence.

Value the social aspects of a team sport environment.

TMACT 303 Outdoor Soccer II

The purpose of this course is to provide the student with an intermediate level player environment to challenge and improve the player's knowledge and skills associated with outdoor soccer. This course emphasizes an intermediate level of defending, attacking, and technical ability. It covers the skills, strategy, and rules that govern the play of outdoor soccer. This class is not for beginners.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO #1: Apply and demonstrate an intermediate level of understanding of the technical aspects for outdoor soccer.
  - Analyze and employ proficient technique for passing in the game of outdoor soccer.
  - Analyze and execute proficient technique for receiving in the game of outdoor soccer.
  - Analyze and execute the proficient technique for shooting in the game of outdoor soccer.
  - Analyze and execute the proficient technique for crossing in the game of outdoor soccer.
  - Analyze and execute the proficient technique for dribbling in the game of outdoor soccer.

- SLO #2: Apply and demonstrate an intermediate level of tactical knowledge of the game for outdoor soccer.
  - Analyze and execute an intermediate level for offense.
  - Analyze and execute an intermediate level for defense.
  - Analyze and execute an intermediate level for goalkeeping.

- SLO #3: Apply and demonstrate an intermediate level of the physical skills that are required for the game of outdoor soccer.
  - Recognize the difference between aerobic and anaerobic fitness as it pertains to intermediate fitness levels for outdoor soccer.
  - Recognize the agility, balance, and coordination requirements as it pertains to intermediate levels for outdoor soccer.
  - Recognize the value of power, strength, and speed involved at an intermediate level for outdoor soccer.

- SLO #4 Recognize and apply the sociological and psychological skills needed in a team sport within an intermediate level environment.
  - Demonstrate and execute self-control within the confines of an intermediate level environment.
  - Demonstrate and execute mental toughness within the confines of an intermediate level environment.
  - Value and demonstrate self-confidence within the confines of an intermediate level environment.
TMACT 304 Outdoor Soccer III

Units: 1
Hours: 54 hours LAB
Course Family: Soccer
Prerequisite: None.
Advisory: TMACT 303; Student should have completed Outdoor Soccer II, played 2 years of High School Varsity Soccer, played at the competitive level of youth soccer, completed 1 year of College Soccer, or satisfy the professor with a level of proficiency.
Transferable: CSU; UC
General Education: AA/AS Area III(a); CSU Area E2
Catalog Date: June 1, 2020

The purpose of this course is to provide the student with an advanced level player environment to challenge the player's knowledge and skills associated with outdoor soccer. This course emphasizes an advanced level of defending, attacking, and technical ability. It covers the skills, strategy, and rules that govern the play of outdoor soccer. This class is not for beginners or intermediate players.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- **SLO #1**: Apply and demonstrate an advanced level of understanding of the technical aspects for outdoor soccer.
- **SLO #2**: Analyze and employ advanced proficient technique for passing in the game of outdoor soccer.
- **SLO #3**: Analyze and execute advanced proficient technique for receiving in the game of outdoor soccer.
- **SLO #4**: Analyze and execute advanced proficient technique for shooting in the game of outdoor soccer.
- **SLO #5**: Analyze and execute advanced proficient technique for crossing in the game of outdoor soccer.
- **SLO #6**: Analyze and execute advanced proficient technique for dribbling in the game of outdoor soccer.
- **SLO #7**: Apply and demonstrate an advanced level of tactical knowledge of the game for outdoor soccer.
- **SLO #8**: Analyze and execute an advanced level for offense.
- **SLO #9**: Analyze and execute an advanced level for defense.
- **SLO #10**: Analyze and execute an advanced level for goalkeeping.
- **SLO #11**: Apply and demonstrate an advanced level of the physical skills that are required for the game of outdoor soccer.
- **SLO #12**: Recognize the difference between aerobic and anaerobic fitness as it pertains to advanced fitness levels for outdoor soccer.
- **SLO #13**: Recognize the agility, balance, and coordination requirements as it pertains to advanced levels for outdoor soccer.
- **SLO #14**: Recognize the value of power, strength, and speed involved at an advanced level for outdoor soccer.
- **SLO #15**: Recognize and apply the sociological and psychological skills needed in a team sport within an advanced level environment.
- **SLO #16**: Demonstrate and execute self-control within the confines of an advanced level environment.
- **SLO #17**: Demonstrate and execute mental toughness within the confines of an advanced level environment.
- **SLO #18**: Value and demonstrate self-confidence within the confines of an advanced level environment.
- **SLO #19**: Value team confidence within the confines of an advanced level environment.

TMACT 320 Basketball
This course is a physical education course that covers a complete review of the basic fundamentals, tactics, rules, and systems of play, and will enhance the student's understanding and ability.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO #1: Identify and apply exercises used in motion as related to basketball.
- Demonstrate skill and knowledge of the game at a competitive level.
- SLO #2: Utilize critical thinking skills, evaluate, plan, and create success as a member of the basketball class.
- Demonstrate proper etiquette and sportsmanship during drills and during competition.
- Define game strategy in a variety of game and scrimmage conditions.
- Identify and explain the rules and regulations of the game of basketball.
- Execute proper playing techniques through participation in drills and games.
- SLO #3: Relate to classmates, teachers, and the competitive atmosphere in a manner that enhances individual participation as well as the team environment.
- Adapt to changing game situations within an informal basketball game.
- Apply individual skills with similarly skilled basketball players in an informal team environment.

TMACT 321 Basketball II

This is a physical education course that covers a complete review of the intermediate fundamentals, tactics, rules, and systems of play. The student will develop a better understanding of how to play competitive basketball in a team setting.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO #1: Identify and apply exercises used in motion as related to basketball.
- Execute proper playing techniques at an intermediate level through participation in drills and games.
- SLO #2: Utilize critical thinking skills to evaluate, plan, and create success as a member of the basketball class.
- Identify and explain the rules and regulations of the game of basketball.
- Define game strategy in a variety of game and scrimmage conditions.
- SLO #3: Relate to classmates, teachers, and the competitive atmosphere in a manner that enhances individual participation as well as the team environment.
- Apply individual skills with similarly skilled (intermediate-level) basketball players in an informal team environment.
- Adapt to changing game situations within an informal basketball game.
TMACT 322 Basketball III

This is a competitive physical education basketball course. This course will cover the basic as well as advanced fundamentals and skills of basketball, in addition to basic strategies, rules, and systems of competitive play. This course is designed to enhance the students' comprehension and ability.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO #1. Demonstrate advanced basketball related skills including strategies, shooting, passing, ball handling, and rebounding.
- properly demonstrate advanced shooting skills in game situations such as bank-shots, & floaters.
- identify when to utilize advanced ball handling skills such as crossovers, & spin moves.
- SLO #2. Apply advanced individual skills, concepts, and strategies in a competitive, yet informal team environment.
- develop efficient strategies in 1 on 1, 2 on 2, 3 on 3, & 5 on 5 game situations.
- SLO #3. Demonstrate knowledge of advanced offensive and defensive concepts, and strategies.
- demonstrate advanced knowledge of zone defensive principles, zone offensive principles, along with pressure man to man offensive & defensive principles.
- SLO #4. Demonstrate sportsmanship during drills and team competition of play.
- maintain focus, and positive attitudes during adverse situations during competition.
- SLO #5. Communicate effectively in a team setting.
- communicate in game situations with both teammates and officials.

TMACT 323 Basketball IV

This is an advanced basketball course. Instruction, demonstration, and participation will provide the student with knowledge of tournament, and bracketed style play for basketball at an advanced level. This course will focus on 2 on 2, 3 on 3, and 5 on 5 tournament style competition.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO #1. Demonstrate advanced level basketball-related skills including shooting, passing, ball-handling rebounding, defensive techniques, and strategy.
- display defensive concepts such as full court defense, trapping defense, and man to man defense.
- SLO #2. Apply individual skills with similarly skill advanced basketball players in a formal team environment.
- compete using a variety of advanced basketball movements.
- SLO #3. Demonstrate knowledge of advanced level team offense and team defense.
TMACT 330 Volleyball

Units: 1  
Hours: 54 hours LAB  
Course Family: Volleyball  
Prerequisite: None.  
Transferable: CSU; UC  
General Education: AA/AS Area III(a); CSU Area E2  
Catalog Date: June 1, 2020

This is a beginning volleyball class. Lecture, demonstration and participation will provide the student with sufficient knowledge for continued participation in volleyball. The fundamentals of passing, setting, serving, attacking, blocking, digging, rules of play and simple strategies will be covered.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO 1 - Apply basic knowledge and learned skills to enjoy the sport of volleyball.
- Execute all of the basic skills in volleyball including serving, passing, setting, spiking, blocking and digging.
- Identify and apply the basic terminology, concepts and rules of volleyball.
- SLO 2 - Explain the relationship between volleyball and wellness.
- Develop strategies for lifelong improvement in volleyball.
- SLO 3 - Identify the importance of team work.
- Illustrate the relationship between team work skills and everyday life experiences.
- SLO 4 - Identify the basic offensive and defensive team tactics.
- Employ knowledge of concepts to the strategies of volleyball.

TMACT 331 Volleyball II

Units: 1  
Hours: 54 hours LAB  
Course Family: Volleyball  
Prerequisite: None.  
Advisory: TMACT 330; Intermediate volleyball students should have some playing experience and basic volleyball knowledge and skills.  
Transferable: CSU; UC  
General Education: AA/AS Area III(a); CSU Area E2  
Catalog Date: June 1, 2020

This is an intermediate volleyball class. Lecture, demonstration and participation will provide the student with sufficient knowledge for continued participation in volleyball. This class will focus on refining basic skills, introducing more complicated techniques and teaching more advanced strategies.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO 1 - Apply basic and intermediate level knowledge and learned skills to enjoy the sport of volleyball.
- Execute and refine all of the skills in volleyball including serving, passing, setting, spiking, blocking and digging.
- Identify and apply more advanced terminology, concepts and rules of volleyball.
- SLO 2 - Identify the offensive and defensive systems.
Employ knowledge of concepts to the various offensive and defensive tactics.

Acquire and apply fundamental skills to execute offensive and defensive systems.

SLO 3 - Design and implement a basic game plan in match competition.

Explain and demonstrate the 4-2 and 6-2 offenses.

Explain and demonstrate the perimeter defense.

SLO 4 - Identify the importance of teamwork.

Illustrate the relationship between teamwork skills and everyday life experiences.

SLO 5 - Explain the relationship between volleyball and wellness.

Develop strategies for lifelong improvement in volleyball.

TMACT 333 Volleyball III

Units: 1
Hours: 54 hours LAB
Course Family: Volleyball (http://crc.losrios.edu/course-families#id_100025)
Prerequisite: None.
Advisory: TMACT 333; Advanced volleyball students are recommended to have significant experience, preferably at the high school varsity level.
Transferable: CSU; UC
General Education: AA/AS Area III(a); CSU Area E2
Catalog Date: June 1, 2020

This is an advanced volleyball class. Lecture, demonstration and participation will provide the student with sufficient knowledge for continued participation in volleyball at an advanced level. In advanced volleyball, students work on improving the more complicated skills and techniques of the sport and competitive play takes a higher priority.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO 1 - Apply advanced knowledge and learned skills to enjoy the sport of volleyball.
- Execute all of the skills in volleyball at an advanced level.
- Identify and apply the concepts, strategies and rules of volleyball.
- SLO 2 - Identify the advanced offensive and defensive team tactics.
- Employ knowledge of these tactics to the game of volleyball as a whole.
- Refine techniques in executing an effective offense and defense.
- SLO 3 - Design and implement a complex game plan in competitive play.
- Explain and demonstrate the 6'2 and 5'1 offenses.
- Compare and contrast various game strategies.
- Compare and contrast perimeter and rotation defense.
- SLO 4 - Identify the importance of teamwork.
- Illustrate the relationship between teamwork skills and everyday life experiences.
- SLO 5 - Explain the relationship between volleyball and wellness.
- Develop strategies for lifelong improvement in volleyball.

TMACT 335 Volleyball IV
This course is designed to teach advanced skills, principles and techniques necessary and fundamental to understanding and playing at an expert level. Emphasis is placed on the 6-2 and 5-1 team offensive/defensive systems and strategies. Includes participation in organized round robin competition preceded by a brief period of appropriate warm-up, skill development, and activities.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO #1: Apply advanced knowledge and learned skills to examine the sport of volleyball.
- Execute all of the skills in volleyball at an expert level.
- SLO #2: Employ team tactics utilizing theoretical concepts pertinent to competing at a high level.
- Design and implement the 6-2 and 5-1 offensive systems.
- Compare and contrast various game strategies.
- Compare and contrast perimeter and rotation defensive systems.
- SLO #3: Understand the procedures and participation of tournament play: Round-robin and bracket competition.
- Apply dynamic and static warm-up and cool-down strategies.
- SLO #4: Identify the relationship between team skills and life experiences.

TMACT 495 Independent Studies in Team Activity

An independent studies project involves an individual student or small group of students in study, research, or activities beyond the scope of regularly offered courses. See the current catalog section of "Special Studies" for full details of Independent Studies.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO #1: Actively engage in intellectual inquiry beyond that required in order to pass a course of study (College Wide Learning Outcome – Area 4).
- Discuss and outline a proposal of study (that can be accomplished within one semester term) with a supervising instructor qualified within the discipline.
- Design an independent study (to be completed individually or by collaboration of a small group) to foster special knowledge, skills, and experience that are not available in any one regularly scheduled course.
- Use information resources to gather discipline-specific information.
- SLO #2: Utilize modes of analysis and critical thinking to apply theoretical perspectives and/or concepts in the major discipline of study to significant problems and/or educational activities (College Wide Learning Outcome – Area 3).
- Analyze and apply the knowledge, skills and experience that are involved in the independent study to theoretical perspectives and/or concepts in the major discipline of study.
- Explain the importance of the major discipline of study in the broader picture of society.
- SLO #3: Communicate a complex understanding of content matter of the major discipline of study (College Wide Outcome – Area 3).
• Demonstrate competence in the skills essential to mastery of the major discipline of study that are necessary to accomplish the independent study.

• SLO #4: Identify personal goals and pursue these goals effectively (College Wide Outcome – Area 4).

• Utilize skills from the “academic tool kit” including time management, study skills, etc., to accomplish the independent study within one semester term.
The Associate Degree in Liberal Arts is designed for students who wish a broad knowledge of liberal arts and sciences, plus additional studies in one of four “Areas of Emphasis.” An area of emphasis can be an appropriate choice for a student planning to transfer to the California State University (CSU) or the University of California (UC), as the student may satisfy general education requirements, plus focus on transferable coursework that relates to majors at CSU or UC. Students must satisfactorily complete 60 units of collegiate coursework with a “C” (2.0) grade point average in curriculum that the district accepts toward this degree.

Associate Degrees

A.A. in Liberal Arts - Arts and Humanities

The Associate Degree in Liberal Arts - Arts and Humanities is designed for students who wish a broad knowledge of the arts and humanities. Students must satisfactorily complete 60 units of collegiate coursework with a “C” (2.0) grade point average in curriculum that the district accepts toward this degree.

Note: If you plan to transfer to a CSU, consider an Associate in Arts for Transfer degree such as the Art History, Art Design, History, Music, Spanish, Studio Arts or Theatre Arts AA-T rather than this degree. Please see a counselor for assistance with selecting the most appropriate transfer courses (i.e. 300 or higher numbered courses). If you plan to transfer to a UC campus or a private college or university, please see a counselor to determine if this degree is the most appropriate choice.

Catalog Date: June 1, 2020

Total Units: 18

The Liberal Arts - Arts and Humanities Associate in Arts (A.A.) degree may be obtained by completion of the required program, plus general education requirements, plus sufficient electives to meet a 60-unit total. See CRC graduation requirements.
Upon completion of this program, the student will be able to:

- Demonstrate an appreciation of artistic endeavors, cultural expressions, ideas and/or institutions through nonempirical, analytic, interpretive studies and critical thinking projects. (PSLO 1)
- Articulate the development of and relationships between different civilizations, cultural traditions, ideas and/or institutions through the application of non-empirical, analytical reasoning. (PSLO 2)
- Evaluate critically the analyses and interpretations by others (including significant historical or contemporary analyses and interpretations) of arts, ideas, skills (including language), and/or institutions. (PSLO 3)
- Express clearly her or his own analyses and interpretations of arts, ideas, skills (including language), and/or institutions, and will properly use the vocabulary appropriate to the field. (PSLO 4)

A.A. in Liberal Arts - Communication and Writing

The Associate Degree in Liberal Arts - Communication and Writing is designed for students who wish a broad knowledge of communication studies and writing. Students must satisfactorily complete 60 units of collegiate coursework with a "C" (2.0) grade point average in curriculum that the district accepts toward this degree.

Note: If you plan to transfer to a CSU, consider completing an Associates in Arts for Transfer degree such as the Communications Studies, English, or Journalism AA-T rather than this degree. Please see a counselor for assistance with selecting the most appropriate transfer courses (i.e. 300 or higher numbered courses). If you plan to transfer to a UC campus or a private college or university, please see a counselor to determine if this degree is the most appropriate choice.

Student Learning Outcomes

Upon completion of this program, the student will be able to:

- Conduct audience analysis to design an appropriate purpose, topic, style and speech structure within formal presentations. Express their ideas clearly in well-organized written messages. (PSLO 1)
- Construct an effective presentation to a specific topic by collecting relevant information and employing credible evidence with proper documentation. (PSLO 2)
- Determine and use appropriate communications technologies to convey information. (PSLO 3)
- Use correct and appropriate conventions of mechanics, usage, and style in written communication. (PSLO 4)

A.S. in Liberal Arts - Math and Science

The Associate Degree in Liberal Arts - Math and Science is designed for students who wish a broad knowledge of mathematics and the sciences. Students must satisfactorily complete 60 units of collegiate coursework with a "C" (2.0) grade point average in curriculum that the district accepts toward this degree.

Note: If you plan to transfer to the CSU after completing this degree, consider an Associates in Science for Transfer degree such as the Biology, Geography, Geology, Math, or Physics AS-T rather than this degree. Please see a counselor for assistance with selecting the most appropriate transfer courses (i.e. 300 or higher numbered courses). If you plan to transfer to a UC campus or a private college or university, please see a counselor to determine if this degree is the most appropriate choice.

### Student Learning Outcomes

Upon completion of this program, the student will be able to:

- Explain the core perspectives of the scientific method and apply it to at least one scientific discipline. (PSLO 1)
- Solve introductory problems of a conceptual and/or quantitative nature in at least one scientific discipline. (PSLO 2)
- Apply accurately the basic vocabulary and concepts of at least one scientific discipline verbally and in writing. (PSLO 3)
- Recognize the use and misuse of scientific concepts in society including politics and the media. (PSLO 4)
- Use appropriate quantitative skills at college level to solve problems applicable to occupational and personal activities. (PSLO 5)

### A.A. in Liberal Arts - Social and Behavioral Sciences

The Associate Degree in Liberal Arts - Social and Behavioral Sciences is designed for students who wish a broad knowledge of social and behavioral sciences. Students must satisfactorily complete 60 units of collegiate coursework with a "C" (2.0) grade point average in curriculum that the district accepts toward this degree.

Note: If you plan to transfer to a CSU after completing this Liberal Arts - Social and Behavioral Sciences degree, please consider an Associate in Arts for Transfer degree such as the Anthropology, Communication Studies, Early Childhood Education, Geography, History, Psychology or Sociology AA-T rather than this degree. See a counselor for assistance with selecting the most appropriate transfer courses (i.e. 300 or higher numbered courses). If you plan to transfer to a UC campus or a private college or university, please see a counselor to determine if this degree is the most appropriate choice.

Total Units: 18

The Liberal Arts - Social and Behavioral Sciences Associate in Arts (A.A.) degree may be obtained by completion of the required program, plus general education requirements, plus sufficient electives to meet a 60-unit total. See CRC graduation requirements.

Student Learning Outcomes

Upon completion of this program, the student will be able to:

- Apply accurately the basic vocabulary and concepts of at least one social or behavioral science discipline verbally and in writing. (PSLO 1)
- Examine the possible causes and suggest solutions to introductory problems of a conceptual nature using the methods of at least one social or behavioral scientific discipline. (PSLO 2)
- Recognize the use and misuse of social and behavioral science concepts in society including politics and the media. (PSLO 3)
- Describe both verbally and in writing the role of diverse ethnic, religious and social groups in American political, economic and social development. (PSLO 4)
LIBR 318 Library Research and Information Literacy

Units: 1  
Hours: 18 hours LEC  
Prerequisite: None.  
Transferable: CSU; UC (UC Transfer Credit Limitation: Library 318 and 324 combined: maximum transfer credit is one course)  
General Education: AA/AS Area III(b)  
Catalog Date: June 1, 2020

This course will help students acquire the information competency skills necessary to conduct academic or personal research. It provides a step-by-step guide to the research process that is applicable to term papers, course work and life-long learning.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO(1): Determine the nature and extent of the information needed.
- Identify different types and formats of potential sources of information.
- SLO(2): Access needed information effectively and efficiently.
- Construct and implement effectively-designed search strategies.
- SLO(3): Use information to accomplish a specific purpose.
- Maintain a journal or log of activities related to the information seeking, evaluating, and communicating process.
- SLO(4): Evaluate information and its sources critically in order to build knowledge.
- Examine and compare information from various sources in order to evaluate reliability, validity, accuracy, authority, timeliness, and point of view or bias.
- SLO(5): Understand the economic, legal, social, and ethical issues surrounding information.
- Demonstrate an understanding of what constitutes plagiarism and select an appropriate documentation style and uses it consistently to cite sources.
This course teaches critical thinking and information literacy to allow students to thoughtfully navigate an information-rich environment. Students will learn to critically seek, access, evaluate, and use information in a variety of contexts. This includes recognizing and using inductive and deductive reasoning, rhetorical appeals, and identifying flawed logic in information sources. These are skills that are invaluable for the college classroom, the workplace, and for lifelong information consumers.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- **SLO-1**: Cultivate and apply searching skills in order to retrieve and use information in academic and other contexts.
  - Objective 1A: Formulate questions for research.
  - Objective 1B: Apply critical thinking to determine appropriate search strategies and information tools based on scope, audience, and type of research.
  - Objective 1C: Use different types of searching language (e.g. controlled vocabulary, keywords, natural language) in appropriate context (information need & tool).
  - Objective 1D: Organize information in meaningful ways while synthesizing ideas gathered from multiple sources.

- **SLO-2**: Critically analyze information in order to evaluate quality, relevance, authority, and purpose.
  - Objective 2A: Demonstrate knowledge of critical reading skills to evaluate information.
  - Objective 2B: Use research tools and indicators of authority to determine usefulness and credibility of sources.
  - Objective 2C: Distinguish different types of authority for given contexts (formal and informal).

- **SLO-3**: Apply critical thinking and critical reading skills to evaluate and use logical arguments in a variety of informational contexts (formal and informal).
  - Objective 3A: Recognize inductive and deductive reasoning.
  - Objective 3B: Identify rhetorical appeals and fallacies in reasoning.
  - Objective 3C: Distinguish between credible evidence (facts), misinformation, and opinions.
  - Objective 3D: Use research to create persuasive arguments that are appropriate for the identified audience.

- **SLO-4**: Explore and analyze the value of information (both monetary value and value in society) in order to use it effectively in college and in the workplace.
  - Objective 4A: Critically analyze the value placed upon different types of information in different contexts.
  - Objective 4B: Recognize how and why some individuals or groups may be underrepresented or marginalized within information systems.
  - Objective 4C: Choose appropriate sources for information needs.
  - Objective 4D: Give credit to the original works and ideas of others through proper attribution and citation.

- **SLO-5**: Contribute to scholarly and professional information environments.
  - Objective 5A: Identify paths to enter and contribute to scholarly and professional conversations.
  - Objective 5B: Recognize that any given source may not represent the only (or even the majority) perspective on an issue.
  - Objective 5C: Use information responsibly (seeking accurate and reliable sources while respecting intellectual property).
An independent studies project involves an individual student or small group of students in study, research, or activities beyond the scope of regularly offered courses. See the current catalog section of “Special Studies” for full details of Independent Studies.

**Student Learning Outcomes**

Upon completion of this course, the student will be able to:

- **SLO #1**: Actively engage in intellectual inquiry beyond that required in order to pass a course of study (College Wide Learning Outcome – Area 4).

- Discuss and outline a proposal of study (that can be accomplished within one semester term) with a supervising instructor qualified within the discipline.

- Design an independent study (to be completed individually or by collaboration of a small group) to foster special knowledge, skills, and experience that are not available in any one regularly scheduled course.

- Use information resources to gather discipline-specific information.

- **SLO #2**: Utilize modes of analysis and critical thinking to apply theoretical perspectives and/or concepts in the major discipline of study to significant problems and/or educational activities (College Wide Learning Outcome – Area 3).

- Analyze and apply the knowledge, skills and experience that are involved in the independent study to theoretical perspectives and/or concepts in the major discipline of study.

- Explain the importance of the major discipline of study in the broader picture of society.

- **SLO #3**: Communicate a complex understanding of content matter of the major discipline of study (College Wide Outcome – Area 3).

- Demonstrate competence in the skills essential to mastery of the major discipline of study that are necessary to accomplish the independent study.

- **SLO #4**: Identify personal goals and pursue these goals effectively (College Wide Outcome – Area 4).

- Utilize skills from the “academic tool kit” including time management, study skills, etc., to accomplish the independent study within one semester term.
Management | Cosumnes River College

This broad-based management program offers introductory courses as well as more specialized ones ranging from studies of the standard corporate organization to analyzing the small business. Managers help organizations achieve their objectives through effective planning, organizing, directing, and controlling. The management program attempts to develop an understanding of the importance and diversity of its related fields. This program prepares students for entry into a company management training program and upgrades the skills of those already working in industry, allowing them to advance to supervisory positions. Students planning vocations in personnel services or analyst positions in state or federal government service should also consider this degree program.

Management (MGMT)

MGMT 295 Independent Studies in Management

Units: 1 - 3
Hours: 54 - 162 hours LAB
Prerequisite: None.
Catalog Date: June 1, 2020

An independent studies project involves an individual student or small group of students in study, research, or activities beyond the scope of regularly offered courses. See the current catalog section of "Special Studies" for full details of Independent Studies.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO #1: Actively engage in intellectual inquiry beyond that required in order to pass a course of study (College Wide Learning Outcome – Area 4).
- Discuss and outline a proposal of study (that can be accomplished within one semester term) with a supervising instructor qualified within the discipline.
- Design an independent study (to be completed individually or by collaboration of a small group) to foster special knowledge, skills, and experience that are not available in any one regularly scheduled course.
- Use information resources to gather discipline-specific information.
- SLO #2: Utilize modes of analysis and critical thinking to apply theoretical perspectives and/or concepts in the major discipline of study to significant problems and/or educational activities (College Wide Learning Outcome – Area 3).
- Analyze and apply the knowledge, skills and experience that are involved in the independent study to theoretical perspectives and/or concepts in the major discipline of study.
- Explain the importance of the major discipline of study in the broader picture of society.
- SLO #3: Communicate a complex understanding of content matter of the major discipline of study (College Wide Outcome – Area 3).
- Demonstrate competence in the skills essential to mastery of the major discipline of study that are necessary to accomplish the independent study.
- SLO #4: Identify personal goals and pursue these goals effectively (College Wide Outcome – Area 4).
- Utilize skills from the "academic tool kit" including time management, study skills, etc., to accomplish the independent study within one semester term.

Career Information

First-line Supervisor or Manager in general business or government service settings.
MGMT 308 Personnel and Human Resources Management

This course presents the student with the materials necessary to begin the complex study and analysis of such areas as civil rights, labor law, the personnel “Human Resources” organization and various management theories currently found in both public and private sector organization.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO 1: DEMONSTRATE SKILL AND COMPREHENSION IN PERSONNEL AND HUMAN RESOURCES MANAGEMENT.
  - Evaluate the role of the human resource management in public and private organizations.
  - Explain the key challenges to personnel and human resource management in developing the flexible and skilled workforce needed in governmental and private organizations.
  - Evaluate the impact of cost pressures on human resource policies.

- SLO 2: EXAMINE AND DEMONSTRATE APPROPRIATE RESPONSES TO PERSONNEL AND HUMAN RESOURCES MANAGEMENT DECISIONS
  - Analyze and decide upon the use of personnel recruitment and selection methods for different sets of conditions.
  - Compare and contrast various performance appraisal techniques, explaining the advantages and disadvantages of each.

- SLO 3: DEMONSTRATE THE ABILITY TO THINK CRITICALLY AND ANALYZE PROBLEMS
  - Explain how careful and astute management of human resources can result in better job performance. Analyze the dynamics and legal foundations of labor and management relations.
  - Analyze the dynamics and legal foundations of labor and management relations.

MGMT 362 Techniques of Management

This is a basic course in management that introduces a variety of modern management concepts. This course includes the basic management functions of planning, organization, staffing, leadership, and control. In addition, such concepts as team development, communication, business ethics, and global management perspectives will be discussed.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO 1: DEMONSTRATE SKILL AND COMPREHENSION IN TECHNIQUES OF MANAGEMENT (AS INDICATED BY COURSE OUTCOMES).
  - Recognize the duties that managers must accomplish in order to facilitate work accomplishments by people in organizations.
  - Identify the five functions of management and apply the planning, organization, staffing, leadership roles, and controlling functions in a variety of real-life business situations.
  - Define various organizational design essentials.
  - Describe the various approaches to modern job enrichment.
  - Explain the concept that organizations are a collection of people working together to a common purpose.

- SLO 2: EXAMINE AND DEMONSTRATE APPROPRIATE RESPONSES TO KEY DIVERSITY ISSUES IN THE WORKPLACE.
Describe the needed management activities to meet the demands and needs of an increasingly diverse work force.

SLO 3: DEMONSTRATE THE ABILITY TO THINK CRITICALLY AND ANALYZE PROBLEMS.

Describe a variety of current management philosophies to current management problems.

Describe why technological changes may require the manager to become a “knowledge worker.”

Evaluate the impact of TQM in the modern management process.

Categorize and evaluate the various Process Theories of Motivation; such as, Maslow, Alderfer, Hersberg, McGregor, and McClelland.

MGMT 372 Human Relations and Organizational Behavior

3 units

- Utilize major approaches to understanding people at work.
- Describe theories of human behavior at work.
- Describe an effective philosophy of human behavior in the workplace of a professional setting.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO 1: DEMONSTRATE SKILL AND COMPREHENSION IN TECHNIQUES OF MANAGEMENT IN TERMS OF HUMAN RELATIONS AND ORGANIZATIONAL BEHAVIOR (AS INDICATED BY COURSE OUTCOMES).
- Apply skills in effective human interaction within the workplace.
- Analyze employee performance and determine performance improvement (in such areas as goal orientation, innovation and creativity, constructive discipline, delegation and responsibility).

MGMT 495 Independent Studies in Management

1 - 3 units

An independent studies project involves an individual student or small group of students in study, research, or activities beyond the scope of regularly offered courses. See the current catalog section of “Special Studies” for full details of Independent Studies.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO #1: Actively engage in intellectual inquiry beyond that required in order to pass a course of study (College Wide Learning Outcome – Area 4).
- Discuss and outline a proposal of study (that can be accomplished within one semester term) with a supervising instructor qualified within the discipline.
- Design an independent study (to be completed individually or by collaboration of a small group) to foster special knowledge, skills, and experience that are not available in any one regularly scheduled course.
Use information resources to gather discipline-specific information.

SLO #2: Utilize modes of analysis and critical thinking to apply theoretical perspectives and/or concepts in the major discipline of study to significant problems and/or educational activities (College Wide Learning Outcome – Area 3).

Analyze and apply the knowledge, skills and experience that are involved in the independent study to theoretical perspectives and/or concepts in the major discipline of study.

Explain the importance of the major discipline of study in the broader picture of society.

SLO #3: Communicate a complex understanding of content matter of the major discipline of study (College Wide Outcome – Area 3).

Demonstrate competence in the skills essential to mastery of the major discipline of study that are necessary to accomplish the independent study.

SLO #4: Identify personal goals and pursue these goals effectively (College Wide Outcome – Area 4).

Utilize skills from the "academic tool kit" including time management, study skills, etc., to accomplish the independent study within one semester term.

MGMT 498 Work Experience in Management

Units: 1 - 4
Hours: 60 - 300 hours LAB
Prerequisite: None.
Enrollment Limitation: Students must be in a paid or unpaid internship, volunteer position or job related to career goals in Management.
Transferable: CSU
General Education: AA/AS Area III(b)
Catalog Date: June 1, 2020

This course provides students with opportunities to develop marketable skills in preparation for employment in their major field of study or advancement within their career. It is designed for students interested in work experience and/or internships in transfer level degree occupational programs. Course content includes understanding the application of education to the workforce; completion of required forms which document the student’s progress and hours spent at the work site; and developing workplace skills and competencies. Appropriate level learning objectives are established by the student and the employer. During the semester, the student is required to participate in a weekly orientation and 75 hours of related paid work experience, or 60 hours of unpaid work experience for one unit. An additional 75 or 60 hours of related work experience is required for each additional unit. Work Experience may be taken for a total of 16 units when there are new or expanded learning objectives. Only one Work Experience course may be taken per semester.

Upon completion of this course, the student will be able to:

DEMONSTRATE AN UNDERSTANDING AND APPLICATION OF PROFESSIONAL WORKPLACE BEHAVIOR IN A FIELD OF STUDY RELATED TO ONE’S CAREER(SLO 1)

Understand the effects time, stress, and organizational management have on performance.

Demonstrate an understanding of consistently practicing ethics and confidentiality in a workplace.

Examine the career/life planning process and relate its relevancy to the student.

Demonstrate an understanding of basic communication tools and their appropriate use.

Demonstrate an understanding of workplace etiquette.

DESCRIBE THE CAREER/LIFE PLANNING PROCESS AND RELATE ITS RELEVANCY TO ONE’S CAREER(SLO 2)

Link personal goals to long term achievement.

Display an understanding of creating a professional first impression.

Understand how networking is a powerful job search tool.

Understand necessary elements of a résumé.

Understand the importance of interview preparation.

Identify how continual learning increases career success.

DEMONSTRATE APPLICATION OF INDUSTRY KNOWLEDGE AND THEORETICAL CONCEPTS AS WRITTEN IN LEARNING OBJECTIVES IN PARTNERSHIP WITH THE EMPLOYER WORK SITE SUPERVISOR(SLO 3)
Marketing | Cosumnes River College

Marketing is a dynamic area of study that provides immediate job and career opportunities after one course or the completion of a degree. The skills learned are easily converted into well-paying careers by many students. There is no limit to your success when these areas of study are utilized successfully. The skills learned are essential for international and domestic business and for companies large and small. Please refer to the Business section for additional marketing courses.

The Marketing Associate in Arts (A.A.) degree may be obtained by completion of the required program, plus general education requirements, plus sufficient electives to meet a 60-unit total. See CRC graduation requirements.

Student Learning Outcomes

Upon completion of this program, the student will be able to:

- Integrate the functions of the marketing mix.
- Identify and examine consumer’s buying behavior and evaluate which marketing communications medium will most effectively meet the needs of the marketplace.
- Incorporate principles of product development, pricing, distribution strategies, promotion strategies and market research.
- Apply the marketing mix to create and analyze various marketing strategies.
- Plan, produce and select the appropriate media for advertising.
- Communicate effectively verbally and in writing in various business settings.

Career Information

Buyer, Account Executive, Entrepreneur; Investment Counselor, Marketing Services, Purchasing Agent, Salesperson, Shipping Clerk, Marketing Manager, or Importer/Exporter. Some career options may require more than two years of college study.

Certificate of Achievement

Marketing Certificate

This Certificate of Achievement in Marketing provides an opportunity for students to acquire knowledge and training for business marketing and prepares them for careers in sales, advertising, customer service, and business development. Students wanting to earn the A.A. degree in Marketing can do so by taking additional courses beyond the 18 units required for this certificate. Please seek advice from your counselor to verify the correct courses to take towards the A.A degree.

Catalog Date: June 1, 2020

Marketing (MKT)

MKT 120 Survey of International Business

| Units: | 3 |
| Hours: | 54 hours LEC |
| Prerequisite: | None. |
| Catalog Date: | June 1, 2020 |

This course is a comprehensive overview of international business designed to provide both beginners and experienced business people with a global perspective on international trade including foreign investments, impact of financial markets, and the operation of multinational corporations.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- analyze the effect of international monetary markets on import and export trade.
- describe the effects of cultural, political, and legal forces on international business.
- explain fundamental principles of global marketing.

MKT 295 Independent Studies in Marketing

| Units: | 1 - 3 |
| Hours: | 54 - 162 hours LAB |
| Prerequisite: | None. |
| Catalog Date: | June 1, 2020 |

An independent studies project involves an individual student or small group of students in study, research, or activities beyond the scope of regularly offered courses. See the current catalog section of "Special Studies" for full details of Independent Studies.
Student Learning Outcomes

Upon completion of this course, the student will be able to:

- **SLO #1:** Actively engage in intellectual inquiry beyond that required in order to pass a course of study (College Wide Learning Outcome – Area 4).
- Discuss and outline a proposal of study (that can be accomplished within one semester term) with a supervising instructor qualified within the discipline.
- Design an independent study (to be completed individually or by collaboration of a small group) to foster special knowledge, skills, and experience that are not available in any one regularly scheduled course.
- Use information resources to gather discipline-specific information.
- **SLO #2:** Utilize modes of analysis and critical thinking to apply theoretical perspectives and/or concepts in the major discipline of study to significant problems and/or educational activities (College Wide Learning Outcome – Area 3).
- Analyze and apply the knowledge, skills and experience that are involved in the independent study to theoretical perspectives and/or concepts in the major discipline of study.
- Explain the importance of the major discipline of study in the broader picture of society.
- **SLO #3:** Communicate a complex understanding of content matter of the major discipline of study (College Wide Outcome – Area 3).
- Demonstrate competence in the skills essential to mastery of the major discipline of study that are necessary to accomplish the independent study.
- **SLO #4:** Identify personal goals and pursue these goals effectively (College Wide Outcome – Area 4).
- Utilize skills from the “academic tool kit” including time management, study skills, etc., to accomplish the independent study within one semester term.

MKT 300 Principles of Marketing

| Units: | 3 |
| Hours: | 54 hours LEC |
| Prerequisite: | None. |
| Transferable: | CSU |
| Catalog Date: | June 1, 2020 |

This course is a general overview of marketing principles. The course covers the process of planning and executing the conception, pricing, promotion, and distribution of ideas, goods and services to create exchanges that satisfy individual and organizational goals. Elements of the marketing environment such as government regulation, environmental protection, competition, and consumer behavior will be analyzed.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- **SLO 1:** DEMONSTRATE SKILL AND COMPREHENSION IN MARKETING AS INDICATED BY COURSE OUTCOMES.
  - This includes the ability to describe and apply the various elements of marketing such as those involved in pricing, promotion, product development, location, and distribution.
- **SLO 2:** DEMONSTRATE UNDERSTANDING OF FACTORS THAT AFFECT MARKETING.
  - This includes the ability to describe marketing ethics, major government regulations, and other external forces that impact a company's marketing effort.
- **SLO 3:** DEMONSTRATE THE ABILITY TO THINK CRITICALLY AND ANALYZE PROBLEMS.
  - This includes the ability to identify various forms of consumer behavior and illustrate how marketing may benefit each group of consumers.
- APPLY COURSE CONCEPTS TO THE REAL PRACTICE OF MARKETING.
- **SLO 4:** This includes the ability to describe and differentiate controllable and uncontrollable variables in marketing and see how they are practiced in the real world.
MKT 310 Selling Professionally

This course shows the importance of good selling techniques and the personal qualifications required for effective selling. It emphasizes the development of a business personality and its application to the approach direction, and closing of a sale. It also examines various kinds of selling experience: direct, industrial, wholesale and retail. This course is recommended for men and women preparing for various technical fields as well as all business majors.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO 1: DEMONSTRATE SKILL AND COMPREHENSION IN BUSINESS SALES (AS INDICATED BY COURSE OUTCOMES).
  - Recognize and demonstrate the qualifications and characteristics necessary for effective selling.
- SLO 2: DEMONSTRATE THE ABILITY TO THINK CRITICALLY AND ANALYZE PROBLEMS.
  - Analyze career opportunities and benefits available in selling.
  - Understand marketing and apply this knowledge to the approach, direction and closing of a sale.
  - Analyze differences in techniques used in direct, industrial, wholesale and retail sales.

MKT 312 Retailing

Retailing is a business that provides goods and services to customers for their personal use. This course will study modern retail operations with emphasis on consumer behavior, store location and layout, sourcing of goods, pricing, organization, promotion, management and other pertinent factors of retail operations.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- analyze the position of retailing in the wider scope of other marketing institutions (SLO #1).
- examine the various types of retail organizations and their internal structure.
- relate business location theories to the local retail market.
- compare and be able to utilize various sources of merchandise and develop a usable buying plan (SLO #2).
- identify the characteristics of the various types of promotions and be able to plan and schedule promotional programs.
- apply basic mathematics to retail markup procedures and be able to use that skill in a variety of retail applications.
- illustrate various consumer behavior patterns and how the retail store should adapt to them (SLO#3).
- recognize various fashion retailing trends and applications.
- understand and recognize the variables in service retailing.

MKT 314 Advertising
This course is an introduction to the field of advertising, its history, purpose, institutions, and functions. Studies are made of the various media used in general advertising, as well as the effective use of these media. Students will produce ads and advertising campaigns. This course is the same as RTVF 376, and only one may be taken for credit.

Student Learning Outcomes
Upon completion of this course, the student will be able to:

- SLO 1: DEMONSTRATE THE ABILITY TO THINK CRITICALLY AND ANALYZE PROBLEMS.
  - Establish criteria for planning, advertising, and selecting appropriate media.
  - Evaluate state and federal laws applicable in the field of advertising.
- SLO 2: DEMONSTRATE SKILL AND COMPREHENSION IN ADVERTISING FORMATS (AS INDICATED BY COURSE OUTCOMES).
  - Demonstrate an awareness of the importance of advertising in our economy and society.
  - Establish criteria for recognizing and analyzing various forms of advertising.

MKT 330 Internet Marketing

This course introduces students to the use of social media and other Internet technologies, with an emphasis on the theory and practice of marketing in an electronic environment. Topics will include strategies to help students build customer relations through technological strategies. Students will have a good understanding of how this technology can be used to help his/her business be more successful.

Student Learning Outcomes
Upon completion of this course, the student will be able to:

- SLO 1: DEMONSTRATE SKILL AND COMPREHENSION IN INTERNET MARKETING
  - Create effective internet marketing strategies that enhance the business relationship with present and future customers.
  - Explain the basic terminology and technology of the Internet.
  - Apply the principles of e-business to various industries and marketing opportunities.
- SLO 2: EXAMINE AND DEMONSTRATE APPROPRIATE RESPONSES INTERNET MARKETING DECISIONS
  - Examine the steps in developing a mobile marketing campaign.
  - Identify and evaluate decisions in the selection of Internet marketing strategies to make a business more effective.
  - Describe the benefits of an Internet business presence.

MKT 495 Independent Studies in Marketing

An independent studies project involves an individual student or small group of students in study, research, or activities beyond the scope of regularly offered courses. See the current catalog section of "Special Studies" for full details of Independent Studies.
Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO #1: Actively engage in intellectual inquiry beyond that required in order to pass a course of study (College Wide Learning Outcome – Area 4).
- Discuss and outline a proposal of study (that can be accomplished within one semester term) with a supervising instructor qualified within the discipline.
- Design an independent study (to be completed individually or by collaboration of a small group) to foster special knowledge, skills, and experience that are not available in any one regularly scheduled course.
- Use information resources to gather discipline-specific information.
- SLO #2: Utilize modes of analysis and critical thinking to apply theoretical perspectives and/or concepts in the major discipline of study to significant problems and/or educational activities (College Wide Learning Outcome – Area 3).
- Analyze and apply the knowledge, skills and experience that are involved in the independent study to theoretical perspectives and/or concepts in the major discipline of study.
- Explain the importance of the major discipline of study in the broader picture of society.
- SLO #3: Communicate a complex understanding of content matter of the major discipline of study (College Wide Outcome – Area 3).
- Demonstrate competence in the skills essential to mastery of the major discipline of study that are necessary to accomplish the independent study.
- SLO #4: Identify personal goals and pursue these goals effectively (College Wide Outcome – Area 4).
- Utilize skills from the "academic tool kit" including time management, study skills, etc., to accomplish the independent study within one semester term.

MKT 498 Work Experience in Marketing

Units: 1 - 4
Hours: 60 - 300 hours LAB
Prequisite: None.
Enrollment Limitation: Students must be in a paid or unpaid internship, volunteer position or job related to career goals in Marketing.
Transferable: CSU
General Education: AA/AS Area III(b)
Catalog Date: June 1, 2020

This course provides students with opportunities to develop marketable skills in preparation for employment in their major field of study or advancement within their career. It is designed for students interested in work experience and/or internships in transfer level degree occupational programs. Course content includes understanding the application of education to the workforce; completion of required forms which document the student's progress and hours spent at the work site; and developing workplace skills and competencies. Appropriate level learning objectives are established by the student and the employer. During the semester, the student is required to participate in a weekly orientation and 75 hours of related paid work experience, or 60 hours of unpaid work experience for one unit. An additional 75 or 60 hours of related work experience is required for each additional unit. Work Experience may be taken for a total of 16 units when there are new or expanded learning objectives. Only one Work Experience course may be taken per semester.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- DEMONSTRATE AN UNDERSTANDING AND APPLICATION OF PROFESSIONAL WORKPLACE BEHAVIOR IN A FIELD OF STUDY RELATED TO ONE'S CAREER(SLO 1)
- Understand the effects time, stress, and organizational management have on performance.
- Demonstrate an understanding of consistently practicing ethics and confidentiality in a workplace.
- Examine the career/life planning process and relate its relevancy to the student.
- Demonstrate an understanding of basic communication tools and their appropriate use.
- Demonstrate an understanding of workplace etiquette.
- DESCRIBE THE CAREER/LIFE PLANNING PROCESS AND RELATE ITS RELEVANCY TO ONE’S CAREER(SLO 2)
- Link personal goals to long term achievement.
• Display an understanding of creating a professional first impression.
• Understand how networking is a powerful job search tool.
• Understand necessary elements of a résumé.
• Understand the importance of interview preparation.
• Identify how continual learning increases career success.

• DEMONSTRATE APPLICATION OF INDUSTRY KNOWLEDGE AND THEORETICAL CONCEPTS AS WRITTEN IN LEARNING OBJECTIVES IN PARTNERSHIP WITH THE EMPLOYER WORK SITE SUPERVISOR (SLO 3)
CRC's Mathematics program offers a comprehensive mathematics curriculum addressing the needs of both transfer and non-transfer students. The study of mathematics provides students with the ability to think logically and abstractly and to use problem-solving and computational skills necessary for success in any field of study.

Associate Degrees for Transfer

A.S.-T. in Mathematics

The Associate in Science in Mathematics for Transfer degree is designed to meet common lower-division requirements for a major in mathematics at most California State University (CSU) campuses. Satisfactory completion of the CRC Associate in Science in Mathematics for Transfer (AS-T) degree provides a solid foundation and satisfies the standard prerequisites for upper division coursework for mathematics majors at most CSU and other four-year universities. However, it is highly recommended that students meet with a counselor since major and general education requirements vary for each college/university.

Catalog Date: June 1, 2020

Degree Requirements

<table>
<thead>
<tr>
<th>COURSE CODE</th>

</tr>
<tr>
<td>MATH 420</td>
<td>Differential Equations</td>
<td>4</td>
</tr>
<tr>
<td>Total Units:</td>
<td></td>
<td>22</td>
</tr>
</tbody>
</table>

The Associate in Science in Mathematics for Transfer (AS-T) degree may be obtained by completion of 60 transferable, semester units with a minimum 2.0 GPA, including (a) the major or area of emphasis described in the Required Program, and (b) either the Intersegmental General Education Transfer Curriculum (IGETC) or the California State University General Education-Breadth Requirements.

Student Learning Outcomes

Upon completion of this program, the student will be able to:

- explain and apply basic concepts of single variable calculus including various forms of derivatives and integrals, their interconnections, and their uses in analyzing and solving real-world problems.

- explain and apply basic concepts of multivariable calculus, linear algebra, or differential equation techniques, their interconnections, and their uses in analyzing and solving real-world problems.
prepare logical arguments and use them to prove basic mathematical theorems.

solve real-world application problems using appropriate mathematical problem-solving skills.

Career Information

Mathematicians work as statisticians, analysts, computer programmers, actuaries, researchers, planners, and educators. NOTE TO TRANSFER STUDENTS: The Associate Degree for Transfer program is designed for students who plan to transfer to a campus of the California State University (CSU). Other than the required core, the courses you choose to complete this degree will depend to some extent on the selected CSU for transfer. In addition, some CSU-GE Breadth or IGETC requirements can also be completed using courses required for this associate degree for transfer major (known as “double-counting”). Meeting with a counselor to determine the most appropriate course choices will facilitate efficient completion of your transfer requirements. For students wishing to transfer to other universities (UC System, private, or out-of-state), the Associate Degree for Transfer may not provide adequate preparation for upper-division transfer admissions; it is critical that you meet with a CRC counselor to select and plan the courses for the major, as programs vary widely in terms of the required preparation.

Associate Degrees

A.S. in Mathematics

This degree is designed to provide a foundation in mathematics and to meet common lower-division requirements for a major in Mathematics or Statistics at many four-year institutions. It is highly recommended that students meet with a counselor because major and general education requirements vary for each college/university.

NOTE TO TRANSFER STUDENTS:
If you are interested in transferring to a four-year college or university to pursue a bachelor’s degree in Mathematics, it is critical that you meet with a CRC counselor to select and plan the courses for your major. Schools vary widely in terms of the required preparation. The courses that CRC requires for an Associate’s degree in Mathematics may be different from the courses required for the Bachelor’s degree.

</tbody>
</table>

The Mathematics Associate in Science (A.S.) degree may be obtained by completion of the required program, plus general education requirements, plus sufficient electives to meet a 60-unit total. See CRC graduation requirements.

Student Learning Outcomes

Upon completion of this program, the student will be able to:

- explain and apply basic concepts of single variable calculus including various forms of derivatives and integrals, their interconnections, and their uses in analyzing and solving real-world problems (P-SLO #1)
Mathematics (MATH)

MATH 20 Arithmetic
This course provides instruction in the fundamentals of arithmetic with emphasis on computational skills. Topics include whole numbers, fractions, decimals, percents, ratios, proportions, problem solving, and applications. Upon completion of this course, the student will be able to:

SLO (1): CORRECTLY USE THE ORDER OF OPERATIONS TO EVALUATE EXPRESSIONS. ACCURATELY COMPUTE PROBLEMS INVOLVING THE BASIC OPERATIONS OF ARITHMETIC (ADDITION, SUBTRACTION, MULTIPLICATION, DIVISION, EXPONENTS, ORDER OF OPERATIONS) ON WHOLE NUMBERS, FRACTIONS, AND DECIMALS.

Identify the prime numbers from 2 to 50. Use divisibility tests, factorization, and the concept of prime and composite to construct the least common multiple. Understand the process of rewriting a given number as the product of all distinct prime numbers.

Express numeric information in one of the following three forms: fraction, percent, decimal.

Convert numeric information into and out of scientific notation.

Incorporate concepts of prime factorization and greatest common factor to simplify fractions.

Evaluate problems involving ratios, proportions, and percents.

Perform unit conversions for American measurements which involve length, capacity, weight, and times. Use the method of unit conversions to solve application problems.

Demonstrate concepts of rounding and estimation of whole numbers and decimals to nearest place value.

SLO (2): DEMONSTRATE THE ABILITY TO TRANSLATE MATHEMATICAL PROBLEMS IN WORD FORM TO AN EXPRESSION OR SINGLE VARIABLE EQUATION, AND SOLVE SINGLE VARIABLE ONE-STEP EQUATIONS.

Translate simple English phrases and sentences into simple algebraic expressions and equations.

Construct equations by translating information from word form to symbolic form with use of a variable.

Set up applied problems involving ratios, proportions, and percents.

Calculate solutions of one-step single variable equations.

Solve applications problems involving whole numbers, fractions, decimals, ratios, proportions, and percents.

Find perimeter and area of basic Euclidean and compound shapes.

SLO (3): ANALYZE PATTERNS AND ORGANIZE MATHEMATICAL THOUGHTS TO INCREASE THE LEVEL OF ABSTRACT THINKING THAT IS ESSENTIAL FOR REAL LIFE PROBLEM SOLVING.

Apply mathematical concepts and patterns to new problems and new situations.

Career Information
Mathematicians work as statisticians, analysts, computer programmers, actuaries, researchers, planners, and educators. Most of these careers require education beyond the two-year college level.
MATH 30 Pre-Algebra Mathematics

Units: 5
Hours: 90 hours LEC
Prerequisite: MATH 20 with a grade of "C" or better; or equivalent skills demonstrated through the assessment process.
Catalog Date: June 1, 2020

This pre-algebra mathematics course emphasizes: fundamental operations on integers, fractions, and decimals; formulas involving geometric figures; measurement; and solving basic equations. Topics include: fractions; decimals; signed numbers; properties of exponents; scientific notation; conversions; metric system; square and cube roots; formula evaluation; solving equations; ratios; proportions; algebraic manipulations; descriptive statistics; the rectangular coordinate system; and elementary calculator use.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO 1: ARTICULATE THE IMPORTANCE OF THE ORDER OF OPERATIONS AND HOW THEY RELATE TO THE REAL NUMBER SYSTEM, EXPRESSIONS, EQUATIONS AND EVALUATION OF MATHEMATICAL FORMULAS.
- Compute with accuracy problems involving the basic operations of arithmetic (addition, subtraction, multiplication, division, exponents, order of operations) on signed numbers.
- Multiply and divide numbers expressed in scientific notation.
- Simplify expressions involving variables by adding, subtracting, multiplying, dividing, or reducing.
- Use and evaluate formulas with more than one variable.
- Demonstrate accurate use of the properties of real numbers and the exponent rules in addition, subtraction, and multiplication of polynomials.
- SLO 2: DEMONSTRATE THE ABILITY TO RECOGNIZE KEY WORDS OR PHRASES THAT WOULD GUIDE ONE THROUGH THE TRANSLATION OF A MATHEMATICAL PROBLEM IN WORD FORM TO AN ALGEBRAIC EXPRESSION OR EQUATION.
- Solve applied problems using signed numbers, variable expressions, scientific notation, and equations.
- Solve linear equations in one variable involving signed numbers, fractions, and decimals.
- Directly translate equations in word form to symbolic form with use of variables and solve them.
- SLO 3: INVESTIGATE AND MODEL REAL LIFE PHENOMENA THROUGH THE USE OF LINEAR EQUATIONS IN TWO VARIABLES AND THEIR CORRESPONDING GRAPHS (ALGEBRAICALLY AND GEOMETRICALLY), AND THINK CRITICALLY ABOUT HOW THE MATHEMATICS IS RELEVANT TO ONE’S LIFE.
- Find solutions to linear equations in two variables and plot these points on the two-dimensional coordinate system.
- Interpret graphs of two-dimensional data, such as bar graphs, line graphs and pie charts.
- SLO 4: UTILIZE AND APPLY THE METHOD OF DIMENSIONAL ANALYSIS (OR UNIT ANALYSIS) TO COMPARE AND CONVERT QUANTITIES.
- Solve applied problems using measurement conversions, proportions, and percent.
- Perform accurate computations involving measurement conversion.
- SLO 5: POSSESS THE ABILITY TO RECOGNIZE PATTERNS, ORGANIZE MATHEMATICAL THOUGHTS, AND INCREASE THE LEVEL OF ABSTRACT THINKING THAT IS ESSENTIAL FOR REAL LIFE PROBLEM SOLVING.

MATH 70 Arithmetic Skills Lab

Units: 0.25 - 2
Hours: 13.5 - 108 hours LAB
Prerequisite: None.
Corequisite: MATH 20
Catalog Date: June 1, 2020

Demonstrate ability to communicate mathematically by writing and presenting the work of the problems in an organized way.
This laboratory course provides the student with assistance in arithmetic skills via enrollment in the campus' Math Center. It is recommended for students who are encountering difficulties in the areas of math anxiety, basic skills, problem solving, and/or arithmetic concepts. Students may enter the Skills Lab course at any time during the first 12 weeks of the semester. It is recommended that the student register for 0.25 units. This recommended unit enrollment will require the student to spend a minimum of 13.5 hours throughout the semester in the Math Center studying for the relevant course. Students can take this course again in subsequent semesters until 2.0 total units have been completed. Students must be concurrently enrolled in an arithmetic-level course (MATH 20 - 29) in order to enroll in MATH 70. Placement into this Skills Lab can be made through student request, instructor recommendation, or an assessment process. This course is graded on a pass/no-pass basis.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- **SLO(1): BUILD STUDY SKILLS AND LEARNING STRATEGIES NEEDED FOR CONTINUED SUCCESS IN MATHEMATICS EDUCATION.**
  - demonstrate improved math study skills.
  - exhibit increased confidence level in approaching mathematics.
- **SLO(2): UTILIZE MATHEMATICAL SKILLS IN A VARIETY OF CONTEXTS.**
  - demonstrate an improved performance at the arithmetic level.
- **SLO(3): FORMULATE STRATEGIES AND CHOOSE AN APPROPRIATE COMBINATION OF TECHNIQUES FOR SOLVING APPLIED PROBLEMS.**
  - employ problem solving strategies to improve specific course skills.

MATH 71 Pre-Algebra Skills Lab

**Units:** 0.25 - 2  
**Hours:** 13.5 - 108 hours LAB  
**Prerequisite:** None  
**Corequisite:** MATH 30  
**Catalog Date:** June 1, 2020

This laboratory course provides the student with assistance in pre-algebra skills via enrollment in the campus' Math Center. It is recommended for students who are encountering difficulties in the areas of math anxiety, basic skills, problem solving, algebraic manipulations and/or algebra concepts. Students may enter the Skills Lab course at any time during the first 12 weeks of the semester. It is recommended that the student register for 0.25 units. This recommended unit enrollment will require the student to spend a minimum of 13.5 hours throughout the semester in the Math Center studying for the relevant course. Students can take this course again in subsequent semesters until 2.0 total units have been completed. Students must be concurrently enrolled in a pre-algebra-level course (MATH 30 - 39) in order to enroll in MATH 71. Placement into this Skills Lab can be made through student request, instructor recommendation, or an assessment process. This course is graded on a pass/no-pass basis.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- **SLO(1): BUILD STUDY SKILLS AND LEARNING STRATEGIES NEEDED FOR CONTINUED SUCCESS IN MATHEMATICS EDUCATION.**
  - demonstrate improved math study skills.
  - exhibit increased confidence level in approaching mathematics.
- **SLO(2): UTILIZE MATHEMATICAL SKILLS IN A VARIETY OF CONTEXTS.**
  - demonstrate an improved performance at the prealgebra level.
- **SLO(3): FORMULATE STRATEGIES AND CHOOSE AN APPROPRIATE COMBINATION OF TECHNIQUES FOR SOLVING APPLIED PROBLEMS.**
  - employ problem solving strategies to improve specific course skills.

MATH 72 Elementary Algebra Skills Lab
This laboratory course provides the student with assistance in elementary algebra skills via enrollment in the campus' Math Center. It is recommended for students who are encountering difficulties in the areas of math anxiety, basic skills, problem solving, algebraic manipulations and/or algebra concepts. Students may enter the Skills Lab course at any time during the first 12 weeks of the semester. It is recommended that the student register for 0.25 units. This recommended unit enrollment will require the student to spend a minimum of 13.5 hours throughout the semester in the Math Center studying for the relevant course. Students can take this course again in subsequent semesters until 2.0 total units have been completed. Students must be concurrently enrolled in an elementary algebra-level course (MATH 100 - 109) in order to enroll in MATH 72. Placement into this Skills Lab can be made through student request, instructor recommendation, or an assessment process. This course is graded on a pass/no-pass basis.

**Student Learning Outcomes**

Upon completion of this course, the student will be able to:

- SLO(1): BUILD STUDY SKILLS AND LEARNING STRATEGIES NEEDED FOR CONTINUED SUCCESS IN MATHEMATICS EDUCATION.
- demonstrate improved math study skills.
- exhibit increased confidence level in approaching mathematics.
- SLO(2): UTILIZE MATHEMATICAL SKILLS IN A VARIETY OF CONTEXTS.
- demonstrate an improved performance at the elementary algebra level.
- SLO(3): FORMULATE STRATEGIES AND CHOOSE AN APPROPRIATE COMBINATION OF TECHNIQUES FOR SOLVING APPLIED PROBLEMS.
- employ problem solving strategies to improve specific course skills.

**MATH 73 Intermediate Algebra/Math Literacy Skills Lab**

This laboratory course provides the student with assistance in intermediate algebra skills via enrollment in the campus' Math Center. It is recommended for students who are encountering difficulties in the areas of math anxiety, basic skills, problem solving, algebraic manipulations and/or intermediate algebra concepts. Students may enter the Skills Lab course at any time during the first 12 weeks of the semester. It is recommended that the student register for 0.25 units. This recommended unit enrollment will require the student to spend a minimum of 13.5 hours throughout the semester in the Math Center studying for the relevant course. Students can take this course again in subsequent semesters until 2.0 total units have been completed. Students must be concurrently enrolled in an intermediate algebra-level course (MATH 120 - 129), including any mathematical literacy course (MATH 140 - 149) in order to enroll in MATH 73. Placement into this Skills Lab can be made through student request, instructor recommendation, or an assessment process. This course is graded on a pass/no-pass basis.

**Student Learning Outcomes**

Upon completion of this course, the student will be able to:

- SLO(1): BUILD STUDY SKILLS AND LEARNING STRATEGIES NEEDED FOR CONTINUED SUCCESS IN MATHEMATICS EDUCATION.
- demonstrate improved math study skills.
- exhibit increased confidence level in approaching mathematics.
- SLO(2): UTILIZE MATHEMATICAL SKILLS IN A VARIETY OF CONTEXTS.
- demonstrate an improved performance at the intermediate algebra level.
- SLO(3): FORMULATE STRATEGIES AND CHOOSE AN APPROPRIATE COMBINATION OF TECHNIQUES FOR SOLVING APPLIED PROBLEMS.
- employ problem solving strategies to improve specific course skills.
MATH 74 Statistics/Geometry Skills Lab

This laboratory course provides the student with assistance in statistics and/or geometry skills via enrollment in the campus' Math Center. It is recommended for students who are encountering difficulties in the areas of math anxiety, basic skills, problem solving, algebraic manipulations, statistics and/or geometry concepts. Students may enter the Skills Lab course at any time during the first 12 weeks of the semester. It is recommended that the student register for 0.25 units. This recommended unit enrollment will require the student to spend a minimum of 13.5 hours throughout the semester in the Math Center studying for the relevant course. Students can take this course again in subsequent semesters until 2.0 total units have been completed. Students must be concurrently enrolled in a statistics (STAT 300) or Geometry (MATH 110) course in order to enroll in MATH 74. Placement into this Skills Lab can be made through student request, instructor recommendation, or an assessment process. This course is graded on a pass/no-pass basis.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO(1): BUILD STUDY SKILLS AND LEARNING STRATEGIES NEEDED FOR CONTINUED SUCCESS IN MATHEMATICS EDUCATION.
  - demonstrate improved math study skills.
  - exhibit increased confidence level in approaching mathematics.
- SLO(2): UTILIZE MATHEMATICAL SKILLS IN A VARIETY OF CONTEXTS.
  - demonstrate an improved performance at the statistics and/or geometry level.
- SLO(3): FORMULATE STRATEGIES AND CHOOSE AN APPROPRIATE COMBINATION OF TECHNIQUES FOR SOLVING APPLIED PROBLEMS.
  - employ problem solving strategies to improve specific course skills.

MATH 75 Skills Lab for Miscellaneous Non-Transferable Math

This laboratory course provides the student with assistance in all non-transfer-level math courses via enrollment in the campus' Math Center. It is recommended for students who are encountering difficulties in the areas of math anxiety, basic skills, problem solving, algebraic manipulations, and/or algebra concepts. Students may enter the Skills Lab course at any time during the first 12 weeks of the semester. It is recommended that the student register for 0.25 units. This recommended unit enrollment will require the student to spend a minimum of 13.5 hours throughout the semester in the Math Center studying for the relevant course. Students can take this course again in subsequent semesters until 2.0 total units have been completed. Students must be concurrently enrolled in a non-transferable math course (MATH 20 – 199) in order to enroll in MATH 75. MATH 75 should only be used as a Skills Lab if there is not already a relevant Skills Lab course available that better fits the student's main math course. Placement into this Skills Lab can be made through student request, instructor recommendation, or an assessment process. This course is graded on a pass/no-pass basis.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO(1): BUILD STUDY SKILLS AND LEARNING STRATEGIES NEEDED FOR CONTINUED SUCCESS IN MATHEMATICS EDUCATION.
  - demonstrate improved math study skills.
  - exhibit increased confidence level in approaching mathematics.
- SLO(2): UTILIZE MATHEMATICAL SKILLS IN A VARIETY OF CONTEXTS.
  - demonstrate an improved performance at the non-transferable math level.
- SLO(3): FORMULATE STRATEGIES AND CHOOSE AN APPROPRIATE COMBINATION OF TECHNIQUES FOR SOLVING APPLIED PROBLEMS.
  - employ problem solving strategies to improve specific course skills.
MATH 76 Trigonometry/Precalculus Skills Lab

Units: 0.25 - 2
Hours: 13.5 - 108 hours LAB
Prerequisite: None.
Corequisite: MATH 335 or 370
Catalog Date: June 1, 2020

This laboratory course provides the student with assistance in trigonometry and/or precalculus (including college algebra) skills via enrollment in the campus' Math Center. It is recommended for students who are encountering difficulties in the areas of math anxiety, advanced algebra skills, problem solving, trigonometric concepts, functions, graphs, etc. Students may enter the Skills Lab course at any time during the first 12 weeks of the semester. It is recommended that the student register for 0.25 units. This recommended unit enrollment will require the student to spend a minimum of 13.5 hours throughout the semester in the Math Center studying for the relevant course. Students can take this course again in subsequent semesters until 2.0 total units have been completed. Students must be concurrently enrolled in a trigonometry (MATH 335) or precalculus (MATH 370) course in order to enroll in MATH 76. Placement into this Skills Lab can be made through student request, instructor recommendation, or an assessment process. This course is graded on a pass/no-pass basis.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO(1): BUILD STUDY SKILLS AND LEARNING STRATEGIES NEEDED FOR CONTINUED SUCCESS IN MATHEMATICS EDUCATION.
  - demonstrate improved math study skills.
  - exhibit increased confidence level in approaching mathematics.
- SLO(2): UTILIZE MATHEMATICAL SKILLS IN A VARIETY OF CONTEXTS.
  - demonstrate an improved performance at the trigonometry, college algebra, and/or precalculus level.
- SLO(3): FORMULATE STRATEGIES AND CHOOSE AN APPROPRIATE COMBINATION OF TECHNIQUES FOR SOLVING APPLIED PROBLEMS.
  - employ problem solving strategies to improve specific course skills.

MATH 77 Calculus I/II Skills Lab

Units: 0.25 - 2
Hours: 13.5 - 108 hours LAB
Prerequisite: None.
Corequisite: MATH 350, 351, 400, or 401
Catalog Date: June 1, 2020

This laboratory course provides the student with assistance in differential and/or integral calculus skills via enrollment in the campus' Math Center. It is recommended for students who are encountering difficulties in the areas of math anxiety, advanced algebra skills, problem solving, calculus concepts, etc. Students may enter the Skills Lab course at any time during the first 12 weeks of the semester. It is recommended that the student register for 0.25 units. This recommended unit enrollment will require the student to spend a minimum of 13.5 hours throughout the semester in the Math Center studying for the relevant course. Students can take this course again in subsequent semesters until 2.0 total units have been completed. Students must be concurrently enrolled in a differential or integral calculus course (MATH 350, 351, 400 or 401) in order to enroll in MATH 77. Placement into this Skills Lab can be made through student request, instructor recommendation, or an assessment process. This course is graded on a pass/no-pass basis.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO(1): BUILD STUDY SKILLS AND LEARNING STRATEGIES NEEDED FOR CONTINUED SUCCESS IN MATHEMATICS EDUCATION.
  - demonstrate improved math study skills.
  - exhibit increased confidence level in approaching mathematics.
- SLO(2): UTILIZE MATHEMATICAL SKILLS IN A VARIETY OF CONTEXTS.
  - demonstrate an improved performance at the differential and/or integral calculus level.
MATH 78 Calculus III/DE/Linear Algebra Skills Lab

Units: 0.25 - 2
Hours: 13.5 - 108 hours LAB
Prerequisite: None.
Corequisite: MATH 402, 410, or 420
Catalog Date: June 1, 2020

This laboratory course provides the student with assistance in multi-variable calculus, differential equations, and linear algebra skills via enrollment in the campus' Math Center. It is recommended for students who are encountering difficulties in the areas of math anxiety, advanced algebra skills, problem solving, calculus concepts, etc. Students may enter the Skills Lab course at any time during the first 12 weeks of the semester. It is recommended that the student register for 0.25 units. This recommended unit enrollment will require the student to spend a minimum of 13.5 hours throughout the semester in the Math Center studying for the relevant course. Students can take this course again in subsequent semesters until 2.0 total units have been completed. Students must be concurrently enrolled in a multi-variable calculus (MATH 402), linear algebra (MATH 410), or differential equations (MATH 420) course in order to enroll in MATH 78. Placement into this Skills Lab can be made through student request, instructor recommendation, or an assessment process. This course is graded on a pass/no-pass basis.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO(1): BUILD STUDY SKILLS AND LEARNING STRATEGIES NEEDED FOR CONTINUED SUCCESS IN MATHEMATICS EDUCATION.
- demonstrate improved math study skills.
- exhibit increased confidence level in approaching mathematics.
- SLO(2): UTILIZE MATHEMATICAL SKILLS IN A VARIETY OF CONTEXTS.
- demonstrate an improved performance at the vector calculus, differential equations, and/or linear algebra level.
- SLO(3): FORMULATE STRATEGIES AND CHOOSE AN APPROPRIATE COMBINATION OF TECHNIQUES FOR SOLVING APPLIED PROBLEMS.
- employ problem solving strategies to improve specific course skills.

MATH 79 Skills Lab for Miscellaneous Transferable Math

Units: 0.25 - 2
Hours: 13.5 - 108 hours LAB
Prerequisite: None.
Catalog Date: June 1, 2020

This laboratory course provides the student with assistance in all transfer-level math courses via enrollment in the campus' Math Center. It is recommended for students who are encountering difficulties in the areas of math anxiety, advanced algebra skills, problem solving, trigonometry, calculus, etc. Students may enter the Skills Lab course at any time during the first 12 weeks of the semester. It is recommended that the student register for 0.25 units. This recommended unit enrollment will require the student to spend a minimum of 13.5 hours throughout the semester in the Math Center studying for the relevant course. Students can take this course again in subsequent semesters until 2.0 total units have been completed. Students must be concurrently enrolled in a transfer-level math course (MATH 300 and above) in order to enroll in MATH 79. MATH 79 should only be used as a Skills Lab if there is not already a relevant Skills Lab course available that better fits the student's main math course. Placement into this Skills Lab can be made through student request, instructor recommendation, or an assessment process. This course is graded on a pass/no-pass basis.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO(1): BUILD STUDY SKILLS AND LEARNING STRATEGIES NEEDED FOR CONTINUED SUCCESS IN MATHEMATICS EDUCATION.
- demonstrate improved math study skills.
- exhibit increased confidence level in approaching mathematics.
- SLO(2): UTILIZE MATHEMATICAL SKILLS IN A VARIETY OF CONTEXTS.
- demonstrate an improved performance at the transferable math level.
- **SLO(3): FORMULATE STRATEGIES AND CHOOSE AN APPROPRIATE COMBINATION OF TECHNIQUES FOR SOLVING APPLIED PROBLEMS.**
- employ problem solving strategies to improve specific course skills.

**MATH 81 Academic Skills in Mathematics**

- **Units:** 0.25 - 6
- **Hours:** 13.5 - 324 hours LAB
- **Prerequisite:** None.
- **Catalog Date:** June 1, 2020

This course is designed for students concurrently enrolled in MATH 20, 30, 100, 101, 102, 110, 120, 125, or 144; placement can be made through student request, instructor recommendation, or an assessment process. This laboratory course provides assistance in math skills to students enrolled in a non-transferable mathematics course. Students may enter the course at any time during the first 12 weeks of the semester and earn 0.25 or 0.5 units. This course is graded on a pass/no-pass basis. MATH 81 is recommended for students who are encountering difficulties in the areas of math anxiety, basic skills, algebraic concepts or manipulation, graphing, problem solving, etc.

**Student Learning Outcomes**

Upon completion of this course, the student will be able to:

- **SLO(1): BUILD STUDY SKILLS AND LEARNING STRATEGIES NEEDED FOR CONTINUED SUCCESS IN MATHEMATICS EDUCATION.**
- demonstrate improved math study skills.
- exhibit increased confidence level in approaching mathematics.
- **SLO(2): UTILIZE MATHEMATICAL SKILLS IN A VARIETY OF CONTEXTS.**
- demonstrate an improved performance at the appropriate course level.
- **SLO(3): FORMULATE STRATEGIES AND CHOOSE AN APPROPRIATE COMBINATION OF TECHNIQUES FOR SOLVING APPLIED PROBLEMS.**
- employ problem solving strategies to improve specific course skills.

**MATH 82 Academic Skills in Mathematics for Transfer Level**

- **Units:** 0.25 - 6
- **Hours:** 13.5 - 324 hours LAB
- **Prerequisite:** None.
- **Catalog Date:** June 1, 2020

This course is designed for students concurrently enrolled in MATH 300, MATH 310, MATH 315, MATH 335, MATH 341, MATH 343, MATH 344, MATH 350, MATH 351, MATH 370, MATH 400, MATH 401, MATH 402, MATH 410, MATH 420, or STAT 300. This laboratory course provides assistance in math skills to students enrolled in a transferable mathematics or statistics course. Students may enter the course at any time during the first 12 weeks of the semester and earn 0.25 or 0.5 units. This course is graded on a pass/no-pass basis. MATH 82 is recommended for students who are encountering difficulties in the areas of math anxiety, basic skills, algebraic concepts or manipulations, graphing, statistics, problem solving, etc.

**Student Learning Outcomes**

Upon completion of this course, the student will be able to:

- **SLO(1): BUILD STUDY SKILLS AND LEARNING STRATEGIES NEEDED FOR CONTINUED SUCCESS IN MATHEMATICS EDUCATION.**
- apply problem solving strategies to improve specific skills at the appropriate course level.
- exhibit increased confidence level in approaching mathematics.
- **SLO(2): UTILIZE MATHEMATICAL SKILLS IN A VARIETY OF CONTEXTS.**
- demonstrate an improved performance at the appropriate course level.
SLO(3): FORMULATE STRATEGIES AND CHOOSE AN APPROPRIATE COMBINATION OF TECHNIQUES FOR SOLVING APPLIED PROBLEMS.

employ problem solving strategies to improve specific course skills.

MATH 83 Self Study Mathematics Modules

Units: 0.25 - 1
Hours: 13.5 - 54 hours LAB
Prerequisite: None.
Catalog Date: June 1, 2020

The course enables students to review specific math topics which are necessary for success in MATH 20, MATH 30, MATH 100 or any course requiring the skills taught in these classes. Learning objectives and the course of study will be designed for each individual based on the needs of the student. A partial list of modules includes fractions, decimals, signed number arithmetic, percent, simplifying algebraic expressions, factoring, and solving linear equations. Modules cannot replace any existing mathematics course, and successful completion of MATH 83 currently does not satisfy any mathematics prerequisite. MATH 83 is a credit/no-credit class and students can enroll in the class at any time during the semester.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO(1): UTILIZE MATHEMATICAL TERMINOLOGY AND ARTICULATE MATHEMATICAL CONCEPTS APPROPRIATE TO THE MODULE BEING STUDIED.
- Understand the terms and concepts covered by the module.
- SLO(2): EMPLOY MATHEMATICAL SKILLS AT A MASTERY LEVEL.
- Practice using the skills covered in the module.
- Demonstrate competency at an 80 percent level.
- ANALYZE A MATHEMATICAL PROBLEM AND APPLY AN APPROPRIATE SET OF PROBLEM-SOLVING SKILLS.
- Complete a critical thinking exercise applying the skills of the module.

MATH 85 Math Study Skills

Units: 1
Hours: 18 hours LEC
Prerequisite: None.
Catalog Date: June 1, 2020

This course is designed to assist students in learning mathematics through the development of successful math study skills, specifically at the basic skills level (arithmetic, prealgebra, and beginning algebra). This course addresses topics such as learning styles, tools and techniques for reading a math textbook, using math homework as a learning tool, taking notes in a math class, preparing and taking exams/quizzes in a math class, and techniques for overcoming math anxiety. It is strongly advised that students be concurrently enrolled in a math course, as an opportunity to apply the learned material in real time. For further guidance and/or recommendations, students are advised to speak with someone in the math department.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO#1: DEMONSTRATE AN UNDERSTANDING OF THE LEARNING PROCESS AS IT APPLIES TO MATHEMATICS AS SHOWN BY:
  - Analyzing his/her current study habits and attitudes as they pertain to math courses
  - Distinguishing the differences between learning mathematics and learning other subjects
  - Classifying individual learning styles

- SLO#2: RECOGNIZE AND APPLY VARIOUS STRATEGIES APPLICABLE TO A MATHEMATICS COURSE, SUCH AS:
  - Listening and note-taking skills as they pertain to math courses
  - Applying study techniques, including but not limited to, how to read a math textbook and using math homework as a learning tool
MATH 100 Elementary Algebra

This course includes the fundamental concepts and operations of algebra with problem solving skills emphasized throughout. Topics include: properties of real numbers, linear equations and inequalities, integer exponents, polynomials, factoring polynomials. Rational expressions and equations, radical expressions and equations, rational exponents, systems of linear equations and inequalities, the rectangular coordinate system, graphs and equations of lines, and solving quadratic equations.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- **SLO#1:** Use increased computational skills and number sense, recognize the order of operations and properties of real numbers; include evaluating various mathematical formulas and extending operations to variable expressions and combining like terms.
- **SLO#2:** Use increased computational skills and number sense, recognize the order of operations and properties of real numbers.
- **SLO#3:** Solve first degree equations, inequalities and applications.
- **SLO#4:** Identify the types of equations including conditional equations, contradiction and identity and techniques for their solution.
- **SLO#5:** Solve linear inequalities and write the solution in both set-builder and interval notation.
- **SLO#6:** Apply problem solving skills to construct equations and inequalities for application problems and solve the applications by solving the equations or inequalities and appropriately interpreting the results.
- **SLO#7:** Identify and analyze linear equations, and graphs of linear equations and linear inequalities.
- **SLO#8:** Interpret the slope of a line as a rate of change and graph a line.
- **SLO#9:** Generate an algebraic model for data that follows linear behavior and interpret the result of this model. Applications of linear models include linear growth, linear depreciations and rates.
- **SLO#10:** Apply mathematical terminology, symbols and operations to develop and extend arithmetic operations on polynomials and to evaluate polynomial expressions.
- **SLO#11:** Evaluate and expand polynomial expressions and expressions written in scientific notation.
- **SLO#12:** Apply rules of exponents (including negative exponents) to simplify algebraic expressions.
- **SLO#13:** Demonstrate proficiency in all arithmetic operations on polynomials, particularly multiplying using FOIL.
- **SLO#14:** Use operations on polynomials to solve certain polynomial equations and applications.
- **SLO#15:** Understand the concept of prime polynomials and factoring polynomials into primes using various techniques.
- **SLO#16:** Factor out common factors and factor by grouping.
- **SLO#17:** Factor the difference of two squares and factor trinomials including perfect square trinomials.
- **SLO#18:** Solve polynomial equations by factoring and using the zero factor property.
- **SLO#19:** Think critically and abstractly by modeling an application problem using a polynomial equation to solve and interpret the result.
MATH 101 Elementary Algebra - Part I

Units: 2
Hours: 36 hours LEC
Prerequisite: MATH 30 with a grade of "C" or better, or placement through the assessment process.
Catalog Date: June 1, 2020

This course presents the fundamental concepts and operations of algebra with problem solving and critical thinking skills incorporated throughout. Topics include: review of properties of real numbers and signed numbers; algebraic expressions, solving linear equations and inequalities; solving linear systems of equations; graphing, properties of exponents; operations on polynomials.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO#1: Use increased computational skills and number sense, recognizing the order of operations and the basic operations and properties of real numbers, including evaluating various mathematical formulas and extend operations to variable expressions and combining like terms.
- Simplify expressions using the order of operations and basic properties of real numbers.
- Compute with accuracy problems involving the basic operations of arithmetic (addition, subtraction, multiplication, division, exponents, order of operations) on signed numbers.
- Multiply and divide numbers expressed in scientific notation.
- Use and evaluate formulas with more than one variable.
- SLO#2: Solve first degree equations and inequalities and applications.
- Identify the types of equations including consistent, contradiction and identity and demonstrate proficiency in techniques for their solution.
- Solve linear inequalities and writing the solution in both set-builder and interval notation.
- Apply problem solving skills to construct equations and inequalities for application problems and solve the application by solving the equation or inequality and appropriately interpreting the solution.
- SLO#3: Identify linear equations, and accurately graph linear equations using various techniques.
Student Learning Outcomes

Upon completion of this course, the student will be able to:

- **SLO#1**: Understand the concept of prime polynomial and record the products of prime factors of polynomials using various techniques.
- Factor out common factors and factor using grouping.
- Factor difference of square expressions, and factoring trinomial expressions including perfect square trinomials.
- Solve polynomial equations by factoring and using the zero factor property.
- Think critically and abstractly by Modeling an application problem using a polynomial equation and solving and appropriately interpreting the solution.
- **SLO#2**: Simplify rational expressions and apply mathematical terminology, symbols, arithmetic operations and problem-solving on rational expressions.
- Multiply and divide rational expressions and incorporate factoring to simplify to lowest terms.
- Add rational equations using the algebraic method and least common denominator.
- Solve rational equations by multiplying by the least common denominator.
- Develop an appropriate rational equation to model an application problem and use problem-solving skills to solve interpreting the results.
- **SLO#3**: Identify and analyze linear equations, linear inequalities and effectively organize, present and summarize quantitative information using symbolic, numerical and graphical methods.
- Generate an algebraic model for data that follows linear behavior and interpret the results of this model.
- Applications of linear models including linear growth, linear depreciations and rates.
- Graph a linear inequality, compute and interpret the solution to a system of linear inequalities using a graph.
- **SLO#4**: Demonstrate with proficiency how to use arithmetic operations on radicals, simplify radical expressions and solve radical and quadratic equations.
- Simplify different types of radicals, rationalizing denominators and combining radicals when it is appropriate.

**MATH 102 Elementary Algebra - Part II**

| Units: | 3 |
| Hours: | 54 hours LEC |
| Prerequisite: | MATH 101 with a grade of "C" or better, or placement through the assessment process. |
| Catalog Date: | June 1, 2020 |

A continuation of MATH 101, this course presents the fundamental concepts and operations of algebra with problem solving and critical thinking skills incorporated throughout. Topics covered include: factoring and applications; operations on rational expressions and solving rational equations; rectangular coordinate systems; graphing lines and linear inequalities; equation of lines; roots and radical expressions; solving quadratic equations; complex numbers; continued study of problem solving and applications.
MATH 110 Elementary Geometry

Units: 5
Hours: 90 hours LEC
Prerequisite: MATH 100 or 102 with a grade of “C” or better, or placement through the assessment process.
General Education: AA/AS Area II(b)
Catalog Date: June 1, 2020

This course introduces Euclidean Geometry. Topics include sets, definitions, postulates, theorems, deductive and inductive reasoning, proof, parallel lines, triangles, polygons, congruence, similarity, constructions, the Pythagorean Theorem, right triangle trigonometry, circles, analytic geometry, and elementary solid geometry.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO #1: DEMONSTRATE UNDERSTANDING OF THE STEP-BY-STEP DEVELOPMENT OF A LOGICAL MATHEMATICAL SYSTEM
  - Clearly state and correctly use definitions, postulates, and theorems.
  - Write 2-column direct proofs, indirect proofs, and analytic proofs using the definitions, postulates, and theorems of Euclidean geometry.

- SLO #2: DEVELOP PROBLEM-SOLVING SKILLS USED TO SOLVE CALCULATIONS.
  - Find missing side lengths and angle measures in a diagram using appropriate theorems.
  - Find areas of planar figures, surface area and volume of solids.
  - Analyze diagrams in the Cartesian coordinate system.
  - Develop a fundamental understanding and application of right triangle trigonometry.

- SLO #3: CONSTRUCT PROOFS TO VERIFY GEOMETRIC RELATIONSHIPS.
  - Write 2-column direct proofs, indirect proofs, and analytic proofs using the definitions, postulates, and theorems of Euclidean geometry.

- SLO #4: PERFORM GEOMETRIC CONSTRUCTIONS USING A COMPASS AND STRAIGHTEDGE, AND USE A PROTRACTOR TO MEASURE ANGLES
  - Construction of parallel lines, perpendicular lines
  - Bisect an angle and a line segment
  - Copying an angle
  - Use a protractor to measure angles

MATH 120 Intermediate Algebra

Units: 5
Hours: 90 hours LEC
Prerequisite: MATH 100 or 102 with a grade of “C” or better; or equivalent skills demonstrated through the assessment process.
General Education: AA/AS Area II(b)
Catalog Date: June 1, 2020
This course extends the concepts of elementary algebra with problem solving skills and applications emphasized throughout. Topics which are briefly reviewed and subsequently extended include: solving equations (quadratic, radical, rational, and systems of linear equations), graphing linear equations, simplifying expressions (polynomial, rational, radical, and those involving integer exponents), and factoring polynomials. New topics include: solving more complex equations and inequalities (exponential, logarithmic, linear and quadratic inequalities, and systems of non-linear equations), graphing more complex equations (quadratics, circles, and various functions using transformations), functions and their properties, exponential and logarithmic functions and their properties.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- Identify and analyze linear behavior, models, and graphs of linear equations and linear inequalities. Utilize the properties of linear equations to solve linear inequalities, and solve absolute value equations and inequalities. Interpret the slope of a linear equation as a rate of change. Generate an algebraic model for data that follows linear behavior and interpret the results of this model. Sketch the graph of a linear inequality using its algebraic representation.

- Solve systems of linear equations and systems of linear inequalities as well as their applications graphically and algebraically. Calculate the solution to 2x2 and 3x3 systems of linear equations by using substitution, elimination, and graphs (for 2x2 systems), as well as determine whether a system is inconsistent, consistent and independent, or dependent. Construct systems of linear equations for applications and find their solution. Compute the solution to a system of linear inequalities using a graph and describe the meaning of this solution.

- Recognize the behavior of exponential and logarithmic functions and their graphs. Apply the properties of exponential and logarithmic expressions to simplify and solve equations involving such expressions. Evaluate algebraic expressions involving exponents and logarithms and convert between these two types of expressions. Produce the algebraic model of an exponential function using data points and use properties of exponential functions to derive conclusions. Employ the properties of exponents and logarithms to solve equations involving exponential and logarithmic expressions. Draw the graph of exponential and logarithmic functions using both point plotting and the properties of transformations. Consolidate and expand logarithmic expressions using the properties of logarithms.

- Identify, simplify, evaluate, and graph quadratic functions using the properties of quadratic functions and transformations. Demonstrate the properties of transformations by graphing a quadratic function, identifying the vertex and the intercepts with the axes. Choose from among factoring (and using the Zero Factor Property), extraction of roots, completing the square, or the quadratic formula to solve a quadratic equation. Apply properties of quadratic functions to create and solve quadratic models and to derive conclusions about the solutions.

- Simplify polynomial expressions, evaluate polynomial functions, and solve equations involving polynomial expressions and their applications. Investigate polynomial division by performing long division on polynomial expressions. Extend factoring techniques to include the sum and difference of cubes. Graph a circle given its equation in standard form as well as use the distance and midpoint formulas to find the equation of a circle given conditions.

- Simplify and solve rational and radical expressions and equations (including those with higher roots). Perform arithmetic on rational and radical expressions and write results in simplified form. Simplify complex fractions. Manipulate equations involving rational or radical expressions to arrive at a non-extraneous solution. Recognize and solve applications that involve rational or radical expressions.

- Use, interpret, and simplify functions, inverse functions, and combination functions. Understand and use the definition of a function and interpret the difference between a relation and a function. Describe the domain and range of functions. Compose the graph of a function from tabular data, a word problem, or algebraic form. Perform composition of functions as well as arithmetic on combinations of functions. Find the inverse of a function algebraically and graphically. Interpret the meaning of the inverse in application problems.

MATH 125 Intermediate Algebra for Statistics and Liberal Arts

Units: 4
Hours: 72 hours LEC
Prerequisite: MATH 100 or 102 with a grade of "C" or better; or equivalent skills demonstrated through the assessment process.
General Education: AA/AS Area II(b)
Catalog Date: June 1, 2020

This course is designed for the intermediate algebra student who plans to continue only into STAT 300, ECON 310, POLS 382, PSYC 330, MATH 300, MATH 310, or MATH 315. The course topics include linear behavior, functions and graphs, exponential and logarithmic functions, systems, and polynomial, rational, exponential, logarithmic and radical expressions and equations. This course will feature discovery activities, applications to real data sets and problems which are current and relevant.

Student Learning Outcomes

Upon completion of this course, the student will be able to:
- **SLO 1:** ANALYZE AND FIND BEST FIT EQUATIONS FOR REAL WORLD DATA GIVEN IN MANY FORMS.
- Organize information into any/all of its four forms: words, data tables, graphs, and algebraic equations.
- Design an accurately scaled and labeled scatterplot of data, use a best fit line to examine linear trends, interpret the meaning of slope as a rate of change.
- Accurately graph and analyze functions; use linear, quadratic, and exponential functions to model real world applications and interpret real data.
- Distinguish arithmetic and geometric progressions; develop formulas for arithmetic and geometric sequences; use summation notation to calculate finite series.

- **SLO 2:** SOLVE EQUATIONS AND INEQUALITIES WHICH COME FROM APPLIED PROBLEMS.
- Simplify and evaluate rational and radical expressions, compositions, exponentials and logarithms; solve linear, quadratic, rational, radical, exponential, logarithmic, and literal equations.
- Accurately solve absolute value inequalities and systems of linear equations; use systems of equations to solve applied problems.

**MATH 144 Math for Contemporary Careers**

- **Units:** 3
- **Hours:** 54 hours LEC
- **Prerequisite:** MATH 100 or 102 with a grade of "C" or better, or placement through the assessment process.
- **General Education:** AA/AS Area II(b)
- **Catalog Date:** June 1, 2020

In the current information age, what mathematics should every person know? This course examines the contributions of mathematics in today's world. Students will explore mathematics' on-going role in society beginning with the need for and development of number systems, logical thinking, and current processes for coding and decoding data. A major focus of the course will be contemporary methods for analyzing data and interpreting statistics to make informed decisions. Students will conclude the course by selecting a module of mathematical interest from a list of available topics drawn from vocational programs and contemporary careers such as automotive technology, construction technology, film, digital media and broadcasting, medical records, pharmacy technology or other emerging career fields.

**Student Learning Outcomes**

Upon completion of this course, the student will be able to:

- **SLO 1:** EXPLORE THE ORIGINS AND CULTURAL CONTRIBUTIONS OF EARLY NUMBER SYSTEMS INCLUDING WRITING AND CALCULATING IN OTHER SYSTEMS
  - Translate numbers in early and modern numeration systems.
  - Examine the diverse cultural history of early and modern numeration systems.

- **SLO 2:** ENCODE AND DECODE USING CRYPTOGRAPHY & OTHER CODING SYSTEMS
  - Calculate and translate numerical information in non-decimal base systems fundamental to computer programming and other digital systems.
  - Apply encryption algorithms for encoding and decoding used to protect the security of information interchange.
  - Perform arithmetic operations in modular systems used in modern business applications such as bar codes, UPC codes, ISBN numbers.

- **SLO 3:** CONSTRUCT AND TEST THE VALIDITY OF LOGIC STATEMENTS USING CONNECTIVES, TRUTH TABLES AND VENN DIAGRAMS
  - Construct truth tables, identify the hierarchy of connectives, and use truth tables to classify statements.
  - Test the validity of arguments by using common argument forms.

- **SLO 4:** EXPLORE THE TERMINOLOGY, METHODOLOGY, GRAPHICAL DISPLAYS AND CONCLUSIONS OF MODERN STATISTICS
  - Compare methods of modern data collection and other sampling methods.
  - Organize, display, describe and compare one-variable data.
  - Organize, display, describe and compare two variable data.
  - Apply statistical methods for computing confidence interval estimates and interpreting margin of error.
MATH 295 Independent Studies in Mathematics

Units: 1 - 3
Hours: 54 - 162 hours LAB
Prerequisite: None.
Catalog Date: June 1, 2020

An independent studies project involves an individual student or small group of students in study, research, or activities beyond the scope of regularly offered courses. See the current catalog section of “Special Studies” for full details of Independent Studies.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

1. SLO #1: Actively engage in intellectual inquiry beyond that required in order to pass a course of study (College Wide Learning Outcome – Area 4).
2. Discuss and outline a proposal of study (that can be accomplished within one semester term) with a supervising instructor qualified within the discipline.
3. Design an independent study (to be completed individually or by collaboration of a small group) to foster special knowledge, skills, and experience that are not available in any one regularly scheduled course.
4. Use information resources to gather discipline-specific information.
5. SLO #2: Utilize modes of analysis and critical thinking to apply theoretical perspectives and/or concepts in the major discipline of study to significant problems and/or educational activities (College Wide Learning Outcome – Area 3).
6. Analyze and apply the knowledge, skills and experience that are involved in the independent study to theoretical perspectives and/or concepts in the major discipline of study.
7. Explain the importance of the major discipline of study in the broader picture of society.
8. SLO #3: Communicate a complex understanding of content matter of the major discipline of study (College Wide Outcome – Area 3).
9. Demonstrate competence in the skills essential to mastery of the major discipline of study that are necessary to accomplish the independent study.
10. SLO #4: Identify personal goals and pursue these goals effectively (College Wide Outcome – Area 4).
11. Utilize skills from the “academic tool kit” including time management, study skills, etc., to accomplish the independent study within one semester term.

MATH 300 Introduction to Mathematical Ideas

Units: 3
Hours: 36 hours LEC; 54 hours LAB
Prerequisite: MATH 120 or 125 with a grade of "C" or better; or equivalent skills demonstrated through the assessment process.
Transferable: CSU; UC
General Education: AA/AS Area II(b); CSU Area B4; IGETC Area 2
Catalog Date: June 1, 2020

Introduction to Mathematical Ideas allows liberal arts students to meet general education mathematics requirements while exploring concepts and objects of mathematics in a meaningful way. This course is designed to show some of the essence and quality of mathematics, and to enhance precision in the evaluation and expression of ideas, thereby developing a student’s quantitative reasoning skills. It is recommended primarily for students who do not plan to major in a math-related field, but may be of interest to others as well. Course content may include topics from numeration systems, logic, geometry, probability, statistics, algebraic modeling, number theory, consumer mathematics, graph theory, voting and apportionment, and perhaps others; concepts of contemporary mathematics may be covered. Emphasis is placed on the deductive process.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

1. SLO 1: Categorize and analyze mathematical objects and apply them to real life problems
- define and setup tables, diagrams, graphs, and matrices
- SLO 2: Solve mathematical problems from different branches of mathematics
- manipulate and solve problems relating to algebra
- apply basic geometric axioms, definitions, and theorems to solve geometric problems
- recognize principles of counting techniques to determine number of ways to select members from a group for a specific task
- compute mean, median, mode, range, standard deviation, and variance of a set of data
- SLO 3: Interpretations of mathematical objects in a variety of analytical settings and performing different operations to combine these objects
- recognize different representations of sets and performing different set operations to combine sets
- apply the logic properties to assess the validity of an argument
- SLO 4: Apply the mathematical concepts or objects to assess a situation, make decisions, and solve the real life problems
- assess the risks and rewards of credit cards and investments, and select the optimal path for a delivery route
- create an efficient schedule, select a fair method for dividing valuable assets, and evaluate the efficiency of an algorithm
- SLO 5: Defend some aspects of the mathematics used in real life applications
- investigate and solve real life problems such as home mortgage loans and student loans
- pursue the meaning of mathematics through the history of different numeration system and the progression of mathematics

**MATH 310 Mathematical Discovery**

**Units:** 3  
**Hours:** 54 hours LEC  
**Prerequisites:** MATH 110 or Geometry; AND MATH 120 or 125 with a grade of "C" or better; or equivalent skills demonstrated through the assessment process.  
**Transferable:** CSU  
**General Education:** AA/AS Area II(b); CSU Area B4  
**Catalog Date:** June 1, 2020

This course is designed to introduce students to the spirit of mathematics by involving them in the mathematical process of exploration, conjecture, and proof. Students will explore mathematical patterns and relations, formulate conjectures, and prove their conjectures. Areas of mathematics from which content may be derived include number theory, statistics, probability, geometry, and sequences and series. This course is recommended for students interested in a career in education.

**Student Learning Outcomes**

Upon completion of this course, the student will be able to:

- SLO(1) EXPLORE MATHEMATICAL PATTERNS AND MAKE CONJECTURES  
  explore mathematical relationships inherent in problems and situations from new branches of mathematics (such as number theory or sequences and series) by recognizing patterns and connections to previously encountered topics.
- SLO(2) PROVE OR DISPROVE CONJECTURES  
  prove or disprove conjectures about mathematical relationships and content.
  develop skills in logical reasoning and making logical explanations.
- SLO(3) DEVELOP STRATEGIES FOR INDEPENDENT PROBLEM SOLVING  
  explore mathematical problems independently, extending their solutions to questions not necessarily posed by the instructor.
  develop and explain a mathematical solution to a problem not previously encountered by the student.
MATH 315 Exploratory Field Experience in Mathematics

This course is an education-based field experience in mathematics designed to allow students to explore learning styles, learning environments and learning methods as they apply to tutoring and teaching mathematics. While exploring teaching as a career choice, students will have the opportunity to learn and practice essential skills to motivate and assist younger students with their progress through the mathematics curriculum. Students will be assigned to area schools to observe and assist in a mathematics classroom and to work with selected students in structured one-on-one or group settings. Weekly seminars will allow students to share experiences and compare observations. Students will also have the opportunity to explore their own cognitive learning styles and consider how these learning styles relate to mathematics both as learner and as teacher. Students will have the opportunity to learn about social, cultural, and educational issues related to mathematics and the school environment.

This course is recommended for students considering a major in teaching preparation who may wish to pursue either a multiple subject credential or a single subject credential in mathematics. Prior to beginning work in the schools, students may be required to be fingerprinted and pass a TB test. This course may be taken two times for credit.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- **SLO 1: UNDERSTAND LEARNING**
  
  relate the learning process and the study of mathematics as the integration of the visual, auditory, psycho-social, and cognitive functioning.

- examine various tools used to assess learning, learning styles and cognitive processes.

- evaluate learning styles and teaching methods for their positive or negative effect on learning mathematics

- **SLO 2: LEARN STRATEGIES AND APPROACHES TO REACH THE MATHEMATICS LEARNER**

  examine and experience alternate approaches to teaching various topics in mathematics that use multiple learning modalities and enhance the learning process

- understand and apply questioning strategies and other techniques for assisting student learning.

- understand and apply principles of motivation, behavior modification and memory enhancement as they apply to the unmotivated and unskilled learner.

- demonstrate critical thinking, problem solving and informed decision making in analyzing areas of mathematical weakness, preparing lessons and implementing strategies to address the identified topics from the pre-algebra/algebra sequence.

- **SLO 3: REFLECT ON TUTORING EXPERIENCES AND CLASSROOM ENVIRONMENTS IN ORDER TO COMPARE AND EVALUATE THEIR EFFECT ON STUDENT LEARNING**

  evaluate and compare individual experiences with learning styles and teaching approaches for different mathematics topics and different student learners

  compare observations related to the social, cultural and educational environment in the mathematics classroom and examine how a student's environment can impact learning.

- **SLO 4: GAIN A POSITIVE EDUCATIONAL EXPERIENCE IN A MATHEMATICS CLASSROOM**

  validate personal career goals related to teaching as a career.

MATH 335 Trigonometry with College Algebra

This course covers trigonometry with an introduction to college algebra. It is designed to fulfill the general education requirements and is transferable to the California State University (CSU) and University of California (UC) systems. Prior to enrolling, students must have completed MATH 110 or Geometry; AND MATH 120; both with a grade of "C" or better; or equivalent skills demonstrated through the assessment process.

- **Units:** 5
- **Hours:** 90 hours LEC
- **Prerequisite:** MATH 110 or Geometry; AND MATH 120; both with a grade of "C" or better; or equivalent skills demonstrated through the assessment process.
- **Transferable:** CSU
- **General Education:** AA/AS Area II(b); CSU Area B4
- **Catalog Date:** June 1, 2020
This is a full trigonometry course with algebra concepts reviewed, extended, and integrated when they are relevant to the trigonometric concepts. The trigonometric topics include right triangle trigonometry, unit circle trigonometry, graphs of trigonometric functions, proofs of trigonometric identities, solving trigonometric equations, applications of trigonometric functions (law of sines and cosines), and inverse trigonometric functions. The algebra topics include exponential and logarithmic functions, complex numbers, conic sections, the polar coordinate system, and solving equations, inequalities, and systems of equations.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO#1: Cite the six fundamental trigonometric functions and be able to interpret and evaluate them
- define the trigonometric functions using right triangles and/or the unit circle
- evaluate the trigonometric functions using reference angles and special triangles
- calculate the values of the trigonometric functions using a calculator with angles in both degrees and radians
- SLO#2: Solve application problems by modeling them with appropriate functions
- recognize what type of function might be best to use in a given situation to model an applied problem
- distinguish between the various ways of solving application problems with trigonometric methods including the use of right triangles, oblique triangles, the law of sines, and the law of cosines
- use a polynomial, rational, exponential, logarithmic, or trigonometric function to model and solve an application
- analyze applications involving exponential and logarithmic growth and decay
- SLO#3: Graph a library of functions including trigonometric, polynomial, rational, absolute value, exponential, and logarithmic functions
- recognize a base graph when given the formula for a complex function
- employ the use of translations, reflections and nonrigid transformations to graph a function once the base graph is known
- express the domain and range of a function in interval notation given a formula or a graph of the function
- recognize important characteristics of graphs of functions including asymptotic behavior, periodic behavior, zeros, and end behavior patterns
- identify a function as even, odd or neither and be able to prove result
- extend quadratic functions to include methods for finding vertices, finding and interpreting intercepts, and minimizing and maximizing functions
- graph points and curves in the polar coordinate system
- SLO#4: Categorize types of equations, systems and inequalities and methods used to solve them
- employ algebraic and graphical methods to solve polynomial, rational, and absolute value equations, systems and inequalities
- use matrix methods to solve systems of equations including the Gauss-Jordan method
- recognize when to use logarithms to solve an equation
- integrate algebraic techniques with known identities to prove trigonometric identities
- solve trigonometric equations and be able to express solutions when restricted to an interval or when there are an infinite number of solutions
- use inverse trigonometric functions to solve an equation
- use sign graphs and graphs of functions to solve inequalities
- SLO#5: Manipulate mathematical expressions to accomplish a specific goal
- simplify and factor expressions when solving equations, working with rational expressions, and finding the difference quotient
- employ properties of exponents and logarithms to manipulate expressions
- use trigonometric identities to rewrite or expand an expression and to do proofs
- write equations of conic sections in standard form to graph them
- analyze conic sections using foci, directrices and asymptotes
- convert points and equations from polar coordinates to rectangular coordinates and the reverse
MATH 341 Calculus for Business and Economics

Units: 4
Hours: 72 hours LEC
Prerequisite: MATH 120 with a grade of "C" or better; or equivalent skills demonstrated through the assessment process.
Transferable: CSU; UC (MATH 341, 350, 355 and 400 combined: maximum transfer credit of one course)
General Education: AA/AS Area II(b); CSU Area B4; IGETC Area 2
C-ID: C-ID MATH 140
Catalog Date: June 1, 2020

This course offers an introduction to the concepts and techniques of sets, functions, limits, analytic geometry and the differential and integral calculus. This course is intended for business students; it is not recommended for mathematics, physical or life science majors.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO 1: SIMPLIFY ALGEBRAIC EXPRESSIONS AND SOLVE ALGEBRAIC EQUATIONS RELATED TO BUSINESS PROBLEMS.
  - Formulate expressions and equations important in business (e.g., profit, average cost, supply and demand, etc.).
  - Understand the concepts and definitions of intercepts and intersection point between two lines to find the intersection point between two lines.
- SLO 2: EVALUATE LIMITS AND DERIVATIVES OF ALGEBRAIC, EXPONENTIAL, AND LOGARITHMIC FUNCTIONS.
  - Use the definition of the limits to calculate the limits of algebraic, exponential, and logarithmic functions.
  - Use graphs, tables, and a variety of algebraic skills to compute limits.
  - Calculate derivatives of algebraic functions using the Power, Product, Quotient, and Chain rules.
- SLO 3: APPLY THE LIMITS AND DERIVATIVE TO BUSINESS APPLICATIONS.
  - Interpret the derivative to solve the optimization problems.
  - Apply the derivative to marginal cost, revenue, and profit analysis.
- SLO 4: COMPARE, CONTRAST, AND COMPUTE DEFINITE AND INDEFINITE INTEGRALS; UNDERSTAND THE RELATIONSHIP BETWEEN INTEGRAL AND ANTIDERIVATIVE.
  - Evaluate definite integrals using the Fundamental Theorem of Calculus.
  - Calculate antiderivatives of various functions using substitution, integration by parts, and other methods.
  - Formulate solutions to applications in business such as consumer and producer surplus models that require integration.
- SLO 5: STUDY MULTIVARIABLE FUNCTIONS AND ITS GRAPHS.
  - Analyze functions of several variables, three-dimensional coordinates and graphs, and its relevance to business.
  - Generate partial derivatives and then apply them to find extreme values of functions.
  - Apply Lagrange multipliers and Least Squares Method to predict business models.

MATH 343 Modern Business Mathematics

Units: 4
Hours: 72 hours LEC
Prerequisite: MATH 120 with a grade of "C" or better; or placement through the assessment process.
Transferable: CSU
General Education: AA/AS Area II(b); CSU Area B4
Catalog Date: June 1, 2020

This course is designed around applications of mathematics in an economic and business context. The major topics included are functions, finance (interest and exponential models), rates of change, optimization, and linear programming. The content of the course is structured to incorporate tables, graphs and data sets collected from real-world situations. This course is not recommended for mathematics or physical science majors.
MATH 350 Calculus for the Life and Social Sciences I

Upon completion of this course, the student will be able to:

- SLO 1: Evaluate and understand limits
- SLO 2: Derive and apply the derivative.
- SLO 3: Integrate algebraic functions.
- SLO 4: Investigate and model real life phenomenon using calculus.

This course is an introduction to calculus. Topics include functions, trigonometric functions, limits, analytic geometry, and differential calculus with applications to business, social, and biological sciences. This course is intended for students majoring in social and biological sciences.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO 1: Evaluate and understand limits
- SLO 2: Derive and apply the derivative.
- SLO 3: Integrate algebraic functions.
- SLO 4: Investigate and model real life phenomenon using calculus.
Apply the concepts and principles of calculus to find rates of change in populations, bacteria, blood flow, ecology, learning, drug absorption and other biological and life science situations.

This course is a continuation of Math 350. Topics include: definite and indefinite integrals, power series, analytic geometry, multivariate calculus, and differential equations with applications to business, social, and biological sciences. Not open to students who have received credit for MATH 401 or higher level mathematics course. See "Cross-Listed Courses" in the catalog.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- **SLO #1**: COMPARE AND CONTRAST BETWEEN THE CONCEPTS OF DERIVATIVES, ANTIDERIVATIVES, AND INTEGRALS.
  - Demonstrate an understanding of the concept of an antiderivative. Apply the techniques of the basic integration formulas to perform indefinite and definite integrals.
  - Apply the antiderivative and the Fundamental Theorem of Calculus to differentiate relationships between derivatives and integrals.

- **SLO #2**: APPROXIMATE AND INTERPRET THE INTEGRAL IN ALGEBRAIC, GRAPHICAL, AND NUMERICAL CONTEXTS TO MODEL AND SOLVE APPLICATION PROBLEMS.
  - Solve and interpret applications such as areas bounded by curves, average value, or total rate of change.
  - Recognize and choose the appropriate method of integrals and set up the integrals for different types of application problems.

- **SLO #3**: DETERMINE AN APPROPRIATE METHOD FOR INTEGRATING A FUNCTION.
  - Apply the methods of substitution, integration by parts, trigonometric substitution, numerical integration, integration using tables, etc. to perform the definite and indefinite integral.
  - Demonstrate an understanding of the concept of an improper integral. Utilize the concepts of limit and continuity to evaluate some classes of improper integrals.

- **SLO #4**: EVALUATE DERIVATIVES AND MULTIPLE INTEGRALS.
  - Analyze surfaces and graph functions of two variables in the three-dimensional coordinate system.
  - Compute partial derivatives.
  - Apply partial derivatives to find a maximum and/or minimum of multivariable functions.
  - Use LaGrange multiplier and methods of least squares for linear regression.
  - Demonstrate techniques of multiple integrals and compute iterated integration over rectangular and general regions.
  - Apply multiple integrals in problem solving situations involving area, volume, surface area, etc.

- **SLO #5**: CONSTRUCT A MATHEMATICAL MODEL BY GATHERING AND ANALYZING DATA, IDENTIFYING KEY VARIABLES, AND ESTABLISHING EQUATIONS RELATING THOSE VARIABLES.
  - Construct and solve elementary first order linear differential and separable equations.
  - Apply differential equations using exponential growth and decay, learning curves, and logistic growth models.

- **SLO #6**: ESTIMATE COMPLICATED FUNCTIONS BY USING SIMILAR FUNCTIONS TO GET AN APPROXIMATION.
  - Define sequences and series and determine convergence or divergence of them.
  - Construct Taylor series to represent elementary functions.
  - Apply power series and Taylor polynomials to the integration of functions not integrable by conventional methods.
This course is an introduction to differential calculus and elementary differential equations via applications in biology and medicine. It covers limits, derivatives of polynomials, trigonometric and exponential functions, graphing, and applications of the derivative to biology and medicine. Topics include the Fundamental Theorem of Calculus and techniques of integration, including integral tables and numerical methods.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- **SLO#1: EXAMINE THE GRAPHS AND LIMITS OF FUNCTIONS.**
  - Examine elementary functions and their graphs.
  - Explore discrete models of exponential growth and decay, log-log/semi-log graphing, discrete biological models, fixed points/steady states, stability, periodic solutions and chaos.
  - Evaluate and interpret limits: the definition of limits, continuity of functions, the intermediate value theorem, the bisection method, trigonometric limits, and limits at infinity.

- **SLO #2: DIFFERENTIATE POLYNOMIAL, RADICAL, TRIGONOMETRIC, LOGARITHMIC, AND EXPONENTIAL FUNCTIONS.**
  - Explore the definition of derivative, geometric interpretation of derivative, the derivative as rate of change, the differentiability of functions, and the properties of derivatives.
  - Learn and apply the basic rules for differentiation: the power rule, product rule, quotient rule and chain rule.
  - Differentiate exponential, logarithmic and trigonometric functions.
  - Extend differentiation methods to include implicit differentiation, related rates, higher-order derivatives, linear approximation and L'Hopital's Rule.

- **SLO#3: GRAPH, ANALYZE & OPTIMIZE FUNCTIONS.**
  - Calculate maxima and minima and explore monotonicity and concavity of elementary functions and other graphs including sigmoidal curves.
  - Test the stability of fixed points in differential equations and apply the Newton-Raphson method for numerical root finding.

- **SLO#4: APPLY DERIVATIVES TO APPLICATIONS IN BIOLOGY AND MEDICINE.**
  - Apply the concepts and principles of calculus to find rates of change in populations, bacteria, blood flow, ecology, learning, drug absorption and other biological and life science situations.

- **SLO#5: INTEGRATE BASIC ELEMENTARY FUNCTIONS.**
  - Apply the Fundamental Theorem of Calculus to the evaluation of definite integrals.
  - Integrate functions using the power rule, substitution, integration by parts, and partial fraction decomposition.
  - Explore numerical integration, tables of integrals and Taylor approximation.

- **SLO #6 SOLVE DIFFERENTIAL EQUATIONS.**
  - Solve initial value ordinary differential equations and differential equations related to biological models of growth and decay.
  - Solve first-order differential equations using integrating factors.
Student Learning Outcomes

Upon completion of this course, the student will be able to:

- **SLO #1: SOLVE SYSTEMS OF EQUATIONS.**
  - Use matrices, matrix operations and determinants to solve systems of linear equations.
  - Compute eigenvalues and eigenvectors for square matrices.
  - Solve linear systems of ordinary differential equations (ODEs).
  - Apply systems of linear differential equations to problems in biology and medicine.
  - Solve nonlinear systems of ordinary differential equations and apply these methods to biological models.

- **SLO #2: EXLORE FUNCTIONS OF TWO OR MORE VARIABLES.**
  - Evaluate and interpret limits and continuity of multivariate functions.

- **SLO #3: DIFFERENTIATE MULTIVARIATE FUNCTIONS.**
  - Compute partial derivatives of functions of several variables.
  - Interpret partial derivatives as slopes and rates of change.
  - Apply the chain rules for multivariate functions and parameterized curves.
  - Implicitly differentiate multivariate functions.

- **SLO #4: ANALYZE & OPTIMIZE MULTIVARIATE FUNCTIONS.**
  - Graph functions of two variables and calculate equations of tangent planes to the graph.
  - Find extrema of multivariate functions, identify local and global extrema and solve applications involving extrema.
  - Optimize multivariate functions and optimize multivariate functions with constraints.
  - Find the gradient vector and directional derivatives and interpret directional derivatives as slopes and rates of change.

- **SLO #5: INTEGRATE MULTIVARIATE FUNCTIONS.**
  - Compute and evaluate double integrals on multivariate functions.
  - Solve applications of double integrals.

- **SLO #6: COMPUTE PROBABILITIES FOR BIOLOGICAL SITUATIONS AND OTHER CHANCE OUTCOMES.**
  - Apply counting principles, permutations, and combinations to biological situations.
  - Compute probabilities using basic probability rules, conditional probability, independence, Bayes’ formula, and Bayesian probability and apply these methods to biological models and events.
  - Explore probability distributions of discrete random variables and use discrete probability distributions to solve applications in biology and medicine.
This course is designed to prepare students for the calculus sequence (MATH 400, 401, 402). Course content includes a brief review followed by an in-depth extension of the properties of polynomial, rational, exponential, logarithmic, and trigonometric functions. Additional topics include systems of linear and non-linear equations and inequalities, conic sections, sequences and series, analytic geometry, vectors, parametric, and polar equations. A graphing calculator may be required for this course.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- **SLO1**: Evaluate limits of algebraic and transcendental functions.
- **SLO2**: Graph and analyze polynomial, rational, absolute value, exponential, logarithmic, trigonometric functions, and inverse trigonometric functions, as well as conic sections, involving algebraic transformations (shifts, scale factors, reflections, and absolute value) in rectangular coordinate system.
- **SLO3**: Graph and analyze polar equations.
- **SLO4**: Use correct logic in reasonings

**MATH 400 Calculus I**

This course explores the basic concepts of analytic geometry, limits, derivatives, and integrals. Topics covered will include the graphs, derivatives, and integrals of algebraic, trigonometric, exponential, logarithmic, and hyperbolic functions, and indeterminate forms. Many applications will be covered, including those involving rectilinear motion, differentials, related rates, graphing, and optimization.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- **SLO1**: Evaluate limits of algebraic and transcendental functions.
Use algebraic, graphical, and numerical approaches to evaluate limits; Use the epsilon-delta definition to prove limits.

- Identify indeterminate forms and utilize L'Hôpital's Rule
- SLO2: Use definition to prove a function is continuous at a real number.
- Determine whether a function is continuous at a real number from the left or from the right; Identify the interval(s) on which a function is continuous.
- SLO3: Compute derivatives by using the definition of derivative and by applying differentiation rules to algebraic/transcendental and inverse functions.
- Compute derivatives by using implicit and logarithmic differentiation techniques.
- SLO4: Recognize and solve real world problems that require use of limits and/or derivatives.
- Graph functions using the limits to find asymptotes, using the first derivative to find relative extreme values, using the second derivative to find concavity and inflection points, and generate equations of tangent/normal lines.
- Solve problems involving velocity, acceleration, related rates and optimization.
- SLO5: Understand and apply the concept of the Riemann Sum to develop the formal definition of the definite integral and use the definition to evaluate definite integrals.
- Calculate definite integrals using the Fundamental Theorem of Calculus and appropriate substitution techniques.
- Interpret definite integral as area and use it to find the area under a curve.
- SLO6: Apply the definitions of limit, derivative, and integral to prove calculus theorems.
- Apply theorems such as the Intermediate Value Theorem, Rolle's Theorem, and the Mean Value Theorem to derive related theorems.

MATH 401 Calculus II

**Units:** 5

**Hours:** 90 hours LEC

**Prerequisite:** MATH 400 with a grade of "C" or better

**Transferable:**
MATH 351, MATH 356 and MATH 401 combined: maximum credit, 1 course; 2) MATH 350, 351, 355, 356, 400, 401, & 402 combined: maximum transfer credit of one series.

**General Education:**
AA/AS Area II(b); CSU Area B4; IGETC Area 2

**C-ID:** C-ID MATH 220

**Catalog Date:** June 1, 2020

This course is a continuation of MATH 400. Topics covered include techniques of integration, numerical integration, improper integrals, infinite series, parametric equations, polar coordinates, and conic sections. Many applications will be covered including those involving areas between plane regions, volumes of revolution, work, moments and concepts of mass, average value, arc length, and surface area.

**Student Learning Outcomes**

Upon completion of this course, the student will be able to:

- SLO#1: Understand the concept of using the limit of a Riemann sum to find areas and volumes.
- Calculate the area between two curves in a plane region.
- Find the volume of a solid of revolution using the disk or washer method.
- Find the volume of a solid of revolution using the cylindrical shell method.
- Find the volume of a solid by using the method of slicing.
- Analyze a problem to choose the best method to use to find an area or volume.
- SLO#2: Understand and appropriately apply techniques of integration.
- Use the method of integration by parts.
- Evaluate trigonometric integrals.
- Use the method of trigonometric substitution.
- Use partial fractions to integrate rational functions.
- Approximate definite integrals using numerical methods including Midpoint Rule, Trapezoidal rule, and Simpson's rule.
• Understand what improper integrals are and evaluate them by writing them as a limit of a proper integral
• Analyze a problem to choose the best method of integration
• Develop a strategy for integration techniques
• SLO#3: Understand other coordinate systems and how to apply calculus techniques to solve problems using them.
• Represent curves in parametric form and understand the calculus of parametric curves
• Represent curves in polar form and understand the calculus of polar curves
• Find areas, volumes, arc length, and surface area using Cartesian coordinates, polar coordinates and parametric equations
• SLO#4: Apply the techniques of integral calculus to solve applied problems.
• Apply calculus to physics and engineering problems
• Apply calculus to work and fluid force problems
• Apply calculus to find the average value of functions
• Apply calculus to solve separable differential equations and exponential growth and decay problems
• SLO#5: Understand the theory of series.
• Understand the definition of a sequence
• Understand the definition of a series
• Understand and apply both the basic comparison test and the limit comparison test
• Understand and apply the integral test
• Understand and apply the ratio and root tests
• Understand and apply the alternating series test
• Understand the difference between conditional and absolute convergence
• Develop a general strategy for testing series for convergence
• Identify power series and compute their radius and interval of convergence
• Represent functions as power series including Taylor and Maclaurin series
• Differentiate and integrate power series

MATH 402 Calculus III

Units: 5
Hours: 90 hours LEC
Prerequisite: MATH 401 with a grade of "C" or better
Transferable: CSU; UC (MATH 350, 351, 400, 401 and 402 combined: maximum transfer credit of one series)
General Education: AA/AS Area II(b); CSU Area B4; IGETC Area 2
C-ID: C-ID MATH 230
Catalog Date: June 1, 2020

This course extends the concepts of limits, derivatives and integrals to vector-valued functions and functions of more than one variable. Topics covered will include three-dimensional analytic geometry and vectors, partial derivatives, multiple integrals, line integrals, surface integrals, and the theorems of Green, Gauss (Divergence), and Stokes. Many applications of the calculus will be included.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

• SLO 1: WORK WITH VECTORS AND GRAPHS IN BOTH TWO AND THREE DIMENSIONS.
  perform operations on vectors in R2 and R3, including the dot and cross products, limits, derivatives, and integrals.
  graph lines, planes, cylinders, and quadric surfaces in R3.
  find the equations of lines (in R3) and planes.
  find the distances between a point and a line, a point and a plane, two planes, two skew lines, etc.
compute the curvature at any point on a space curve along with the tangential and normal components of acceleration, the arc length, and the unit tangent and unit normal vectors.

SLO 2: EVALUATE FUNCTIONS OF MORE THAN ONE VARIABLE AS WELL AS THEIR LIMITS, CONTINUITY, AND DERIVATIVES, AND APPLY THEM TO REAL WORLD PROBLEMS.

evaluate functions of more than one variable, find their domain and range, and sketch level curves and level surfaces.

evaluate limits, prove limits using the epsilon-delta definition of a limit, show that limits do not exist using the “two path rule”.

examine the continuity for functions of more than one variable.

evaluate partial derivatives and directional derivatives and find local extrema and test for saddle points.

calculate the gradient and use it to find equations of tangent planes to surfaces in \( \mathbb{R}^3 \)

determine differentiability, calculate linearizations, differentials, and derivatives using the chain rule and apply them to real world problems.

optimize a multivariate function on a space curve or plane region, including both local extrema and absolute extrema, the latter including the use of Lagrange multipliers to solve constraint problems.

SLO 3 EVALUATE MULTIPLE INTEGRALS AND APPLY THEM TO REAL WORLD PROBLEMS.

evaluate double and triple integrals using rectangular, polar, cylindrical, and spherical coordinate systems as well as change of variables using the Jacobian.

calculate area, volume, mass, and center of mass using double and triple integrals.

SLO 4: EVALUATE LINE INTEGRALS AND SURFACE INTEGRALS AND APPLY THEM TO THE APPROPRIATE REAL WORLD PROBLEMS.

evaluate line integrals using parametrization, the Fundamental Theorem of Line Integrals, Green’s Theorem, and Stokes’ Theorem and apply them to real world problems, including work.

evaluate surface integrals using parametrization and the Divergence Theorem and apply them to real world problems, including flux.

Find the divergence and curl of a vector field.

MATH 410 Introduction to Linear Algebra

Units: 3
Hours: 54 hours LEC
Prerequisite: MATH 401 with a grade of “C” or better
Advisory: MATH 402
Transferable: CSU; UC
General Education: AA/AS Area II(b); CSU Area B4; IGETC Area 2
C-ID: C-ID MATH 250
Catalog Date: June 1, 2020

This course introduces linear algebra. Topics include matrices, determinants, systems of equations, vector spaces, linear transformations, eigenvectors, and applications. This course is intended for majors in mathematics, engineering, science, and related fields.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

SLO 1: SOLVE SYSTEMS OF LINEAR EQUATIONS

Solve systems of homogeneous and nonhomogeneous linear equations using Gaussian elimination, Gauss-Jordan elimination, and inverse matrices (in particular, the relationship between coefficient matrix invertibility and solutions to a system of linear equations).

Solve vector equations

Examine vector algebra on \( \mathbb{R}^n \)

Solve matrix equations.

Construct rigorous mathematical proofs involving linear equations, vector equations, vector algebra on \( \mathbb{R}^n \), and matrix equations.

SLO 2: EXAMINE BASES
- Test for linear independence of a set of vectors.
- Test for the span of a set of vectors.
- Construct a change of basis.
- Construct rigorous mathematical proofs involving independence, span, and basis.

**SLO 3: EXAMINE MATRICES**

- Calculate the inverse of a matrix.
- Construct factorizations of matrices.
- Compute determinants of matrices.
- Examine special matrices: diagonal and triangular

- Construct rigorous mathematical proofs involving matrices.

**SLO 4: EXAMINE VECTOR SPACES AND LINEAR TRANSFORMATIONS**

- Test the linearity of a transformation from one vector space to another.
- Test whether a linear transformation is an isomorphism.
- Compute the Kernel and Range of a linear transformation.
- Test a subset of a vector space to determine if it is a subspace of said vector space.
- Examine the Null Space and Column Space of a matrix.

- Construct rigorous mathematical proofs involving vector spaces.

**SLO 5: EXAMINE EIGENSPACES AND ORTHOGONALITY**

- Calculate dot product, norm of a vector, the angle between vectors in $\mathbb{R}^n$, eigenvalues and eigenvectors and their use in applications.
- Diagonalize matrices.
- Construct orthogonal bases using the Gram-Schmidt process.
- Examine symmetric matrices and orthogonally diagonalize them.

- Construct rigorous mathematical proofs involving eigenspaces and orthogonality.

---

**MATH 420 Differential Equations**

- **Units:** 4
- **Hours:** 72 hours LEC
- **Prerequisite:** MATH 401 with a grade of "C" or better
- **Advisory:** MATH 402 (may be taken concurrently)
- **Transferable:** CSU; UC
- **General Education:** AA/AS Area II(b); CSU Area B4
- **C-ID:** C-ID MATH 240
- **Catalog Date:** June 1, 2020

This course will cover the theory and the applications of the solutions of ordinary differential equations and systems of ordinary differential equations. The course will introduce students to various topics useful in the solution of differential equations including power series, Laplace transforms, matrices, eigenvalues and eigenvectors, and numerical methods.

**Student Learning Outcomes**

Upon completion of this course, the student will be able to:

- **SLO 1:** SOLVE FIRST ORDER DIFFERENTIAL EQUATIONS AND APPLY THEM TO REAL WORLD PROBLEMS.
- Apply the theory of first order differential equations, including existence and uniqueness theorems for ordinary differential equations.
- Solve first order differential equations using separation of variables, exactness, linearity, and substitutions (including homogeneous differential equations).
• Apply first order differential equations to real world problems, including exponential growth and decay, Newton's Law of Cooling, and mixture problems.

• SLO 2: SOLVE HIGHER ORDER DIFFERENTIAL EQUATIONS AND APPLY THEM TO REAL WORLD PROBLEMS.

• Examine the theory of higher order differential equations, including the fundamental set of solutions, linear independence, and the Wronskian.

• Solve higher order homogeneous and nonhomogeneous linear differential equations with constant coefficients.

• Solve Cauchy-Euler differential equations.

• Solve homogeneous and nonhomogeneous linear ordinary differential equations with variable coefficients using power series solutions.

• Apply higher order differential equations to real world problems, including spring/mass problems and circuits.

• SLO 3: SOLVE INITIAL VALUE PROBLEMS USING LAPLACE TRANSFORMS AND APPLY THEM TO REAL WORLD PROBLEMS.

• Examine the theory of Laplace transforms.

• Solve initial value problems using Laplace Transforms.

• Apply Laplace Transforms to real world problems.

• SLO 4: SOLVE SYSTEMS OF LINEAR DIFFERENTIAL EQUATIONS.

• Calculate eigenvalues and eigenvectors.

• Solve systems of linear homogeneous and nonhomogeneous differential equations using eigenvalues, eigenvectors, and inverse matrices.

• SLO 5: SOLVE INITIAL VALUE PROBLEMS USING NUMERICAL METHODS.

• Calculate numerical solutions to initial value problems.

MATH 483 Honors Seminar in Mathematics - Introduction to Mathematical Proof

- Same As: HONOR 391
- Units: 1
- Hours: 18 hours LEC
- Prerequisite: MATH 370 with a grade of "C" or better
- Transferable: CSU; UC (May be taken twice for credit.)
- Catalog Date: June 1, 2020

Honors Seminars in Mathematics are special one-unit intensive courses for academically accomplished students or those with the potential for high academic achievement. This particular course will study various methods of mathematical proof in a seminar setting, and will be particularly useful to students planning to study calculus, differential equations, and linear algebra. Topics include: deductive reasoning, proof by axioms, proofs of conditional and biconditional statements, proofs by contrapositive and contradiction, and proof by mathematical induction. Studies will include homework, discussions, oral presentations and lectures. Students will be expected to do independent problem solving and present their solutions to the class. Enrollment is limited to Honors Program students (see catalog). This course is the same as HONOR 391. This course, under either name, may be taken one time for credit. This course will be offered in spring semester only.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

• SLO 1: EXAMINE METHODS OF PROOF
  - Prove statements using axioms
  - Prove statements using deductive reasoning
  - Prove conditional statements
  - Prove biconditional statements
  - Prove statements using the contrapositive
  - Prove statements using contradiction
  - Prove statements using mathematical induction
MATH 484 Honors Seminar in Mathematics - Topics in Number Theory

Honors Seminars in Mathematics are special one-unit intensive courses for academically accomplished students or those with the potential for high academic achievement. This particular course will study various topics in the field of number theory in a seminar setting. Topics include: the integers and their properties; finding integer solutions to Diophantine equations (equations with more variables than equations); and cryptography (the study of how secret codes are created and broken). Studies will include homework, discussions, oral presentations and lectures. Students will be expected to do independent problem solving and present their solutions to the class. Enrollment is limited to Honors Program students (see catalog). This course is the same as HONOR 392. This course, under either name, may be taken one time for credit. This course will be offered in spring semester only.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- **SLO 1: EXAMINE THE PROPERTIES OF THE INTEGERS**
  - Examine divisibility
  - Examine prime numbers
  - Calculate the greatest common divisor
  - Examine the fundamental theorem of arithmetic
  - Prove theorems involving the integers

- **SLO 2: EXAMINE DIOPHANTINE EQUATIONS**
  - Examine the Euclidean algorithm
  - Solve linear Diophantine equations
  - Prove theorems involving Diophantine equations

- **SLO 3: EXAMINE LINEAR CONGRUENCES**
  - Examine modular arithmetic
  - Examine the properties of congruences
  - Solve congruence equations
  - Prove theorems involving linear congruences

- **SLO 4: EXAMINE CRYPTOLOGY**
  - Examine the theory of cryptology
  - Examine encoding messages
  - Examine decoding messages
  - Prove theorems involving cryptology

MATH 495 Independent Studies in Mathematics

Units: 1 - 3
Hours: 54 - 162 hours LAB
Prerequisite: None.
Transferable: CSU
Catalog Date: June 1, 2020
Student Learning Outcomes

Upon completion of this course, the student will be able to:

- **SLO #1**: Actively engage in intellectual inquiry beyond that required in order to pass a course of study (College Wide Learning Outcome – Area 4).
- **SLO #2**: Utilize modes of analysis and critical thinking to apply theoretical perspectives and/or concepts in the major discipline of study to significant problems and/or educational activities (College Wide Learning Outcome – Area 3).
- **SLO #3**: Communicate a complex understanding of content matter of the major discipline of study (College Wide Outcome – Area 3).
- **SLO #4**: Identify personal goals and pursue these goals effectively (College Wide Outcome – Area 4).

Mathematics Support (MATHS)

Statistics (STAT)

STAT 100 Pre-Statistics

</table>

This course prepares students for transfer-level Statistics. Topics include computational mathematics needed for statistics: ratios, rates, and proportional reasoning; arithmetic with fractions, decimals and percents; evaluating expressions, solving equations and inequalities, and analyzing formulas to understand statistical measures; introduction to statistical terminology and use of statistical symbols; introduction to probability, venn diagrams, set theory and two-way statistical tables; graphical and numerical descriptive statistics for quantitative and categorical data; use of linear and exponential functions to model bivariate data. Note: This course is not intended as preparation for the PreCalculus/Trigonometry courses required for students as part of their pathway to science, computer information science, engineering, or mathematics.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- **SLO 1**: READ, EVALUATE AND CONVERSE USING BASIC STATISTICAL TERMINOLOGY.
- **SLO 2**: PERFORM AND INTERPRET COMPUTATIONAL MATHEMATICS USED IN STATISTICS AND PROBABILITY.
- Use and interpret fractions, decimals and percents, including use of decimal place values and rounding.
- Simplify linear expressions, solve linear equations and rewrite literal equations (formulas) to solve for a particular variable.
- Translate inequality statements, solve linear inequalities and demonstrate the solution on a number line.
- Translate applied situations (english) to statistical knowns and unknowns and apply these to evaluate statistical formulas using the order of operations.

SLO 3: CREATE AND INTERPRET STATISTICAL GRAPHS AND TABULAR DISPLAYS OF DATA.
- Create and interpret frequency tables, relative frequency tables, bar graphs, histograms, stem and leaf displays, boxplots and scatterplots.

SLO 4: APPLY PROBABILITY, SET THEORY AND ORGANIZATIONAL TOOLS SUCH AS VENN DIAGRAMS AND 2-WAY TABLES TO QUANTIFY THE LIKELIHOOD OF CHANCE OUTCOMES.
- Compute and interpret relative frequency observational probability and classical sample space probabilities.
- Compute and interpret the probabilities of an event, the complement of an event, and the union and intersection of events.
- Use Venn Diagrams and 2-way tables to compute and interpret the probabilities of and event, the complement of an event, unions and intersections of events, and conditional probabilities.
- Compute and interpret the area under a histogram to determine probabilities.
- Compute and interpret the area under continuous curves using symmetry or partial sums to determine probabilities.

SLO 5: CREATE AND INTERPRET GRAPHS OF LINEAR AND EXPONENTIAL FUNCTIONS AND USE THEM TO MODEL BIVARIATE DATA.
- Sketch the graphs of linear and exponential functions.
- Find the equations of linear and exponential functions given two points on the line or curve.
- Use technology to find the equations of linear and exponential functions given a data set.
- Interpret the parameters of the linear and exponential models and explain how these parameters describe relationships in the data.
- Use linear and exponential models to compute predictions and make comparisons between models.

STAT 300 Introduction to Probability and Statistics

Units: 4
Hours: 54 hours LEC; 54 hours LAB
Prerequisite: MATH 120, MATH 125, or STAT 100 with a grade of "C" or better, or placement through the assessment process.
Transferable: CSU; UC
General Education: AA/AS Area II(b); CSU Area B4; IGETC Area 2
C-ID: C-ID MATH 110
Catalog Date: June 1, 2020

This course is an introduction to probability and statistics. Topics include: elementary principles and applications of descriptive statistics, elementary probability principles, probability distributions, estimation of parameters, hypothesis testing, linear regression and correlation, and ANOVA. Scientific calculators with two-variable statistics capabilities may be required.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO 1: ORGANIZE, DISPLAY, DESCRIBE AND COMPARE REAL DATA SETS.
- Recognize data types and data sources: develop basic statistical terminology including population parameters & sample statistics; identify common sampling methods used for obtaining data and identify advantages & disadvantages of each; recognize bias in sampling; compare principles of good experimental design.
- Organize and display data appropriately by preparing tables and graphs.
- Analyze data by computing measures of central tendency, measures of dispersion, and measures of position.
- Analyze bivariate data for linear trends using the least-squares regression model and the correlation coefficient.
SLO 2: DISTINGUISH BETWEEN PROBABILITY MODELS APPROPRIATE TO DIFFERENT CHANCE EVENTS AND CALCULATE PROBABILITY ACCORDING TO THESE METHODS.

- Compute probabilities using sample spaces, the addition & multiplication rules, conditional probability, and complements.
- Develop and apply probability distributions for discrete random variables; compute probabilities and expected value.
- Analyze both discrete and continuous probability distributions by considering areas under the graph of a function or a histogram.
- Use the normal and binomial probability distributions to compute probabilities.

SLO 3: APPLY INFERENTIAL STATISTICAL METHODS TO MAKE PREDICTIONS, DRAW CONCLUSIONS ABOUT HYPOTHESES AND COMPARE POPULATIONS.

- Create and interpret confidence interval estimates for population mean and population proportion based on appropriate probability models.
- Select the appropriate hypothesis test, perform the necessary computations and comparisons to test hypotheses about one population mean or one population proportion and explain the conclusion of the test.
- Create and interpret confidence interval estimates for the difference in two population means (independent and dependent sampling) or two population proportions.
- Select the appropriate hypothesis test, perform the necessary computations and comparisons to test hypotheses about two-population means (independent & dependent sampling), more than two population means, and two or more population proportions and explain the conclusion of the test.
- Test significance of correlation and make predictions based on linear trends using the least-squares regression model.

SLO 4: USE APPROPRIATE STATISTICAL TECHNIQUES TO ANALYZE AND INTERPRET APPLICATIONS OF DATA including all of the following: business, economics, social sciences, psychology, life science, health science and education.

STAT 480 Introduction to Probability and Statistics - Honors

Same As: HONOR 393
Units: 4
Hours: 72 hours LEC
Prerequisite: MATH 120 or 125 with a grade of "C" or better, or placement through the assessment process.
Enrollment Limitation: Enrollment is limited to Honors Program students. Details about the Honors Program can be found in the Cosumnes River College Catalog.
Transferable: CSU; UC (UC transfer credit limitation: STAT 300, STAT 480, ECON 310 and POLS 382, PSYC 330 combined: maximum credit, 1 course)
General Education: AA/AS Area II(b); CSU Area B4; IGETC Area 2
C-ID: C-ID MATH 110
Catalog Date: June 1, 2020

This course is an introduction to probability and statistics designed for students in the honors program. Topics include elementary principles and applications of descriptive statistics, counting principles, elementary probability principles, probability distributions, estimation of parameters, hypothesis testing, linear regression and correlation, and ANOVA. Scientific calculators with two-variable statistical capabilities may be required for this class. This honors section uses an intensive instructional methodology designed to challenge motivated students. This course is the same as HONOR 393 and only one may be taken for credit.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO 1: ORGANIZE, DISPLAY, DESCRIBE AND COMPARE REAL DATA SETS.
  - Recognize data types and data sources: develop basic statistical terminology including population parameters & sample statistics; identify common sampling methods used for obtaining data and identify advantages & disadvantages of each; recognize bias in sampling; compare principles of good experimental design
  - Organize and display data appropriately by preparing tables and graphs.
  - Analyze data by computing measures of central tendency, measures of dispersion, and measures of position.
  - Analyze bivariate data for linear trends using the least-squares regression model and the correlation coefficient.
- SLO 2: DISTINGUISH BETWEEN PROBABILITY MODELS APPROPRIATE TO DIFFERENT CHANCE EVENTS AND CALCULATE PROBABILITY ACCORDING TO THESE METHODS
  - Compute probabilities using sample spaces, the addition & multiplication rules, conditional probability, and complements.
Develop and apply probability distributions for discrete random variables; compute probabilities and expected value.

Analyze both discrete and continuous probability distributions by considering areas under the graph of a function or a histogram.

Use the normal and binomial probability distributions to compute probabilities.

Develop and apply sampling distributions for the sample mean and sample proportion.

SLO 3: APPLY INFERENTIAL STATISTICAL METHODS TO MAKE PREDICTIONS, DRAW CONCLUSIONS ABOUT HYPOTHESES AND COMPARE POPULATIONS.

Create and interpret confidence interval estimates for population mean and population proportion based on appropriate probability models.

Select the appropriate hypothesis test, perform the necessary computations and comparisons to test hypotheses about one population mean or one population proportion and explain the conclusion of the test.

Create and interpret confidence interval estimates for the difference in two population means (independent and dependent sampling) or two population proportions.

Select the appropriate hypothesis test, perform the necessary computations and comparisons to test hypotheses about two-population means (independent & dependent sampling), more than two population means (ANOVA), and two or more population proportions (Chi-Sq. tests) and explain the conclusion of the test.

Test significance of correlation and make predictions based on linear trends using the least-squares regression model.

SLO 4: USE TECHNOLOGY TO PERFORM STATISTICAL COMPUTATIONS, PREDICTIONS AND HYPOTHESIS TESTS.

SLO 5: USE APPROPRIATE STATISTICAL TECHNIQUES TO ANALYZE AND INTERPRET APPLICATIONS OF DATA including all of the following: business, economics, social sciences, psychology, life science, health science and education.

SLO 6 (HONORS PROGRAM SLO 1): EXPRESSION OF IDEAS: EXPRESS IDEAS CLEARLY IN WELL-ORGANIZED WRITTEN MESSAGES (SLO #1, College Wide SLO – Area 1, and General Education SLO C5a – English Composition).

Express ideas clearly and completely in a variety of written formats.

Utilize correct and appropriate conventions of mechanics, usage, and style in written communication.

Comprehend main ideas and reasonably interpret written information.

Compose and apply properly documented sources of information.

SLO 7 (HONORS PROGRAM SLO 2): ANALYSIS AND CRITICAL THINKING: UTILIZE MODES OF ANALYSIS AND CRITICAL THINKING IN A DISCIPLINE OF STUDY AS APPLIED TO SIGNIFICANT ISSUES AND/OR PROBLEMS (SLO #2, College Wide SLO Area 3).

Analyze reasoning processes to evaluate issues, value judgments or conclusions that determine the quality, validity, and/or reliability of information.

Construct an accurate and/or logical interpretation of reasoning while applying a framework of analytic concepts.

Communicate a complex understanding of content matter of a major discipline of study.

Explain the importance of the major discipline of study in the broader picture of society.

SLO 8 (HONORS PROGRAM SLO 3): INTELLECTUAL INQUIRY: ACTIVELY ENGAGE IN INTELLECTUAL INQUIRY BEYOND THAT REQUIRED IN ORDER TO PASS A COURSE OF STUDY (SLO #3, College Wide SLO – Area 4).

Apply information and resources necessary to develop academically and personally.

Utilize skills from one’s “academic tool kit” including time management, study skills, etc.

SLO 9 (HONORS PROGRAM SLO 4): ETHICAL REASONING: RECOGNIZE THE ETHICAL DIMENSIONS OF DECISIONS AND ACTIONS (SLO #4, College Wide SLO – Area 5).

Demonstrate the ability to engage in ethical reasoning necessary to exercise responsibility as an ethical individual, professional, local and global citizen.

SLO 10 (HONORS PROGRAM SLO 5): ARTICULATE AN AWARENESS OF A VARIETY OF PERSPECTIVES WITHIN A DISCIPLINE AND THE RELEVANCE OF THESE PERSPECTIVES TO ONE’S OWN LIFE (SLO #5, College Wide SLO – Area 2).

STAT 495 Independent Studies in Statistics
An independent studies project involves an individual student or small group of students in study, research, or activities beyond the scope of regularly offered courses. See the current catalog section of "Special Studies" for full details of Independent Studies.

**Student Learning Outcomes**

Upon completion of this course, the student will be able to:

- **SLO #1**: Actively engage in intellectual inquiry beyond that required in order to pass a course of study (College Wide Learning Outcome – Area 4).
- **SLO #2**: Discuss and outline a proposal of study (that can be accomplished within one semester term) with a supervising instructor qualified within the discipline.
- **SLO #3**: Design an independent study (to be completed individually or by collaboration of a small group) to foster special knowledge, skills, and experience that are not available in any one regularly scheduled course.
- **SLO #4**: Use information resources to gather discipline-specific information.
- **SLO #5**: Utilize modes of analysis and critical thinking to apply theoretical perspectives and/or concepts in the major discipline of study to significant problems and/or educational activities (College Wide Learning Outcome – Area 3).
- **SLO #6**: Analyze and apply the knowledge, skills and experience that are involved in the independent study to theoretical perspectives and/or concepts in the major discipline of study.
- **SLO #7**: Explain the importance of the major discipline of study in the broader picture of society.
- **SLO #8**: Communicate a complex understanding of content matter of the major discipline of study (College Wide Outcome – Area 3).
- **SLO #9**: Demonstrate competence in the skills essential to mastery of the major discipline of study that are necessary to accomplish the independent study.
- **SLO #10**: Identify personal goals and pursue these goals effectively (College Wide Outcome – Area 4).
- **SLO #11**: Utilize skills from the “academic tool kit” including time management, study skills, etc., to accomplish the independent study within one semester term.
Medical Assisting | Cosumnes River College

The CRC Medical Assisting Program is designed to prepare competent entry-level medical assistants in the cognitive (knowledge), psychomotor (skills), and affective (behavior) learning domains. Upon completion of the Certificate in Medical Assisting, students may take the CMA certification exam administered by American Association of Medical Assistants (AAMA).

The Cosumnes River College Medical Assisting Program is accredited by the Commission on Accreditation of Allied Health Education Programs (www.caahep.org (http://www.caahep.org)) upon the recommendation of the Medical Assisting Education Review Board (MAERB).

Commission on Accreditation of Allied Health Education Programs

pregl@crc.losrios.edu

Associate Degree

A.S. in Medical Assisting

The Cosumnes River College Medical Assisting program is accredited by the Commission on Accreditation of Allied Health Education Programs (www.caahep.org) upon the recommendation of the Medical Assisting Education Review Board (MAERB).

Commission on Accreditation of Allied Health Education Programs
25400 US Highway 19 North, Suite 15B
Clearwater, FL 33763
727/210-2350
www.caahep.org

The CRC Medical Assisting program is designed to prepare competent entry-level medical assistants in the cognitive (knowledge), psychomotor (skills), and affective (behavior) learning domains. Upon completion of the Certificate in Medical Assisting, students may take the CMA (AAMA) certification exam administered by American Association of Medical Assistants.

Highlights include:

* According to the Occupational Outlook Handbook published by the Department of Labor's Bureau of Statistics, "Medical Assisting employment is projected to grow much faster than average, ranking medical assistants among the fastest growing occupations over the 2008–18 decade. Job opportunities should be excellent, particularly for those with formal training or experience, and certification."

* Eligibility to become members of AAMA and CSMA

* Accredited preparation for national board exams; CRC students have exceeded national averages in the top 5 percent consistently for the past 20 years

* Provides multiple skills for the entry-level health care professional

**Total Units:** 28

<sup>1</sup>may be taken either fall or spring semester

<sup>2</sup>may be taken either fall or spring semester

<sup>3</sup>This is the capstone course and should be taken last.

The Medical Assisting Associate in Science (A.S.) degree may be obtained by completion of the required program, plus general education requirements, plus sufficient electives to meet a 60-unit total. See CRC graduation requirements.

### Enrollment Eligibility

To be eligible for enrollment in the program, the student must meet the following criteria:

- Completion of the following pre-requisite courses with a C or better:
  - AH 110 - Medical Language
  - BIOL 102 - Essentials of Human Anatomy and Physiology (BIOL 100 or 430 & 431 are acceptable)
  - CISC 302 - Computer Familiarization
  - ENGWR 101 - or eligibility for ENGWR 300 as determined by assessment testing
  - MEDA 100 - Introduction to Medical Assisting (taken within the previous 5 years)

### Enrollment Process

Eligible students are selected for the program according to the following steps:

- Only students who meet the pre-enrollment requirements will be considered for the program
- Selection will be based on a random selection process, should the number of qualified applicants exceed available spaces in the program
- Accepted applicants will be notified by the Program Director by July 1
- Students will be required to perform a background and drug clearance screening. Students will also be required to show proof of vaccination or immunity to the following: measles, rubella, rubeola, varicella, TdP, and possibly influenza. Placement in a clinical location will be contingent upon the results of this screening.

### Student Learning Outcomes
Upon completion of this program, the student will be able to:

- Enter the allied health workforce as a competent, entry-level Medical Assistant trained in the cognitive, affective and psychomotor domains of the occupation (PSLO #1).
- Declare eligibility for the AAMA national certification examination with the goal of obtaining the CMA (AAMA) credential (PSLO #2).

Career Information

Administrative Medical Assistant; Clinical Medical Assistant

Certificates of Achievement

Medical Assisting, Administrative Certificate

This curriculum is designed to prepare the individual with front office skills for employment as an Administrative Medical Assistant in a physician’s office, hospital, clinic, laboratory, pharmaceutical company, or health insurance company.

1[(BIOL 102) or (BIOL 430 and BIOL 431) are also acceptable]

Student Learning Outcomes

Upon completion of this program, the student will be able to:

- Attain entry-level skills in insurance billing.
- Utilize insurance and billing knowledge to obtain entry-level employment in an ambulatory setting.

Career Information

The CRC Medical Insurance Billing Certificate is designed to prepare students for entry-level employment in an ambulatory setting in the insurance and/or billing department. Students will obtain the necessary knowledge for insurance authorizations, billing and reconciliations.

Medical Assisting Certificate
The Cosumnes River College Medical Assisting program is accredited by the Commission on Accreditation of Allied Health Education Programs (www.caahep.org) upon the recommendation of the Medical Assisting Education Review Board (MAERB).

The CRC Medical Assisting program is designed to prepare competent entry-level medical assistants in the cognitive (knowledge), psychomotor (skills), and affective (behavior) learning domains. Upon completion of the Certificate in Medical Assisting, students may take the CMA (AAMA) certification exam administered by American Association of Medical Assistants.

Highlights include:
* According to the Occupational Outlook Handbook published by the Department of Labor's Bureau of Statistics, "Medical Assisting employment is projected to grow much faster than average, ranking medical assistants among the fastest growing occupations over the 2008–18 decade. Job opportunities should be excellent, particularly for those with formal training or experience, and certification."

* Eligibility to become members of AAMA and CSMA

* Accredited preparation for national board exams; CRC students have exceeded national averages in the top 5 percent consistently for the past 20 years

* Provides multiple skills for the entry-level health care professional

\(^3\)may be taken either fall or spring semester

\(^4\)This is the capstone course and should be taken last.

Enrollment Eligibility

To be eligible for enrollment in the program, the student must meet the following criteria:

- Completion of the following pre-requisite courses with a C or better:
  - AH 110 - Medical Language
  - BIOL 102 - Essentials of Human Anatomy and Physiology (BIOL 100 or 430 & 431 are acceptable)
  - CISC 302 - Computer Familiarization
This course provides an introduction to the field of Medical Assisting. Students will learn the typical duties of an administrative and clinical MA, including career ladders and types of facilities that employ medical assistants. Students will also be introduced to the desired qualities and characteristics of a successful medical assistant. Additionally, the CRC Medical Assisting Program entrance requirements will be discussed.

Upon completion of this course, the student will be able to:

- EVALUATE THE VARIETY OF CAREER POSSIBILITIES OPEN TO MEDICAL ASSISTANTS (SLO #1)
- differentiate between the duties of an administrative and clinical medical assistant.
- research the typical career paths of administrative and clinical medical assistants.
- APPRAISE THE EDUCATIONAL AND PROFESSIONAL QUALIFICATIONS FOR MEDICAL ASSISTANTS (SLO #2)
- evaluate the desired personal qualifications of a medical assistant.
- analyze the AAMA educational standards and guidelines for medical assistant education
- compare and contrast the available formats of medical assisting education.
• choose appropriate verbal and nonverbal communication behaviors in a medical environment.

MEDA 105 General Medical Assisting

Units: 3
Hours: 54 hours LEC
Prerequisite: None.
Enrollment Limitation: Student must be accepted into the current cohort of the CRC Medical Assisting program to be eligible for enrollment in this course.
Catalog Date: June 1, 2020

This course will cover the topics outlined in the American Association of Medical Assistants (AAMA) General category of knowledge of an entry-level medical assistant, as required for certification. Areas covered will include gross Anatomy, applied Medical Terminology, and Law and Ethics as they pertain to Medical Assisting.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

• APPLY MEDICAL LANGUAGE IN THE CLINICAL SETTING (SLO #1)
  • Demonstrate correct spelling, pronunciation and usage of medical terms and abbreviations in communicating with patients and other health care workers.
  • Interpret and abstract information from patient medical records and other clinical documents.

• IDENTIFY BASIC ANATOMICAL STRUCTURES (SLO #2)
  • Locate correct anatomical landmarks as utilized in various medical procedures.
  • Relate patient symptoms to specific body systems and/or structures involved.

• RECOGNIZE AND ADHERE TO THE LEGAL SCOPE OF PRACTICE AND ETHICAL STANDARDS OF A MEDICAL ASSISTANT (SLO #3)
  • Distinguish between allowed and non-allowed duties of a Medical Assistant in California.
  • Interpret written orders to determine legality of performing requested activity.
  • Appraise clinical situations to determine appropriate ethical response.

MEDA 110 Medical Insurance Procedures

Units: 1.5
Hours: 27 hours LEC
Prerequisite: None.
Corequisite: AH 110
Catalog Date: June 1, 2020

This course will introduce students to the basics of medical office insurance billing. Students will learn the terminology of health insurance, the differences between the various forms of health insurance, as well as the process for patient billing in a medical office setting.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

• PREPARE ACCURATE CLAIM FORMS FOR THE MOST COMMON INSURANCE COMPANIES (SLO #1)
  • Distinguish between a clean, pending, rejected, incomplete and invalid claim.
  • Categorize the six levels of review and appeals in the Medicare program, and the three levels of review in the TRICARE program.
  • Analyze a patient's medical record in order to accurately abstract data necessary for completing various health and disability claim forms.
  • Examine the process of a physician-based insurance claim starting from obtaining patient information through payment receipt.
MEDA 124 Administrative Medical Assisting
This course is designed to introduce the medical assisting student to the administrative responsibilities encountered in an ambulatory clinic. Typical administrative topics covered include patient reception, scheduling, telephone procedures, documentation and reporting, records management including HIPAA regulations, screening/processing mail, equipment and supply inventory, practice finances, coding and bookkeeping principles.

Student Learning Outcomes
Upon completion of this course, the student will be able to:

- PERFORM THE DUTIES OF AN ENTRY-LEVEL ADMINISTRATIVE MEDICAL ASSISTANT (SLO #1)
- Demonstrate the correct method and/or technique when performing administrative skills such as answering phones, filing, scheduling, composing written correspondence, coding and performing various practice financial procedures.
- ASSESS THE IMPORTANCE OF THEORY AS IT RELates TO THE PERFORMED SKILL (SLO #2)
- Distinguish among various guidelines for processing incoming and/or outgoing mail and patient information.
- Determine the best method for transmitting health information applying HIPAA regulations.
- Discuss the importance of complete and accurate records management in a medical facility.
- Identify mandatory reporting documentation within a medical office

MEDA 140 Medical Assisting Practicum
This course consists of supervised experience in a health care setting performing the tasks and responsibilities of a medical assistant. Those duties include, but are not limited to, administering injections, performing electrocardiograms, obtaining patient history and chief complaints, scheduling appointments, answering telephones, basic clerical functions and other duties as requested by site physician and/or supervisor. Students will be required to show proof of Healthcare Provider CPR from American Heart Association, as well as immunity to Varicella, Measles, Mumps, Rubella and TB prior to beginning the clinical rotation. Students will also have supplementary requirements such as liability insurance, background check and drug screening. This course is for students who have completed all of the CRC Medical Assisting Program requirements.

Student Learning Outcomes
Upon completion of this course, the student will be able to:

- PERFORM THE DUTIES OF AN ENTRY-LEVEL MEDICAL ASSISTANT IN AN AMBULATORY SETTING WITH MINIMAL SUPERVISION - SLO #1
- Demonstrate the correct method and/or technique when performing clinical skills such as injections, EKGS, spirometry, vitals, instrument identification, care and usage, and other skills as outlined in the MA scope of practice.
- Demonstrate the correct method and/or technique when performing administrative skills such as answering phones, filing, scheduling, insurance verification, billing and coding.
- COMMUNICATE EFFECTIVELY WITH PATIENTS ACCORDING TO THEIR INDIVIDUAL NEEDS - SLO #2
Evaluate and respect a patient's individual need based on various factors including age, socioeconomic status, culture, and medical history.

EXHIBIT PROFESSIONALISM THROUGH VARIOUS MEANS SUCH AS BEHAVIOR, ADAPTABILITY, INITIATIVE AND QUALITY OF WORK - SLO #3

MEDA 145 Medical Assisting Certification Review

**Units:** 2

**Hours:** 36 hours LEC

**Prerequisite:**

**Enrollment Limitation:**

- Students must meet the Certifying Agencies examination eligibility requirements to enroll in this course:
  * Graduate from a CAHHEP or ABHES accredited MA program; OR
  * Currently employed as an MA by a licensed MD/DO in the United States; OR
  * At least two years employment within the previous five years as an MA, either in private sector or military enlisted; OR
  * Current MA instructor at an accredited institution in the United States

**Catalog Date:**

June 1, 2020

This course is designed to prepare students for the Medical Assisting certification examinations offered by the three Certifying Agencies approved by the California Medical Board - the American Association of Medical Assistants (AAMA), the American Medical Technologists (AMT), or the California Certifying Board of Medical Assistants (CCBMA). This course is available to students who meet the current exam eligibility requirements for at least one of the Certifying Agencies. Students will be required to provide documentation of eligibility.

**Student Learning Outcomes**

Upon completion of this course, the student will be able to:

- **ACHIEVE A CONSISTENT PASSING SCORE ON PRACTICE CERTIFICATION EXAMS (SLO #1)**
- Identify and discuss primary elements of Administrative Medical Assisting duties.
- Identify and discuss primary elements of Clinical Medical Assisting duties.
- Identify and discuss primary elements of other aspects of Medical Assisting such as communication, the disease process, medicolegal and bioethical issues, and professionalism.
- **EMPLOY SUCCESSFUL TEST-TAKING STRATEGIES (SLO #2)**
- Identify and discuss techniques for preparing for an examination.
- Analyze exam question wording to determine the best response
- **ASSESS THE ROLE OF THE MEDICAL ASSISTING PRECEPTOR IN THE CLINICAL SETTING (SLO #3)**
- Identify the California state requirements for participating as an MA Preceptor
- Relate the responsibilities involved when performing the function of an MA Preceptor

MEDA 230 Clinical Procedures

**Units:** 5

**Hours:** 36 hours LEC; 162 hours LAB

**Prerequisite:**

MEDA 124 with a grade of "C" or better

**Corequisite:**

AH 120 and 124

**Enrollment Limitation:**

Student must be accepted into the CRC Medical Assisting program to enroll in this course.

**Catalog Date:**

June 1, 2020

This course will instruct the student in the clinical procedures performed by entry-level Medical Assistants according to AAMA standards and the Medical Assisting Scope of Practice.

**Student Learning Outcomes**

Upon completion of this course, the student will be able to:

- **PERFORM BASIC CLINICAL PROCEDURES (SLO #1)**
- collect accurate vital signs on a patient including temperature, pulse rate, respiration rate and blood pressure on adults and children. Measure accurate height and weight on adults. Measure accurate height, weight and head circumference on infants
evaluate various instruments used in the clinical setting according to their classification and usage. Correctly assemble minor surgical trays, prepare instruments/equipment for autoclave sterilization and be able to differentiate when to use chemical vs. steam sterilization.

- prepare patient for and perform audiometry, spirometry, ear irrigation, oxygen and aerosol treatments, including proper documentation.

- evaluate basic nutritional needs and recognize the need for a therapeutic diet given specific diagnostic information.

**PERFORM ADVANCED CLINICAL PROCEDURES (SLO #2)**

- prepare necessary supplies for bandaging, splinting or dressing various injuries and/or wounds. This includes preparing the patient for the procedure and the removal of sutures.

- perform electrocardiography using the single and multi-channel ECG equipment.

- instruct patients on the preparation for diagnostic radiology.

- collect specimens for diagnostic evaluation per CLIA regulations including urinalysis, hemoccult, step culture, HCG testing and finger punctures for hematocrits.

- select the appropriate syringe, needle and injection site for intramuscular, subcutaneous and intradermal injections.

**UTILIZE UNIVERSAL PRECAUTIONS AND SAFETY PRACTICES IN A CLINICAL SETTING (SLO #3)**

- distinguish when Universal Precautions will be required and correctly utilize personal protective equipment.

- adhere to the principles of infection control including aseptic technique.

**DISPLAY CRITICAL THINKING AND EFFECTIVE COMMUNICATION SKILLS AS THEY RELATE TO OBTAINING PATIENT INFORMATION OR IMPARTING PATIENT EDUCATION (SLO #4)**

- perform patient interviewing techniques in order to gather clinical information necessary for treatment.

- research and organize gathered information to be used for patient education purposes, including community resources and general health topics.

- obtain patient clinical history and document information in both paper and electronic format.

---

**MEDA 295 Independent Studies in Medical Assisting**

**Units:** 1 - 3  
**Hours:** 54 - 162 hours LAB  
**Prerequisite:** None.  
**Catalog Date:** June 1, 2020

An independent studies project involves an individual student or small group of students in study, research, or activities beyond the scope of regularly offered courses. See the current catalog section of “Special Studies” for full details of Independent Studies.

**Student Learning Outcomes**

Upon completion of this course, the student will be able to:

- SLO #1: Actively engage in intellectual inquiry beyond that required in order to pass a course of study (College Wide Learning Outcome – Area 4).

- Discuss and outline a proposal of study (that can be accomplished within one semester term) with a supervising instructor qualified within the discipline.

- Design an independent study (to be completed individually or by collaboration of a small group) to foster special knowledge, skills, and experience that are not available in any one regularly scheduled course.

- Use information resources to gather discipline-specific information.

- SLO #2: Utilize modes of analysis and critical thinking to apply theoretical perspectives and/or concepts in the major discipline of study to significant problems and/or educational activities (College Wide Learning Outcome – Area 3).

- Analyze and apply the knowledge, skills and experience that are involved in the independent study to theoretical perspectives and/or concepts in the major discipline of study.

- Explain the importance of the major discipline of study in the broader picture of society.

- SLO #3: Communicate a complex understanding of content matter of the major discipline of study (College Wide Outcome – Area 3).
• Demonstrate competence in the skills essential to mastery of the major discipline of study that are necessary to accomplish the independent study.

• SLO #4: Identify personal goals and pursue these goals effectively (College Wide Outcome – Area 4).

• Utilize skills from the “academic tool kit” including time management, study skills, etc., to accomplish the independent study within one semester term.

MEDA 298 Work Experience in Medical Assisting

| Units:  | 1 - 4 |
| Hours:  | 60 - 300 hours LAB |
| Prerequisite: | None. |
| Enrollment Limitation: | Students must be in a paid or unpaid internship, volunteer position or job related to career goals in Medical Assisting. |
| General Education: | AA/AS Area III(b) |
| Catalog Date: | June 1, 2020 |

This course provides students with opportunities to develop marketable skills in preparation for employment in their major field of study or advancement within their career. It is designed for students interested in work experience and/or internships in associate degree level or certificate occupational programs. Course content includes understanding the application of education to the workforce; completion of required forms which document the student's progress and hours spent at the work site; and developing workplace skills and competencies. Appropriate level learning objectives are established by the student and the employer. During the semester, the student is required to participate in a weekly orientation and 75 hours of related paid work experience, or 60 hours of unpaid work experience for one unit. An additional 75 or 60 hours of related work experience is required for each additional unit. Work Experience may be taken for a total of 16 units when there are new or expanded learning objectives. Only one Work Experience course may be taken per semester.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

• DEMONSTRATE AN UNDERSTANDING AND APPLICATION OF PROFESSIONAL WORKPLACE BEHAVIOR IN A FIELD OF STUDY RELATED ONE’S CAREER.(SLO 1)

• Understand the effects time, stress, and organizational management have on performance.

• Demonstrate an understanding of consistently practicing ethics and confidentiality in a workplace.

• Examine the career/life planning process and relate its relevancy to the student.

• Demonstrate an understanding of basic communication tools and their appropriate use.

• Demonstrate an understanding of workplace etiquette.

• DESCRIBE THE CAREER/LIFE PLANNING PROCESS AND RELATE ITS RELEVANCY TO ONE’S CAREER.(SLO 2)

• Link personal goals to long term achievement.

• Display an understanding of creating a professional first impression.

• Understand how networking is a powerful job search tool.

• Understand necessary elements of a résumé.

• Understand the importance of interview preparation.

• Identify how continual learning increases career success.

• DEMONSTRATE APPLICATION OF INDUSTRY KNOWLEDGE AND THEORETICAL CONCEPTS AS WRITTEN IN LEARNING OBJECTIVES IN PARTNERSHIP WITH THE EMPLOYER WORK SITE SUPERVISOR.(SLO 3)
Music | Cosumnes River College

The CRC music program includes vocal and instrumental components as well as courses on music, history theory and electronic music. The two-year program in music is designed to provide students with a foundation in music theory and history, in addition to allowing a choice of instrumental, keyboard, or vocal performance areas in which they may specialize.

 BedfordB@crc.losrios.edu

Associate Degrees for Transfer

A.A.-T. in Music

Completion of this degree provides a foundation in music. Program offerings include course work in music theory and aural skills, applied instrumental and vocal instruction, and ensemble performance.

The Associate in Arts in Music for Transfer Degree (AA-T) is designed to provide a seamless transfer pathway for students interested in pursuing at least one Music degree option in the California State University (CSU) system. The degree is comprised of lower division coursework typically required by CSU institutions. Students must complete the core curriculum and electives to meet a total of 60 transferable units, which includes the CSU General Education Breadth or the Intersegmental General Education Transfer Curriculum (IGETC) pattern. Upon successful completion of the degree requirements, students will be guaranteed admission to the CSU system with junior status and will not have to repeat lower division coursework. Students are encouraged to meet with a counselor to develop their educational plans as degree options and general education requirements vary for each university.

Catalog Date: June 1, 2020

Total Units: 24

The Associate in Arts in Music for Transfer (AA-T) degree may be obtained by completion of 60 transferable, semester units with a minimum 2.0 GPA, including (a) the major or area of emphasis described in the Required Program, and (b) either the Intersegmental General Education Transfer Curriculum (IGETC) or the California State University General Education-Breadth Requirements.

Student Learning Outcomes

Upon completion of this program, the student will be able to:

- Analyze and compare musical compositions, scores and performances.
- Understand, identify and recognize the elements of music (melody, rhythm, harmony, form)
- Perform music at a level appropriate to the area of specialization.
- Acquire and demonstrate aural awareness and ensemble skills.
- Establish an historical, cultural, geographical and chronological context of music. Differentiate different eras and styles of music.
- Compose music for the purpose of understanding the elements of music within the context of the Baroque, Classical, Romantic and early Twentieth Century.

Career Information

Individuals with four-year degrees in music may teach in the K-12 educational field as well as perform in professional music ensembles, direct religious and community music groups, instruct in private music studios, compose for media and publishing, music therapy, and administrative staff for music organizations. Advanced degrees in music may lead to careers as educators at the college or university level, performers, music directors, and music editors and journalists. NOTE TO TRANSFER STUDENTS: The Associate Degree for Transfer program is designed for students who plan to transfer to a campus of the California State University (CSU). Other than the required core, the courses you choose to complete this degree will depend to some extent on the selected CSU for transfer. In addition, some CSU-GE Breadth or IGETC requirements can also be completed using courses required for this associate degree for transfer major (known as “double-counting”). Meeting with a counselor to determine the most appropriate course choices will facilitate efficient completion of your transfer requirements. For students wishing to transfer to other universities (UC System, private, or out-of-state), the Associate Degree for Transfer may not provide adequate preparation for upper-division transfer admissions; it is critical that you meet with a CRC counselor to select and plan the courses for the major, as programs vary widely in terms of the required preparation.

Associate Degrees

A.A. in Music, General

Completion of this degree provides a foundation in music. Program offerings include course work in music theory and aural skills, applied instrumental and vocal instruction, ensemble performance, music history and piano.

Highlights include:
* Various avenues for vocal performance — college chorus, choir, chamber singers, contemporary gospel choir
* Various avenues for instrumental performance—college orchestra, jazz ensemble, concert band

Note to Transfer Students:
If you are interested in transferring to a four-year college or university to pursue a bachelor's degree in this major, it is critical that you meet with a CRC counselor to select and plan the courses for your major. Schools vary widely in terms of the required preparation. The courses that CRC requires for an Associate's degree in this major may be different from the requirements needed for the Bachelor's degree.

¹NOTE: All music majors are required to enroll in at least one music performance course each semester they are enrolled.

²NOTE: All music majors are required to enroll in at least one music performance class each semester they are enrolled.

³NOTE: All music majors are required to enroll in at least one music performance course each semester they are enrolled.

The Music, General Associate in Arts (A.A.) degree may be obtained by completion of the required program, plus general education requirements, plus sufficient electives to meet a 60-unit total. See CRC graduation requirements.

### Enrollment Eligibility

To be eligible for enrollment in the program, the student must meet the following criteria:

- Music literacy at the college level.
- Performance skills at the college level.

### Enrollment Process

Eligible students are selected for the program according to the following steps:

- Enroll in applied music or equivalent courses. Enroll in performing ensemble.
- Pass music literacy test (given on first class session of MUFHL 400) or pass MUFHL 321, Basic Musicianship with a grade of C or better.

### Student Learning Outcomes

Upon completion of this program, the student will be able to:
Analyze and compare musical compositions, scores and performances.
Understand, identify and recognize the elements of music (melody, rhythm, harmony, form)
Perform music at a level appropriate to the area of specialization.
Acquire and demonstrate aural awareness and ensemble skills.
Establish an historical, geographical and chronological context of music. Differentiate different eras and styles of music.
Compose music for the purpose of understanding the elements of music within the context of the Baroque, Classical, Romantic and early Twentieth Century.
Develop and demonstrate basic piano proficiency (for non-pianist majors)

Career Information
Music Education; Public and Private Teaching; Vocal Performance; Instrumental Performance; Music Store Employment & Management; Church Music Direction; Composer Some career options may require more than two years of college study. Classes beyond the associate degree may be required to fulfill some career options or for preparation for transfer to a university program.

Certificates of Achievement
Entrepreneurial Arts: Independent Music Instructor Certificate
This certificate provides real world tools for the aspiring music teacher to earn a living as a thriving and successful independent music instructor.

Catalog Date: June 1, 2020

Student Learning Outcomes

Upon completion of this program, the student will be able to:

- PSLO #1 STUDENT WILL ACQUIRE PHYSICAL SKILLS/DEXTERITY WITHIN A DISCIPLINE.
- Certificate graduates will develop increased artistry and technical mastery with which to attract a more diverse teaching clientele.
- PSLO #2 STUDENT WILL BE PROFICIENT IN NEW TECHNOLOGIES FOR THE PURPOSES OF RESEARCH, COMPOSITION, LISTENING, PERFORMANCE, RECORDING, ARCHIVING, AND CROSS-DISCIPLINE COLLABORATION.
- Certificate graduates will acquire a knowledge of partner organizations on the local, state, and federal levels.
- Certificate graduates will develop a mastery of using social media for recruitment and retainment purposes.
- Certificate graduates will develop the necessary independent contractor business skills to help their careers as an independent music teacher.

Career Information

Career opportunities include the following: independent private music instructor, charter school music instructor, after school program music instructor, children's day care and/or pre school music instructor, private tutor, music school proprietor.

Entrepreneurial Arts: Music Composition Certificate

The Entrepreneurial Arts: Music Composition Certificate prepares students for all aspects of a thriving music career, from performance to music creation to business skills. We give you the tools to grow and survive as an independent contractor in a gig economy.

Catalog Date: June 1, 2020

Two units from the following:

**Enrollment Eligibility**

To be eligible for enrollment in the program, the student must meet the following criteria:

- Meet with an CRC counselor and declare intention of enrolling in the program.
- Contact Music Department Chair to schedule a program entrance audition with appropriate CRC faculty. (If applicable) contact CRC ensemble director to schedule ensemble audition.
- If applicable, contact CRC ensemble director to schedule ensemble audition.
- Be enrolled in a CRC performance ensemble in each semester until the completion of the program.

**Student Learning Outcomes**

Upon completion of this program, the student will be able to:

- PSLO #1 STUDENT WILL ACQUIRE PHYSICAL SKILLS/DEXTERITY WITHIN A DISCIPLINE.
- Demonstrate an ability to perform original compositions on a chosen instrument
- Demonstrate an ability to create music compositions in a style of one's choice, be it classical, jazz, or assorted popular idioms
- PSLO #2 STUDENT WILL ESTABLISH AN HISTORICAL, GEOGRAPHICAL, AND CHRONOLOGICAL CONTEXT OF MUSIC.
- Demonstrate a knowledge of evolving music industry economic models and means of gaining employment through them
- PSLO #3 STUDENT WILL LEARN AND USE CRITICAL LISTENING SKILLS TO DISCUSS AND CRITIQUE MUSICAL WORKS AND PERFORMANCES THROUGH SELF ANALYSIS, ENSEMBLE PARTICIPATION, AND PERFORMANCE EVALUATION.
- Demonstrate a working knowledge of musical literacy and musicianship skills
- PSLO #4 STUDENT WILL BE PROFICIENT IN NEW TECHNOLOGIES FOR THE PURPOSES OR RESEARCH, COMPOSITION, LISTENING, PERFORMANCE, RECORDING, ARCHIVING, AND CROSS-DISCIPLINE COLLABORATION.
- Create a marketing plan that includes promotion tools such as radio, television, and new media, such as YouTube, social networking, and viral campaigns
- Demonstrate an understanding of the various aspects of project management as it pertains to an independent musician, be it rehearsal preparation, concert preparation and promotion, non profit fundraising, and contracts

**Career Information**

Career opportunities include multiple aspects of the music industry including live performance in classical and/or commercial styles, composition, performance of original compositions, concert promotion, music marketing, music publishing and distribution, music licensing, project management, studio teaching, and other assorted freelance gigging opportunities. This program will be of interest for individuals looking to proceed to professional practice or to further their academic study.

**Music - Fundamentals, History, and Literature (MUFHL)**

MUFHL 300 Introduction to Music
A brief study of the development of music from the middle ages to music of today, emphasizing the relation of music to the social, cultural, economic and political factors which produced it. Learn to listen to and understand the music of many historic periods and cultures through the features they share: sound sources, time frame, rhythm and meter, pitch, and structure. Concert attendance is required. Designed for the student with no previous musical study and for those who are particularly interested in the humanities or the arts.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO #1 BUILD A VOCABULARY OF MUSIC TERMINOLOGY (P-SLO 4, P-SLO 5)
  - Choose correct musical terms and identify and compare their differences in the categories of melody, rhythm, meter, harmony, tempo and dynamics.
  - Classify musical instruments into their correct categories using the Hornbostel-Sachs scheme of musical instrument classification.
  - Differentiate different performance mediums.

- SLO #2 DEVELOP AURAL AWARENESS (PSLO 2)
  - Differentiate between major and minor tonalities. Distinguish diatonic and chromatic pitches in tonal music.
  - Separate listening examples into the harmonic classifications of monophony, heterophony, polyphony and homophony.
  - Choose and identify instruments names from listening examples. Choose and identify instrument families from listening examples.
  - Compare and differentiate musical examples from the same and different periods of art music.
  - Distinguish different musical forms including renaissance dance suite movements, opera, oratorio, da-capo aria, recitative, rondo, sonata, concerto, fugue, sonata-allegro and sonata cycle.

- SLO #3 DEVELOP AN UNDERSTANDING OF THE CHARACTERISTICS OF ART MUSIC IN EACH OF THE MAJOR ERAS. (P-SLO 2, P-SLO 3, P-SLO 4, P-SLO 5)
  - Examine the music of each era and analyze their similarities and differences.
  - Compare and differentiate musical examples from each musical era.
  - Investigate the social, religious and political influences of each era on its music.
  - Investigate the relationship between the music of an era and the art, literature, architecture and science of that era.

MUFHL 308 Introduction to Music: Rock & Roll

This course examines social, political, cultural and economic issues as they relate to the history of rock and roll music. Musical examples will develop listening skills and the ability to critique the music orally and in written form. This course is designed for students with no previous musical study.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- ACQUIRE AURAL AWARENESS AND SKILLS (SLO #1; PSLO #2).
  - Compare and contrast styles and sub-genres of Rock music from the late 1940’s to the present.
Identify, differentiate and categorize instrumental and vocal stylistic characteristics and techniques of various Rock musicians.

Recognize and describe studio production styles and characteristics.

ESTABLISH AN HISTORICAL, GEOGRAPHICAL, AND CHRONOLOGICAL CONTEXT OF ROCK MUSIC (SLO #2; PSLO #3).

Identify the historical, geographical, and social contexts reflected in the Rock music styles and sub-genres over time.

Analyze and discuss issues of ethnicity, ethnocentrism, racism, ageism, class differences, and gender, as they relate to Rock music styles and sub-genres.

LEARN AND USE CRITICAL LISTENING SKILLS TO DISCUSS AND CRITIQUE MUSICAL WORKS AND PERFORMANCES (SLO #3; PSLO #4).

Describe and evaluate live and recorded musical performances.

Identify and discern differences in the uses of melodic material, rhythm, structure, and musical aesthetics in Rock music styles and sub-genres.

ACQUIRE ANALYTICAL SKILLS AND A CONCEPTUAL FRAMEWORK FOR THE FUTURE (SLO #4; PSLO #5).

Identify and analyze components of a personal aesthetic appreciation for music in one's own life.

Design, organize and compose a term project.

MUFHL 310 Survey of Music History and Literature (Greek Antiquity to 1750)

Units: 3
Hours: 54 hours LEC
Prerequisite: None.
Transferable: CSU; UC
General Education: AA/AS Area I; CSU Area C1; IGETC Area 3A
Catalog Date: June 1, 2020

A detailed study of the development of music from antiquity to 1750, emphasizing the relation of music to the social, cultural, economic and political factors which produced it. Required for music majors and designed for those particularly interested in the humanities or the arts.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO #1 BUILD A VOCABULARY OF MUSIC TERMINOLOGY (P-SLO 4, P-SLO 5)
  - Choose correct musical terms and identify and compare their differences in the categories of melody, rhythm, meter, harmony, tempo and dynamics.
  - Classify musical instruments into their correct categories using the Hornbostel-Sachs scheme of musical instrument classification.
  - Categorize musical instruments into their family groups.
  - Differentiate different performance mediums.

- SLO #2 DEVELOP AURAL AWARENESS (PSLO 2)
  - Differentiate between major and minor tonalities. Distinguish diatonic and chromatic pitches in tonal music.
  - Separate listening examples into the harmonic classifications of monophony, heterophony, polyphony and homophony.
  - Choose and identify instruments names from listening examples. Choose and identify instrument families from listening examples.
  - Compare and differentiate musical examples from the same and different periods of art music.
  - Distinguish different musical forms including renaissance dance suite movements, opera, oratorio, da-capo aria, recitative, rondo, sonata, concerto and fugue.
  - Critique and discuss musical performances.

- SLO #3 DEVELOP AN UNDERSTANDING OF THE CHARACTERISTICS OF ART MUSIC IN THE MIDDLE AGES, RENAISSANCE AND BAROQUE ERAS. (P-SLO 2, P-SLO 3, P-SLO 4, P-SLO 5)
Examine the music of each era and analyze their similarities and differences.

Compare and differentiate musical examples from each musical era.

Investigate the social, religious and political influences of each era on its music.

Investigate the relationship between the music of an era and the art, literature, architecture and science of that era.

A detailed study of the development of music from the beginning of the classical period to music of today, emphasizing the relation of music to the social, cultural, economic and political factors which produced it. Required for music majors and designed for those particularly interested in the humanities or the arts.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- **SLO #1 BUILD A VOCABULARY OF MUSIC TERMINOLOGY (P-SLO 4, P-SLO 5)**
  - Differentiate different performance mediums and genres.
  - Compare and investigate the different forms developed from 1750 to the present including the sonata-cycle, sonata-allegro form, rondo, minuet and trio, scherzo and trio, tone poem, symphonic poem, small piano forms, impressionist forms, serial music, neo-classical, neo-romantic, minimalist and post minimalist.

- **SLO #2 DEVELOP AURAL AWARENESS (PSLO 2)**
  - Compare and differentiate musical examples from the same and different periods of art music.
  - Distinguish different musical forms including sonata-cycle, sonata-allegro form, rondo, minuet and trio, scherzo and trio, tone poem, symphonic poem, small piano forms, impressionist forms, serial music, neo-classical, neo-romantic, minimalist and post minimalist.
  - Critique and discuss musical performances.

- **SLO #3 DEVELOP AN UNDERSTANDING OF THE CHARACTERISTICS OF ART MUSIC IN THE MIDDLE AGES, RENAISSANCE AND BAROQUE ERAS. (P-SLO 2, P-SLO 3, P-SLO 4, P-SLO 5)**
  - Examine the music of each era and analyze their similarities and differences.
  - Compare and differentiate musical examples from each musical era.
  - Investigate the social, religious and political influences of each era on its music.
  - Investigate the relationship between the music of an era and the art, literature, architecture and science of that era.

This course is an historical, comprehensive, and comparative listeners survey of the traditions of Jazz music from around the world and in the United States, in which concepts of ethnicity, ethnocentrism, racism, ageism, class differences, and gender issues will be addressed. Guided listening presentations will show how African and early African-American musical traditions have led to the development of various improvisational forms and styles, including Ragtime, Swing, Bebop, Free Jazz, Fusion, and Acid Jazz. Jazz style of the Americas, Asia, Africa, India, and Europe will be covered.
Upon completion of this course, the student will be able to:

- **ACQUIRE AURAL AWARENESS AND SKILLS (SLO #1; PSLO #2).**
  - Compare and contrast styles and sub-genres of Jazz music from the 1890's to the present.
  - Identify, differentiate and categorize instrumental and vocal stylistic characteristics and techniques of various Jazz musicians.

- **ESTABLISH AN HISTORICAL, GEOGRAPHICAL, AND CHRONOLOGICAL CONTEXT OF JAZZ MUSIC (SLO #2; PSLO #3).**
  - Identify the historical, geographical, and social contexts reflected in the Jazz music styles and sub-genres over time throughout the world.
  - Analyze and discuss issues of ethnicity, ethnocentrism, racism, ageism, class differences, and gender, as they relate to Jazz music styles and sub-genres.

- **LEARN AND USE CRITICAL LISTENING SKILLS TO DISCUSS AND CRITIQUE MUSICAL WORKS AND PERFORMANCES (SLO #3; PSLO #4).**
  - Describe and evaluate live and recorded musical performances.
  - Identify and discern differences in the uses of melodic material, rhythm, structure, and musical aesthetics in Jazz music styles and sub-genres.

- **ACQUIRE ANALYTICAL SKILLS AND A CONCEPTUAL FRAMEWORK FOR THE FUTURE (SLO #4; PSLO #5).**
  - Identify and analyze components of a personal aesthetic appreciation for music in one's own life.
  - Formulate, organize and compose a term project.

---

**MUFHL 321 Basic Musicianship**

| Units: | 3 |
| Hours: | 54 hours LEC |
| Prerequisites: | None. |
| Transferable: | CSU; UC (No credit for MUFHL 321 if taken after MUFHL 400.) |
| General Education: | CSU Area C1; IGETC Area 3A |
| C-ID: | C-ID MUS 110 |
| Catalog Date: | June 1, 2020 |

This course is designed as an starting point for students with limited musical experience or for those wishing a basic course prior to enrollment in MUFHL 400. The course concentrates on learning to read and understand (visually, aurally, and kinesthetically) rhythmic, melodic, and harmonic notation, texture and form through keyboard and/or other instruments including voice as a window to music literacy and creativity.

**Student Learning Outcomes**

Upon completion of this course, the student will be able to:

- **SLO #1. STUDENTS WILL DEVELOP A VOCABULARY TO UNDERSTAND BASIC MUSICAL TERMS. (P-SLO 5)**
  - Identify and be able to define basic terminology for music to include descriptions of musical sound and structure and components of printed music.

- **SLO #2. STUDENTS WILL LEARN HOW TO READ MUSIC. (P-SLO 2, P-SLO 5)**
  - Analyze, arrange and perform musical notation to include time, notes, rests, simple and compound meters, time signatures, syncopation, anacrusis, barring of tuplets, staffs and clefs.

- **SLO #3. STUDENTS WILL UNDERSTAND AND BE ABLE TO UTILIZE BASIC MUSIC THEORY. (P-SLO 2, P-SLO 4, P-SLO 5)**
  - Analyze and demonstrate knowledge of pitch relationships. Understand and compose major and minor scales in bass and treble clef using accidentals. Compose major and minor scales using key signatures. Construct the circle of fifths in both major and minor tonalities. Identify and write melodic and harmonic intervals. Identify and construct augmented, major, minor and diminished triads. Diagram and compose musical rhythms.

- **SLO #4. STUDENTS WILL BE ABLE TO PERFORM USING A MUSICAL INSTRUMENT. (P-SLO 1, P-SLO 2, P-SLO 4, P-SLO 5)**
  - Students will acquire and demonstrate skill on the recorder, voice or keyboard by performing. Students will understand and use the piano keyboard layout. Students will vocally perform music rhythms in simple and compound meters.
MUFHL 330 World Music

This course is a comprehensive, comparative listeners' survey of the folk ethnic, dance, and ceremonial music traditions around the world and in the United States, in which concepts of ethnicity, ethnocentrism, racism, ageism, class differences, and gender issues will be addressed. Guided listening presentations will show how traditional forms and styles have led to the urban, professional music popular in many countries today known as "World Beat." Music of the Americas, Africa, Asia, Australasia and Europe will be covered.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- ACQUIRE AURAL AWARENESS AND ENSEMBLE SKILLS (SLO #1; PSLO #2).
- Compare and contrast traditions of music throughout the world.
- Identify, differentiate and categorize stylistic characteristics and musical instruments of various world music traditions.
- ESTABLISH AN HISTORICAL, GEOGRAPHICAL, AND CHRONOLOGICAL CONTEXT OF MUSIC (SLO #2; PSLO #3).
- Identify the historical, geographical, and social contexts reflected in the music of world cultures.
- Discuss issues of ethnicity, ethnocentrism, racism, ageism, class differences, and gender, as they relate to music cultures throughout the world.
- LEARN AND USE CRITICAL LISTENING SKILLS TO DISCUSS AND CRITIQUE MUSICAL WORKS AND PERFORMANCES (SLO #3; PSLO #4).
- Describe and evaluate live and recorded musical performances.
- Identify and discern differences in the uses of melodic material, rhythm, structure, and musical aesthetics in world music cultures.
- ACQUIRE ANALYTICAL SKILLS AND A CONCEPTUAL FRAMEWORK FOR THE FUTURE (SLO #4; PSLO #5).
- Identify and analyze components of a personal aesthetic appreciation for music in one's own life.
- Formulate, organize and compose a term project.

MUFHL 400 Music Theory and Musicianship I

This course is the study of scales, intervals, triads, diatonic harmonies, part writing, rhythms, sight singing, ear training, dictation, history and performance. Analysis and composition will be taught. Reading music is a requirement for this course. This course is required for music majors.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- DEVELOP A FRAMEWORK FOR HEARING, UNDERSTANDING AND IDENTIFYING THE CONSTRUCTION OF INTERVALS AND SCALES. (SLO #1) (PSLO # 2)
- Identify, write and analyze intervals, chromatic scales, major scales and all forms of the minor scales. (P-SLO2)
- TRANPOSE A GIVEN MELODY TO ANY SPECIFIED KEY. (SLO #1) (PSLO # 2)
Based on the Student Learning Outcomes:

- Formulate a vocabulary to analyze basic harmonic structures and compose melodies to them.
- Critique and understand the relationship between triads and keys using Roman numerals, proper names, and popular chord symbols. Assess and understand the structure of tonality and the relationship between primary and secondary triads. Understand and compose melodies to basic opening and closing progressions.
- Identify and compose using simple and compound meters.
- Analyze and formulate triads, dominant seventh chords in homophonic music and four-part harmony.
- Analyze and voice triads and dominant seventh chords into four parts using open and closed structure, using proper doubling and figured bass symbols. Understand the historical development of the use of figured bass at the beginning of the common practice period (1600-1900) and its common use in Baroque Era cultures.
- Identify phrases and periods in notated music. Understand how these are used in different styles and diverse cultures.
- Write and analyze four-part harmony realizing figured bass symbols.
- Analyze four part harmony in root position and all inversions using Roman numerals and contemporary chord symbols. Students will write four part harmony using correct voice leading techniques in root position and all inversions.
- Understand melodic contour and musical cadences.
- Analyze and compose half, authentic, deceptive, plagal, and phrygian.
- Analyze and compose perfect and imperfect cadences.
- Analyze and compose suspensions.
- Critique music of different styles, genres, cultures, and periods of music.
- Demonstrate the ability to hear music with understanding, recognizing patterns and musical function.
- Aurally identify all intervals up to the octave: ascending, descending, and harmonic.
- Aurally identify qualities, inversions, and soprano notes of triads and aurally identifying dominant 7th chords.
- Take dictation of melodies featuring leaps within the primary triads.
- Take dictation of rhythms with divided beats in a variety of meter signatures and tempi.
- Demonstrate the ability to "audiate" a musical score.
- Perform rhythms with divided beats in a variety of meters and tempi.
- Sight sing melodies featuring leaps within the primary triads.

**MUFHL 401 Music Theory and Musicianship II**

**Units:** 4

**Hours:** 54 hours LEC; 54 hours LAB

**Prerequisite:** MUFHL 400 with a grade of "C" or better

**Corequisite:** MUIVI 341

**Transferable:** CSU; UC

**Catalog Date:** June 1, 2020

With an emphasis on the study of scales, intervals, triads, diatonic harmonies, part writing, rhythms, sight singing, ear training, dictation, history, and performance, this course includes analysis and composition. This course is required for music majors. Students may wish to challenge the prerequisite on the basis of equivalent experience.

**Student Learning Outcomes**

Upon completion of this course, the student will be able to:

- be thoroughly familiar with major, minor, modal, chromatic and whole tone scales; recognize them when played or sung and be able to sing them.
- understand the components of melody, be able to write a variety of types for various instruments involving motive, theme, phrase member, period, double period, song forms and various modifications.
understand voice ranges and instrumental ranges, non-transposing and transposing instruments and write for various instrumental and vocal combinations.

write in four part choral style primarily in root position but also in first and second inversions.

understand major-minor dominant seventh chords; leading tone seventh chords; modulation; non-dominant seventh chords; secondary dominants; chord symbols used in American popular song, blues, boogie and jazz.

MUFHL 402 Music Theory I

Units: 3
Hours: 54 hours LEC
Prerequisite: None.
Corequisite: MUFHL 403
Enrollment Limitation: Basic piano proficiency is required for this course. Proficiency may be demonstrated by audition or concurrent enrollment in MUIVI 340.
Transferable: CSU; UC
C-ID: C-ID MUS 120
Catalog Date: June 1, 2020

This course, through guided composition and analysis, incorporates the following concepts: rhythm and meter; basic properties of sound; intervals; diatonic scales and triads; diatonic chords; basic cadential formulas and phrase structure; dominant seventh; figured bass symbols; and non-harmonic tones. Students will understand the relationship and use of music theory in relationship to cultural and historical periods including its relationship in different musical styles and cultures. Development of skills in handwritten notation and computer notation is expected. The ability to read music is required for this course. Basic piano proficiency is required and may be passed by exam or concurrent enrollment in MUIVI 340 (Beginning Piano). This course is required for the AA and AA-T degrees in music.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- DEVELOP A FRAMEWORK FOR HEARING, UNDERSTANDING AND IDENTIFYING THE CONSTRUCTION OF INTERVALS AND SCALES. (SLO #1) (PSLO # 2)
- Identify, write and analyze intervals, chromatic scales, major scales and all forms of the minor scales. (P-SLO2)
- TRANSPOSE A GIVEN MELODY TO ANY SPECIFIED KEY. (SLO #1) (PSLO # 2)
- FORMULATE A VOCABULARY TO ANALYZE BASIC HARMONIC STRUCTURES AND COMPOSE MELODIES TO THEM. (SLO #2) (P-SLO #4,5)
- Critique and understand the relationship between triads and keys using roman numerals, proper names and popular chord symbols. Assess and understand the structure of tonality and the relationship between primary and secondary triads. Understand and compose melodies to basic opening and closing progressions.
- identify and compose using simple and compound meters.
- ANALYZE AND FORMULATE TRIADS, DOMINANT SEVENTH CHORDS IN HOMOPHONIC MUSIC AND FOUR PART HARMONY. (SLO #3) (P-SLO #4,5)
  - Analyze and voice triads and dominant seventh chords into four parts using open and closed structure, using proper doubling and figured bass symbols. Understand the historical development of the use of figured bass at the beginning of the common practice period (1600-1900) and its common use in Baroque Era cultures.
  - Identify phrases and periods in notated music. Understand how these are used in different styles and diverse cultures.
- WRITE AND ANALYZE FOUR PART HARMONY REALIZING FIGURED BASS SYMBOLS. (SLO #4) (P-SLO #4, 5)
  - Analyze four part harmony in root position and all inversions using roman numerals and contemporary chord symbols. Students will write four part harmony using correct voice leading techniques in root position and all inversions.
  - UNDERSTAND MELODIC COUNTERPART AND MUSICAL CADENCES. (SLO #2) (PSLO # 2, 3, 4 & 5)
- Compose melodies using a contour technique adding harmony after the melody has been written.
- Analyze and compose half, authentic, deceptive, plagal and phrygian.
  - Analyze and compose perfect and imperfect cadences
  - Analyze and compose suspensions.
- CRITIQUE MUSIC OF DIFFERENT STYLES, GENRES, CULTURES AND PERIODS OF MUSIC. (PSLO # 2, 3, 4 & 5)
MUFHL 403 Musicianship I

This course applies and develops the rhythmic, melodic, and harmonic materials of Music Theory I through ear training, sight singing, analysis, and dictation.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- **DEMONSTRATE THE ABILITY TO HEAR MUSIC WITH UNDERSTANDING, RECOGNIZING PATTERNS AND MUSICAL FUNCTION (P-SLO 1, P-SLO 2, P-SLO 5).**
  - Aurally identify all intervals up to the octave: ascending, descending, and harmonic.
  - Aurally identify qualities, inversions, and soprano notes of triads and aurally identifying dominant 7th chords.
  - Take dictation of melodies featuring leaps within the primary triads.
  - Take dictation of rhythms with divided beats in a variety of meter signatures and tempi.
- **DEMONSTRATE THE ABILITY TO "AUDIATE" A MUSICAL SCORE (P-SLO 1, P-SLO 2, P-SLO 5).**
  - Perform rhythms with divided beats in a variety of meters and tempi.
  - Sight sing melodies featuring leaps within the primary triads.

MUFHL 404 Music Theory II

This course incorporates the concepts from Music Theory I. In addition, through guided composition and analysis, the course will include: an introduction to two-part counterpoint; voice leading involving four-part chorale writing; diatonic harmony; and an introduction to secondary/applied chords and modulation. Basic piano proficiency is required and may be passed by exam or concurrent enrollment in MUIVI 341. The course is required for the AA and AA-T degrees in Music.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- **UNDERSTAND FOUR PART HARMONY IN ALL INVERSIONS USING SEVENTH CHORDS AND DIATONIC NON-HARMONIC TONES. (SLO #1) (PSLO #2, 3, 4 & 5)**
  - Analyze four part writing identifying inversions, proper resolution of active tones in seventh chords concentrating on the dominant seventh and diatonic non-harmonic tones.
  - Compose in four part writing using all inversions, correct voice leading including seventh chords, their active tones and diatonic non-harmonic tones.
- **UNDERSTAND MELODIC COUNTOUR AND MUSICAL CADENCES. (SLO #2) (PSLO # 2, 3, 4 & 5)**
  - Compose melodies using a contour technique adding harmony after the melody has been written.
  - Analyze and compose half, authentic, deceptive, plagal and Phrygian cadences.
  - Analyze and compose perfect and imperfect cadences.
Analyze and compose suspensions.

UNDERSTAND HARMONIC PROGRESSION AND THE TECHNIQUE OF HARMONIZATION. (SLO #3) (PSLO #2, 3, 4 & 5)

Analyze root movement, progressions and retrogressions.

Explain the difference between structural and embellishing harmony.

Compose phrases using given harmonic progressions.

Create harmonic progressions and compose melodies.

Compose and identify cadences to fit melodic lines.

Compose and identify structural harmony to fit a melodic line; then add embellishing harmony to that work.

MUFHL 405 Musicianship II

Units: 1
Hours: 54 hours LAB
Prerequisite: MUFHL 402 and 403 with grades of "C" or better
Advisory: MUFHL 404 and MUIVI 341; Skills developed concurrently in Music Theory II (MUFHL 404) and Piano II (MUIVI 341) are advised for success in Musicianship II (MUFHL 405).
Transferable: CSU; UC
C-ID: C-ID MUS 135
Catalog Date: June 1, 2020

This course applies and develops the rhythmic, melodic, and harmonic materials of Music Theory II through ear training, sight singing, analysis, and dictation.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- DEMONSTRATE THE ABILITY TO HEAR MUSIC WITH UNDERSTANDING, RECOGNIZING PATTERNS AND MUSICAL FUNCTION (P-SLO 1, P-SLO 2, P-SLO 5).
- Take dictation of melodies in major and minor keys featuring leaps from I, IV, V and V7 chords.
- Take dictation of rhythms with subdivided beats in simple and compound meters.
- Take harmonic dictation of common diatonic progressions with inversions, writing outer voices and Roman Numerals.
- DEMONSTRATE THE ABILITY TO "AUDIATE" A MUSICAL SCORE (P-SLO 1, P-SLO 2, P-SLO 5).
- Sight read and perform rhythms with subdivided beats in simple and compound meters.
- Sight sing melodies in major and minor keys featuring leaps from the I, IV, V and V7 chords.

MUFHL 410 Music Theory and Musicianship III

Units: 4
Hours: 54 hours LEC; 54 hours LAB
Prerequisite: MUFHL 401 with a grade of "C" or better
Corequisite: MUIVI 350 or 351
Transferable: CSU; UC
Catalog Date: June 1, 2020

This is the third course of a four course cycle. This course focuses on the study of scales, intervals, triads, seventh chords, diatonic harmonies, part writing, phrase structures, cadences, non-harmonic tones, harmonic progressions, harmonization, rhythms, sight singing, ear training, dictation, history and performance. Analysis and composition skills will be taught. Required for music majors. Students may wish to challenge the prerequisite on the basis of equivalent experience. This course is required for music majors.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- UNDERSTAND FOUR PART HARMONY IN ALL INVERSIONS USING SEVENTH CHORDS, SECONDARY DOMINANTS, DIATONIC AND NON-DIATONIC NON-HARMONIC TONES. (SLO #1) (PSLO #2, 3, 4 & 5)
- Analyze four-part writing identifying inversions, proper resolution of active tones in dominant and non-dominant seventh chords.
- Compose in four-part writing using all inversions, correct voice leading including seventh chords, secondary dominants, their active tones and both diatonic and non-diatonic tones.
- Compose using altered non-harmonic tones and secondary dominants.
- UNDERSTAND MODULATION TO CLOSELY RELATED KEYS. (SLO #2) (PSLO #2, 3, 4 & 5)
  - Analyze modulation to closely related keys using common chord, chromatic and phrase modulation.
  - Compose modulations to closely related keys using common chord, chromatic and phrase modulation.
- UNDERSTAND THE USE OF BORROWED CHORDS. (SLO #3) (PSLO #2, 3, 4 & 5)
  - Identify and construct borrowed chords.
  - Analyze compositions containing borrowed chords.
  - Harmonize melodies using borrowed chords.
- GAIN A CONCEPTUAL AND AURAL FRAMEWORK FOR THE RECOGNITION AND PERFORMANCE OF MELODIC AND HARMONIC INTERVALS. (SLO #5) (P-SLO 1,2)
  - Analyze and sing Major, Minor, Diminished, and Augmented melodic intervals.
  - Analyze Major, Minor, Diminished, and Augmented harmonic intervals.
- GAIN PROFICIENCY USING THE SOLFEGE SINGING SYSTEM (SLO #6) (P-SLO 1,2)
  - Sing prepared and sight-read melodies using the Solfege system in major and minor modes.
  - Sing prepared and sight read duets using the Solfege system in major and minor modes.
- DEVELOP SINGING SKILLS. (SLO #7) (P-SLO 1,2)
  - Prepare and sight sing melodies, duets, and multi-part music with their fellow students.
  - Sing transposed melodies.
- DEVELOP AURAL SKILLS (SLO #8) (P-SLO 1,2)
  - Analyze and successfully dictate rhythms.
  - Analyze and successfully dictate melodies.
  - Analyze and successfully dictate harmonic progressions.
- GAIN PROFICIENCY IN SINGING MELODIES WHILE PERFORMING AN INDEPENDENT PART ON THE KEYBOARD. (SLO #9) (P-SLO 1)
  - Sing a vocal line while playing an independent piano part on a piano or keyboard.

MUFHL 411 Music Theory and Musicianship IV

</table>

This is the fourth course of a four course cycle. This course focuses on techniques used in the 19th century to the beginning of the 20th century and includes techniques used in the baroque through impressionist eras. Major topics include borrowed chords; augmented sixth chords; Neapolitan sixth chords; altered dominants; altered diminished seventh chords; chromatic mediants; modulation to foreign keys; and ninth, eleventh and thirteenth chords. Analysis and composition skills will be taught. Musicianship skills will be taught including sight singing and ear training of advanced rhythms, melodies and harmonic progressions. This course is required for music majors.

Student Learning Outcomes

Upon completion of this course, the student will be able to:
MUFHL 412 Music Theory III

Units: 3
Hours: 54 hours LEC
Prerequisite: MUFHL 404 with a grade of "C" or better
Transferable: CSU; UC
C-ID: C-ID MUS 140
Catalog Date: June 1, 2020

This course incorporates the concepts from Music Theory II. In addition, through writing and analysis, the course will include: introduction to chromatic harmony; secondary/applied chords; modulation; borrowed chords; introduction to Neapolitan and augmented-sixth chords. This course is required for the AA and AA-T degree in music.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- **UNDERSTAND SECONDARY/APPLIED CHORDS (DOMINANT AND FULLY DIMINISHED) SEVENTH CHORDS IN ROOT POSITION AND INVERSION, BORROWED/MIXTURE CHORDS (SECONDARY AND DOUBLE) IN ROOT POSITION AND INVERSION. (SLO #1) (PSLO #2, 3, 4 & 5)
  - Analyze secondary/applied chords and seventh chords, borrowed/mixture chords (secondary and double) in root position and inversion.
  - Compose secondary/applied chords and seventh chords, borrowed/mixture chords (secondary and double) in root position and inversion.

- **UNDERSTAND SECONDARY APPLIED SEVENTH CHORDS, BORROWED MIXTURE CHORDS, DIATONIC AND MODULATING SEQUENCES. (SLO #1) (PSLO #2, 3, 4 & 5)
  - Harmonize a given melody using secondary applied seventh chords, borrowed mixture chords, diatonic and modulating sequences.
  - Conduct harmonic analysis of music using secondary applied seventh chords, borrowed mixture chords, diatonic and modulating sequences.

- **UNDERSTAND BINARY AND TERNARY FORMS. (SLO #1) (PSLO #2, 3, 4 & 5)
  - Conduct formal analysis of music which uses binary and ternary forms.
MUFHL 413 Musicianship III

Units: 1  
Hours: 54 hours LAB  
Prerequisite: MUFHL 404 and 405 with grades of "C" or better  
Advisory: MUFHL 412; Skills developed concurrently in Music Theory III (MUFHL 412) and in piano study are advised for success in Musicianship III (MUFHL 413).  
Transferable: CSU; UC  
C-ID: C-ID MUS 145  
Catalog Date: June 1, 2020

This course applies and develops the rhythmic, melodic, and harmonic materials of Music Theory III through ear training, sight singing, analysis, and dictation.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- DEMONSTRATE THE ABILITY TO HEAR MUSIC WITH UNDERSTANDING, RECOGNIZING PATTERNS AND MUSICAL FUNCTION (P-SLO 1, P-SLO 2, P-SLO 5).
- Take dictation of rhythms with triplets/duplets and syncopation in simple and compound meter signatures.
- Take dictation of melodies in major and minor keys with triplets/duplets, syncopation, chromatic alterations, and modulation to closely-related keys.
- Aurally identify and transcribing 4-part harmonic progressions utilizing secondary/applied chords.
- DEMONSTRATE THE ABILITY TO "AUDIATE" A MUSICAL SCORE (P-SLO-1, P-SLO 2, P-SLO 5).
- Sight read and perform rhythms with triplets/duplets and syncopation in simple and compound meters.
- Prepare and sight sing melodies with triplets/duplets, syncopation, chromatic alterations, and modulation to closely-related keys.

MUFHL 414 Music Theory IV

Units: 3  
Hours: 54 hours LEC  
Prerequisite: MUFHL 412 with a grade of "C" or better  
Transferable: CSU; UC  
C-ID: C-ID MUS 150  
Catalog Date: June 1, 2020

This course incorporates the concepts from Music Theory III. In addition, through writing and analysis, the course will include: post-Romantic techniques such as borrowed chords and modal mixture, chromatic mediants, Neapolitan and augmented-sixth chords, 9th, 11th and 13th chords, altered chords and dominants; and 20th century techniques such as: Impressionism, tone rows, set theory, pandiatomicism and polytonalism, meter and rhythm.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- UNDERSTAND BORROWED CHORDS AND MODAL MIXTURE IN ROOT POSITION AND INVERSION. (SLO #1) (PSLO #2, 3, 4 & 5)
- Analyze borrowed/mixture chords (secondary and double) in root position and inversion.
- Compose borrowed/mixture chords (secondary and double) in root position and inversion.
- UNDERSTAND CHROMATIC MEDIANTS. (SLO #1) (PSLO #2, 3, 4 & 5)
- Analyze chromatic mediants in root position and inversion.
- Compose chromatic mediants in root position and inversion.
- UNDERSTAND NEAPOLITAN AND AUGMENTED SIXTH CHORDS IN ROOT POSITION AND INVERSION. (SLO #1) (PSLO #2, 3, 4 & 5)
- Analyze neapolitan and augmented sixth chords in root position and inversion.
- Compose neapolitan and augmented sixth chords in root position and inversion.
- UNDERSTAND 9TH, 11TH, AND 13TH CHORDS IN ROOT POSITION AND INVERSION. (SLO #1) (PSLO #2, 3, 4 & 5)
Analyze 9th, 11th, and 13th chords in root position and inversion. 9th, 11th, and 13th chords

Compose 9th, 11th, and 13th chords in root position and inversion. 9th, 11th, and 13th chords

UNDERSTAND ALTERED CHORDS AND DOMINANTS IN ROOT POSITION AND INVERSION. (SLO #1) (PSLO #2,3,4 & 5)

Analyze altered chords and dominants in root position and inversion. 9th, 11th, and 13th chords

Compose altered chords and dominants in root position and inversion. 9th, 11th, and 13th chords

UNDERSTAND ENHARMONIC REINTERPRETATION AND MODULATION. (SLO #1) (PSLO #2,3,4 & 5)

Analyze enharmonic reinterpretation and modulation

Compose enharmonic reinterpretation and modulation

UNDERSTAND 20TH CENTURY TECHNIQUES SUCH AS: IMPRESSIONISM, TONE ROWS, SET THEORY, PANDIATONICISM AND POLYTONALISM, ADVANCED APPROACHES TO METER AND RHYTHM (SLO #1) (PSLO #2,3,4 & 5)

Analyze 20th century techniques such as: Impressionism, tone rows, set theory, pandiatomicism and polytonalism, advanced approaches to meter and rhythm

Compose 20th century techniques such as: Impressionism, tone rows, set theory, pandiatomicism and polytonalism, advanced approaches to meter and rhythm

**MUFHL 415 Musicianship IV**

- **Units:** 1
- **Hours:** 54 hours LAB
- **Prerequisite:** MUFHL 412 with a grade of "C" or better
- **Advisory:** MUFHL 414; Skills developed concurrently in Music Theory IV (MUFHL 414) together with continued piano study are advised for success in Musicianship IV. (Piano study may be obtained by enrollment in a CRC piano class, or by individual instruction.)
- **Transferable:** CSU; UC
- **C-ID:** C-ID MUS 155
- **Catalog Date:** June 1, 2020

**Student Learning Outcomes**

Upon completion of this course, the student will be able to:

- DEMONSTRATE THE ABILITY TO HEAR MUSIC WITH UNDERSTANDING, RECOGNIZING PATTERNS AND MUSICAL FUNCTION (P-SLO 1, P-SLO 2, P-SLO 5).
- Aurally identify and sing the diatonic modes (Ionian, Dorian, Phrygian, Lydian, Mixolydian, Aeolian, and Locrian).
- Take dictation of chromatic, modulating (especially to distantly-related keys), modal, and post-tonal melodies.
- Take dictation of rhythms featuring irregular beat divisions and polyrhythms and/or in asymmetrical or mixed meters.
- Aurally identify and transcribe harmonic progressions utilizing secondary/applied chords, mode mixture, non-dominant 7th chords, Neapolitan and augmented 6th chords, extended and altered chords, and modulation to distantly-related keys.
- DEMONSTRATE THE ABILITY TO "AUDIATE" A MUSICAL SCORE (P-SLO 1, P-SLO 2, P-SLO 5).
- Sight read and perform rhythms featuring irregular beat divisions and polyrhythms and/or in asymmetrical or mixed meters.
- Prepare and sight sing chromatic, modulating (especially to distantly-related keys), modal, and post-tonal melodies.

**MUFHL 416 Studies in Contemporary Composition**

Techniques, Performance, and Literature
This course focuses on the creation, performance, and literature of 20th and 21st Century concert music. Students will both create original works and analyze existing compositions as we research trends in art and music. This class will focus primarily on music as it developed and evolved from the European classical tradition and took new shape in the Americas. Topics may include: European classical music heritage, American classical and art music, jazz, film music, European avant garde, world music, and minimalism.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- DEVELOP A CLEAR UNDERSTANDING OF THE EUROPEAN CLASSICAL TRADITION. (SLO #1) (PSLO #3, 4 & 5)
- Discuss and analyze representative concert music composers
- DEVELOP A CLEAR UNDERSTANDING OF THE 20TH CENTURY TRENDS IN CONCERT MUSIC. (SLO #1) (PSLO #3, 4 & 5)
- Analyze and assess scores by representative 20th Century composers that contain unique and forward thinking harmonic components.
- Analyze and assess scores by representative 20th Century composers that contain unique and forward thinking rhythmic components.
- UNDERSTAND THE INFLUENCE OF POPULAR MUSIC ON 20TH CENTURY CONCERT MUSIC. (SLO #1) (PSLO #3, 4 & 5)
- Research and discuss jazz, ragtime, and tin pan alley composers
- UNDERSTAND POST-MODERN TRENDS IN ART AND MUSIC, PARTICULARLY AS THEY RELATE TO MINIMALISM IN MUSIC. (SLO #1) (PSLO #3, 4 & 5)
- Analyze and discuss musical scores and biographical elements of representative minimalist composers and artists
- UNDERSTAND COMMON 20TH CENTURY TECHNIQUES AS THEY APPEAR IN COMPOSITIONS. (SLO #1) (PSLO #3, 4 & 5)
- Create and perform original musical compositions that integrate key elements of 20th Century concert music.

MUFHL 420 Beginning Jazz Theory

This course introduces the elements of jazz theory including harmonic, melodic and formal analysis in the jazz idiom.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- apply chord symbol notation in written form.
- apply melodic and harmonic techniques to an instrument.
- analyze melodic, harmonic and formal elements of jazz compositions.
- synthesize melodic, harmonic and formal elements of jazz into original compositions arrangements.
- recognize common techniques used in the jazz idiom through ear-training exercises.

MUFHL 421 Advanced Jazz Theory

This course introduces the elements of jazz theory including harmonic, melodic and formal analysis in the jazz idiom.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- apply chord symbol notation in written form.
- apply melodic and harmonic techniques to an instrument.
- analyze melodic, harmonic and formal elements of jazz compositions.
- synthesize melodic, harmonic and formal elements of jazz into original compositions arrangements.
- recognize common techniques used in the jazz idiom through ear-training exercises.
This course provides a continuation of jazz concepts presented in MUFHL 420. The emphasis will be advanced elements of jazz theory including harmonic, melodic and formal analysis in the jazz idiom.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- apply reharmonization concepts to jazz compositions.
- apply melodic and harmonic techniques to an instrument.
- analyze advanced melodic, harmonic and formal elements of jazz compositions.
- synthesize melodic, harmonic and formal elements of jazz into original compositions arrangements.
- recognize common techniques used in the jazz idiom through ear-training exercises.

MUFHL 495 Independent Studies in Music Fundamentals/History and Literature

An independent studies project involves an individual student or small group of students in study, research, or activities beyond the scope of regularly offered courses. See the current catalog section of “Special Studies” for full details of Independent Studies.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO #1: Actively engage in intellectual inquiry beyond that required in order to pass a course of study (College Wide Learning Outcome – Area 4).
- Discuss and outline a proposal of study (that can be accomplished within one semester term) with a supervising instructor qualified within the discipline.
- Design an independent study (to be completed individually or by collaboration of a small group) to foster special knowledge, skills, and experience that are not available in any one regularly scheduled course.
- Use information resources to gather discipline-specific information.
- SLO #2: Utilize modes of analysis and critical thinking to apply theoretical perspectives and/or concepts in the major discipline of study to significant problems and/or educational activities (College Wide Learning Outcome – Area 3).
- Analyze and apply the knowledge, skills and experience that are involved in the independent study to theoretical perspectives and/or concepts in the major discipline of study.
- Explain the importance of the major discipline of study in the broader picture of society.
- SLO #3: Communicate a complex understanding of content matter of the major discipline of study (College Wide Outcome – Area 3).
- Demonstrate competence in the skills essential to mastery of the major discipline of study that are necessary to accomplish the independent study.
- SLO #4: Identify personal goals and pursue these goals effectively (College Wide Outcome – Area 4).
- Utilize skills from the “academic tool kit” including time management, study skills, etc., to accomplish the independent study within one semester term.
Music - Instrumental/Voice Instruction (MUIVI)

MUIVI 310 Voice Class I

Units: 2
Hours: 36 hours LEC; 18 hours LAB
Course Family: Traditional Voice Fundamentals
Prerequisite: None
Transferable: CSU; UC
General Education: CSU Area C1
Catalog Date: June 1, 2020

Students will experience basic training in the correct use of the singing voice, vocal techniques, and repertoire. This course is strongly recommended for vocal majors, but open to all students desiring to begin the study of voice.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- INCORPORATE PROPER VOCAL TECHNIQUE TO THE INDIVIDUAL SINGING VOICE (SLO #1).
- Identify and express vocal technique to the singing voice in such elements, but not limited to, as posture, breathing, tone production, diction, stage development, memorization and interpretation.
- Name and recall the parts of the body utilized in singing.
- TRANSLATE AND PARAPHRASE FOREIGN LANGUAGE TEXTS TO ENGLISH (SLO #2).
- ANALYZE AND DIAGNOSE PERSONAL WEAKNESSES IN VOCAL TECHNIQUE (SLO #3).
- Conduct a self-evaluation to analyze and diagnose areas for improvement while identifying proper vocal technique.
- ASSESS AND EVALUATE INDIVIDUAL MUSICAL PERFORMANCE AND THAT OF STUDENT PEERS (SLO #4).
- Recognize and model constructive feedback pertaining to vocal technique in the singing voice and towards the overall musical performance of peers and one's self.

MUIVI 311 Voice Class II

Units: 2
Hours: 36 hours LEC; 18 hours LAB
Course Family: Traditional Voice Fundamentals
Prerequisite: MUIVI 310 with a grade of "C" or better
Transferable: CSU; UC
General Education: CSU Area C1
Catalog Date: June 1, 2020

Students will experience basic training in the correct use of the singing voice, vocal techniques, and repertoire. This course is strongly recommended for vocal majors, but open to all students desiring to begin the study of voice.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- INCORPORATE PROPER VOCAL TECHNIQUE TO THE INDIVIDUAL SINGING VOICE, BUILDING UPON INDIVIDUAL TECHNIQUE FROM MUIVI 310 (SLO #1).
- Identify and express vocal technique to the singing voice in such elements, but not limited to, as posture, breathing, tone production, diction, stage development, memorization and interpretation.
- Name and recall the parts of the body utilized in singing.
- TRANSLATE AND PARAPHRASE FOREIGN LANGUAGE TEXTS TO ENGLISH (SLO #2).
- ANALYZE AND DIAGNOSE PERSONAL WEAKNESSES IN VOCAL TECHNIQUE (SLO #3).
- Perform musical selections to a live audience (in class, or in optional public performances).
- Conduct a self-evaluation to analyze and diagnose areas for improvement while identifying proper vocal technique.
- ASSESS AND EVALUATE INDIVIDUAL MUSICAL PERFORMANCE AND THAT OF STUDENT PEERS (SLO #4).
Recognize and model constructive feedback pertaining to vocal technique in the singing voice and towards the overall musical performance of peers and one's self.

MUIVI 320 Voice Class III

This course provides opportunity for vocal exercise and intellectual analysis in the development of efficient singing technique and skill in performing vocal literature. Performance in class and in recital is essential. The course is strongly recommended for vocal majors. Students may wish to challenge the prerequisite on the basis of equivalent experience.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- INCORPORATE PROPER VOCAL TECHNIQUE TO THE INDIVIDUAL SINGING VOICE, BUILDING UPON INDIVIDUAL TECHNIQUE FROM MUIVI 311 (SLO #1).
- Identify and express vocal technique to the singing voice in such elements, but not limited to, as posture, breathing, tone production, diction, stage development, memorization and interpretation.
- Name and recall the parts of the body utilized in singing.
- TRANSLATE AND PARAPHRASE FOREIGN LANGUAGE TEXTS TO ENGLISH (SLO #2).
- ANALYZE AND DIAGNOSE PERSONAL WEAKNESSES IN VOCAL TECHNIQUE (SLO #3).
- Conduct a self-evaluation to analyze and diagnose areas for improvement while identifying proper vocal technique.
- ASSESS AND EVALUATE INDIVIDUAL MUSICAL PERFORMANCE AND THAT OF STUDENT PEERS (SLO #4).
- Recognize and model constructive feedback pertaining to vocal technique in the singing voice and towards the overall musical performance of peers and one's self.
- PERFORM MUSICAL SELECTIONS EFFECTIVELY TO A LIVE AUDIENCE (SLO #5).
- Prepare and perform musical selections per an assigned art song repertoire.

MUIVI 321 Voice Class IV

This course provides opportunity for vocal exercise and intellectual analysis in the development of efficient singing technique and skill in performing vocal literature. Performance in class and in recital is essential. The course is strongly recommended for vocal majors. Students may wish to challenge the prerequisite on the basis of equivalent experience.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- INCORPORATE PROPER VOCAL TECHNIQUE TO THE INDIVIDUAL SINGING VOICE, BUILDING UPON SKILLS IN MUIVI 320 (SLO #1).
- Identify and express vocal technique to the singing voice in such elements, but not limited to, as posture, breathing, tone production, diction, stage development, memorization and interpretation.
- Name and recall the parts of the body utilized in singing.
- TRANSLATE AND PARAPHRASE FOREIGN LANGUAGE TEXTS TO ENGLISH (SLO #2).
ANALYZE AND DIAGNOSE PERSONAL WEAKNESSES IN VOCAL TECHNIQUE (SLO #3).

Conduct a self-evaluation to analyze and diagnose areas for improvement while identifying proper vocal technique.

ASSESS AND EVALUATE INDIVIDUAL MUSICAL PERFORMANCE AND THAT OF STUDENT PEERS (SLO #4).

Recognize and model constructive feedback pertaining to vocal technique in the singing voice and towards the overall musical performance of peers and one’s self.

PERFORM MUSICAL SELECTIONS EFFECTIVELY TO A LIVE AUDIENCE (SLO #5).

Prepare and perform musical selections per an assigned art song repertoire.

MUIVI 340 Beginning Piano

Units: 2
Hours: 36 hours LEC; 18 hours LAB
Prerequisite: None.
Transferable: CSU; UC
General Education: CSU Area C1
Catalog Date: June 1, 2020

Course is based on conceptual learning which is transferable to all areas of music study. Group activities include ear training, repertoire, sight reading and transposition, technique, improvisation, and written work. Goals are literacy and creativity in music through keyboard application. Recommended for all music majors, pre-school and elementary teachers, and required for non-keyboard music majors.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- develop literacy and creativity in music through keyboard study.

MUIVI 341 Piano II

Units: 2
Hours: 36 hours LEC; 18 hours LAB
Course Family: Traditional Piano Fundamentals
Prerequisite: MUIVI 340 with a grade of "C" or better; or have beginning training in playing piano, determined by the professor per an evaluation for the level of proficiency.
Transferable: CSU; UC
General Education: CSU Area C1
Catalog Date: June 1, 2020

This is the second in a series of four consecutive group piano classes - successful completion of MUIVI 340 with a "C" or better or a comparable experience is required for enrollment. Students will learn ensemble and solo works, acquire basic rhythmic skills, and will develop fundamental keyboard and music theory skills beyond the major and minor five-note patterns. This course is designed for both music majors planning to transfer as well as for students who are studying primarily for personal enjoyment. Specific skills students will develop include sight reading, improvising, listening skills, primary root position triads, hand-over-hand major and minor arpeggios, intervals, fingering, notation, time signatures, dynamics, basic harmonization, major key signatures, and various methods of tone production.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- READ AND ANALYZE MUSIC PROFICIENTLY IN TREBLE AND BASS CLEFS. (SLO #1) (P-SLO #5, 6)
- Evaluate and play two octaves scales in C, G, D, F, and Bb (hands separate and together). Identify intervals visually and aurally.
- Perform and analyze root position triads and the basic I-IV-I-V7-I harmonic progression in C, G, D, A, and E.
- ANALYZE AND PERFORM BASIC PIANO PIECES CONSISTING OF INDEPENDENT PARTS IN BOTH HANDS (SLO #2) (P-SLO #2)
- Practice and perform basic piano pieces in front of peers.
- DEMONSTRATE BASIC SIGHT-READING SKILLS. (SLO #3) (P-SLO #1, 4)
- Perform sight-reading exercises in groups and as a whole.
- REHEARSE AND PERFORM DUETS AND ENSEMBLE PIECES. (SLO #4) (P-SLO #2)
MUIVI 350 Intermediate Piano

This is the third in a series of four consecutive group piano classes - successful completion of MUIVI 341 with a 'C' or better (or a comparable experience) is required for enrollment. Students will learn ensemble and solo works, develop more complex rhythmic skills, and will develop fundamental keyboard and music theory skills beyond the major and minor five-note patterns. This course is designed for both music majors planning to transfer as well as for students who are studying primarily for personal enjoyment. Specific skills students will develop include sight reading, improvising, listening skills, primary root position triads, hand-over-hand major and minor arpeggios, intervals, fingering, notation, time signatures, dynamics, basic harmonization, major key signatures, and various methods of tone production.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- READ AND ANALYZE MUSIC PROFICIENTLY IN TREBLE AND BASS CLEFS. (SLO #1) (P-SLO #5, 6)
- Evaluate and play three octaves scales in all major scales (hands together). Identify intervals visually and aurally.
- Perform and analyze root position triads and the basic I-IV-I-7-I harmonic progression in all major scales.
- ANALYZE AND PERFORM EARLY INTERMEDIATE PIANO PIECES CONSISTING OF INDEPENDENT PARTS IN BOTH HANDS (SLO #2) (P-SLO #2)
- Practice and perform early intermediate piano pieces in front of peers.
- DEMONSTRATE EARLY INTERMEDIATE SIGHT-READING SKILLS. (SLO-#3) (P-SLO #1, 4)
- Perform sight-reading exercises in groups and as a whole.
- DEMONSTRATE MASTERY OF EARLY INTERMEDIATE DUET AND ENSEMBLE PIECES. (SLO #4) (P-SLO #2)
- Rehearse and successfully perform early intermediate duet and ensemble pieces

MUIVI 351 Piano IV

This is the fourth in a series of four consecutive group piano classes - successful completion of MUIVI 350 with a 'C' or better (or a comparable experience) is required for enrollment. Students will learn ensemble and solo works, develop more complex rhythmic skills, and will develop fundamental keyboard and music theory skills comparable to advanced level repertoire. This course is designed for both music majors planning to transfer as well as for students who are studying primarily for personal enjoyment. Specific skills students will develop include sight reading, improvising, listening skills, primary root position triads, hand-over-hand major and minor arpeggios, intervals, fingering, notation, time signatures, dynamics, basic harmonization, major key signatures, and various methods of tone production.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- PERFORM AND ANALYZE ADVANCED LEVEL PIANO MUSIC PROFICIENTLY IN TREBLE AND BASS CLEFS. (SLO #1) (P-SLO #5, 6)
- Evaluate and play four octaves scales in all major keys and minor keys (hands separate and together). Identify intervals visually and aurally.
- Perform and analyze root position triads and the basic I-IV-I-7-I harmonic progression in all major and minor keys.
ANALYZE AND PERFORM ADVANCED LEVEL PIANO PIECES CONSISTING OF COMPLEX INDEPENDENT PARTS IN BOTH HANDS (SLO #2) (P-SLO #2)

- Practice and perform advanced piano pieces in front of peers.
- DEMONSTRATE ADVANCED LEVEL SIGHT-READING SKILLS. (SLO-#3) (P-SLO #1, 4)
- Perform sight-reading exercises in groups and as a whole.
- REHEARSE AND PERFORM DUETS AND ENSEMBLE PIECES. (SLO #4) (P-SLO #2)

MUIVI 370 Beginning Guitar

Units: 2  
Hours: 36 hours LEC; 18 hours LAB  
Prerequisite: None.  
Transferable: CSU; UC  
General Education: CSU Area C1  
Catalog Date: June 1, 2020

Beginning instruction on the guitar with emphasis on the fundamentals of music as well as basic guitar chord technique and accompaniment figurations.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- enable the student to become acquainted with music through the medium of the guitar.
- develop dexterity skills necessary to create chords through strumming and arpeggiation.
- develop reading skills of melodic lines through conventional notation and tablature.
- allow the student an opportunity for creative expression both formally (writing) and informally.

MUIVI 371 Intermediate Guitar

Units: 2  
Hours: 36 hours LEC; 18 hours LAB  
Prerequisite: MUIVI 370 with a grade of "C" or better  
Transferable: CSU; UC  
General Education: CSU Area C1  
Catalog Date: June 1, 2020

A continuation of MUIVI 370 with emphasis on increased skills in chording, arpeggiation, accompaniment, improvisation, melodic reading, and development of personal style. Students may wish to challenge the prerequisite on the basis of equivalent experience.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- continue to develop dexterity skills through strummed chords and finger picking.
- improve reading skills of conventional notation and tablature.
- develop improvisational techniques based on dexterity and reading skills.

MUIVI 385 Jazz Styles and Improvisation

Units: 2  
Hours: 27 hours LEC; 27 hours LAB  
Prerequisite: None.  
Advisory: Ability to play a melodic instrument or ability to sing; ability to read music.  
Transferable: CSU; UC  
Catalog Date: June 1, 2020
This course is the study of instrumental and vocal application of jazz improvisation.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- notate, perform, identify and apply the blues scale, the bebop scale, the diatonic modes, the pentatonic scale, triads, 7th, 9th, 11th and 13th chords, upper and lower neighbor non-harmonic tones and II-V-I in all keys.

MUIVI 386 Jazz Styles and Improvisation

Units: 2
Hours: 27 hours LEC; 27 hours LAB
Prerequisite: MUIVI 385 with a grade of "C" or better
Transferable: CSU; UC
Catalog Date: June 1, 2020

This course is the study of advanced instrumental and vocal applications of jazz improvisation.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- notate, perform, identify and apply the Lydian dominant scale, the Coltrane pentatonic scale, the diminished scale, the whole tone scale, the diminished whole tone scale, the Locrian #2 scale, tonal triads and sevenths and minor II-V-I in all keys.

- identify and apply fourths, sidestepping, tritone substitution and horizontal vs. vertical techniques in a jazz improvisation.

MUIVI 410 Applied Music

Units: 1
Hours: 18 hours LEC
Prerequisite: None.
Corequisite: MUIHL 402, 404, 412, or 414; Select one large performing ensemble from the following: MUP 310, MUP 312, MUP 330, MUP 335, MUP 357, MUP 358, MUP 360, or MUP 362.
Enrollment Limitation: Audition required.
Transferable: CSU; UC
C-ID: C-ID MUS 160
Catalog Date: June 1, 2020

This course consists of individualized study of the appropriate techniques and repertoire for the specific instrument or voice being studied. The emphasis is on the progressive development of skills needed for solo performance. The course involves instrumental or vocal study requiring a minimum of one-half hour per week of individual study through one-on-one instruction for a minimum of 18 weeks. The course also meets one hour per week on campus for instruction and performance. This course may be repeated to meet the major requirement for transfer to CSU, Sacramento, or to other universities with a similar transfer requirement.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- STUDENTS WILL WORK TOWARDS AND DEVELOP A LEVEL OF TECHNICAL PROFICIENCY ON THEIR INSTRUMENT (OR VOICE) WHICH ALLOWS THEM TO STUDY AND PERFORM CONCERT LEVEL MUSIC AT A PRE-PROFESSIONAL LEVEL (SLO #1) (P-SLO #1, 2, 3, 4, 5)

- Develop improved musical skills that prepare the student for applied music requirements at transfer institutions.

- Demonstrate and adapt acquired skills for successful musical performances.

- Analyze and interpolate the musical skills needed for successful performances of music spanning a multiplicity of styles and genres.

MUIVI 495 Independent Studies in Music

Instrumental/Voice Instruction
An independent studies project involves an individual student or small group of students in study, research, or activities beyond the scope of regularly offered courses. See the current catalog section of “Special Studies” for full details of Independent Studies. This independent study course is designed to provide instrumental training not offered in other CRC music classes. Components of the course may include private or group instruction, solo and ensemble work, accompanying experience, and programmed learning in music fundamentals and music technology. The course may also be designed for students interested in developing tutorial and/or instrumental skills.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO #1: Actively engage in intellectual inquiry beyond that required in order to pass a course of study (College Wide Learning Outcome – Area 4).
- Discuss and outline a proposal of study (that can be accomplished within one semester term) with a supervising instructor qualified within the discipline.
- Design an independent study (to be completed individually or by collaboration of a small group) to foster special knowledge, skills, and experience that are not available in any one regularly scheduled course.
- Use information resources to gather discipline-specific information.
- SLO #2: Utilize modes of analysis and critical thinking to apply theoretical perspectives and/or concepts in the major discipline of study to significant problems and/or educational activities (College Wide Learning Outcome – Area 3).
- Analyze and apply the knowledge, skills and experience that are involved in the independent study to theoretical perspectives and/or concepts in the major discipline of study.
- Explain the importance of the major discipline of study in the broader picture of society.
- SLO #3: Communicate a complex understanding of content matter of the major discipline of study (College Wide Outcome – Area 3).
- Demonstrate competence in the skills essential to mastery of the major discipline of study that are necessary to accomplish the independent study.
- SLO #4: Identify personal goals and pursue these goals effectively (College Wide Outcome – Area 4).
- Utilize skills from the “academic tool kit” including time management, study skills, etc., to accomplish the independent study within one semester term.

Music - Performance (MUP)

MUP 310 Orchestra

| Units: | 2 |
| Hours: | 18 hours LEC; 54 hours LAB |
| Prerequisite: | Students should be able to read music and perform on an orchestral instrument (violin, viola, cello, bass, piccolo, flute, clarinet, double reed, trumpet, French horn, trombone, or percussion) for music that is composed for string orchestra and symphony orchestra, which will be determined by the instructor based upon an audition process. |
| Enrollment Limitation: | Students will be admitted to this course by audition only. Audition times and dates will be announced by the department. |
| Transferable: | CSU; UC |
| General Education: | CSU Area C1 |
| C-ID: | C-ID MUS 180 |
| Catalog Date: | June 1, 2020 |

This course covers the study and performance of orchestral music. It is open to all students who read music and perform on an orchestral instrument (violin, viola, cello, bass, piccolo, flute, clarinet, double reed, trumpet, french horn, trombone, or percussion.) This course includes public performances and field trips, and meets requirements for music majors and minors. Students study and perform music literature composed for string orchestra and symphony orchestra. This course may be repeated to meet the major requirement for transfer to CSU, Sacramento, or to other universities with a similar transfer requirement. Students may be required to provide their own instruments.
Student Learning Outcomes

Upon completion of this course, the student will be able to:

- **SLO 1 PERFORM ORCHESTRAL MUSIC (P-SLO 1, P-SLO 2, P-SLO 3, P-SLO 4)**
  - Perform with artistic expression in public performances.
  - Perform representative works from standard orchestral literature of both contemporary and historical periods.
  - Apply proper basic instrumental technique (posture, bowing, support, embouchure, tone, projection, stage deportment, ensemble performance.)
  - Examine new literature and produce music utilizing proper sight reading techniques.
  - Create proper balance within the section and across the ensemble by evaluating dynamic levels in both groups. Discriminate melodic versus harmonic role and modify dynamics for proper balance.
  - Identify proper intonation within the section and across the ensemble and match pitch accordingly.
  - Identify the correct tempo in use and match the ensemble to produce a more precise and artistic performance.
  - Criticize and appraise performances.

This course includes public performance and meets the performance requirement for all music majors and minors. Students study and perform music literature composed for orchestra. The literature and performances will differ in content as students repeat the course and continue to develop musical skills for performance. Four semesters of a large performance class are required for the AA degree and transfer for all music majors.

MUP 312 Orchestra

**Units:** 1  
**Hours:** 9 hours LEC, 27 hours LAB  
**Prerequisite:** None.  
**Enrollment Limitation:** Students will be admitted to this course by audition only. Audition times and dates will be announced by the department.  
**Transferable:** CSU; UC  
**C-ID:** C-ID MUS 180  
**Catalog Date:** June 1, 2020

This course includes the study and performance of jazz including stage routines and special arrangements. Public performances are required. This course may be repeated to meet the major requirement for transfer to CSU, Long Beach, or to other universities with a similar transfer requirement.

**Student Learning Outcomes**

Upon completion of this course, the student will be able to:

- **ACQUIRE PHYSICAL SKILLS/DEXTERITY ON JAZZ INSTRUMENTS (SLO #1; PSLO #1).**
  - sight-read, interpret and perform a variety of jazz styles in an ensemble setting, with repeating students expanding their range and flexibility with respect to technique, phrasing, articulation, and rhythm.
  - prepare and perform jazz band repertoire from recordings and sheet music, with repeating students broadening the scope of their experience to include new repertoire of increased difficulty and greater ability to infer genre-specific aesthetics.
  - develop ability to perform independently at a level of quality and consistence.
  - integrate artistic expression and technical proficiency into public performances.
  - formulate and implement practice strategies specific to a jazz instrument.
  - apply knowledge of jazz routines to construct improvised solos.

- **ACQUIRE AURAL AWARENESS AND ENSEMBLE SKILLS (SLO#2; PSLO #2).**
  - apply ensemble experience to jazz environments, and for repeating students, explore leadership roles within an ensemble.
  - demonstrate the interpersonal skills necessary to participate cooperatively within a jazz ensemble.

- **ESTABLISH AN HISTORICAL, GEOGRAPHICAL AND CHRONOLOGICAL CONTEXT OF JAZZ MUSIC (SLO#3; PSLO#3).**
  - demonstrate the ability to analyze, distinguish and perform jazz ensemble music of various historical eras and stylistic trends, with repeating students augmenting their command of various performance practices within the jazz lineage.

- **LEARN AND USE CRITICAL LISTENING SKILLS TO DISCUSS AND CRITIQUE MUSICAL WORKS AND PERFORMANCES (SLO#4; PSLO#4).**
  - analyze and evaluate jazz improvisations.
  - evaluate technical skills and discern stylistic characteristics through individual preparation, ensemble practice and performance.
  - evaluate and critique other performers and performance ensembles.

This course is for the continuing study and performance of Jazz Band repertoire. Additional topics include rehearsal technique and improvisation. Public performance and field trips are required. Performance participation will be by audition. This course may be taken a maximum of four times to meet the major requirement for transfer to CSU, Long Beach, or to other universities with a similar transfer requirement.
Upon completion of this course, the student will be able to:

- ACQUIRE PHYSICAL SKILLS/DEXTERITY ON JAZZ INSTRUMENTS (SLO #1; PSLO #1).
- sight-read, interpret and perform a variety of jazz styles in an ensemble setting, with repeating students expanding their range and flexibility with respect to technique, phrasing, articulation, and rhythm.
- prepare and perform jazz band repertoire from recordings and sheet music, with repeating students broadening the scope of their experience to include new repertoire of increased difficulty and greater ability to infer genre-specific aesthetics.
- develop ability to perform independently at an advanced level of quality and consistence.
- integrate artistic expression and technical proficiency into public performances.
- formulate and implement practice strategies specific to a jazz instrument.
- apply knowledge of jazz routines to construct improvised solos at an advanced level.
- ACQUIRE AURAL AWARENESS AND ENSEMBLE SKILLS (SLO#2; PSLO #2).
- apply ensemble experience to jazz environments, and for repeating students, explore leadership roles within an ensemble.
- demonstrate the interpersonal skills necessary to participate cooperatively within a jazz ensemble and to assume the role of section leader.
- ESTABLISH AN HISTORICAL, GEOGRAPHICAL AND CHRONOLOGICAL CONTEXT OF JAZZ MUSIC (SLO#3; PSLO#3).
- demonstrate the ability to analyze, distinguish and perform jazz ensemble music of various historical eras and stylistic trends, with repeating students augmenting their command of various performance practices within the jazz lineage.
- LEARN AND USE CRITICAL LISTENING SKILLS TO DISCUSS AND CRITIQUE MUSICAL WORKS AND PERFORMANCES (SLO#4; PSLO#4).
- analyze and evaluate jazz improvisations at an advanced level.
- evaluate technical skills and discern stylistic characteristics through individual preparation, ensemble practice and performance.
- evaluate and critique other performers and performance ensembles.

MUP 330 Concert Band

- **Units:** 2
- **Hours:** 18 hours LEC; 54 hours LAB
- **Prerequisite:**
  - Student should be able to read music and perform on a concert band instrument (piccolo, flute, clarinet, double reed, saxophone, trumpet, French horn, trombone, euphonium, baritone, tuba, string bass or percussion), for music that is composed for a concert band, which will be determined by the instructor based upon an audition process.
- **Enrollment Limitation:**
  - Students will be admitted to this course by audition only. Audition times and dates will be announced by the department.
- **Transferable:**
  - CSU; UC
- **C-ID:** C-ID MUS 180
- **Catalog Date:** June 1, 2020

This course covers the study and performance of concert band music. It is open to students who read music and perform on a concert band instrument (piccolo, flute, clarinet, double reed, saxophone, trumpet, French horn, trombone, euphonium, baritone, tuba, string bass or percussion). This course includes public performances and field trips, and meets requirements for music majors and minors. Students study and perform music literature composed for concert band. This course may be repeated to meet the major requirement for transfer to CSU, Sacramento, or to other universities with a similar transfer requirement. Students may be required to provide their own instruments.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO 1 PERFORM CONCERT BAND MUSIC (P-SLO 1, P-SLO 2, P-SLO 3, P-SLO 4)
- Perform with artistic expression in public performances.
- Perform representative works from standard concert band literature.
- Apply proper basic instrumental technique (posture, support, embouchure, tone, projection, stage deportment, ensemble performance.)
- Examine new literature and produce music utilizing proper sight reading techniques.
- Create proper balance within the section and across the ensemble by evaluating dynamic levels in both groups. Discriminate melodic versus harmonic role and modify dynamics for proper balance.
- Identify proper intonation within the section and across the ensemble and match pitch accordingly.
- Identify the correct tempo in use and match the ensemble to produce a more precise and artistic performance.
- Criticize and appraise performances.

MUP 335 Concert Band

Units: 1
Hours: 9 hours LEC; 27 hours LAB
Prerequisite: None.
Enrollment Limitation: Audition will be required for admission to this course. Audition times and dates will be announced by the department.
Transferable: CSU; UC
C-ID: C-ID MUS 180
Catalog Date: June 1, 2020

This course covers the study and performance of concert band music. It is open to students who read music and perform on a concert band instrument (piccolo, flute, clarinet, double reed, saxophone, trumpet, French horn, trombone, euphonium, baritone, tuba, string bass or percussion). This course includes public performances and field trips, and meets requirements for music majors and minors. Students study and perform music literature composed for concert band. This course may be repeated to meet the major requirement for transfer to CSU, Sacramento, or to other universities with a similar transfer requirement. Students may be required to provide their own instruments.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO 1 PERFORM CONCERT BAND MUSIC (P-SLO 1, P-SLO 2, P-SLO 3, P-SLO 4)
- Perform with artistic expression in public performances.
- Perform representative works from standard concert band literature.
- Apply proper basic instrumental technique (posture, support, embouchure, tone, projection, stage deportment, ensemble performance.)
- Examine new literature and produce music utilizing proper sight reading techniques.
- Create proper balance within the section and across the ensemble by evaluating dynamic levels in both groups. Discriminate melodic versus harmonic role and modify dynamics for proper balance.
- Identify proper intonation within the section and across the ensemble and match pitch accordingly.
- Identify the correct tempo in use and match the ensemble to produce a more precise and artistic performance.
- Criticize and appraise performances.

MUP 350 Concert Choir I

Units: 2
Hours: 18 hours LEC; 54 hours LAB
Prerequisite: None.
Advisory: MUP 357, or placement through the assessment process.
Transferable: CSU; UC
General Education: CSU Area C1
C-ID: C-ID MUS 180
Catalog Date: June 1, 2020

This course covers the study and performance of standard vocal literature from the 16th century to the modern period. Students are urged to enter during their freshman year. Public performances are required. This course may be taken a maximum of four times to meet the major requirement for transfer to CSU, Sacramento, or to other universities with a similar transfer requirement.

Student Learning Outcomes
Upon completion of this course, the student will be able to:

- SLO 1: PERFORM AND UNDERSTAND CHORAL MUSIC THROUGH THE AGES.
- perform with artistic expression in public performances.
- perform representative works of art from standard choral literature.
- demonstrate proper basic vocal technique (posture, breathing, diction, resonance, and stage deportment) and ensemble singing.

MUP 353 Contemporary Gospel Choir

**Units**: 2  
**Hours**: 18 hours LEC; 54 hours LAB  
**Prerequisite**: None.  
**Transferable**: CSU; UC  
**Catalog Date**: June 1, 2020

This course is designed for the college student who is interested in learning the history of gospel music, improving their general musicianship, enhancing their vocal technique, and performing chorale repertoire from different eras of gospel music. No previous musical experience is necessary. Multiple public performances of the repertoire rehearsed and learned, and a brief biographic paper on a gospel figure are required. This course may be repeated to meet the major requirement for transfer to CSU, Dominguez Hills, or to other universities with a similar transfer requirement.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- Establish an historical, geographical and chronological context of music (SLO #1; PSLO #3).
- Recognize and appreciate gospel music as legitimate, viable and exciting piece of a larger body of music.
- Acquire aural awareness and ensemble skills (SLO #2; PSLO #2).
- Develop stage presence as a performer in a choral setting.
- Acquire physical skills/dexterity within a discipline (SLO #3; PSLO #1).
- Identify the elements of gospel style and sound in order to distinguish between traditional and contemporary performances.
- Discuss and critique musical works and performances through self analysis, ensemble participation and performance evaluation (SLO #4; PSLO #4).
- Participate in educational outreach initiatives through off-campus performances.
- Acquire analytical skills and a conceptual framework for the future (SLO #5; PSLO #5).

MUP 357 College Chorus

**Units**: 2  
**Hours**: 18 hours LEC; 54 hours LAB  
**Prerequisite**: None.  
**Enrollment Limitation**: Voice placement or audition required.  
**Transferable**: CSU; UC  
**General Education**: AA/AS Area I; CSU Area C1  
**C-ID**: C-ID MUS 180  
**Catalog Date**: June 1, 2020

This course is designed for the college student who is interested in a musical experience. Singers study and perform standard choral literature. Ability to match pitch, maintain rhythmic integrity and produce a good tone will be assessed by voice placement or audition in the initial rehearsals. This course may be repeated to meet the major requirement for transfer to CSU, Sacramento, or to other universities with a similar transfer requirement.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO 1: PERFORM AND UNDERSTAND CHORAL MUSIC THROUGH THE AGES.
MUP 358 College Chorus Chorale

Units: 1
Hours: 9 hours LEC; 27 hours LAB
Prerequisite: None.
Enrollment Limitation: Voice placement or audition required.
Transferable: CSU; UC
General Education: AA/AS Area I
C-ID: C-ID MUS 180
Catalog Date: June 1, 2020

This course is designed for the college student who is interested in a musical experience. Singers study and perform standard choral literature. Ability to match pitch, maintain rhythmic integrity and produce a good tone will be assessed by voice placement or by audition during the initial rehearsals. This course may be repeated to meet the major requirement for transfer to CSU, Sacramento, or to other universities with a similar transfer requirement.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- PERFORM AND UNDERSTAND CHORAL MUSIC THROUGH THE AGES. (SLO 1, P-SLO 3)
- Perform with artistic expression in public performances. (P-SLO 1, 2, 3, 4)
- Perform representative works of art from standard choral literature. (SLO-1, P-SLO 1, 2, 3, 4)
- Demonstrate proper basic vocal technique (posture, breathing, diction, resonance, and stage deportment) and ensemble singing. (P-SL0 1, 2, 4)

MUP 360 Chamber Singers

Units: 2
Hours: 18 hours LEC; 72 hours LAB
Prerequisite: None.
Enrollment Limitation: Audition required.
Advisory: MUP 350 or 357; Students are strongly advised to document previous choral experience.
Transferable: CSU; UC
General Education: AA/AS Area I; CSU Area C1
C-ID: C-ID MUS 180
Catalog Date: June 1, 2020

Singers study and perform standard choral literature, especially written for chamber ensemble. Prospective members should have considerable previous choral experience. Public performances are required. Singers will perform outside of class, including evening concerts, participation in collegiate choral festivals, and on short tours. Ability to match pitch, maintain rhythmic integrity and produce a good tone will be assessed by voice placement or by audition in the initial rehearsals. This course may be repeated to meet the major requirement for transfer to CSU, Sacramento, or to other universities with a similar transfer requirement.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO 1: PERFORM AND UNDERSTAND CHORAL MUSIC THROUGH THE AGES, ESPECIALLY MUSIC WRITTEN FOR CHAMBER ENSEMBLE.
- perform artistically in public settings.
- sing repertoire of other languages and cultures.
apply appropriate stylistic characteristics to the repertoire being sung in regards to the historical period or the culture of the music.

- Analyze and evaluate all vocal performances with regards to basic choral technique.

## MUP 362 Chamber Singers Chorale

| Units: | 1 |
| Hours: | 9 hours LEC; 27 hours LAB |
| Prerequisite: | None. |
| Enrollment Limitation: | Audition required. |
| Advisory: | MUP 350, 357, or 358; Students are strongly advised to document previous choral experience. |
| Transferable: | CSU; UC |
| General Education: | AA/AS Area I |
| C-ID: | C-ID MUS 180 |
| Catalog Date: | June 1, 2020 |

Singers study and perform standard choral literature, especially written for chamber ensemble. Prospective members should have considerable previous choral experience. Public performances are required. Singers will perform outside of class, including evening concerts, participation in collegiate choral festivals, choral exchanges, and on short tours. Ability to match pitch, maintain rhythmic integrity and produce a good tone will be assessed by audition during the initial rehearsals. This course may be repeated to meet the major requirement for transfer to CSU, Sacramento, or to other universities with a similar transfer requirement.

## Student Learning Outcomes

Upon completion of this course, the student will be able to:

- PERFORM AND UNDERSTAND CHORAL MUSIC THROUGH THE AGES, ESPECIALLY MUSIC WRITTEN FOR CHAMBER ENSEMBLE. (SLO 1, P-SLO 1, 2, 3, 4)
- Perform artistically in public settings. (P-SLO1, 2, 3, 4)
- Sing repertoire of other languages and cultures. (P-SLO 1, 2, 3, 4)
- Apply appropriate stylistic characteristics to the repertoire being sung in regards to the historical period or the culture of the music. (P-SLO 1, 2, 3, 4)
- Analyze and evaluate all vocal performances with regards to basic choral technique. (P-SLO 2, 4)

## MUP 422 Special Ensemble Participation

| Units: | 0.5 - 2 |
| Prerequisite: | None. |
| Transferable: | CSU; UC |
| Catalog Date: | June 1, 2020 |

This course is open to all students who sing, or play a musical instrument. Instrumentation of groups will vary, including jazz combo, piano quintet, guitar ensemble, and related music as well as choral groups.

## MUP 423 Composition Ensemble Workshop

| Units: | 2 |
| Hours: | 36 hours LEC; 18 hours LAB |
| Prerequisite: | None. |
| Transferable: | CSU |
| Catalog Date: | June 1, 2020 |

This course provides students with an opportunity to create original works in a variety of genres and styles, while learning about important musical trends and composers in the 20th and 21st Century world of classical, jazz, film, commercial, and pop music worlds.

## Student Learning Outcomes

Upon completion of this course, the student will be able to:

- DEVELOP A CLEAR UNDERSTANDING OF THE EUROPEAN CLASSICAL TRADITION. (SLO #1)
Discuss and analyze representative concert music composers

UNDERSTAND COMMON 20TH CENTURY TECHNIQUES AS THEY APPEAR IN COMPOSITIONS. (SLO #2)

Create and perform original musical compositions that integrate key elements of 20th Century concert music.

DEVELOP A CLEAR UNDERSTANDING OF 20TH CENTURY TRENDS IN CONCERT MUSIC. (SLO #3)

Analyze and assess scores by representative 20th Century composers that contain unique and forward thinking harmonic components.

DEVELOP A NUANCED ARTISTIC SENSIBILITY AND USE ADVANCED CRITICAL THINKING SKILLS WHILE CREATING NEW MUSICAL COMPOSITIONS THAT WILL BE PUBLICLY PERFORMED. (SLO #4)

Create music compositions that have a compelling musical structure and content.

Create music compositions that are emotionally and intellectually intriguing.

Create music compositions that use advanced techniques with respect to melody, harmony, rhythm, texture, timbre, and gesture.

Create and successfully perform music compositions that develop a unique artistic voice.

REHEARSE AND PERFORM ORIGINAL AND RECENTLY COMPOSED MUSIC (SLO #5)

Perform with artistic expression in public performances.

Create music compositions that are emotionally and intellectually intriguing.

Criticize and appraise performances.

Create and perform successful music compositions that develop a unique artistic voice.

MUP 424 Commercial Music Ensemble

Units: 2
Hours: 18 hours LEC; 54 hours LAB
Prerequisite: None.
Enrollment Limitation: audition/demonstrated instrumental or vocal skill
Advisory: Ability to play at least one instrument or vocalize in a popular style.
Transferable: CSU
Catalog Date: June 1, 2020

This course involves the rehearsal and performance of contemporary pop and commercial styles, including rock, jazz, rhythm and blues, soul, folk, urban styles, country, and world beat.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- interpret and perform a variety of commercial styles in an ensemble setting, with repeating students expanding their range and flexibility as ensemble players. SLO #1
- apply ensemble experience to real world environments, and for repeating students, explore leadership roles within an ensemble. SLO #2
- perform music learned from recordings and sheet music, with repeating students broadening their skills to include arranging. SLO #3
- analyze, organize and apply basic business and technical support systems to fit various music groups, with repeating students strengthening and refining these skills. SLO #4
- participate cooperatively as an ensemble musician. SLO #5

MUP 495 Independent Studies in Music Performance

Units: 1 - 3
Hours: 54 - 162 hours LAB
Prerequisite: None.
Transferable: CSU
Catalog Date: June 1, 2020
Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO #1: Actively engage in intellectual inquiry beyond that required in order to pass a course of study (College Wide Learning Outcome – Area 4).
- Discuss and outline a proposal of study (that can be accomplished within one semester term) with a supervising instructor qualified within the discipline.
- Design an independent study (to be completed individually or by collaboration of a small group) to foster special knowledge, skills, and experience that are not available in any one regularly scheduled course.
- Use information resources to gather discipline-specific information.
- SLO #2: Utilize modes of analysis and critical thinking to apply theoretical perspectives and/or concepts in the major discipline of study to significant problems and/or educational activities (College Wide Learning Outcome – Area 3).
- Analyze and apply the knowledge, skills and experience that are involved in the independent study to theoretical perspectives and/or concepts in the major discipline of study.
- Explain the importance of the major discipline of study in the broader picture of society.
- SLO #3: Communicate a complex understanding of content matter of the major discipline of study (College Wide Outcome – Area 3).
- Demonstrate competence in the skills essential to mastery of the major discipline of study that are necessary to accomplish the independent study.
- SLO #4: Identify personal goals and pursue these goals effectively (College Wide Outcome – Area 4).
- Utilize skills from the "academic tool kit" including time management, study skills, etc., to accomplish the independent study within one semester term.

Music - Specializations in Music (MUSM)

MUSM 110 The Business of Music

</tr>
</tbody>
</table>

This course gives an overview of the processes of the music industry. This includes record contracts as well as the duties and responsibilities of record producers, agents, managers, and performing artists.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- UTILIZE PROFICIENTLY NEW TECHNOLOGIES FOR THE PURPOSES OR RESEARCH, COMPOSITION, LISTENING, PERFORMANCE, RECORDING, ARCHIVING, AND CROSS-DISCIPLINE COLLABORATION IN THE FIELDS AND INDUSTRY OF MUSIC. (SLO #1) (PSLO #6)
- understand and utilize proper terminology to describe music industry practices, business operations, legalities, and current issues.
- utilize and understand current technologies to create opportunities that help offset the many financial challenges facing the music industry.
- examine career opportunities in music to evaluate advantageous and disadvantageous career paths.
- describe and summarize key elements of music industry agreements, contracts, procedures, and methods of doing business.
MUSM 334 Introduction to Musical Instrument Digital Interface (MIDI)

This course is an introduction to the rapidly evolving use of professional music software and MIDI electronic instruments. Various music hardware options, including keyboards, synthesizers, samplers, computers and drum machines, will be explored. Through a series of MIDI projects, students learn to use music sequencing, notation, and CAI (computer-assisted instruction) software.

Upon completion of this course, the student will be able to:

- demonstrate a knowledge of the history, concepts and terminology associated with MIDI technology.
- compare and contrast the strengths and weaknesses of various MIDI hardware and software options.
- design and produce a musical score using music notation software.
- input, edit, and output music using music sequencing software.
- assess and select appropriate CAI (computer-assisted instruction) software for personal and classroom use.

MUSM 346 Audio and Music Production I

This course covers introductory concepts and skill development in audio and music production. Students will work with consumer grade software applications designed to produce music digitally that are either free or come bundled with their laptops. Students will learn how to control this software with consumer grade hardware, such as control surfaces and digital audio interfaces. Students will develop skills in songwriting, music composition, and learn how to prepare written music for a recorded performance.

Upon completion of this course, the student will be able to:

- SLO 1: Demonstrate a basic understanding of the software and hardware used on a daily basis in a musician's life. (P-SLO 6)
- Create recordings with computers using digital audio workstation software and Analog/Digital peripheral interfaces.
- Evaluate the various software and hardware with which music is created and delivered in the digital realm.
- SLO 2: Analyze and utilize compositional forms to communicate music most effectively. (P-SLO 5, P-SLO 6)
- Create original compositions that are both prepared for musicians in a studio environment and recording using the aforementioned hardware and software.

MUSM 347 Audio and Music Production II
This course covers intermediate and advanced concepts and skill development in digital audio/music production. In Audio and Music Production II, students will build on knowledge acquired Digital Music I, through their continual practice and work with key, industry-standard professional software environments, such digital audio workstation and music notation software. Students will continue to hone their skills in songwriting and music composition for other media such as film, gaming, and video. Students will complete original creative musical projects, promote their own work on web sites they create for themselves, place their music on social media platforms, and monetize their creativity on the internet.

Student Learning Outcomes
Upon completion of this course, the student will be able to:

- SLO 1: Demonstrate a strong working knowledge of software and hardware used on a daily basis in a musician’s life. (P-SLO 6)
- Create professional grade recordings with computers using digital audio workstation software and Analog/Digital peripheral interfaces.
- Evaluate the various media forms in which music is created and delivered in the digital realm.
- SLO 2: Analyze and select the most advantageous professional grade software and hardware to complete musical projects in the digital realm. (P-SLO 5, P-SLO 6)
- Create original compositions for film, video, and/or gaming using professional grade software and hardware.
- Design websites and social media pages for the promotion and sale of their music.

MUSM 370 Music for Children

Experiences and materials for integrating music into pre-school, elementary, and recreational programs. Recommended for elementary and early childhood credential candidates, recreation leaders, and others who use music with children.

Student Learning Outcomes
Upon completion of this course, the student will be able to:

- Acquire physical skills/dexterity within a discipline (SLO #1, PSLO #1).
- Use music as a primary learning tool.
- Acquire analytical skills and a conceptual framework for the future (SLO #2; PSLO #5).
- Organize success-oriented elemental music activities.
- Plan music classes which integrate the arts into all phases of the curriculum.
- Utilize new technologies for the purposes of research, composition, listening, performance, recording, archiving and cross-discipline collaboration (SLO #3; PSLO #6).
- Teach young children basic music concepts of rhythm and melody, using singing, dancing, playing of instruments, creating and improvising music.
- Create and perform on rhythm-band instruments used in school.

MUSM 495 Independent Studies in Music Specializations

An independent studies project involves an individual student or small group of students in study, research, or activities beyond the scope of regularly offered courses. See the current catalog section of "Special Studies" for full details of Independent Studies.
Student Learning Outcomes

Upon completion of this course, the student will be able to:

- **SLO #1**: Actively engage in intellectual inquiry beyond that required in order to pass a course of study (College Wide Learning Outcome – Area 4).
- **SLO #2**: Discuss and outline a proposal of study (that can be accomplished within one semester term) with a supervising instructor qualified within the discipline.
- **SLO #3**: Design an independent study (to be completed individually or by collaboration of a small group) to foster special knowledge, skills, and experience that are not available in any one regularly scheduled course.
- **SLO #4**: Use information resources to gather discipline-specific information.
- **SLO #5**: Utilize modes of analysis and critical thinking to apply theoretical perspectives and/or concepts in the major discipline of study to significant problems and/or educational activities (College Wide Learning Outcome – Area 3).
- **SLO #6**: Analyze and apply the knowledge, skills and experience that are involved in the independent study to theoretical perspectives and/or concepts in the major discipline of study.
- **SLO #7**: Explain the importance of the major discipline of study in the broader picture of society.
- **SLO #8**: Communicate a complex understanding of content matter of the major discipline of study (College Wide Outcome – Area 3).
- **SLO #9**: Demonstrate competence in the skills essential to mastery of the major discipline of study that are necessary to accomplish the independent study.
- **SLO #10**: Identify personal goals and pursue these goals effectively (College Wide Outcome – Area 4).
- **SLO #11**: Utilize skills from the “academic tool kit” including time management, study skills, etc., to accomplish the independent study within one semester term.

---

**MUSM 498 Work Experience in Music Specializations**

**Units:** 1 - 4
**Hours:** 60 - 300 hours LAB
**Prerequisite:** None.
**Enrollment Limitation:** Students must be in a paid or unpaid internship, volunteer position or job related to career goals in the field of music.
**Transferable:** CSU
**General Education:** AA/AS Area III(b)
**Catalog Date:** June 1, 2020

This course provides students with opportunities to develop marketable skills in preparation for employment in their major field of study or advancement within their career. It is designed for students interested in work experience and/or internships in transfer level degree occupational programs. Course content includes understanding the application of education to the workforce; completion of required forms which document the student’s progress and hours spent at the work site; and developing workplace skills and competencies. Appropriate level learning objectives are established by the student and the employer. During the semester, the student is required to participate in a weekly orientation and 75 hours of related paid work experience, or 60 hours of unpaid work experience for one unit. An additional 75 or 60 hours of related work experience is required for each additional unit. Work Experience may be taken for a total of 16 units when there are new or expanded learning objectives. Only one Work Experience course may be taken per semester.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- **SLO 1**: DEMONSTRATE AN UNDERSTANDING AND APPLICATION OF PROFESSIONAL WORKPLACE BEHAVIOR IN A FIELD OF STUDY RELATED TO ONE’S CAREER.
- **SLO 2**: Understand the effects time, stress, and organizational management have on performance.
- **SLO 3**: Demonstrate an understanding of consistently practicing ethics and confidentiality in a workplace.
- **SLO 4**: Examine the career/life planning process and relate its relevancy to the student.
- **SLO 5**: Demonstrate an understanding of basic communication tools and their appropriate use.
- **SLO 6**: Demonstrate an understanding of workplace etiquette.
- **SLO 7**: Link personal goals to long term achievement.
- Display an understanding of creating a professional first impression.
- Understand how networking is a powerful job search tool.
- Understand necessary elements of a résumé.
- Understand the importance of interview preparation.
- Identify how continual learning increases career success.

SLO 3: DEMONSTRATE APPLICATION OF INDUSTRY KNOWLEDGE AND THEORETICAL CONCEPTS AS WRITTEN IN LEARNING OBJECTIVES IN PARTNERSHIP WITH THE EMPLOYER WORK SITE SUPERVISOR.
CRC's Department of Nutrition and Foods offers an Associate's Degree Program that is challenging, accessible, and rewarding. The program provides opportunities to master the knowledge and skills required for transfer to a didactic program in dietetics or a four-year degree in nutrition and foods.

Associate Degrees for Transfer

A.S.-T. in Nutrition and Dietetics
The Associate in Science in Nutrition and Dietetics for Transfer degree provides students with a major that fulfills the general requirements of the California State University for transfer to baccalaureate degree programs in nutrition and dietetics. Students with this degree will receive priority admission with junior status to the California State University system. The Associate in Science in Nutrition and Dietetics for Transfer is comprised of lower division coursework typically required by CSU institutions. Students must complete the following Associate Degree for Transfer requirements (Pursuant to SB1440, §66746):

- 60 semester or 90 quarter CSU-transferable units
- the California State University-General Education-Breadth pattern (CSU GE-Breadth); OR the Intersegmental General Education Transfer Curriculum (IGETC) pattern
- a minimum of 18 semester or 27 quarter units in the major or area of emphasis as determined by the community college district
- obtain a minimum grade point average (GPA) of 2.0
- earn a grade of C or better in all courses required for the major or area of emphasis

Upon successful completion of the Associate in Science in Nutrition and Dietetics for Transfer degree requirements, students will be guaranteed admission to the CSU system with junior status and will not have to repeat lower division coursework.

Each California State University may have slightly different requirements for transfer so it is critical for students to work with their counselors to develop individual academic plans.

Catalog Date: June 1, 2020

Total Units: 28

If BIOL 430 is selected, BIOL 431 must also be selected as the second course taken.

The Associate in Science in Nutrition and Dietetics for Transfer (AS-T) degree may be obtained by completion of 60 transferable, semester units with a minimum 2.0 GPA, including (a) the major or area of emphasis described in the Required Program, and (b) either the Intersegmental General Education Transfer Curriculum (IGETC) or the California State University General Education-Breadth Requirements.

**Student Learning Outcomes**

Upon completion of this program, the student will be able to:

- PSLO 1: Explain the principles of nutrition and its effect on health
- PSLO 2: Demonstrate a fundamental understanding of health behaviors on nutritional and health status

**Career Information**

Upon successful completion of a baccalaureate degree in nutrition or dietetics include positions as dieticians, nutritionists and dietetic technicians in hospitals/nursing homes, school food services, other health related facilities, college food service, industry food service, restaurants, public health agencies, nutrition programs, WIC programs, Meals on Wheels, health clubs, weight management clinics, community wellness centers, food companies, contract food management companies, and food distribution companies.

**Associate Degrees**

**A.S. in Nutrition and Foods**

CRC's Department of Nutrition and Foods offers an Associate's Degree Program that is challenging, accessible, and rewarding. The program provides opportunities to master the knowledge and skills required for transfer to a didactic program in dietetics or a four-year degree in nutrition and foods.

Highlights include:

* Online nutrition courses

Note to Transfer Students:

If you are interested in transferring to a four-year college or university to pursue a Bachelor's degree in this major, it is critical that you meet with a CRC counselor to select and plan the courses for your major. Schools vary widely in terms of the required preparation. The courses that CRC requires for an Associate's degree in this major may be different from the requirements needed for the Bachelor's degree.

Total Units: 38 - 39

* Chem 305, 400 are transferable to CSUS Didactic Program

2 BIOL 430 - transferable to CSUS Didactic Program

The Nutrition and Foods Associate in Science (A.S.) degree may be obtained by completion of the required program, plus general education requirements, plus sufficient electives to meet a 60-unit total. See CRC graduation requirements.

Enrollment Eligibility

To be eligible for enrollment in the program, the student must meet the following criteria:

- Have access to the Internet
- Have an e-mail account
- Be familiar with word processing, PowerPoint, retrieving and attaching electronic documents and using the world wide web
- Have self-discipline, motivation, and the ability to complete required assignments on schedule.

Enrollment Process

Eligible students are selected for the program according to the following steps:

- Admission to the college
- Contact CRC Nutrition and Foods Program Counselor regarding transferable courses.

Student Learning Outcomes

Upon completion of this program, the student will be able to:

- PSLO 1: Demonstrate independent learning and effective communication skills
- PSLO 2: Explain the principles of nutrition and its effect on health
- PSLO 3: Demonstrate a fundamental understanding of health behaviors on nutritional and health status
- PSLO 4: Demonstrate a fundamental understanding of food service management function
- PSLO 5: Compare the effectiveness of various management styles
- PSLO 6: Interpret current nutrition research
Career Information

Hospitals/nursing homes, school food services, other health related facilities, college food service, industry, restaurant, public health agencies, nutrition program, WIC programs, Meals on Wheels, health clubs, weight management clinic, community wellness centers, food companies, contract food management companies, food distribution companies. Some career options may require more than two years of college study. Classes beyond the associate degree may be required to fulfill some career options or for preparation for transfer to a university program.

Certificates of Achievement

Nutrition and Foods, Community Nutrition Certificate

This certificate advances student's understanding of the interaction between nutrition and health. The focus is on community wellness through dietary choices, as they relate to nutrition needs of individuals throughout the lifecycle, cultural influences, community programs targeted at addressing nutrition-related issues and basic food preparation techniques. After completing the classes for this certificate, students may apply credits toward CRC’s Nutrition and Foods associate's degree program. Students earning this certificate are not qualified to practice medical nutrition therapy.

The Nutrition department offers courses both on-campus and online to accommodate varying students' needs.

Student Learning Outcomes

Upon completion of this program, the student will be able to:

- PSLO 1: Demonstrate independent learning and effective communication skills
- PSLO 2: Explain the principles of nutrition and its effect on health
Career Information

Upon further academic study, students would be qualified for positions in hospitals/nursing homes, school food services, other health related facilities, college food service, industry, restaurant, public health agencies, nutrition program, WIC programs, Meals on Wheels, health clubs, weight management clinic, community wellness centers, food companies, contract food management companies, food distribution companies. These career options may require more than the certificate and two years of college study. Classes beyond the associate degree may be required to fulfill some career options or for preparation for transfer to a university program.

Plant-Based Nutrition and Sustainable Agriculture Certificate

The Plant-Based Nutrition and Sustainable Agriculture Certificate Program brings farm-to-fork into the classroom. It provides the science that supports the benefits of whole plant-based foods to the health of the individual as well as the environment. Students will gain knowledge in the function of plant-based foods towards the treatment and prevention of chronic diseases. The program addresses the environmental and social concerns with strategies and principles of sustainable agriculture. Students will master the theories and skills of plant-based food preparation bringing the food to the fork and into everyday food choices.

Contact the CRC Nutrition and Foods, Horticulture, and/or Ag Counselor regarding transferable courses.

Catalog Date: June 1, 2020

Student Learning Outcomes

Upon completion of this program, the student will be able to:

- PSLO 1: Demonstrate independent learning and effective communication skills.
- Demonstrate responsibility for personal action and choices.
- Communicate effectively both orally and in writing.
- PSLO 2: Explain the principles of nutrition and its effect on health.
- Relate the dietary causes of chronic diseases.
- Evaluate the role of plant-based foods on health and the environment.
- PSLO 3: Demonstrate a fundamental understanding of health behaviors on nutritional and health status.
- Schematize the effects of personal food choice on health, the environment and public policy.
- PSLO 4: Basic and advanced plant science/horticulture skills development and improvement.
- Demonstrate and apply the theories of sustainable and organic agriculture.
- Demonstrate a fundamental understanding of soils, soil development, soil building and preparation and sustainable soil management.
- Demonstrate a fundamental understanding of hydraulics and irrigation design, installation, and water management principles and practices.
- Create agriculture design concepts based on sound, sustainable soil management, water conservation, construction and maintenance, and integrated pest management best practices.
- PSLO 5: Effectively and accurately prepare and analyze raw ingredients and prepared foods.
Nutrition (NUTRI)

NUTRI 300 Nutrition

This course studies the basic science of human nutrition and its application to health and chronic diseases. It examines the sources and functions of micro- and macronutrients nutrients, including digestion, absorption, and transportation. Emphasis is placed on the health implications associated with dietary patterns, phytonutrient intake, consumption of whole foods, the impact of processing, and consequences of under and overconsumption. The course will also include topics such as nutrition as a world and consumer problem, weight loss, sports nutrition, food safety, and the diet-disease relationship, among others. An evaluation of personal dietary habits using current dietary guidelines and nutritional assessment methods will be completed to help students assess their own nutritional health.

Upon completion of this course, the student will be able to:

- SLO 1: Demonstrate independent learning and effective communication skills.
- SLO 2: Explain the principles of nutrition and their effects on health.
- SLO 3: Demonstrate fundamental understanding of health behaviors on nutrition and health status.
- PSLO 6: Implement proper sanitary and safety techniques.
- Demonstrate appropriate food handling and sanitary techniques.
- Utilize kitchen tools/equipment appropriately.

Career Information

In restaurants, food service facilities, farms, urban farms, sustainable/organic farms, school garden, health education. Some of these career options may require more than the certificate and two years of college study. Classes beyond the associate degree may be required to fulfill some career options or for preparation for transfer to a university program.

Nutrition (NUTRI)

NUTRI 300 Nutrition

Units: 3
Hours: 54 hours LEC
Prerequisite: None.
Transferable: CSU; UC
General Education: AA/AS Area III(b); CSU Area E1
C-ID: C-ID NUTR 110
Catalog Date: June 1, 2020

This course studies the basic science of human nutrition and its application to health and chronic diseases. It examines the sources and functions of micro- and macronutrients nutrients, including digestion, absorption, and transportation. Emphasis is placed on the health implications associated with dietary patterns, phytonutrient intake, consumption of whole foods, the impact of processing, and consequences of under and overconsumption. The course will also include topics such as nutrition as a world and consumer problem, weight loss, sports nutrition, food safety, and the diet-disease relationship, among others. An evaluation of personal dietary habits using current dietary guidelines and nutritional assessment methods will be completed to help students assess their own nutritional health.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO 1: Demonstrate independent learning and effective communication skills.
- Demonstrate independent learning by attending or logging in to class regularly.
- Utilize time management effectively and prioritize tasks to meet deadlines.
- Demonstrate effective communication (orally and/or in writing).
- SLO 2: Explain the principles of nutrition and their effects on health.
- Explain the science of nutrition and scientific research.
- Explain the process of digestion and absorption involved for each of the nutrients.
- Identify the disease(s) associated with nutrient deficiencies and toxicities.
- Compare and understand the nutrient, caloric, and food requirements at the various stages of the life cycle.
- Examine the role of food in the promotion of a healthy lifestyle.
- Examine the roles of food technology and environment issues related to food.
- SLO 3: Demonstrate fundamental understanding of health behaviors on nutrition and health status.
- Analyze and evaluate personal dietary intake and review food compositions.
- Examine the relationship of dietary intake to weight management, sports performance, chronic diseases, and global nutrition (hunger).
This course studies the science of plant-based nutrition and its application to health promotion, chronic disease reduction and the sustainability of the environment. It examines the sources and functions of micro- and macronutrients in plant foods and how the body digests, absorbs, transports and stores them. Emphasis is placed on the health implications associated with the standard American dietary intake, phytonutrient intake, whole foods/plant foods consumption, the impact of processing, and consequences of under and overconsumption. The course will also include topics on how plant-based nutrition significantly reduces the ecological footprint, how food choice can influence public policy, weight loss, food safety, and the diet-disease relationship, among others. An evaluation of personal dietary habits using current dietary guidelines and nutritional assessment methods will be completed to help students assess their own plant-based nutritional health.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO 1: Demonstrate independent learning and effective communication skills.
- Demonstrate responsibility for personal actions and choices.
- Communicate effectively both orally and in writing.
- SLO 2: Explain the principles of nutrition and its effect on health.
- Relate the dietary causes of chronic diseases.
- Evaluate the role of plant-based foods on individual health and the environment.
- SLO 3: Demonstrate a fundamental understanding of health behaviors on nutritional and health status.
- Schematize the effects of personal food choice on health, the environment and public policy.

This course compares various western and non-western culture food customs and patterns including their social, religious, economic and aesthetic significance. The nutritional status of various cultures as it relates to geographic agricultural and socioeconomic factors will be explored. Ethnocentrism, gender-related stereotypes, and racism as they relate to the availability, distribution, and preparation of food throughout the world will also be compared.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO 1: Demonstrate independent learning and effective communication skills.
- demonstrate independent learning by attending or logging in to class regularly
- utilize time management effectively and prioritizes tasks to meet deadline
- demonstrate effective oral and written communication
- SLO 2: Demonstrate fundamental understanding of health behaviors on nutritional and health status
- analyze ethnicity, ethnocentrism, and racism and their impact on American food habits
- analyze the impact of food-related stereotypes
• compare traditional food habits of other cultures with contemporary food habits of Americans
• explain the sociocultural and ethnic food consumption issues and trends
• explain the influence of socioeconomic, cultural, and psychological factors on food and nutrition behavior
• examine the significant aspects of various cultures, their contributions, and influences on American food preference and consumption
• describe the traditional food habits, common foods, meal patterns, special occasion foods, food taboos, and the role of food from various regions of the world
• analyze similarities and differences in the nutritional contributions from comparative ethnic foods
• list the common foods in each culture studied
• identify food patterns as related to religious practices, cultural customs, psychological and family structures, and health beliefs
• analyze the distribution and availability of food based on ethnocentrism, gender-related issues and racism
• demonstrate personal methods of cultural tolerance by examining various cultures

NUTRI 322 Nutrition Issues Throughout Life

Units: 3
Hours: 54 hours LEC
Prerequisite: NUTRI 300 with a grade of “C” or better
Advisory: LIBR 318
Transferable: CSU
General Education: AA/AS Area III(b)
Catalog Date: June 1, 2020

This course is a study of the nutritive needs of persons at various stages of the lifecycle with emphasis on special periods such as pregnancy, preschool, adolescence and aging. This course may be helpful for Kinesiology and Early Childhood Education students as well as those working with people in social agencies, such as nursing and gerontology, seeking an understanding of the nutritional changes and requirements through the different stages of life.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

• SLO 1: Demonstrate independent learning and effective communication skills
  - Demonstrate independent learning by attending or logging in to class regularly.
  - Utilize time management effectively and prioritizes tasks to meet deadlines.
  - Demonstrate effective oral and in written communication.

• SLO 2: Explain the principles of nutrition and its effect on health
  - Analyze the effect of nutrition on the outcome of pregnancy for both the mother and the child.
  - Examine the nutrition needs of low and high-risk pregnancies.
  - Evaluate the nutrient needs of healthy persons at various stages of life.

• SLO 3: Demonstrate a fundamental understanding of health behaviors on nutritional and health status
  - Examine how nutrient needs can be satisfied under normal conditions at each stage of development.
  - Inspect the nutrition support programs and the role of the nutrition professional in promoting nutrition and health.
  - Distinguish the role of nutrition on growth and development as well as health in children, pregnancy, and elderly.

• SLO 4: Interpret current nutrition research
  - Formulate a nutritional care plan to promote health during pregnancy, lactation, infancy, childhood, adolescence, adulthood, and elderly years.
  - Analyze research articles and summarize findings in essays.
NUTRI 331 Plant-Based Food Principles and Preparation

This course provides a comprehensive study of plant-based food ingredients and the basic principles and techniques involved in plant-based food preparation. Students will examine the factors that influence taste and the changes that occur in foods during preparation. In the laboratory, basic cooking skills and theoretical applications will be emphasized. Additionally, importance is placed on the reasons for recipe procedures and the prevention and correction of cooking failures.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO 1: Demonstrate independent learning and effective communication skills.
- Demonstrate responsibility for personal actions and choices.
- Communicate effectively both orally and in writing.
- SLO 2: Effectively and accurately prepare and analyze raw ingredients and prepared foods.
- Evaluate food through sensory evaluation of texture, taste, color, presentation, smell.
- Identify optimal cooking procedures/heat transfer to maximize nutrient content as well as the quality of the ingredients and dish as a whole.
- Analyze quality defects in cooked products and specify possible errors in techniques or ingredient selection.
- SLO 3: Implement proper sanitary and safety techniques.
- Demonstrate appropriate food handling and sanitary techniques.
- Utilize kitchen tools/equipment appropriately.

NUTRI 340 Nutrition and Metabolism

This course examines the chemical structure and metabolism of carbohydrate, lipids, and proteins. Emphasis is placed on the biological roles of vitamins and minerals, metabolic pathways and its relation to overall health. In addition, this course will help the student integrate the understanding of metabolic knowledge to contemporary and controversial issues in nutrition.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO 1: Demonstrate independent learning and effective communication skills.
- demonstrate independent learning by attending or logging in to class regularly
- utilize time management effectively and prioritizes tasks to meet deadlines
- demonstrate effective oral and written communication
- SLO 2: Explain the principles of nutrition and its effect on health
- analyze the biological role of various nutrients in the body
- analyze and examine nutrition and metabolism at the physiological level
- relate the deficiency and toxicity conditions to the vitamin and minerals
• examine the role and the metabolic processes of the macronutrients
• evaluate the type of nutrients and how nutrients are used for energy during exercise and activity
• analyze the role of complementary and alternative nutrition and dietary supplements
• SLO 3: Interpret current nutrition research.
• examine the appropriate use and interpretation of the current dietary guidelines and recommendations
• integrate scientific knowledge and relate it to current nutrition issues
• compose a written essay on a current nutrition issue

NUTRI 350 Community Nutrition

This course studies the theory, concepts, and philosophy affecting nutrition education and services in the community. Students will be introduced to programs, policies, and institutions that influence nutrition services at local, state and national levels throughout the lifespan, with special emphasis on infants and children as well as the elderly. Students will learn about epidemiology and its application in nutrition research and explore examples of how a variety of teaching methods can improve the nutritional status in a community and with various population groups.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

• SLO 1: Demonstrate independent learning and effective communication skills.
  • demonstrate independent learning by attending or logging in to class regularly
  • utilize time management effectively and prioritizes tasks to meet deadlines
  • demonstrate effective oral and written communication

• SLO 2: Demonstrate a fundamental understanding of health behaviors on nutritional and health status
  • examine the factors involved in nutrition-related deficiencies
  • appraise the public policy role in community nutrition and other health programs
  • demonstrate knowledge of educational material development
  • demonstrate knowledge of economic and public policy issues related to nutrition, food availability, and nutrition behaviors
  • identify educational needs of diverse populations
  • analyze general health assessment and application of health promotion and disease prevention

• SLO 3: Interpret current nutrition research
  • assess the nutrition-related problems which exist and the services available for helping to prevent or assist those problems in the community
  • examine materials and techniques for working in or with various community groups
  • demonstrate knowledge of a needs assessment
  • demonstrate knowledge of program planning, monitoring, and evaluation

NUTRI 370 Food Service Management
The course will study the organization, planning, and control of production for a quantity food service operation. This course also examines the process and importance of food service functions such as leadership, human resource management and employee inservice training, menu planning and pricing, scheduling of staff and production, portion and temperature control, recipe standardization and scaling, basic tenants of food and equipment safety and sanitation, and elements of culinary layout and design.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO 1: Demonstrate independent learning and effective communication skills.
  - demonstrate independent learning by attending or logging in to class regularly
  - utilize time management effectively and prioritize tasks to meet deadlines
  - demonstrate effective communication (orally and/or in writing)

- SLO 2: Demonstrate a fundamental understanding of food service management function.
  - analyze scheduling requirements for food production and staffing efficiently
  - calculate menu item costs and calculate selling prices
  - distinguish principles of good menu writing practice
  - explain methods of controlling portion size
  - discuss the factors affecting volume and sales mix forecasting
  - calculate standardize recipes and accurately scale recipes for specific operational needs
  - calculate quantities of food to order and to produce for specified operations
  - discuss factors involved in planning efficient facility layout and equipment purchases
  - SLO 3: Compare the effectiveness of various management styles
  - identify management styles

NUTRI 495 Independent Studies in Nutrition and Foods

An independent studies project involves an individual student or small group of students in study, research, or activities beyond the scope of regularly offered courses. See the current catalog section of "Special Studies" for full details of Independent Studies.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO #1: Actively engage in intellectual inquiry beyond that required in order to pass a course of study (College Wide Learning Outcome – Area 4).
  - Discuss and outline a proposal of study (that can be accomplished within one semester term) with a supervising instructor qualified within the discipline.
  - Design an independent study (to be completed individually or by collaboration of a small group) to foster special knowledge, skills, and experience that are not available in any one regularly scheduled course.
  - Use information resources to gather discipline-specific information.

- SLO #2: Utilize modes of analysis and critical thinking to apply theoretical perspectives and/or concepts in the major discipline of study to significant problems and/or educational activities (College Wide Learning Outcome – Area 3).
- Analyze and apply the knowledge, skills and experience that are involved in the independent study to theoretical perspectives and/or concepts in the major discipline of study.

- Explain the importance of the major discipline of study in the broader picture of society.

- SLO #3: Communicate a complex understanding of content matter of the major discipline of study (College Wide Outcome – Area 3).

- Demonstrate competence in the skills essential to mastery of the major discipline of study that are necessary to accomplish the independent study.

- SLO #4: Identify personal goals and pursue these goals effectively (College Wide Outcome – Area 4).

- Utilize skills from the “academic tool kit” including time management, study skills, etc., to accomplish the independent study within one semester term.
Pharmacy Technology  
| Cosumnes River College

The CRC Pharmacy Technology Program includes didactic, laboratory, and practicum components that are structured to facilitate the achievement of educational and career goals. Pharmacy technicians are skilled technical health workers who perform a wide variety of pharmacy related tasks under the direct supervision of a registered pharmacist. Successful completion of the program not only qualifies students for registration with the California State Board of Pharmacy but also prepares graduates for entry-level pharmacy technician positions. The program is accredited by the American Society of Health-System Pharmacists.

**Dean**  
Collin Pregliasco

### Associate Degree

#### A.S. in Pharmacy Technology

The CRC Pharmacy Technology Program includes didactic, laboratory, and practicum components that are structured to facilitate the achievement of educational and career goals. Pharmacy technicians are skilled technical health workers who perform a wide variety of pharmacy related tasks under the direct supervision of a registered pharmacist. Successful completion of the program not only prepares graduates to participate in taking the Pharmacy Technician Certification Exam (PTCE) but also qualifies students for licensure and registration with the California State Board of Pharmacy and be employed as entry-level pharmacy technician. The program has obtained a 6 year Accreditation Status conferred by the American Society of Health System Pharmacists (ASHP) and the Accreditation Council of Pharmaceutical Education (ACPE).

**Catalog Date:** June 1, 2020

^1Course can be taken prior to admission into the Pharmacy Technology Program.

^2Course can be taken prior to admission into the Pharmacy Technology Program.

The Pharmacy Technology Associate in Science (A.S.) degree may be obtained by completion of the required program, plus general education requirements, plus sufficient electives to meet a 60-unit total. See CRC graduation requirements.

Enrollment Eligibility

To be eligible for enrollment in the program, the student must meet the following criteria:

- The American Society of Health System Pharmacists requires that all students in the program must have a high school diploma or G.E.D.

- Students may enter PHARM 300 and AH 120 without formal acceptance into the Pharmacy Technology Program, however in order to qualify for official acceptance into the Pharmacy Technology Program, and proceed forward to complete the hands-on laboratory training (PHARM 350, 360, 380) and externship training (PHARM 410, 420), students must complete the following prerequisite courses with a grade of a C or higher: AH 120 (corequisites BIOL 102 & AH 110), PHARM 300, PHARM 315 and PHARM 320.

- The American Society of Health System Pharmacists requires that all students must be successful in passing a Background Check prior to official acceptance into the Pharmacy Technology Training Program.

Enrollment Process

Eligible students are selected for the program according to the following steps:

- Students should complete all the prerequisite courses with a C grade or better to meet the minimum requirement for acceptance to the Pharmacy Technology Program.

- Qualified students should submit an Application Form electronically and a hard copy to the Pharmacy Technology Program Director after gaining instructor permission for enrollment in the Pharm 315 & 320 classes. Students will be formally notified by a Letter of Acceptance to the Pharmacy Technology Program. Applications will be made available in the Careers and Technology area office.

Student Learning Outcomes

Upon completion of this program, the student will be able to:

- PSLO 1: Application of the federal, state, and local laws; regulations and professional standards to pharmacy practice.

- PSLO 2: Analysis of the role of the Pharmacy Technician in distributive pharmacy.

- PSLO 3: Demonstrate the comprehension of knowledge pertaining to human anatomy, physiology, and pharmacology.

- PSLO 4: Perform math function, dosage calculation and compounding techniques.

- PSLO 5: Demonstrate ethical and professional conduct in all job-related activities.

- PSLO 6: Design and relate messages for effective and appropriate oral and written communication.

Career Information

Businesses that will make up the potential market for CRC’s Pharmacy Technician graduates include hospitals; pharmacies/drug stores; grocery stores; department stores; state government; local government; and other general merchandise stores in the region. Retail pharmacies are expected to experience the largest growth in pharmacy technician jobs over the next ten years and will most likely benefit the most from a Pharmacy Technician degree program in the region.
PHARM 300 Introduction to Pharmacy Practice

This course introduces the concepts of direct pharmaceutical patient care and the technicians’ role in its delivery. Current direct patient care delivery system and medication distribution systems are emphasized. Topics include dosage calculations, the influence that medication laws, standards and regulations have on practice, and quality assurance in the pharmaceutical setting.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO 1: Understand the role of the Pharmacy Technician in collecting, organizing, evaluating, distributing and storing pharmaceutical goods or services for direct pharmaceutical therapy.
- Explain "direct patient care" and how it is delivered in the various care settings.
- Describe the various systems used to distribute medications.
- Explain the technician’s role in preventing and detecting medication errors.
- SLO 2: Understand the federal, state, and local laws; regulations and professional standards related to pharmacy practice.
- Describe how state laws and regulations determine the role and scope of practice for the pharmacy technician.
- Describe quality assurance methods in pharmacy.
- Describe the role of the Food and Drug Administration in regulating herbal and dietary supplements.
- SLO 3: Perform math operations, dosage calculations and compounding techniques.
- Explain the pharmacy technician activities associated with measuring, preparation and packaging of medications.

PHARM 315 Pharmaceutical Calculations

This course presents the mathematical concepts and practical experience required for students to pass the math portion of the Pharmacy Technician Certification Examination. Through lecture demonstrations and practice problem sets, students will learn the skills essential for calculating and preparing pharmaceutical dosages in both community and institutional pharmacy settings.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO 1: Understand and perform mathematical calculation methods necessary for daily operational duties in a community or institutional pharmacy.
  a) Determine and validate accurately the drug amount & percentage strength of active ingredient(s) for a given extemporaneous or sterile compounding prescription.
  b) Interpret a given prescription to calculate accurately the dosage amount needed, and conversion of metric system to common household measurement units in the daily processing of a prescription.
  c) Calculate price, profit and discount, and perform other financial calculations relating to insurance reimbursement and business operation of a pharmacy.
- SLO 2: Solve equations and inequalities which come from applied problems and critical thinking.
a) Interpret accurately from a given word problem (situational) and translate to a mathematical equation to obtain an unknown from the given known variables.

b) Understand the use of the principles of ratio, proportionality and dimensional analysis as a method to derive an answer for the unknown in a given problem.

SLO 3: Perform special calculations in compounding which involve admixtures of various concentrations and dilutions.

a) Perform alligation method of determining portions of stock preparations to compound a prescribed percentage strength of a pharmaceutical product not available commercially.

b) Determine accurately the least measurable quantity and aliquot measurements in compounding admixtures of a prescription solution or suspension.

PHARM 320 Pharmacology of Therapeutic Agents

This course studies the anatomy and physiology of the various human body systems. Students will learn the use and side effects of prescription medications, nonprescription medications, and alternative therapies commonly used to treat diseases affecting the nervous, musculoskeletal, immune, dermatological, hematologic cardiovascular, respiratory, reproductive, gastrointestinal, renal system as well as the eye, ear, nose and throat. This course covers brand and generic names of the therapeutic agents studied, standard pronunciation, dosage forms, routes of administration, medical abbreviation and the role of the Food and Drug Administration in herbal and dietary supplements. The laboratory activities are designed to provide hands-on experiences in pharmacy calculation and compounding medications related to the various body systems.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO 1: Demonstrate knowledge in federal, state, and local laws; regulations; and professional standards.
- Explain the role of the Food and Drug Administration.
- Describe how state laws and regulations determine the role and scope of practice for the pharmacy technician.
- Describe quality assurance methods in pharmacy.
- SLO 2: Demonstrate knowledge of human anatomy and physiology and pharmacology.
- State the definitions of medical terms commonly used in the range of patient care setting.
- Describe the basic anatomy of the nervous, skeletal, muscular immune, endocrine, dermatological, and hematologic system.
- Describe the application of pharmaceuticals in treating conditions of the various body systems.
- Determine the dosage forms of prescription and non-prescription medications commonly used to treat diseases of the various body systems.
- SLO 3: Perform math operations, dosage calculations and compounding techniques.
- Calculate the proper dose and strength for compounding medications.
- Demonstrate proper compounding techniques.
- Demonstrate proper preparation and labeling of repackaged medications.
- Accurately calculate expiration date for medications.
- Accurately measure out various forms of medication.
- Demonstrate proper use of lab equipments.
- Demonstrate accurate record keeping.
This course reviews how state laws and regulations determine the activities associated with the collection of patient-specific information by the pharmacy technician. Students learn to secure information from the medical chart, record, patient profile, patient, caregiver, database and health care professional. Technologies used for storing, accessing and recording pharmacy data and proper methods for receiving and authenticating prescription orders are emphasized. Students will also learn safety in medication use and monitoring program of medication therapy and the pharmacy technician’s role in the prevention and reporting of medication misadventures. The lab provides hands-on experience with pharmacy distribution software, technology, and prescription processing.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO 1: Analyze the role of the Pharmacy Technician in distributive pharmacy.
- Efficiently secure the prescribe medication or devices from inventory.
- Efficiently and accurately collect pertinent information for use by the pharmacist.
- Identify the need for a referral to pharmacist.
- Accurately create a new patient profile to an established procedure.
- SLO 2: Demonstrate knowledge in federal, state, and local laws; regulations; and professional standards.
- Demonstrate appropriate collection of patient information.
- Apply established laws and protocols to select the appropriate product.
- Apply established protocol to assemble appropriate patient information materials.
- Apply established policies and procedures for recording the preparation of pharmaceutical products.
- SLO 3: Design and relate messages for effective and appropriate oral and written communication.
- Communicate effectively orally and in writing.
- Effectively utilize credible resources.
- Demonstrate skills in the use of technology and internet.

This course reviews the process of pharmaceutical purchasing and acquisitions in the retail settings and in emergency situations. Students will learn inventory control including handling of receipts, storage, removal, and documentation. Other topics include: methods of distribution with emphasis on computer database maintenance and the state laws that govern these activities, billing, collection of payment, third-party payment, and the technician’s role in the assisting the PharmD in immunization administration. The lab will provide hands-on experience in a simulated retail environment.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO 1: Collect, organize, and evaluate pharmaceutical goods or services for direct patient care, medication use review, or pharmaceutical therapy.
- Process the correct medication, equipment, device, or supplies to the correct patient or patient’s representative.
- Monitor utilization of medications to assure that use is congruent with the prescription order for the patient.
PHARM 380 Preparation of Pharmaceutical Products

Units: 3
Hours: 27 hours LEC; 81 hours LAB
Prerequisite: PHARM 300 with a grade of "C" or better
Corequisite: PHARM 370
Transferable: CSU
Catalog Date: June 1, 2020

This course presents the methods of preparing non-compounded, compounded, non-sterile, and sterile products for distribution. Students will learn the state laws and regulations that determine the role of a pharmacy technician in measuring, preparing, packaging, and storing of medications. Medication preparation, profiling, calculation, measuring, safety, labeling and quality assurance procedures will be emphasized.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO 1: Understand the role of the Pharmacy Technician in distributive pharmacy.
- Secure the prescribed medications or devices from inventory.
- Complete dosage forms as specified by the prescription order.
- Apply safety policies and procedures in the preparation and packaging of all medications.
- Apply safety policies and procedures in the disposal of all hazardous and non-hazardous wastes generated during medication preparation.
- Apply established procedures to generate accurate and complete product labels.
- Apply manufacturer’s recommendation and/or pharmacy’s guidelines for storage of all medications prior to distribution.
- Compound non-sterile products.
- Compound sterile products.
- Compound cytotoxic and other hazardous medication products.
- SLO 2: Understand the federal, state, and local laws; regulations and professional standards related to pharmacy practice.
• Explain how state laws and regulations determine what activities associated with preparing medications for distribution can be delegated to the technicians.

• Apply established laws and protocols to select the appropriate product.

• Apply protocol to assemble appropriate patient information materials.

• Apply established policies and procedures for recording the preparation of bulk, unit dose, special doses of medications for immediate or in anticipation of future use.

• Apply established policies and procedures for recording the preparation of controlled substances.

• Assess the correctness of medications produced by other technicians.

• SLO 3: Perform math operations, dosage calculations and compounding techniques

• Clean laminar flow biological safety cabinets appropriately.

• Calibrate device, compounder or pump appropriately.

• Apply manufacturer’s guidelines in trouble-shooting, maintaining, and repairing electronic devices used by the pharmacy in the preparation and dispensing of medications.

PHARM 400 Pharmacy Technician Profession

Student Learning Outcomes

Upon completion of this course, the student will be able to:

• SLO 1: Collect, organize, and evaluate pharmaceutical goods or services for direct patient care, medication use review, or pharmaceutical therapy.

• Discuss the responsibility of a Pharmacy Technician for improving direct patient care.

• Explain the concept of workflow management.

• SLO 2: Demonstrate ethical and professional conduct in all job-related activities.

• Define ethics and compare it with laws.

• Explain ethical codes that pertain to the work function of pharmacists.

• Discuss appropriate and professional appearance.

• Apply personal self-control and professional decorum.

• Explain the necessity and methods for technicians to stay current with advances in pharmacy practices.

• Devise an effective plan for minimizing stress and balancing professional and personal obligations.

• Explain the benefits and the principles of change management.

• Explain the benefits of obtaining technician certification.

• Explain the process by which pharmacy technicians can become certified.

• SLO 3: Design and relate messages for effective and appropriate oral and written communication.

• Use effective negotiation skills to resolve conflicts.

• Demonstrate consistent use of a systematic approach to problem solving and consensus building.

• Use effective interpersonal skills to manage working relationships.
PHARM 410 Acute Care Practicum

This course develops practical skills in the didactic and practicum phases of pharmacy technician training in the acute and home care environment. Acute care includes hospital and/or long-term care facilities. Home care includes exposure to infusion therapy. The clinical experience is performed under professional supervision. A preceptor (Licensed Pharmacist or Certified Pharmacy Technician) evaluates the student’s performance at the site. Students will directly interact with clients and other health care professionals. Students must have a TB clearance and any other immunization required by the clinical facility. Students must have an established Agency Agreement on file with the faculty with a sponsoring site prior to the beginning of the first day of class. Contact the Careers and Technology Main Office for information about the Agency Agreement.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO 1: Collect, organize, and evaluate pharmaceutical goods or services for direct patient care, medication use review, or pharmaceutical therapy.
- Collect pertinent patient information for use by the pharmacist.
- Receive and process prescription/medication orders.
- SLO 2: Analyze the role of the Pharmacy Technician in distributive pharmacy.
- Apply established policies and procedures for purchasing pharmaceuticals, devices, and supplies.
- Apply established policies and procedures for removing expired, discontinued, recalled items, and/or pharmaceuticals from inventory.
- Apply established policies and procedures for documenting repackaging items or pharmaceuticals.
- SLO 3: Demonstrate knowledge in federal, state, and local laws; regulations; and professional standards.
- Apply established policies/procedures for monitoring the practice site and/or service area for compliance with federal, state, local laws, regulations and professional standards.
- Apply the principles of quality assurance to all technician activities.
- SLO 4: Demonstrate knowledge of human anatomy and physiology and pharmacology.
- Monitor utilization of medications to assure that use is congruent with the prescription.
- Identify potential for adverse medical event and participate in the formulation of a strategy for prevention.
- SLO 5: Perform math calculations, dosage calculations and compounding techniques.
- Calibrate the weighing or counting device, compounder or pump accurately.
- Maintain, troubleshoot, and use electronic devices appropriately.
- Perform selected monitoring procedures (finger-stick, cholesterol screening, blood pressure, pulse).
- SLO 6: Demonstrate ethical and professional conduct in all job-related activities.
- Act ethically in the conduct of all job-related activities.
- Consistently maintain personal self-control and professional decorum.
- Observe legal and ethical guidelines for safeguarding the confidentiality of patient information.
- SLO 7: Design and relate messages for effective and appropriate oral and written communication.
- Organize all written or oral communication in a logical manner and pronounce technical terms correctly.
- Address all communication on the level appropriate for the audience.
- Demonstrate skills in the use of computer, word processing, computerized medication information databases, and internet.
PHARM 420 Retail Practicum

This course develops the practical skills for pharmacy technicians in a community/retail environment. The clinical experience is performed under professional supervision. A preceptor (Licensed Pharmacist or Certified Pharmacy Technician) evaluates the student's performance at the site. Students will directly interact with clients and other health care professionals. Students must have a TB clearance and any other immunization required by the clinical facility. Students must have an established Agency Agreement with a sponsoring site on file with the faculty prior to the beginning of the first day of class. Contact the Careers and Technology Main Office for information about the Agency Agreement.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- **SLO 1:** Collect, organize, and evaluate pharmaceutical goods or services for direct patient care, medication use review, or pharmaceutical therapy.
  - Collect pertinent patient information for use by the pharmacist.
  - Receive and process prescription/medication orders.
- **SLO 2:** Analyze the role of the Pharmacy Technician in distributive pharmacy.
  - Determine payment due for medication orders.
  - Demonstrate sensitivity to patient's concern regarding third party payment coverage and further actions to be taken.
  - Record the receipt of payment for pharmaceutical goods and services.
  - Apply established policies and procedures for purchasing pharmaceuticals, devices, and supplies.
  - Apply established policies and procedures for removing expired, discontinued, recalled items, and/or pharmaceuticals from inventory.
  - Apply established policies and procedures for documenting repackaging items or pharmaceuticals.
- **SLO 3:** Demonstrate knowledge in federal, state, and local laws; regulations; and professional standards.
  - Apply the principles of quality assurance to all technician activities.
  - **SLO 4:** Demonstrate knowledge of human anatomy and physiology and pharmacology.
  - Monitor utilization of medications to assure that use is congruent with the prescription.
  - Identify potential for adverse medical event and participate in the formulation of a strategy for prevention.
  - **SLO 5:** Perform math calculations, dosage calculations and compounding techniques
  - Calibrate the weighing or counting device, compounder or pump accurately.
  - Maintain, troubleshoot, and use electronic devices appropriately.
  - Perform selected monitoring procedures (finger-stick, cholesterol screening, blood pressure, pulse).
- **SLO 6:** Demonstrate ethical and professional conduct in all job-related activities
  - Act ethically in the conduct of all job-related activities
  - Consistently maintain personal self-control and professional decorum
  - Observe legal and ethical guidelines for safeguarding the confidentiality of patient information
- **SLO 7:** Design and relate messages for effective and appropriate oral and written communication.
  - Organize all written or oral communication in a logical manner and pronounce technical terms correctly.
  - Address all communication on the level appropriate for the audience.
  - Demonstrate skills in the use of computer, word processing, computerized medication information databases, and internet.
Philosophy | Cosumnes River College

Philosophy is the logical examination of fundamental issues regarding the nature and limits of human knowledge, ultimate reality, moral value and obligation, correct reasoning, beauty, and art. Students of philosophy learn to generate, understand, and evaluate arguments, express themselves clearly and carefully, and see things from multiple points of view.

Dean

 (916) 691-7142
 WilliaL3@crc.losrios.edu

Philosophy (PHIL)

PHIL 300 Introduction to Philosophy

Units: 3
Hours: 54 hours LEC
Prerequisites: None.
Transferable: CSU; UC
General Education: AA/AS Area II(b); CSU Area A3; CSU Area C2; IGETC Area 3B
C-ID: C-ID PHIL 100
Catalog Date: June 1, 2020

In this course, students will apply the critical thinking techniques of analysis, evaluation, and synthesis to areas of philosophical inquiry including meta-philosophy, epistemology, metaphysics, ethics, political philosophy, philosophy of religion, history of philosophy, and existentialism. Students will practice distinguishing fact from opinion, employing inductive and deductive reasoning, identifying logical errors and fallacies, and developing oral and written arguments to support their own philosophical perspectives or challenge the perspectives of others. The quality and quantity of the course's required writing will reflect the standards of a second semester composition course.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO #1: Identify important questions and conceptions within a range of traditional subfields of Philosophy (Epistemology, Metaphysics, Logic, Ethics, and Aesthetics), distinguish from among divergent interpretations those that are better supported and those that are less well supported, construct well supported interpretations of diverse viewpoints and reason well about written and oral discourse.

- Objective 1a: Evaluate information concerning central issues within a range of traditional subfields of Philosophy for quality, validity and bias to determine if it is objective and reliable.

- Objective 1b: Evaluate the relationship of language to logic and analyze, criticize and rationally justify points of view concerning central issues within a range of traditional subfields of Philosophy.

- SLO #2: Reason inductively and deductively, reach conclusions concerning central issues within a range of traditional subfields of Philosophy based on sound or cogent inferences drawn from unambiguous statements of knowledge or belief.

- Objective 2a: Distinguish fact from non-factual judgment, belief from knowledge and fallacious reasoning from correct (invalid or weak) reasoning in respect to central issues within a range of traditional subfields of Philosophy.

PHIL 304 Introduction to Asian Philosophy
This course provides an introduction to the philosophical traditions of Hinduism, Buddhism, Taoism and Confucianism focusing on metaphysics, epistemology, and ethics.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- Identify important questions and conceptions within a range of traditional subfields of Philosophy (Epistemology, Metaphysics, Logic, Ethics, and Aesthetics) as they are addressed within a range of classical Asian philosophical traditions (Hindu, Confucian, Taoist, Buddhist), distinguish from among divergent interpretations those that are better supported and those that are less well supported, construct well supported interpretations of diverse viewpoints and reason well about written and oral discourse (SLO1, PSLO1).

- Evaluate information concerning central issues within a range of traditional sub-fields of Philosophy as they are addressed within a range of classical Asian philosophical traditions for quality, validity and bias to determine if it is objective and reliable.

- Evaluate the relationship of language to logic and analyze, criticize and rationally justify points of view concerning central issues within a range of traditional sub-fields of Philosophy as they are addressed within a range of classical Asian philosophical traditions.

- Reason inductively and deductively, reach conclusions concerning central issues within a range of traditional sub-fields of Philosophy as they are addressed within a range of classical Asian philosophical traditions based on sound or cogent inferences drawn from unambiguous statements of knowledge or belief.

- Distinguish fact from non-factual judgment, belief from knowledge and fallacious reasoning from correct (invalid or weak) reasoning in respect to central issues within a range of traditional sub-fields of Philosophy as they are addressed within a range of classical Asian philosophical traditions.

- Distinguish between philosophy and religion, philosophical views and religious views.

- Demonstrate the ability to engage in ethical reasoning necessary to exercise responsibility as an ethical individual, professional, local, and global citizen (SLO2, PSLO3).

- Apply ethical reasoning skills to ethical issues addressed within a range of classical Asian philosophical traditions and work toward a personal resolution of ethical issues.

- Express an appreciation of ethical principles addressed within a range of classical Asian philosophical traditions as applied to personal and civic choices.

- Realize and apply the responsibility to use knowledge wisely.

PHIL 310 Introduction to Ethics

The application of theories developed by traditional and contemporary moral philosophy to the ethical problems, dilemmas, and issues of today.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO #1: identify important questions and conceptions within Ethics, distinguish from among divergent interpretations those that are better supported and those that are less well supported, construct well supported interpretations of diverse viewpoints and reason well about written and oral discourse.

- Objective 1a: evaluate information concerning central issues within Ethics for quality, validity and bias to determine if it is objective and reliable.
Objective 1b: evaluate the relationship of language to logic and analyze, criticize and rationally justify points of view concerning ethical issues.

SLO #2: reason inductively and deductively concerning ethical issues, reach conclusions about ethical issues based on sound or cogent inferences drawn from unambiguous statements of knowledge of belief.

Objective 2a: distinguish fact from non-factual judgment concerning ethical issues, belief from knowledge and fallacious reasoning from correct (invalid or weak) reasoning concerning ethical issues.

Objective 2b: apply ethical reasoning skills to ethical issues and work toward a personal resolution of ethical issues.

SLO #3 (PSLO #3): demonstrate the ability to engage unethical reasoning necessary to exercise responsibility as an ethical individual, professional, local, and global citizen.

Objective 3a: show an appreciation of ethical principles as applied to personal and civic choices.

PHIL 315 Contemporary Moral Issues

Units: 3
Hours: 54 hours LEC
Prerequisite: None.
Advisory: Eligibility for ENGWR 300.
Transferable: CSU
Catalog Date: June 1, 2020

This course investigates some of the moral issues our society presently faces. These issues may include abortion, euthanasia, genetic engineering, individual liberty and the collective good, sexuality/gender and society, war and terrorism, capital punishment, hunger/poverty and moral obligation, discrimination, and affirmative action.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO #1: Critically evaluate views concerning abortion, euthanasia, capital punishment, or other topics addressed in the course.
- SLO #2: Compare and contrast differing theories concerning abortion, euthanasia, capital punishment, or other topics addressed in the course.
- SLO #3: Analyze and evaluate arguments from primary sources concerning abortion, euthanasia, capital punishment, or other topics addressed in the course.
- Assess presuppositions underlying various views concerning abortion, euthanasia, capital punishment, or other topics addressed in the course.
- SLO #4: Formulate reasons to justify one's beliefs concerning abortion, euthanasia, capital punishment, or other topics addressed in the course.

PHIL 320 Logic and Critical Reasoning

Units: 3
Hours: 54 hours LEC
Prerequisite: None.
Transferable: CSU; UC
General Education: AA/AS Area II(b); CSU Area A3
Catalog Date: June 1, 2020

This course is an introduction to basic principles and frameworks of logic and critical thinking appropriately used in argument analysis: deduction, induction, fallacy recognition. Emphasis on developing analytical skills and applying principles of good reasoning to the arguments encountered in life. Argument topics from academic fields and textbooks, the electronic and print media, advertisements, politics and ethics may be considered. The quality and quantity of the course's required writing will reflect the standards of a second semester composition course.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO #1: Identify important questions and conceptions, distinguish from among divergent interpretations those that are better supported and those that are less well supported; construct well supported interpretations of diverse viewpoints; and reason well about written and oral discourse.
Evaluate information concerning central issues for quality, validity and bias to determine if it is objective and reliable.

Evaluate the relationship of language to logic and analyze, criticize and rationally justify points of view.

Reason inductively and deductively, reach conclusions based on sound or cogent inferences drawn from unambiguous statements of knowledge or belief.

Distinguish fact from non-factual judgment, belief from knowledge and fallacious reasoning from correct (invalid or weak) reasoning.

SLO #2: Access, synthesize and evaluate information using a variety of sources.

Utilize technological resources in order to explore and express information.

Determine the extent of information needed, evaluate the information and its sources critically, and ethically and legally apply gathered information to personal and community issues.

SLO #3: Demonstrate the ability to engage in ethical reasoning necessary to exercise responsibility as an ethical individual, professional, local, and global citizen.

Apply ethical reasoning skills to ethical issues and work toward a personal resolution of ethical issues.

Express an appreciation of ethical principles as applied to personal and civic choices.

Realize and apply the responsibility to use knowledge wisely.

PHIL 325 Symbolic Logic

This course introduces sentential and predicate logic by introducing logical symbolism, truth tables, methods of formal analysis and methods of formal proof including natural deduction. It is recommended for students in the sciences, computer programming, mathematics, linguistics, law, and philosophy.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- distinguish an argument from a description, explanation, or report.
- distinguish deductive from inductive arguments.
- recognize the logical form of an argument or argument type.
- symbolize arguments in the languages of propositional and predicate logic.
- evaluate the validity of arguments using truth tables.
- evaluate the consistency and equivalence of sets of sentences using truth tables.
- evaluate the validity of arguments using natural deduction.
- comprehend the distinction between semantic and syntactical methods of argument evaluation.

This course is a survey of the origin and development of Western (Anglo-European) Philosophy during the period of ancient Greece and Rome. This course may be required for the completion of a degree in philosophy and is especially recommended for all philosophy, history and humanities majors.
Student Learning Outcomes
Upon completion of this course, the student will be able to:

- SLO #1: Identify important questions and conceptions within the history of classical (or ancient) philosophy, distinguish from among divergent interpretations those that are better supported and those that are less well supported, construct well supported interpretations of diverse viewpoints and reason well about written and oral discourse.

- Objective 1a: Evaluate information concerning central issues within the history of classical philosophy for quality, validity and bias to determine if it is objective and reliable.

- Objective 1b: Evaluate the relationship of language to logic and analyze, criticize and rationally justify points of view concerning central issues within the history of classical philosophy in the context of reading ancient primary texts critically.

- SLO #2: Reason inductively and deductively, reach conclusions concerning central issues within the history of classical philosophy based on sound or cogent inferences drawn from unambiguous statements of knowledge or belief.

- Objective 2a: Distinguish fact from non-factual judgment, belief from knowledge and fallacious reasoning (invalid or weak) from correct reasoning in respect to central issues within the history of classical philosophy.

PHIL 331 History of Modern Philosophy

Units: 3
Hours: 54 hours LEC
Prerequisite: None.
Transferable: CSU; UC
General Education: AA/AS Area I; CSU Area C2; IGETC Area 3B
Catalog Date: June 1, 2020

This course is a survey of the development of Western (Anglo-European) Philosophy from the period of the Renaissance through the period of modern Europe and America. This course is especially recommended for all Philosophy, History and Humanities majors.

Student Learning Outcomes
Upon completion of this course, the student will be able to:

- SLO #1: Identify important questions and conceptions within the history of modern philosophy, distinguish from among divergent interpretations those that are better supported and those that are less well supported, construct well supported interpretations of diverse viewpoints and reason well about written and oral discourse.

- Objective 1a: Evaluate information concerning central issues within the history of modern philosophy for quality, validity and bias to determine if it is objective and reliable.

- Objective 1b: Evaluate the relationship of language to logic and analyze, criticize and rationally justify points of view concerning central issues within the history of modern philosophy in the context of reading primary texts critically.

- SLO #2: Reason inductively and deductively, reach conclusions concerning central issues within the history of modern philosophy based on sound or cogent inferences drawn from unambiguous statements of knowledge or belief.

- Objective 2a: Distinguish fact from non-factual judgment, belief from knowledge and fallacious reasoning (invalid or weak) from correct reasoning in respect to central issues within the history of modern philosophy.

PHIL 338 Contemporary Philosophy

Units: 3
Hours: 54 hours LEC
Prerequisite: None.
Transferable: CSU; UC
General Education: AA/AS Area I; CSU Area C2; IGETC Area 3B
Catalog Date: June 1, 2020

A comprehensive study of the basic ideas of pragmatists, twentieth century metaphysicians, philosophy of language, and existentialists. Special attention will be given to relevance of their ideas to modern life.

Student Learning Outcomes
Upon completion of this course, the student will be able to:
PHIL 350 Philosophy of Religion

This course is a historical and topical survey of the questions, problems, and theories philosophers have developed in attempts to understand religion as a fundamental impulse within human experience and as a major cultural force. Rather than survey the different religions, this course considers the basic philosophical beliefs and concepts that seem auxiliary to religion. Topics include the possibility of religious knowledge, faith versus reason, theistic arguments, conceptions of God, religious language, atheism, agnosticism, mysticism, the problem of evil, immortality, the challenge of science, and religion's influence on ethics and politics.

Upon completion of this course, the student will be able to:

- SLO #1: identify important questions and conceptions within Philosophy of Religion, distinguish from among divergent interpretations those that are better supported and those that are less well supported, construct well supported interpretations of diverse viewpoints and reason well about written and oral discourse.
- Objective 1a: evaluate information concerning central issues within Philosophy of Religion for quality and bias to determine if it is objective and reliable.
- Objective 1b: evaluate the relationship of language to logic and analyze, criticize and rationally justify points of view concerning central issues within Philosophy of Religion.
- SLO #2: reason inductively and deductively, reach conclusions concerning central issues within Philosophy of Religion based on sound or cogent inferences drawn from unambiguous statements of knowledge or belief.
- Objective 2a: distinguish fact from non-factual judgment, belief from knowledge and fallacious reasoning (invalid or weak) from correct reasoning in respect to central issues within Philosophy of Religion.
- Objective 2b: distinguish between philosophy and religion, philosophical views and religious views.

PHIL 352 Introduction to World Religions

This course will introduce students to the major world religious traditions, including indigenous sacred ways, Hinduism, Buddhism, Taoism and Confucianism, Judaism, Christianity, and Islam. Students will study the practices and beliefs of each tradition and will read selected material from the sacred writings of each tradition. Also, the influence of these religions on contemporary issues in the United States including ethnicity, ethnocentrism, racism, ageism, class differences, and sexual orientation is considered. This course fulfills Cosumnes River College's Ethnic/Multicultural requirement for the Associates Degree. This course is the same as RLST 301. This course, under either name, may be taken only one time for credit.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO #1: identify important questions and conceptions within Philosophy of Religion, distinguish from among divergent interpretations those that are better supported and those that are less well supported, construct well supported interpretations of diverse viewpoints and reason well about written and oral discourse.
- Objective 1a: evaluate information concerning central issues within Philosophy of Religion for quality and bias to determine if it is objective and reliable.
- Objective 1b: evaluate the relationship of language to logic and analyze, criticize and rationally justify points of view concerning central issues within Philosophy of Religion.
- SLO #2: reason inductively and deductively, reach conclusions concerning central issues within Philosophy of Religion based on sound or cogent inferences drawn from unambiguous statements of knowledge or belief.
- Objective 2a: distinguish fact from non-factual judgment, belief from knowledge and fallacious reasoning (invalid or weak) from correct reasoning in respect to central issues within Philosophy of Religion.
- Objective 2b: distinguish between philosophy and religion, philosophical views and religious views.
Upon completion of this course, the student will be able to:

- SLO #1: identify important questions and conceptions concerning world religions, distinguish from among divergent interpretations those that are better supported and those that are less well supported, construct well supported interpretations of diverse viewpoints and reason well about written and oral discourse.
- Objective 1a: evaluate information concerning central issues within world religions for quality and bias to determine if it is objective and reliable.
- Objective 1b: criticize and rationally justify points of view concerning central issues within world religions.
- Objective 1c: reach conclusions about central issues concerning world religions based on accurate interpretations of religious doctrines.
- Objective 1d: distinguish amongst philosophy, religious studies, and religion.
- SLO #2 (PSLO #3): demonstrate the ability to engage in ethical reasoning necessary to exercise responsibility as an ethical individual, professional, local, and global citizen.
- Objective 2a: demonstrate the ability to engage in rational discourse regarding issues in world religion in an ethically responsible manner.
- Objective 2b: demonstrate a critical appreciation of the role world religion has played in human spirituality and morality.

PHIL 356 Introduction to the Bible

In this course, students survey the literary, historical, ethical, theological and philosophical themes of the Bible. Students will read extensive passages from the Hebrew and Christian scriptures with special focus on textual exegesis and analysis. Topics from the Hebrew scriptures include the Law, the development of monotheism, the social justice tradition of the Prophets, and the Writings. Topics from the New Testament scriptures include the investigation of the Gospels and the "Jesus Problem" and the examination of the early development of the Christian Church.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO #1: identify important questions and conceptions concerning Biblical Studies, distinguish from among divergent interpretations those that are better supported and those that are less well supported, construct well supported interpretations and reason well about written and oral discourse.
- Objective 1a: demonstrate skills in text criticism, exegesis, and hermeneutics.
- Objective 1b: evaluate interpretations within Biblical Studies for quality and bias to determine if it is objective as opposed to faith-based.
- Objective 1c: criticize and rationally justify interpretations within Biblical Studies.
- SLO #2: reach conclusions concerning interpretations within Biblical Studies based on accurate methods of text criticism, exegesis, and hermeneutics.
- Objective 2a: distinguish amongst philosophy, biblical studies, and religion.
- SLO #3 (PSLO #3): demonstrate the ability to engage in ethical reasoning necessary to exercise responsibility as an ethical individual, professional, local, and global citizen.
- Objective 3a: demonstrate the ability to engage in rational discourse regarding Biblical Studies in an ethically responsible manner.
- Objective 3b: demonstrate appreciation of the influence of the bible on humanity's literary, moral, and philosophical traditions.
A historical, methodological, and topical survey of significant themes of social and political philosophy from Plato to our present times: authority, freedom, government, justice, law, rights, society and the state.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- understand and appreciate the nature and methods of social science.
- grasp certain important content of the history and topical areas of social and political philosophy.
- develop general and transferable critical thinking abilities that accompany rigorous study of philosophy.
- analyze methodologically the presuppositions and criteria used in solutions.
- cultivate a critical habit of mind enabling one to recognize, reflect, analyze, and then appropriately accept or reject one’s institutional systems and alternatives.

PHIL 485 Honors Seminar: Philosophy of the Martial Arts

This course provides an introduction to the philosophical views that have traditionally been associated with the practice of martial arts and explores the interplay between those views and that practice. It also provides an introduction to those contemporary philosophical issues that arise in the context of present day analytic philosophical reflection on the nature and practice of martial arts. The course thus provides both the opportunity to appreciate the eastern philosophical underpinnings of an activity that has become part of mainstream American Culture and the opportunity to experience the rigorous application of contemporary analytic academic philosophical methodology. Details about the Honors Program can be found in the front of the Catalog and on the CRC website. Enrollment is limited to Honors Program students. This course is the same as HONOR 364 and only one may be taken for credit.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- Employ the general and transferable critical thinking and communication abilities developed by the rigorous study of academic philosophy (SLO 1).
- Demonstrate the ability to engage in upper-division work in the discipline of Philosophy.
- Apply the basic methodology of contemporary analytic philosophy (e.g. assess, critique, deduce, evaluate, research, support, justify, analyze, debate, defend, detect, distinguish, examine, etc.) to understand traditional Asian, as well as contemporary American, martial arts.
- Recognize and explain the fundamental ethical, metaphysical, and epistemological tenets of Confucianism, Buddhism, and Taoism (SLO 2).
- Describe and explain the influence of the fundamental ethical, metaphysical, and epistemological tenets of Confucianism, Buddhism, and Taoism on the traditional study of (Asian) martial arts.
- Demonstrate the ability to navigate a seminar environment (SLO 3).

PHIL 495 Independent Studies in Philosophy
An independent studies project involves an individual student or small group of students in study, research, or activities beyond the scope of regularly offered courses. See the current catalog section of "Special Studies" for full details of Independent Studies.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO #1: Actively engage in intellectual inquiry beyond that required in order to pass a course of study (College Wide Learning Outcome – Area 4).
- Discuss and outline a proposal of study (that can be accomplished within one semester term) with a supervising instructor qualified within the discipline.
- Design an independent study (to be completed individually or by collaboration of a small group) to foster special knowledge, skills, and experience that are not available in any one regularly scheduled course.
- Use information resources to gather discipline-specific information.
- SLO #2: Utilize modes of analysis and critical thinking to apply theoretical perspectives and/or concepts in the major discipline of study to significant problems and/or educational activities (College Wide Learning Outcome – Area 3).
- Analyze and apply the knowledge, skills and experience that are involved in the independent study to theoretical perspectives and/or concepts in the major discipline of study.
- Explain the importance of the major discipline of study in the broader picture of society.
- SLO #3: Communicate a complex understanding of content matter of the major discipline of study (College Wide Outcome – Area 3).
- Demonstrate competence in the skills essential to mastery of the major discipline of study that are necessary to accomplish the independent study.
- SLO #4: Identify personal goals and pursue these goals effectively (College Wide Outcome – Area 4).
- Utilize skills from the "academic tool kit" including time management, study skills, etc., to accomplish the independent study within one semester term.

Religious Studies (RLST)

RLST 301 Introduction to World Religions

| Same As: | PHIL 352 |
| Units: | 3 |
| Hours: | 54 hours LEC |
| Prerequisite: | None. |
| Transferable: | CSU; UC |
| General Education: | CSU Area C2; IGETC Area 3B |
| Catalog Date: | June 1, 2020 |

This course will introduce students to the major world religious traditions, including indigenous sacred ways, Hinduism, Buddhism, Taoism and Confucianism, Judaism, Christianity, and Islam. Students will study the practices and beliefs of each tradition and will read selected material from the sacred writings of each tradition. Also, the influence of these religions on contemporary issues in the United States including ethnicity, ethnocentrism, racism, ageism, class differences, and sexual orientation is considered. This course fulfills Cosumnes River College's Ethnic/Multicultural requirement for the Associates Degree. This course is the same as PHIL 352. This course, under either name, may be taken only one time for credit.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO #1: Identify important questions and conceptions concerning world religions, distinguish from among divergent interpretations those that are better supported and those that are less well supported, construct well supported interpretations of diverse viewpoints and reason well about written and oral discourse.
- Objective 1a: evaluate information concerning central issues within world religions for quality and bias to determine if it is objective and reliable.
- Objective 1b: criticize and rationally justify points of view concerning central issues within world religions.
- Objective 1c: reach conclusions about central issues concerning world religions based on accurate interpretations of religious doctrines.
- Objective 1d: distinguish amongst philosophy, religious studies, and religion.
- SLO #2 (PSLO #3): demonstrate the ability to engage in ethical reasoning necessary to exercise responsibility as an ethical individual, professional, local, and global citizen.
- Objective 2a: demonstrate the ability to engage in rational discourse regarding issues in world religion in an ethically responsible manner.
- Objective 2b: demonstrate a critical appreciation of the role world religion has played in human spirituality and morality.
Photography | Cosumnes River College

The photography program is designed to teach entry-level skills for careers in the photographic industry. Students interested in photography as visual expression or an adjunct to a vocation will also benefit. Flexibility of the advanced program allows a student to concentrate upon a specific photographic career area. Students planning to prepare for a four-year degree in Photography should consult the lower division requirements of the university to which they plan to transfer.

The Art-Photo Associate in Arts (A.A.) degree may be obtained by completion of the required program, plus general education requirements, plus sufficient electives to meet a 60-unit total. See CRC graduation requirements.

Student Learning Outcomes
Upon completion of this program, the student will be able to:

- SLO #1 Produce a portfolio that conveys creative self expression.
- SLO #2 Work with silver based and alternative processes in black and white photography.
- SLO #3 Use a variety of film based cameras, including medium and large format.
- SLO #4 Describe the history of photography.
- SLO #5 Recount current trends in photographic theories and aesthetics.

Career Information

Fine art photographer, gallery worker, museum worker, curator or general photographer. Some career options may require more than two years of college study. Classes beyond the associate degree may be required to fulfill some career options or for preparation for transfer to a university program.

A.A. in Photography

The photography program is designed to teach entry-level skills for careers in the photographic industry. Students interested in photography as visual expression or an adjunct to a vocation will also benefit.

Flexibility of the advanced program allows a student to concentrate upon a specific photographic career area.

Students planning to prepare for a four-year degree in Photography should consult the lower division requirements of the university to which they plan to transfer.

HIGHLIGHTS
*modern lab and studio facilities
*twenty four black & white enlargers
*digital media lab
*digital scanners and printers
*field trips to a variety of photographic businesses in Sacramento and the Bay Area
* field study course in Yosemite
*special seminars and internships

The Photography Associate in Arts (A.A.) degree may be obtained by completion of the required program, plus general education requirements, plus sufficient electives to meet a 60-unit total. See CRC graduation requirements.

Student Learning Outcomes

Upon completion of this program, the student will be able to:

- PSLO #1 describe technical and aesthetic qualities of successful photographs
- PSLO #2 apply a variety of lighting techniques to the production of photographs
- PSLO #3 produce photographs using various cameras
- PSLO #4 produce photographs using various photographic papers and digital output
- PSLO #5 create a portfolio and related materials for job preparation
- PSLO #6 describe successful working relationships with clients and subjects
- PSLO #7 develop a personal visual style

Career Information

Studio Photography; Portrait & Wedding Photography; Photographic Lab Technician; Photojournalism; Industrial or Architectural Photography. Some career options may require more than two years of college study. Classes beyond the associate degree may be required to fulfill some career options or for preparation for transfer to a university program.

Certificates of Achievement

Commercial and Studio Photography Certificate

The commercial and studio program is designed for students who want to enter a career path in studio photography. Students will use strobe equipment to learn lighting techniques, work with professionals in the field and design their own portfolio. Business strategies, self promotion, and workflow methods will also be covered.

### Student Learning Outcomes

Upon completion of this program, the student will be able to:

- PSLO #1 use a variety of traditional and digital cameras
- PSLO #2 set up strobe lighting in the studio and on location for both product and people
- PSLO #3 create a personal portfolio of images that display expertise in commercial photography
- PSLO #4 define business goals and self promotion strategies
- PSLO #5 interact with photographers and designers to create compelling images

### Career Information

- studio assistant, studio photographer, freelance photographer, editorial photographer, lab manager

### Fine Art Photography Certificate

The fine art photography program is designed for students who want to enter a career path in fine art photography. Students will use a variety of cameras and formats to produce images in both color and black and white. Personal expression and creativity, history and contemporary issues in photography and visual communication will also be emphasized.

**Catalog Date:** June 1, 2020

**Student Learning Outcomes**

Upon completion of this program, the student will be able to:

- PSLO #1 communicate visual ideas in a variety of formats
- PSLO #2 describe important historical and contemporary movements in photography
- PSLO #3 produce a portfolio of images emphasizing personal creativity and self expression

**Career Information**

freelance photographer, editorial photographer, photojournalist, gallery apprentice, museum apprentice, teacher

**Portraiture and Wedding Photography Certificate**

The portraiture and wedding program is designed for students who want to enter a career path in wedding photography. Students will learn techniques to pose and work with models and clients, use strobe equipment and available lighting techniques, work with professionals in the field and design their own portfolio. Business strategies, self promotion, and workflow methods will also be covered.

ARTPH 341 Advanced Alternative Process Photography

This course is an advanced study of historical and alternative processes in photography and is designed to expand on the technical and creative concepts acquired in Beginning Alternative Process Photography. Topics of instruction include a deeper investigation of pinhole photography, handmade cameras, historical photographic processes, creating digital negatives and contact printing. Students will also hang a class exhibition. The class includes research, lectures, visual presentations, lab time, exams, and a portfolio. This course is the same as PHOTO 366.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- PSLO #1 use a variety of traditional and digital cameras
- PSLO #2 set up strobe lighting and available lighting to effectively photograph clients and models
- PSLO #3 create a personal portfolio of images that display expertise in wedding and portrait photography
- PSLO #4 define business goals and self promotion strategies
- PSLO #5 interact with clients, models and other professionals to attain a common visual goal

Career Information

photographer’s assistant, wedding photographer, portrait photographer, studio assistant, editorial photographer, photojournalist
- SLO #1 Research two types of alternative processes
- Create a multimedia presentation of two types of alternative processes and their practitioners
- Compile a research folio containing written research, visual examples and personal examples of researched processes
- SLO #2 Make contact prints
- Explore several methods of enlarging negatives
- Produce a variety of digital negatives
- SLO #3 Produce various alternative processes in photography
- Produce a themed portfolio using two to three alternative photographic processes
- Document each processes as they are completed
- SLO #4 Participate in a class exhibition
- Research local gallery options
- Secure a date for exhibition
- Produce a promo piece for the exhibition
- Produce and frame prints
- Hang the exhibition

Photography (PHOTO)

PHOTO 260 The Eastern Sierra Landscape, Yosemite Valley

| Units: | 2 |
| Hours: | 18 hours LEC; 54 hours LAB |
| Prerequisite: | None. |
| Catalog Date: | June 1, 2020 |

This course is designed to give students an opportunity to photograph in the Eastern Sierra emphasizing the Yosemite Valley. The course will include a variety of topics including using film and digital cameras in the landscape, understanding different natural qualities of light and low light photography. This course includes meetings on campus and a field trip to Yosemite.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO #1 Demonstrate an understanding of lighting conditions in the natural landscape.
- Change ISO setting to accommodate low and bright light.
- Change bracketing functions for exposure.
- SLO #2 Demonstrate competence with auxiliary equipment.
- Set up a tripod, cable release and self-timer functions.
- SLO #3 Describe the history of photography in the area.
- Visit the the Ansel Adams Gallery in Yosemite Valley.
- Write a critical analysis of a photographer.
- SLO #4 Produce a portfolio of digital or traditional photographs.

PHOTO 271 Color Management
This course covers the fundamental principles of color management. Topics of instruction include: calibration, profile generation, color management in Photoshop, and optimizing and preparing images for output to labs. Students will work with digital cameras. The class includes: lectures, lab time, field trips, exams, a journal, and a final project.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO #1 Calibrate a variety of digital hardware devices
- Print out targets on at least 3 different paper types
- Use a spectrophotometer to read targets
- Create profiles based on target outcomes
- SLO #2 Manage color in Photoshop
- Manipulate color profiles for accurate proofing
- SLO #3 Demonstrate color management workflow principles through creation of a final printed project

PHOTO 272 Lightroom

This course is designed to provide students the opportunity to learn the most current photographic archiving software products. Topics of instruction include: importing images, editing imaging and placing images into collections and libraries. Students will work with digital cameras. The class includes: lectures, lab time, field trips, exams, a journal, and a final project.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO #1: Import photographs into Lightroom
- describe the difference between a collection and library
- use keywords and stars to rate images
- compare and rank images side by side
- SLO #2: Work on images using the development module
- describe the options in each portion of the modules
- alter exposure, contrast, and color; both locally and globally
- perform and create presets on images
- SLO #3 Export photographs from the Lightroom
- describe steps for exporting to a folder or the web
- complete a batch process export including file name and file format changes
- SLO #4 Complete a final project in image management
- perform an in class presentation of the final image gallery
PHOTO 273 Video Capture with DSLRs

Units: 1.5
Hours: 18 hours LEC; 27 hours LAB
Prerequisite: PHOTO 302 or 400 with a grade of “C” or better
Catalog Date: June 1, 2020

This course is designed to provide students instruction in shooting video with DSLR cameras. Topics include: custom settings for shooting video, options for sound capture, lighting techniques, video editing and digital story telling. Students will work with digital cameras and accessory equipment. The class includes: lectures, lab time, field trips, exams, a journal, and a final project.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO#1: Capture video footage with a DSLR camera
- define and describe different cameras that offer video capture
- manipulate custom camera settings to optimize video capture
- use stabilization accessories
- SLO #2 Capture sound files for video
- experiment with in-camera and off camera options for sound capture
- SLO #3 Set up lighting for video capture
- experiment with different lighting techniques, including ambient, LED and tungsten sources
- SLO #4 Edit video footage
- describe different video editing software
- produce a 3-5 minute video project
- SLO #4 Describe digital story telling
- analyze various videos for editing, sound, and music

PHOTO 275 Digital Applications for Alternative Processes

Units: 1.5
Hours: 18 hours LEC; 27 hours LAB
Prerequisite: PHOTO 302 or 400 with a grade of “C” or better
Catalog Date: June 1, 2020

This course is designed to provide students instruction in digital applications for alternative processes. Topics include: creating custom curves for alternative process printing, using a variety of software products for creating unique imagery, and applying digital technology to older print processes. Students will work with digital cameras and accessory equipment. The class includes: lectures, lab time, field trips, exams, a journal, and a final project.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO#1 Identify software applications used for alternative processes
- describe applications for contact printing
- describe the differences between cyanotype, platinum and pallidium printing
- SLO#2 Design custom curves for digital negatives
- create step wedges for each process
- determine d-max for each process
- experiment with transparency OHP materials
- SLO#3 Produce a portfolio of alternative process digital prints
PHOTO 277 Creating a Digital Portfolio

Units: 1.5
Hours: 18 hours LEC; 27 hours LAB
Prerequisite: PHOTO 302 or 400 with a grade of "C" or better
Catalog Date: June 1, 2020

This course is designed to provide students instruction in creating a website to promote their photography. Website hosting options, uploading and organizing images will be covered. Students will work with digital cameras and design software. The class includes: lectures, lab time, field trips, exams, a journal, and a final project.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO #1 Describe different hosting options for a photographic website.
- articulat specific needs for different genres of photography
- describe a flash based site
- determine different costs of hosting services
- SLO #2 Prepare imagery for uploading
- edit photographs for content and genre
- sequence images for formal relationships
- resize and sharpen final images
- SLO #3 Create a website
- produce a price list
- create sound tracks for viewing

PHOTO 278 Flash Photography

Units: 1.5
Hours: 18 hours LEC; 27 hours LAB
Prerequisite: PHOTO 301 or 302 with a grade of "C" or better
Catalog Date: June 1, 2020

This course covers flash photography using digital cameras. Topics of instruction include: on camera flash, flash with cord, off camera flash and multiple strobe effects. The class includes: lectures, lab time, field trips, a journal, and a final project.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO #1 Describe options for flash units
- define guide numbers as a criteria for flash
- describe differences between name brand and off brand flash units
- SLO #2 Use on-camera flash
- create images that use: bounce flash, fill flash, flash-ambient, high-speed synch, multiple burst and a variety of lighting ratios
- SLO #3 Use a flash unit with a cord
- create different lighting patterns that use: side lighting, bounce lighting, and backgrounds with and without detail
- SLO #4 Use off-camera flash
PHOTO 295 Independent Studies in Photography

Units: 1 - 3  
Hours: 54 - 162 hours LAB  
Prerequisite: None.  
Catalog Date: June 1, 2020

An independent studies project involves an individual student or small group of students in study, research, or activities beyond the scope of regularly offered courses. See the current catalog section of “Special Studies” for full details of Independent Studies.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO #1: Actively engage in intellectual inquiry beyond that required in order to pass a course of study (College Wide Learning Outcome – Area 4).
- Discuss and outline a proposal of study (that can be accomplished within one semester term) with a supervising instructor qualified within the discipline.
- Design an independent study (to be completed individually or by collaboration of a small group) to foster special knowledge, skills, and experience that are not available in any one regularly scheduled course.
- Use information resources to gather discipline-specific information.
- SLO #2: Utilize modes of analysis and critical thinking to apply theoretical perspectives and/or concepts in the major discipline of study to significant problems and/or educational activities (College Wide Learning Outcome – Area 3).
- Analyze and apply the knowledge, skills and experience that are involved in the independent study to theoretical perspectives and/or concepts in the major discipline of study.
- Explain the importance of the major discipline of study in the broader picture of society.
- SLO #3: Communicate a complex understanding of content matter of the major discipline of study (College Wide Outcome – Area 3).
- Demonstrate competence in the skills essential to mastery of the major discipline of study that are necessary to accomplish the independent study.
- SLO #4: Identify personal goals and pursue these goals effectively (College Wide Outcome – Area 4).
- Utilize skills from the “academic tool kit” including time management, study skills, etc., to accomplish the independent study within one semester term.

PHOTO 301 Beginning Photography

Units: 3  
Hours: 36 hours LEC; 54 hours LAB  
Prerequisite: None.  
Transferable: CSU; UC  
General Education: AA/AS Area I; CSU Area C1  
Catalog Date: June 1, 2020

This course combines lectures with hands-on experience in traditional black and white photography. Students will work primarily with film cameras. Instruction includes camera function, exposure control, film processing, enlarging prints, low light photography, and print finishing. Creative control and elements of composition will also be covered. The format of the class includes lectures, visual presentations, lab time, a field trip, exams and a portfolio. Students may wish to challenge the prerequisite on the basis of equivalent experience. This course is the same as ARTPH 301, and only one may be taken for credit.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO #1 Operate a manual 35mm camera and lens
- expose black and white film shot under a variety of light sources
PHOTO 302 Beginning Digital Photography

**Units:** 3
**Hours:** 36 hours LEC; 54 hours LAB
**Prerequisite:** None.
**Transferable:** CSU; UC
**General Education:** AA/AS Area I
**Catalog Date:** June 1, 2020

This course combines lectures with hands-on experience in digital photography. Instruction includes digital camera function, exposure control, technical and creative control, computer manipulation of images and digital output options. The format of the class includes lectures, visual presentations, lab time, exams and a portfolio.

**Student Learning Outcomes**

Upon completion of this course, the student will be able to:

- SLO #1 Operate a digital camera
- adjust film speed for proper exposure
- adjust white point for proper lighting
- use accessory equipment for a digital camera including: flash unit, tripod, filters and cable release
- recognize and use good compositional techniques
- SLO #2 Analyze a variety of image storage and media options
- use and compare digital media
- SLO #3 Produce a digital portfolio
- perform basic image manipulation in Photoshop
- use a variety of digital output options
- retouch and mount a final image
- SLO #4 Describe basic film-based photography techniques
- differentiate between a digital and traditional SLR camera
- explain basic exposure, development and printing techniques

PHOTO 310 Intermediate Photography
This course is designed to expand on the technical and creative concepts acquired in beginning film photography. Topics of instruction include: exposure and development control, archival printing, introduction to medium and large format photography, studio lighting techniques, and alternative processes. Students will work primarily with film cameras. The class includes lectures, visual presentations, lab time, written tests, and a portfolio. This course is the same as ARTPH 310, and under either name, the course may only be taken one time for credit.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO #1 Expose and develop images using a variety of lighting
  - push and pull images
  - apply the zone system to exposure and development
  - solve equivalent exposures
- SLO #2 Produce an image made with studio lights
  - set up studio lighting equipment
  - operate a light meter in ambient, spot and flash modes
- SLO #3 Produce an archival print or a digital equivalent
  - use fiber based paper with correct processing and mounting
- SLO #4 Create alternative process images
  - differentiate between high contrast, infra red, multiple imagery, solarization, toning, and hand-coloring.
  - create a collage
- SLO #5 Produce a portfolio
  - generate ten images using techniques from the class

PHOTO 312 Intermediate Digital Photography

This course is designed to expand on the technical and creative concepts acquired in beginning digital photography. Topics of instruction include: advanced digital camera functions, exposure control, introduction to studio lighting, computer manipulation of images, digital archiving, digital output options and digital print finishing. The class includes lectures, visual presentations, lab time, written tests, a field trip, and a portfolio.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO #1: Use advanced functions of a digital camera
  - adjust for correct white balance in difficult lighting condition
  - identify all menu options in a DSLR
- SLO #2: Produce an image made with studio lights
  - operate a light meter in ambient, spot and flash modes
- SLO #3: Perform multiple-step image correction with image software
PHOTO 320 Color Photography

This course covers the fundamental principles of color photography. Topics of instruction include: color theory, correct exposure, techniques to determine correct color balance, flash exposure for color and printing digital files. Students will work with digital cameras. The class includes: lectures, visual presentations, lab time, written tests, and a portfolio. This course is the same as ARTPH 322, and under either name, the course may only be taken one time for credit.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO #1 Explain fundamental color theory and its application in color photography
- produce prints with limited color, dominant color, harmonic color and complementary color
- explain color temperature
- SLO #2 Expose and print color images
- differentiate between a variety of digital papers and surfaces
- explain the effects of polarizing, color compensating and light balancing filters
- differentiate between a variety of file formats
- adjust color balance to produce prints
- SLO #3 Produce color alternative process prints
- use techniques in image editing software to create alternative color processes
- research various output choices
- SLO #4 Produce imagery using artificial lighting
- explain how flash and strobe photography is related to color temperature
- experiment with capture stations to view images produced with artificial light
- explain lighting ratios and how they relate to subject contrast in color
- SLO #5 Develop a personal style using color imagery
- produce a portfolio of imagery
- write an artist statement relating to color

PHOTO 340 Careers in Photography

36 hours LEC; 54 hours LAB
PHOTO 320 with a grade of "C" or better
CSU
June 1, 2020
This course is an overview of different careers available in the photographic industry. Fields of study include: portraiture, wedding photography, fashion, commercial and tabletop, photojournalism, and fine art photography. Students are encouraged to pursue their own area of interest by working with professionals in the field. Students may work with digital or traditional cameras. The class includes: lectures, studio visits, lab time, and completion of a resume, price list, and portfolio.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO #1 Compare various professions in photography
- list the skills and training required to enter various fields of photography
- job shadow with a professional in the field
- SLO #2 Produce a portfolio
- determine a personal area of interest in photography
- use the appropriate camera equipment necessary for various jobs in the photographic industry
- SLO #3 Produce a resume, price list and business card

PHOTO 350 Photojournalism

3

Students will study features, sports, spot news, and the photo essay styles of journalistic photography. Students may work with digital or traditional cameras. Students will also capture and use audio to complete multimedia projects. A beginning, advanced, or magazine style digital portfolio will be completed. The course includes lectures, visual presentations, speakers, a required field trip, and lab time. Students will provide their own camera and related materials. (C-ID JOUR 160)

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO #1: Define documentary photography.
- describe the history of photojournalism
- identify major historical and contemporary photojournalists
- critique documentary photographs
- SLO #2: List the steps in becoming a photojournalist.
- identify the difference between newspaper and magazine photography
- apply and demonstrate understanding of ethics of photojournalism
- SLO #3: Produce a documentary portfolio of images.
- demonstrate an understanding of principles of editing and self-editing
- shoot in difficult lighting situations
- shoot and edit a photographic essay
- capture audio for multimedia content
- create a multimedia piece for a final portfolio

PHOTO 360 Large Format Photography
This course is designed to give students a thorough knowledge of view camera operation in the studio and in the field. Topics of instruction include: view camera movements, exposure techniques, processing sheet film, adjustments necessary to print large format negatives, and presentation of the large format image. Students may work in black and white, color, or both. The class includes: lectures, visual presentations, lab time, studio time, and a portfolio. Students are urged to provide their own large format camera. This course is the same as ARTPH 314.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO #1 Adjust a view camera
  - set up a view camera
  - utilize all view camera movements, including: swings, tilts, rises, falls and shifts.
  - apply these movements to control focus and perspective
- SLO #2 Use the view camera in a variety of settings
  - produce a large format image in an architectural style
  - produce a large format image in the studio
  - produce a large format photograph on location
- SLO #3 Develop sheet film
  - experiment with tray and tank methods of development
- SLO #4 Print a 4x5 negative
  - adjust the enlarger for 4x5 negatives
  - apply advanced printing procedures such as making and flashing to create superior prints
  - produce a portfolio of photographs made with a view camera

PHOTO 364 Advanced Black and White Photography

This course is designed to expand on the technical and creative concepts acquired in intermediate photography. Topics of instruction include: zone system, archival printing techniques, advanced methods of image manipulation, and digital fine art printing. Students will work with digital and traditional cameras. The class includes lectures, visual presentations, lab time, exams, and a portfolio.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO #1 use the Zone System
  - test film speed and digital ISO settings
  - apply the zone system to exposure and development
  - use a large format camera
  - produce prints with a full range of zone values
- SLO #2 use advanced printing techniques
PHOTO 365 Alternative Process Photography

This course introduces historical and alternative processes in photography. Topics of instruction include: pin hole photography, handmade cameras, historical photographic processes, enlarging negatives, creating digital negatives and contact printing. Students will also hang a class exhibition. The class includes lectures, visual presentations, lab time, exams, and a portfolio. This course is the same as ARTPH 340.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO #1 Make a pinhole camera
- research material options for a handmade camera
- use film and paper inside a handmade camera for exposure
- SLO #2 Make contact prints
- explore several methods of enlarging negatives
- produce a digital negative
- SLO #3 Research and produce various alternative processes in photography
- produce a timeline outlining historical processes in the history of photography
- produce images using each of following techniques: cyanotype, van dyke brown, and platinum-palladium
- produce several images using the following techniques: cliche-verre, gum bichromate, albumen, calotype, sun print, photogram, and silver-toned
- SLO #4 explore digital fine art printing techniques and determine techniques necessary for production
- define warm tone and cold tone papers
- SLO #5 Participate in a class exhibition
- research local gallery options
- secure a date for exhibition
- produce a promo piece for the exhibition
- produce and frame prints
- hang the exhibition

PHOTO 366 Advanced Alternative Process Photography
This course is an advanced study of historical and alternative processes in photography and is designed to expand on the technical and creative concepts acquired in Beginning Alternative Process Photography. Topics of instruction include a deeper investigation of pinhole photography, handmade cameras, historical photographic processes, creating digital negatives and contact printing. Students will also hang a class exhibition. The class includes research, lectures, visual presentations, lab time, exams, and a portfolio. This course is the same as ARTPH 341.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO #1 Research two types of alternative processes
- Create a multimedia presentation of two types of alternative processes and their practitioners
- Compile a research folio containing written research, visual examples and personal examples of researched processes SLO #2
- Create contact prints
- SLO #2 Create contact prints
- Explore several methods of enlarging negatives Produce a variety of digital negatives independent of instructor
- Produce a variety of digital negatives
- SLO #3 Produce various alternative processes in photography
- Produce a themed portfolio using two to three alternative photographic processes
- Document each processes as they are completed
- SLO #4 Participate in a class exhibition
- Research local gallery options
- Secure a date for exhibition
- Produce a promo piece for the exhibition
- Produce and frame prints
- Hang the exhibition

PHOTO 370 Portraiture and Wedding Photography

This course is designed to provide students with an overview of the portraiture and wedding photography business. Topics include: techniques of lighting, use of appropriate cameras and media, professional practices and strategies for beginning business. Students work with digital cameras. The class includes: lectures, lab time, on-location field trips, exams, a journal, and a portfolio geared toward a professional presentation.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO #1 Create images in a variety of lighting conditions.
- use available light and reflectors for outdoor portraiture
- use fill flash for outdoor portraiture
- use electronic flash equipment, in the studio and on-location
- describe flash-ambient exposure for indoor exposure
PHOTO 372 Advanced Portrait Photography

Units: 3 - 4
Hours: 36 hours LEC; 54 - 108 hours LAB
Prerequisite: PHOTO 320 with a grade of “C” or better
Transferable: CSU
Catalog Date: June 1, 2020

This course is designed to give students an in depth understanding of portraiture. Topics include: techniques of lighting and posing, working with groups and individuals, use of appropriate cameras and films, professional ethics and business strategies. Students may work with digital or traditional cameras. The class includes: lectures, lab time, on-location field trips, exams, a journal, and a portfolio geared toward a professional presentation.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO #1 use studio lighting equipment
- describe accessory equipment for strobes including: reflectors, softboxes, umbrellas, scrims, snoots, reflectors and flags
- set up studio accent lights
- use a flash meter in a variety of modes
- SLO #2 create portraits in a variety of lighting conditions
- shoot a group and individual portraits outdoors using fill flash
- shoot an environmental portrait combining light sources
- SLO #3 identify professional practices in the portrait industry
- develop a price list and model release form
- describe market trends in the Sacramento area
- SLO #4 produce a portfolio
- experiment with a variety of output choices and determine which are most suitable for portfolio presentation

PHOTO 390 Studio Lighting Techniques

Units: 3 - 4
Hours: 36 hours LEC; 54 - 108 hours LAB
Prerequisite: PHOTO 320 with a grade of “C” or better
Transferable: CSU
Catalog Date: June 1, 2020

This course is a study in studio lighting techniques used in commercial photography. Topics of instruction include: correct exposure using strobe, lighting ratios, basic portraiture and advertising, appropriate choice of camera formats, and studies in composition of commercial photographs. Students are encouraged to work in a variety of formats, using black and white and color. Students will primarily use digital cameras. The class includes: lectures, visual presentations and discussions, on-location field trips, lab time, exams, and a portfolio.

Student Learning Outcomes
Upon completion of this course, the student will be able to:

- SLO #1 Use studio lighting equipment.
- use a flash meter in a variety of modes
- calculate and apply lighting ratios to determine exposure
- describe studio accessories, including: booms, flags, c-stands, gels, scrims, reflectors, umbrellas, and softboxes
- SLO #2 Produce a portfolio of images created in the studio.
- photograph portraits using studio lighting
- photograph still lives using studio lighting
- experiment with a variety of props, backgrounds and tabletop options
- prepare and participate in on-location studio shoots, including: on-sight research, equipment handling and set-up procedures, working with models, and roles in assisting.
- SLO #3 Investigate a career as a studio photographer
- attend a fieldtrip at a photographer's studio

PHOTO 392 Commercial and Advertising Photography

Units: 3 - 4
Hours: 36 hours LEC; 54 - 108 hours LAB
Prerequisite: PHOTO 320 with a grade of “C” or better
Transferable: CSU
Catalog Date: June 1, 2020

This course covers studio lighting techniques used in the production of advertising photographs. Topics of instruction include: advanced studio lighting techniques, correct exposure using strobe, appropriate choice of camera format and films, studies in composition and meaning of advertising photographs, and market research. Students are encouraged to work in a variety of formats, using both film and digital cameras. The class includes: lectures, visual presentations and discussions, on-location field trips, lab time, written tests, a journal, and a portfolio geared toward a professional presentation.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO #1 Use studio lighting equipment
- use a flash meter in a variety of advanced modes
- use strobe and studio accessories, including booms, flags, c-stands, gels, scrims, reflectors, umbrellas and softboxes
- describe characteristics of lighting, including sources, color temperature, modification, multiple strobe, matching light to subject and creative applications
- SLO #2 Produce a portfolio of images created in the studio
- photograph images with challenging surfaces and subjects including: glass, plastics and metal
- recreate successful images found from outside sources
- participate in on-location studio shoots, including location research, and equipment safety setup procedures
- produce an image by levitating an object in the studio
- SLO #3 Study market trends in commercial advertising images
- critique successful images and produce a journal
- develop strategies for marketing a portfolio, including: studying local market trends, and changing presentation styles for clients
- meet with a professional in the field (for example, an art director) to discuss professional expectations
PHOTO 400 Digital Imaging

Units: 3
Hours: 36 hours LEC; 54 hours LAB
Prerequisite: None.
Transferable: CSU
Catalog Date: June 1, 2020

This is an introductory course in digital imaging and electronic desktop photography. Methods currently used in publishing will be emphasized. The class includes lectures, use of computers and scanners, slide presentations, occasional off-campus class meetings, and preparation of a notebook and a digital portfolio.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO #1: Produce photographs using various camera, film and digital choices
- Acquire and import digital files, set-up and scan slides and prints digital photographs.
- SLO #2: Produce photographs using various digital techniques
- Demonstrate competency with Adobe Photoshop.
- Assess and retouch digital images using a variety of tools in Photoshop.
- Compose digital images with copy including usage of layers.
- SLO #3: Create a portfolio and related materials for job preparation
- Integrate established work flow, edit and prepare images for digital printing output
- Create CD of images by combining photo portfolio and sound on CD
- Output completed digital files.

PHOTO 410 Advanced Digital Imaging

Units: 3
Hours: 36 hours LEC; 54 hours LAB
Prerequisite: PHOTO 400 with a grade of “C” or better
Transferable: PHOTO 400 with a grade of “C” or better
Catalog Date: June 1, 2020

This course is an advanced study of digital imaging and related software programs. Methods currently used in publishing will be emphasized. The class includes lectures, use of computers, scanners, and a variety of output devices, and preparation of a digital portfolio. This course will introduce the student to the emerging field of multimedia and visit various local businesses.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO #1: Produce photographs using various camera, film and digital choices.
- Demonstrate competency in using a variety of scanning devices, including flatbed and transparency.
- Demonstrate competency in acquiring various types digital files.
- SLO #2: Demonstrate proficiency in advanced software applications related to digital imaging, such as Adobe's Photoshop, InDesign, Illustrator and Painter.
- Demonstrate competency in advanced digital manipulation techniques such as using layers, masks, blend modes and paths.
- SLO #3: Produce photographs using various photographic papers and digital output.
- Produce a digital portfolio in a variety of outputs including inkjet print and photo cd.
- SLO #4: Create a portfolio and related materials for job preparation.
- Produce multiple self-promotional materials using a variety of advanced digital manipulation techniques
- Produce a complete portfolio demonstrating competency in advanced digital imaging techniques
PHOTO 420 History of Photography

This course provides an in-depth study of photography and photographically derived images. The course will focus on the development of the first photograph processes from the nineteenth century to current technologies. The format of the class includes lecture and discussions, visual presentations and a field trip. This course is the same as ARTPH 342, and only one may be taken for credit.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO #1: Define the major movements in the history of photography
- produce a timeline for the world history of photography
- author a research paper on a major movement or artist in the history of photography
- SLO #2: Evaluate different visual styles in photography
- produce a multi-media presentation of a major movement or artist in the history of photography
- attend a field trip to a major photographic collection
- SLO #3: Describe photographic processes from the 19th Century to the present
- create an example of an historical process
- complete a journal depicting a technology timeline

PHOTO 495 Independent Studies in Photography

An independent studies project involves an individual student or small group of students in study, research, or activities beyond the scope of regularly offered courses. See the current catalog section of “Special Studies” for full details of Independent Studies.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO #1: Actively engage in intellectual inquiry beyond that required in order to pass a course of study (College Wide Learning Outcome – Area 4).
- Discuss and outline a proposal of study (that can be accomplished within one semester term) with a supervising instructor qualified within the discipline.
- Design an independent study (to be completed individually or by collaboration of a small group) to foster special knowledge, skills, and experience that are not available in any one regularly scheduled course.
- Use information resources to gather discipline-specific information.
- SLO #2: Utilize modes of analysis and critical thinking to apply theoretical perspectives and/or concepts in the major discipline of study to significant problems and/or educational activities (College Wide Learning Outcome – Area 3).
- Analyze and apply the knowledge, skills and experience that are involved in the independent study to theoretical perspectives and/or concepts in the major discipline of study.
- Explain the importance of the major discipline of study in the broader picture of society.
PHOTO 498 Work Experience in Photography

This course provides students with opportunities to develop marketable skills in preparation for employment in their major field of study or advancement within their career. It is designed for students interested in work experience and/or internships in transfer level degree occupational programs. Course content includes understanding the application of education to the workforce; completion of required forms which document the student's progress and hours spent at the work site; and developing workplace skills and competencies. Appropriate level learning objectives are established by the student and the employer. During the semester, the student is required to participate in a weekly orientation and 75 hours of related paid work experience, or 60 hours of unpaid work experience for one unit. An additional 75 or 60 hours of related work experience is required for each additional unit. Work Experience may be taken for a total of 16 units when there are new or expanded learning objectives. Only one Work Experience course may be taken per semester.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- **DEMONSTRATE AN UNDERSTANDING AND APPLICATION OF PROFESSIONAL WORKPLACE BEHAVIOR IN A FIELD OF STUDY RELATED ONE'S CAREER.(SLO 1)**
  - Understand the effects time, stress, and organizational management have on performance.
  - Demonstrate an understanding of consistently practicing ethics and confidentiality in a workplace.
  - Examine the career/life planning process and relate its relevancy to the student.
  - Demonstrate an understanding of basic communication tools and their appropriate use.
  - Demonstrate an understanding of workplace etiquette.
  - **DESCRIBE THE CAREER/LIFE PLANNING PROCESS AND RELATE ITS RELEVANCY TO ONE'S CAREER.(SLO 2)**
  - Link personal goals to long term achievement.
  - Display an understanding of creating a professional first impression.
  - Understand how networking is a powerful job search tool.
  - Understand necessary elements of a résumé.
  - Understand the importance of interview preparation.
  - Identify how continual learning increases career success.
  - **DEMONSTRATE APPLICATION OF INDUSTRY KNOWLEDGE AND THEORETICAL CONCEPTS AS WRITTEN IN LEARNING OBJECTIVES IN PARTNERSHIP WITH THE EMPLOYER WORK SITE SUPERVISOR.(SLO 3)**
The CRC Physics department offers a full array of transferable courses that fulfill both major and general education requirements. Physics sequences include a three-semester calculus-based sequence for computer science and engineering students, a two-semester calculus-based sequence for life science and architecture students, and a two-semester trigonometry-based sequence for life science and architecture students.

### Associate Degrees for Transfer

#### A.S.-T. in Physics

The Associate in Science in Physics for Transfer degree provides students with a thorough overview of the field of physics. Students will have demonstrated sufficient understanding in the fields of mechanics, electricity and magnetism, thermodynamics, mechanical and electromagnetic waves, modern physics, the scientific method and mathematics to successfully transfer to a four-year institution with a major in physics.

The Associate in Science in Physics for Transfer degree fulfills the general requirements of the California State University for transfer. Students with this degree will receive priority admission with junior status to the California State University system, although not necessarily to a particular campus or major.

**Catalog Date:** June 1, 2020

The Associate in Science in Physics for Transfer (A.S.-T) degree may be obtained by completion of 60 transferable, semester units with a minimum 2.0 GPA, including (a) the major or area of emphasis described in the Required Program, and (b) either the Intersegmental General Education Transfer Curriculum (IGETC) or the California State University General Education-Breadth Requirements.

#### Student Learning Outcomes

Upon completion of this program, the student will be able to:
• explain the scientific method and its application to the fundamental concepts of physics including mechanics, electricity and magnetism, thermodynamics, mechanical and electromagnetic waves, optics and modern physics.

• solve conceptual, numeric and symbolic problems in physics (specifically the fields of mechanics, electricity and magnetism, thermodynamics, mechanical and electromagnetic waves, optics and modern physics) using mathematics through calculus.

• demonstrate the proper use of basic laboratory devices including metersticks, balances, digital multimeters, and oscilloscopes.

• apply mathematical concepts including single and multivariable calculus, vector calculus, and basic differential equations in order to model physical systems and solve physical problems.

• create graphical representations of data and analyze those graphs to determine the results of laboratory activities.

• write a clear, coherent and thorough lab report.

Career Information

This degree is designed to facilitate successful transfer to four-year programs that prepare students for advanced study in physics and related fields including biophysics, physical chemistry, geophysics, and astrophysics. Physicists with undergraduate and graduate degrees have a wide range of employment opportunities including research, engineering, computer programming, and teaching. NOTE TO TRANSFER STUDENTS: The Associate Degree for Transfer program is designed for students who plan to transfer to a campus of the California State University (CSU). Other than the required core, the courses you choose to complete this degree will depend to some extent on the selected CSU for transfer. In addition, some CSU-GE Breadth or IGETC requirements can also be completed using courses required for this associate degree for transfer major (known as “double-counting”). Meeting with a counselor to determine the most appropriate course choices will facilitate efficient completion of your transfer requirements. For students wishing to transfer to other universities (UC System, private, or out-of-state), the Associate Degree for Transfer may not provide adequate preparation for upper-division transfer admissions, because many universities require more lower division courses than those in this degree. Even the CSUs that accept this transfer degree may likely require more lower division courses to achieve the Bachelor degree. Specifically, courses in general chemistry, differential equations, linear algebra, and computer programming may better prepare the transfer student for certain universities. It is critical that you meet with a CRC counselor to select and plan the courses for the major, as programs vary widely in terms of the required preparation.

Associate Degrees

A.S. in General Science

Areas of Study include:

• Physical Anthropology
• Astronomy
• Biology
• Chemistry
• Engineering
• Physical Geography
• Geology
• Physics

Eighteen (18) units of transfer level course work in science is required. Two laboratory courses must be included: one in the physical sciences and one in the biological sciences. Courses may be selected from astronomy, biology, chemistry, geology, physical geography, physical anthropology, and physics. The student, in consultation with a counselor, should choose science courses to meet his or her program, transfer, or general education requirements.

Students interested in transferring to a four-year university with a science major are encouraged to complete a science AS or AS-T degree such as Anthropology, Biology, Chemistry, Engineering, Geography, Geology, or Physics. This General Science degree may not include the majors-level transfer courses needed for many science majors. Students are strongly recommended to see a counselor for guidance.

1Courses used in A or B above will not count towards C, except units exceeding the 4 or 3 unit minimum in A and B. For example, a student completing the 5 unit CHEM 309 under B could apply 2 of those units towards C. A total of 18 science units is required.

The General Science Associate in Science (A.S.) degree may be obtained by completion of the required program, plus general education requirements, plus sufficient electives to meet a 60-unit total. See CRC graduation requirements.

Student Learning Outcomes

Upon completion of this program, the student will be able to:

- explain the core perspectives of the scientific method and apply it to at least one scientific discipline. (SLO 1)
- solve introductory problems of a conceptual and/or numerical nature of at least one scientific discipline. (SLO 2)
- accurately apply the basic vocabulary and concepts of at least one scientific discipline verbally and in writing. (SLO 3)
- recognize the use and misuse of scientific concepts in society including politics and the media. (SLO 4)

A.S. in Physics

The Associate in Science in Physics degree provides students with a thorough overview of the field of physics. Students will have demonstrated sufficient understanding in the fields of mechanics, electricity and magnetism, thermodynamics, mechanical and electromagnetic waves, modern physics; the scientific method, mathematics and chemistry to successfully transfer to a four-year institution with a major in physics.

This course is a descriptive course in general astronomy treating the nature and evolution of the solar system, stars, galaxies, cosmology and life in the universe.

Student Learning Outcomes
Upon completion of this course, the student will be able to:

- **DEVELOP AN UNDERSTANDING OF EARLY ASTRONOMY AND CELESTIAL MOTION (SLO 1, PSLO 2).**
  - Explain the structure of the celestial sphere.
  - Differentiate between the geocentric and heliocentric models of the universe proposed by Ptolemy and Copernicus, respectively.
  - State contributions made by the Greeks, Brahe, Kepler, Galileo and Newton.
  - State Newton's Law of Universal Gravitation and how it can be used to explain an orbiting body around another.
  - Describe the principal reasons for the daily and annual motion of the stars, Sun and Moon, and state the reason for the seasons.
  - Explain why planetary retrograde motion is observed.
  - Describe what causes the different types of lunar and solar eclipses.
  - Have an understanding of the Scientific Method.

- **DISCUSS SOME OF THE TOOLS AND MEASURING METHODS USED IN ASTRONOMY (SLO 2, PSLO 2 AND 3).**
  - Explain what causes stellar parallax.
  - Define the astronomical unit (AU), the light year (ly) and the parsec (pc) and express numbers in scientific notation.
  - Demonstrate a basic understanding of atomic structure and the origin of light and its properties.
  - Explain what takes place in transitions between energy levels and how this is represented in a spectrum.
  - State the relationship between wavelength, frequency and the speed of an electromagnetic wave.
  - State the regions of the electromagnetic spectrum and arrange them in order of increasing energy, wavelength, or frequency.
  - Explain the conditions under which the three principal spectra are produced and the effect temperature has on Blackbody radiation spectra and on color.
  - Explain the basics of Doppler shift.
  - Discuss the importance of telescopes.
  - Compare reflecting and refracting telescopes and any limitations they may have.
  - Demonstrate an understanding of nonoptical telescopes and how and where they are used.
  - Explain some of the techniques that are used to improve resolution.

- **DEMOSTRATE KNOWLEDGE OF THE PROPERTIES OF THE SOLAR SYSTEM. (SLO 3, PSLO 2).**
  - List the planets in the Solar System in order and describe a possible reason for the differences between the two major groups of planets and the characteristics that distinguishes planets of each group.
  - State the accepted theory for the formation of the Moon and its influence on Earth.
  - Demonstrate knowledge of key features of smaller objects in the solar system including dwarf planets, moons, comets, asteroids, and meteoroids.
  - Explain how astronomers detect extra-solar planets.

- **DEVELOP AN UNDERSTANDING OF THE EVOLUTION AND PROPERTIES OF STARS, ESPECIALLY OUR SUN, AND GALAXIES (SLO 4, PSLO 2).**
  - Explain the basic properties of the Sun--hydrostatic equilibrium, source of energy, magnetic activity and its cycles and determination of its composition.
  - Identify the regions in the HR diagram and summarize some of the properties of stars in each region.
  - Explain what is meant by the interstellar medium.
  - Summarize the composition and evolution of stars (protostars, main sequence stars, novae, supernovae, neutron stars, and black holes).
  - Explain how astronomers might detect a black hole.
  - Develop a basic understanding of the Milky Way galaxy and other galaxies.
  - Categorize galaxies according to shape and size.
  - Discuss how galactic motion infers the expansion of the universe.
• DEVELOP A BASIC UNDERSTANDING OF COSMOLOGY AND THE SEARCH FOR LIFE IN THE UNIVERSE (SLO 5, PSLO 2).

• Demonstrate knowledge of the Big Bang theory and of any experimental data supporting the Big Bang theory.

• Describe what is meant by spacetime.

• Express the current understanding of the fate of universe.

• State what methods astronomers use to search for extra-terrestrial life.

• Demonstrate a basic understanding of each factor in the Drake equation.

ASTR 400 Astronomy Laboratory

Units: 1
Hours: 54 hours LAB
Prerequisite: None.
Corequisite: ASTR 300
Transferable: CSU; UC
General Education: CSU Area B3; IGETC Area 5C
Catalog Date: June 1, 2020

This course covers topics including constellations, star charts, and motions of the Earth, Moon and other astronomical bodies. Students will apply the techniques that astronomers use to study the Earth, Moon, Sun, planets and stars. The course includes observations with the naked eye, binoculars and/or telescopes.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

• IDENTIFY AND CLASSIFY COMMON CELESTIAL OBJECTS. (SLO 1)

• identify major constellations and stars.

• classify stars according to constellation and spectrum.

• INCORPORATE PROPER ASTRONOMICAL OBSERVATION TECHNIQUES. (SLO 2)

• operate a basic telescope and use the naked eye and binoculars to make astronomical observations.

• ASSESS THE EFFECTS OF MOTIONS OF CELESTIAL OBJECTS ON OBSERVATIONS. (SLO 3)

• explain how the Earth's, moon's and sun's motions cause cycles in the sky.

• predict the night sky on any given evening using star charts.

• ANALYZE LIGHT TO DETERMINE PROPERTIES OF ASTRONOMICAL OBJECTS. (SLO 4)

• measure relative motion of and distance to stars using Doppler shifts and relative intensities.

• research composition of astronomical objects using spectral analysis.

ASTR 495 Independent Studies in Astronomy

Units: 1 - 3
Hours: 54 - 162 hours LAB
Prerequisite: None.
Transferable: CSU
Catalog Date: June 1, 2020

An independent studies project involves an individual student or small group of students in study, research, or activities beyond the scope of regularly offered courses. See the current catalog section of "Special Studies" for full details of Independent Studies.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

• SLO #1: Actively engage in intellectual inquiry beyond that required in order to pass a course of study (College Wide Learning Outcome – Area 4).
Discuss and outline a proposal of study (that can be accomplished within one semester term) with a supervising instructor qualified within the discipline.

Design an independent study (to be completed individually or by collaboration of a small group) to foster special knowledge, skills, and experience that are not available in any one regularly scheduled course.

Use information resources to gather discipline-specific information.

SLO #2: Utilize modes of analysis and critical thinking to apply theoretical perspectives and/or concepts in the major discipline of study to significant problems and/or educational activities (College Wide Learning Outcome – Area 3).

Analyze and apply the knowledge, skills and experience that are involved in the independent study to theoretical perspectives and/or concepts in the major discipline of study.

Explain the importance of the major discipline of study in the broader picture of society.

SLO #3: Communicate a complex understanding of content matter of the major discipline of study (College Wide Outcome – Area 3).

Demonstrate competence in the skills essential to mastery of the major discipline of study that are necessary to accomplish the independent study.

SLO #4: Identify personal goals and pursue these goals effectively (College Wide Outcome – Area 4).

Utilize skills from the “academic tool kit” including time management, study skills, etc., to accomplish the independent study within one semester term.

---

**ASTR 498 Work Experience in Astronomy**

**Units:** 1 - 4  
**Hours:** 60 - 300 hours LAB  
**Prerequisite:** None.  
**Enrollment Limitation:** Students must be in a paid or unpaid internship, volunteer position or job related to career goals in Astronomy.  
**Transferable:** CSU  
**General Education:** AA/AS Area III(b)  
**Catalog Date:** June 1, 2020

This course provides students with opportunities to develop marketable skills in preparation for employment in their major field of study or advancement within their career. It is designed for students interested in work experience and/or internships in transfer level degree occupational programs. Course content includes understanding the application of education to the workforce; completion of required forms which document the student's progress and hours spent at the work site; and developing workplace skills and competencies. Appropriate level learning objectives are established by the student and the employer. During the semester, the student is required to participate in a weekly orientation and 75 hours of related paid work experience, or 60 hours of unpaid work experience for one unit. An additional 75 or 60 hours of related work experience is required for each additional unit. Work Experience may be taken for a total of 16 units when there are new or expanded learning objectives. Only one Work Experience course may be taken per semester.

**Student Learning Outcomes**

Upon completion of this course, the student will be able to:

- **DEMONSTRATE AN UNDERSTANDING AND APPLICATION OF PROFESSIONAL WORKPLACE BEHAVIOR IN A FIELD OF STUDY RELATED ONE’S CAREER**(SLO 1)  
  - Understand the effects time, stress, and organizational management have on performance.
  - Demonstrate an understanding of consistently practicing ethics and confidentiality in a workplace.
  - Examine the career/life planning process and relate its relevancy to the student.
  - Demonstrate an understanding of basic communication tools and their appropriate use.
  - Demonstrate an understanding of workplace etiquette.

- **DESCRIBE THE CAREER/LIFE PLANNING PROCESS AND RELATE ITS RELEVANCY TO ONE’S CAREER**(SLO 2)  
  - Link personal goals to long term achievement.
  - Display an understanding of creating a professional first impression.
  - Understand how networking is a powerful job search tool.
  - Understand necessary elements of a résumé.
  - Understand the importance of interview preparation.
Identify how continual learning increases career success.

DEMONSTRATE APPLICATION OF INDUSTRY KNOWLEDGE AND THEORETICAL CONCEPTS AS WRITTEN IN LEARNING OBJECTIVES IN PARTNERSHIP WITH THE EMPLOYER WORK SITE SUPERVISOR. (SLO 3)

Physics (PHYS)

PHYS 310 Conceptual Physics

Units: 3
Hours: 54 hours LEC
Prerequisites: None.
Advisory: MATH 100 or 102, or placement through the assessment process.
Transferable: CSU; UC (No credit for PHYS 310 if taken after PHYS 350, PHYS 360, PHYS 370, PHYS 380, PHYS 411, PHYS 411 or PHYS 431)
General Education: AA/AS Area IV; CSU Area B1; IGETC Area 5A
Catalog Date: June 1, 2020

This course provides a conceptual overview of Newtonian and modern physics for non-science and science students alike. The conceptual approach to physics is tied to the student's personal experience in the everyday world, so that the student learns to see physics not as just a classroom or laboratory activity, but as a part of his or her surroundings. The class is open to students with no previous physics background.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO #1: EXPLAIN THE SCIENTIFIC METHOD AND HOW SCIENTISTS APPLY IT TO UNDERSTANDING NATURE.
- SLO #2: EVALUATE SIMPLE AND COMMON MECHANICAL SYSTEMS USING CLASSICAL MECHANICS INCLUDING ONE- AND/OR TWO-DIMENSIONAL KINEMATICS, NEWTON'S LAWS OF MOTION, GRAVITATION, MOMENTUM, WORK AND ENERGY.
- determine the forces acting on a familiar system and draw the appropriate free body diagram.
- solve conceptual problems of a mechanical nature using kinematics, the laws of motion, gravitation, work and energy.
- solve simple numerical problems using kinematics and the laws of motion.
- SLO #3: EXPLAIN BASIC ATOMIC STRUCTURE AND DIFFERENT STATES OF MATTER
- describe basic atomic theory.
- compare and contrast solids, liquids and gases.
- solve conceptual problems applying the atomic theory of matter and the definitions of solid, liquid, gas and concepts such as density and fluid mechanics.
- SLO #4: EXPLAIN AND DEFINE HEAT, HEAT TRANSFER AND ITS RESULTS.
- compare and contrast heat and temperature.
- recognize the different ways in which heat can be transferred.
- discuss some effects of heat transfer such as temperature or phase change and thermal expansion.
- SLO #5: EXPLAIN THE SOURCES AND BEHAVIORS OF WAVES.
- recognize the different types of waves and discuss the quantities used to describe waves.
- discuss the wave nature of phenomena such as light and sound.
- SLO #6: EXPLAIN THE FUNDAMENTAL CONCEPTS AND DEFINITIONS RELATED TO CHARGE AND CHARGE INTERACTIONS INCLUDING BASIC ELECTRICAL CIRCUITS.
- compare and contrast electrostatic and magnetic forces and the dependence of each on charge, distance, motion, etc.
- explain the terms potential difference and current, their relation to each other and application to basic DC circuits.
- solve conceptual problems applying the basic theories of electricity and magnetism and DC circuit analysis.
- solve simple numerical problems using the basic theories of DC circuit analysis.
PHYS 350 General Physics

This course, the first semester of General Physics, is a transferable course required for many life science and other majors and may also be taken for general education credit. Materials covered will include classical mechanics (including kinematics, statics, dynamics, Newton's Laws, energy and momentum conservation, rigid body motion and oscillatory motion), fluid mechanics, mechanical waves (including sound), and thermodynamics.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- APPLY APPROPRIATELY NEWTON'S LAWS OF MOTION TO MECHANICAL SYSTEMS, DEVELOP AND ARTICULATE A NEWTONIAN WORLDVIEW (SLO 1; PSLO 2, 4)
- differentiate between terms that describe motion such as displacement, velocity and acceleration.
- compare and contrast vector and scalar quantities.
- analyze a mechanical system to identify all external forces acting on it, and using Newton's Laws of Motion, predict the resulting motions of the system.
- evaluate mechanical systems for conserved quantities such as momentum or mechanical energy, and use these conserved quantities to predict the motion.
- recognize the forces resulting in oscillations and mechanical waves and correctly apply definitions and mechanical concepts to these systems to make predictions.
- DEVELOP CONNECTIONS BETWEEN THE BEHAVIOR OF ATOMS AND MOLECULES AND THE MACROSCOPIC QUANTITIES PHYSICISTS USE TO DESCRIBE SYSTEMS THROUGH THE APPLICATION OF THERMODYNAMIC PRINCIPLES (SLO 2; PSLO 2, 4)
- distinguish between pressure, temperature, heat, internal energy and their relation to the molecules of a system.
- evaluate thermodynamic systems using the Laws of Thermodynamics.
- SOLVE CONCEPTUAL, SYMBOLIC AND NUMERIC PHYSICAL PROBLEMS AT AN APPROPRIATE LEVEL USING MATH THROUGH COLLEGE ALGEBRA AND TRIGONOMETRY. MORE SPECIFICALLY, STUDENTS WILL BE ABLE TO DIFFERENTIATE BETWEEN DIFFERENT TYPES OF PROBLEMS, EVALUATE THE GIVEN DATA FOR ITS SIGNIFICANCE, FORMULATE A SOLUTION STRATEGY, AND EVALUATE THE RESULTS. (SLO 3; PSLO 3)
- identify and analyze conceptual, symbolic and numeric problems in one- and two-dimensional motion, formulate solution strategies and evaluate results.
- analyze conceptual, symbolic and numeric dynamics, statics, circular motion and gravitation problems using Newton's Laws, formulate solution strategies and evaluate results.
- graphically and mathematically add and subtract vectors.
- identify mechanical systems appropriate to the application of the work-energy theorem, apply this theorem to conceptual, symbolic and quantitative problems and evaluate results.
- identify and analyze conceptual, symbolic, and quantitative problems applying the conservation of mechanical energy and/or linear momentum, formulate solution strategies and evaluate results.
- identify and analyze conceptual, symbolic, and quantitative problems applying the concepts, definitions and principles of rotational motion, including rotational kinematics, torque, rotational inertia, mechanical energy, and angular momentum, formulate solution strategies and evaluate results.
- identify and analyze conceptual, symbolic, and quantitative problems applying the concepts, definitions and principles of simple harmonic motion and mechanical waves, including pendulums and spring oscillators, waves on a string and sound, and wave interference, formulate solution strategies and evaluate results.
- identify and analyze conceptual, symbolic, and quantitative problems applying the concepts, definitions and principles of thermodynamics, including temperature, thermal expansion, heat transfer and calorimetry, formulate solution strategies and evaluate results.
- identify and analyze conceptual, symbolic and quantitative problems of thermodynamic systems using the Laws of Thermodynamics, formulate solution strategies and evaluate results.

- MODEL BASIC LAB SKILLS AND APPLY AND EVALUATE METHODS FOR DISPLAYING AND INTERPRETING EXPERIMENTAL DATA.  
  (SLO 4; PSLO 5, 6)

- design, conduct, analyze and interpret scientific experiments in the fields of mechanics and thermodynamics.

- demonstrate skilled laboratory techniques, including use of metersticks, timing devices, thermometers, computer-aided data acquisition devices, etc.

- create graphical representations of experimental data to clearly demonstrate trends, and use those representations to formulate conclusions relevant to mechanical and thermodynamic systems.

**PHYS 360 General Physics**

**Units:** 4  
**Hours:** 54 hours LEC; 54 hours LAB  
**Prerequisites:** PHYS 350 with a grade of "C" or better  
**Transferable:** 
CSU; UC (PHYS 350, 360, 370, 380, 411, 421, 431 combined: maximum transfer credit of one series*; deduct credit for duplication of topics)  
**General Education:** 
CSU Area B1; CSU Area B3; IGETC Area 5A; IGETC Area 5C  
**C-ID:** C-ID PHYS 110; Part of C-ID PHYS 100S  
**Catalog Date:** June 1, 2020

This course, the second semester of General Physics, is a transferable course required for many life science and other students. Material covered will include classical electricity and magnetism (electrostatics, electric fields and potentials, magnetic fields, electromagnetic induction and electromagnetic radiation), DC and AC circuits, light, geometric and wave optics, special relativity, atomic structure, quantum physics and nuclear physics.

**Student Learning Outcomes**

Upon completion of this course, the student will be able to:

- **SLO #1 – EVALUATE A PHYSICAL SYSTEM FOR ELECTROMAGNETIC INTERACTIONS, PROPERLY APPLY THE LAWS OF ELECTRICITY AND MAGNETISM TO PHYSICAL SYSTEMS, AND INTEGRATE THIS INTO A NEWTONIAN VISION OF THE UNIVERSE.**

  - Evaluate motions of charges in electric and magnetic systems using Newtonian mechanics including forces, work and energy.

  - Generate appropriate shapes and relative magnitudes of electric and magnetic fields based on different charge and/or current distributions.

  - Predict the behavior of simple DC electrical circuits using power sources, resistors and capacitors.

  - Compare and contrast the different regions of the electromagnetic spectrum based on frequency and/or wavelength.

- **SLO #2 – DEVELOP AND ARTICULATE A BASIC UNDERSTANDING OF THE BRANCHES OF MODERN PHYSICS INCLUDING SPECIAL RELATIVITY AND QUANTUM PHYSICS.**

  - Critique classical physics and assess its limitations. More specifically, the student will evaluate physical phenomena that classical physics does not adequately explain.

  - Discuss the quantum mechanical model of the atom.

- **SLO #3 – SOLVE CONCEPTUAL, SYMBOLIC AND NUMERIC PHYSICAL PROBLEMS AT AN APPROPRIATE LEVEL USING MATH THROUGH TRIGONOMETRY AND COLLEGE ALGEBRA.**BY RECOGNIZING DIFFERENT TYPES OF PROBLEMS, EVALUATING THE GIVEN INFORMATION FOR ITS SIGNIFICANCE, FORMULATING A SOLUTION STRATEGY, AND EVALUATING THE RESULTS.

  - Identify and analyze conceptual, symbolic and numeric problems of the electric and magnetic fields and forces, formulate solution strategies and evaluate results.

  - Identify and analyze conceptual, symbolic and numeric electrostatic energy problems including electric potential, formulate solution strategies and evaluate results.

  - Identify and analyze conceptual, symbolic, and numeric problems of DC circuits, formulate solution strategies and evaluate results.

  - Identify and analyze conceptual, symbolic, and quantitative problems of electromagnetic induction, formulate solution strategies and evaluate results.

  - Identify and analyze conceptual, symbolic, and quantitative problems of the ray and wave natures of light including reflection, refraction, mirrors and thin lenses, interference and polarization, formulate solution strategies and evaluate results.

  - Identify and analyze conceptual, symbolic, and quantitative problems of the modern physics including special relativity and introductory quantum physics. Formulate solution strategies and evaluate results.
Student Learning Outcomes

Upon completion of this course, the student will be able to:

- **SLO #1** – develop and articulate a Newtonian worldview. The student will appropriately apply Newton’s Laws of motion to mechanical systems, will recognize prior misconceptions about the mechanical universe and replace them with correct concepts.

- differentiate between terms that describe motion such as displacement, velocity and acceleration.

- compare and contrast vector and scalar quantities.

- analyze a system to identify all external forces acting on it.

- evaluate a mechanical system using Newton’s Laws of Motion, apply these laws to the system, predict the resulting motions.

- evaluate mechanical systems for conserved quantities, determine the quantities that are conserved, and defend these conclusions.

- **SLO #2** – develop connections between the behavior of atoms and molecules and the macroscopic quantities physicists use to describe systems through the application of thermodynamic principles

- distinguish between pressure, temperature, heat, internal energy and their relation to the molecules of a system.

- evaluate thermodynamic systems using the Laws of Thermodynamics.

- **SLO #3** – solve conceptual, symbolic and numeric physical problems at an appropriate level using math through trigonometry and basic calculus. More specifically, students will be able to differentiate between different types of problems, evaluate the given data for its significance, formulate a solution strategy, and evaluate the results.

- identify and analyze conceptual, symbolic and numeric problems in one- and two-dimensional motion, formulate solution strategies and evaluate results.

- analyze conceptual, symbolic and numeric dynamics, statics, circular motion and gravitation problems using Newton’s Laws, formulate solution strategies and evaluate results.

- graphically and mathematically add and subtract vectors.

- identify mechanical systems appropriate to the application of the work-energy theorem, apply this theorem to conceptual, symbolic and quantitative problems and evaluate results.

**PHYS 370 Introductory Physics - Mechanics and Thermodynamics**

**Units:** 5  
**Hours:** 72 hours LEC; 54 hours LAB  
**Prerequisite:** MATH 350 with a grade of “C” or better  
**Transferable:** CSU; UC (PHYS 350, 360, 370, 380, 411, 421, 431 combined: maximum transfer credit of one series; deduct credit for duplication of topics)  
**General Education:** AA/AS Area IV; CSU Area B1; CSU Area B3; IGETC Area 5A; IGETC Area 5C  
**C-ID:** C-ID PHYS 105; Part of C-ID PHYS 100S  
**Catalog Date:** June 1, 2020

This course, the first semester of the Introductory Physics sequence, is designed for students transferring to programs which require two semesters of calculus-based physics such as some life science and architecture programs. Material covered will include classical mechanics (kinematics, statics, dynamics, Newton’s Laws, work, conservation of mechanical energy and momentum, rotations and oscillations), fluid mechanics, mechanical waves including sound, and thermodynamics. Basic calculus skills will be assumed in the derivation and application of physical principles.
identify and analyze conceptual, symbolic, and quantitative problems applying the conservation of mechanical energy and/or linear momentum, formulate solution strategies and evaluate results.

identify and analyze conceptual, symbolic, and quantitative problems applying the concepts, definitions and principles or rotational motion, including rotational kinematics, torque, rotational inertia, mechanical energy, and angular momentum. Formulate solution strategies and evaluate results.

identify and analyze conceptual, symbolic, and quantitative problems applying the concepts, definitions and principles or simple harmonic motion and mechanical waves, including pendulums and spring oscillators, waves on a string and sound, and wave interference. Formulate solution strategies and evaluate results.

identify and analyze conceptual, symbolic, and quantitative problems applying the concepts, definitions and principles or thermodynamics, including temperature, thermal expansion, heat transfer and calorimetry. Formulate solution strategies and evaluate results.

identify and analyze conceptual, symbolic and quantitative problems of thermodynamic systems using the Laws of Thermodynamics laws, formulate solution strategies and evaluate results.

SLO #4 – develop basic lab skills and apply and evaluate methods for displaying and interpreting experimental data.

design, conduct, analyze and interpret scientific experiments in the fields of mechanics and thermodynamics.

demonstrate skilled laboratory techniques, including use of metersticks, timing devices, thermometers, etc.

create graphical representations of experimental data to clearly demonstrate trends, and use those representations to formulate conclusions relevant to mechanical and thermodynamic systems.

PHYS 380 Introductory Physics - Electricity and Magnetism, Light and Modern Physics

Units: 5
Hours: 72 hours LEC; 54 hours LAB
Pre-requisite: PHYS 370 with a grade of "C" or better
Transferable: CSU; UC (PHYS 350, 360, 370, 380, 411, 421, 431 combined: maximum transfer credit of one series*; deduct credit for duplication of topics)
General Education: CSU Area B1; CSU Area B3; IGETC Area 5A; IGETC Area 5C
C-ID: C-ID PHYS 110; Part of C-ID PHYS 100S
Catalog Date: June 1, 2020

This course, the second semester of the Introductory Physics sequence, is designed for students transferring to programs which require two semesters of calculus-based physics such as some life science and architecture programs. Material covered will include electrostatics, electrical circuits and devices, magnetism, light, and modern physics (including special relativity, quantum, atomic and nuclear physics). Basic calculus skills will be assumed in the derivation and application of physical principles.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO #1 – evaluate a physical system for electromagnetic interactions, properly apply the laws of electricity and magnetism to physical systems, and integrate this into a Newtonian vision of the universe.
- evaluate motions of charges in electric and magnetic systems using Newtonian mechanics including forces, work and energy.
- generate appropriate shapes and relative magnitudes of electric fields based on different charge and/or current distributions.
- predict the behavior of simple DC electrical circuits using power sources, resistors and capacitors.
- compare and contrast the different regions of the electromagnetic spectrum based on frequency and/or wavelength.
- SLO #2 – develop a basic understanding of the branches of modern physics including Special Relativity and Quantum Physics.
- critique classical physics and assess its limitations. More specifically, the student will evaluate physical phenomena that classical physics can not adequately explain.
- design a working quantum mechanical model of the atom.
- SLO #3 – solve conceptual, symbolic and numeric physical problems at an appropriate level using math through trigonometry and basic calculus. More specifically, students will be able to differentiate between different types of problems, evaluate the given data for its significance, formulate a solution strategy, and evaluate the results.
- identify and analyze conceptual, symbolic and numeric problems of the electric field and force, formulate solution strategies and evaluate results.
- identify and analyze conceptual, symbolic and numeric electrostatic energy problems including electric potential, formulate solution strategies and evaluate results.

- identify and analyze conceptual, symbolic, and numeric problems of DC circuits, formulate solution strategies and evaluate results.

- identify and analyze conceptual, symbolic, and numeric problems of magnetic fields and forces, formulate solution strategies and evaluate results.

- identify and analyze conceptual, symbolic, and quantitative problems of electromagnetic induction.

- identify and analyze conceptual, symbolic, and quantitative problems of the ray nature of light including reflection, refraction, mirrors and thin lenses. Formulate solution strategies and evaluate results.

- identify and analyze conceptual, symbolic, and quantitative problems of the wave nature of light including interference and polarization. Formulate solution strategies and evaluate results.

- identify and analyze conceptual, symbolic, and quantitative problems of the modern physics including special relativity and introductory quantum physics. Formulate solution strategies and evaluate results.

- SLO #4 – develop basic lab skills and apply and evaluate methods for displaying and interpreting experimental data.

- design, conduct, analyze and interpret scientific experiments in the fields of electricity and magnetism, light and modern physics.

- design and build simple DC circuits using power sources, resistors and capacitors.

- demonstrate skilled laboratory techniques, including use of multimeters.

- create graphical representations of experimental data to clearly demonstrate trends, and use those representations to formulate conclusions relevant to electromagnetic systems and light.

**PHYS 411 Mechanics of Solids and Fluids**

**Units:** 4

**Hours:** 54 hours LEC; 54 hours LAB

**Prerequisites:** MATH 400 with a grade of "C" or better

**Transferable:**
- CSU; UC (PHYS 350, 360, 370, 380, 411, 421, 431 combined: maximum transfer credit of one series; deduct credit for duplication of topics)

**General Education:**
- AA/AS Area IV; CSU Area B1; CSU Area B3; IGETC Area 5A; IGETC Area 5C

**C-ID:** C-ID PHYS 205; Part of C-ID PHYS 200S

**Catalog Date:** June 1, 2020

The course examines the fundamentals of mechanics: vectors, kinematics, Newton's laws of motion, work, energy, momentum, conservation principles, oscillations, fluids, and gravitation. This course is recommended for students studying the Physical Sciences, Engineering, and Computer Information Science, as well as some students studying Architecture or Mathematics.

**Student Learning Outcomes**

Upon completion of this course, the student will be able to:

- DEVELOP AND ARTICULATE A NEWTONIAN WORLDVIEW AND APPROPRIATELY APPLY NEWTON'S LAWS OF MOTION TO MECHANICAL SYSTEMS. (SLO 1, PSLO 2)

- differentiate between terms that describe motion such as displacement, velocity and acceleration.

- compare and contrast vector and scalar quantities.

- analyze a mechanical system to identify all external forces acting on it, and using Newton's Laws of Motion, predict the resulting motions of the system.

- evaluate mechanical systems for conserved quantities such as momentum or mechanical energy, and use these conserved quantities to predict the motion.

- recognize the forces that produce oscillatory motion and correctly apply definitions and mechanical concepts to these systems to predict the motion.

- SOLVE CONCEPTUAL, SYMBOLIC AND NUMERIC PHYSICAL PROBLEMS AT AN APPROPRIATE LEVEL USING MATH THROUGH CALCULUS. MORE SPECIFICALLY, STUDENTS WILL BE ABLE TO DIFFERENTIATE BETWEEN DIFFERENT TYPES OF PROBLEMS, EVALUATE THE GIVEN DATA FOR ITS SIGNIFICANCE, FORMULATE A SOLUTION STRATEGY, AND EVALUATE THE RESULTS. (SLO 2, PSLO 3)

- identify and analyze conceptual, symbolic and numeric problems in one- and two-dimensional motion, formulate solution strategies and evaluate results.
analyze conceptual, symbolic and numeric dynamics, statics, circular motion and gravitation problems using Newton's Laws, formulate solution strategies and evaluate results.

graphically and mathematically add and subtract vectors, and calculate the vector and scalar products.

identify mechanical systems appropriate to the application of the work-energy theorem, apply this theorem to conceptual, symbolic and quantitative problems and evaluate results.

identify and analyze conceptual, symbolic, and quantitative problems applying the conservation of mechanical energy and/or linear momentum, formulate solution strategies and evaluate results.

identify and analyze conceptual, symbolic, and quantitative problems applying the concepts, definitions and principles or rotational motion, including rotational kinematics, torque, rotational inertia, mechanical energy, and angular momentum, formulate solution strategies and evaluate results.

identify and analyze conceptual, symbolic, and quantitative problems applying the concepts, definitions and principles of simple harmonic motion, formulate solution strategies and evaluate results.

identify and analyze conceptual, symbolic, and quantitative problems of fluid statics and dynamics, formulate solution strategies and evaluate results.

DEVELOP BASIC LAB SKILLS AND APPLY AND EVALUATE METHODS FOR DISPLAYING AND INTERPRETING EXPERIMENTAL DATA. (SLO 3, PSLO 5 & 6)

design, conduct, analyze and interpret scientific experiments in the field of mechanics.

demonstrate skilled laboratory techniques, including use of metersticks, timing devices, and computer-aided data acquisition devices.

create graphical representations of experimental data to clearly demonstrate trends, and use those representations to formulate conclusions relevant to mechanical systems.

evaluate experimental procedures, data and results in writing.

PHYS 421 Electricity and Magnetism

Students will be able to:

SLO#1--DEVELOP AND ARTICULATE AN UNDERSTANDING OF ELECTROMAGNETIC SYSTEMS AND IN SOME CASES HOW THEY INTEGRATE INTO A NEWTONIAN WORLDVIEW.

demonstrate a basic understanding of electric and magnetic fields and the forces associated with them.

demonstrate a basic understanding of electric potential and potential energy.

demonstrate a basic understanding of induction and how it relates to mechanical motion.

demonstrate a basic understanding of electric current, resistance, capacitance, electromagnetic force (emf) and dielectrics.

demonstrate proper usage of measuring devices such as ammeters, voltmeters, ohmmeters and oscilloscopes.

SLO#2--SOLVE CONCEPTUAL, SYMBOLIC AND NUMERICAL PHYSICAL PROBLEMS INVOLVING ELECTROMAGNETIC INTERACTIONS AT AN APPROPRIATE LEVEL USING MATH UP TO AND INCLUDING CALCULUS.

apply definitions and physical laws to solve conceptual and analytic problems of an electric and/or magnetic nature.

identify, analyze and solve quantitative problems of an electric and/or magnetic nature requiring the application of vector components and vector sums and products.
- construct and evaluate integrals in problems involving Gauss' Law, electric fields and potentials of charge distributions, Ampere's Law, and the Biot-Savart Law.
- calculate the resistance of materials given their shape and resistivity.
- solve problems that include resistors or capacitors in series or in parallel.
- discuss the theory and applications of resistors, capacitors and inductors (e.g. in RC, LC and RLC circuits).
- demonstrate a basic understanding of electric field, potential, current, magnetic field and induction.
- identify and solve problems involving electromagnetic induction by using Faraday's and Lenz's Laws.
- use Kirchhoff's Rules to solve DC and AC circuits.
- analyze and solve quantitative AC circuit problems using reactance, impedance and phasor diagrams.
- demonstrate a basic understanding of the propagation of electromagnetic radiation and Maxwell's equations.
- SLO#3--DEVELOP BASIC LAB SKILLS AND APPLY AND EVALUATE METHODS FOR DISPLAYING AND INTERPRETING EXPERIMENTAL DATA.
- design, build, analyze and quantitatively solve basic AC and DC circuits that include electric sources, resistors, capacitors and/or inductors.
- operate basic electric measuring devices including multimeters and oscilloscopes.
- create and analyze graphical representations of experimental data.
- clearly communicate experimental procedures, data and results in writing.

PHYS 431 Heat, Waves, Light and Modern Physics

**Units:** 4
**Hours:** 54 hours LEC; 54 hours LAB
**Prerequisite:** MATH 401 and PHYS 411 with grades of "C" or better
**Transferable:** CSU; UC (PHYS 350, 360, 380, 411, 421, 431 combined: maximum transfer credit of one series; deduct credit for duplication of topics)
**General Education:** CSU Area B1; CSU Area B3; IGETC Area 5A; IGETC Area 5C
**C-ID:** C-ID PHYS 215; Part of C-ID PHYS 200S
**Catalog Date:** June 1, 2020

This course examines the fundamentals of thermodynamics, waves and modern physics. Topics include temperature, heat, kinetic theory of gases, thermodynamics, mechanical waves, sound, light reflection and refraction, interference and diffraction, optics, lasers, special relativity, quantum physics, atomic physics, nuclear physics, and particle physics.

**Student Learning Outcomes**

Upon completion of this course, the student will be able to:

- SLO#1--DEVELOP AND ARTICULATE A BASIC UNDERSTANDING OF THERMODYNAMIC SYSTEMS, WAVE PROPERTIES, SOUND, REFLECTION AND REFRACTION OF LIGHT, GEOMETRICAL OPTICS AND MODERN PHYSICS THAT INCLUDES RELATIVITY, QUANTUM PHYSICS, AND NUCLEAR PHYSICS.
- apply the concepts of basic thermodynamics and elementary statistical mechanics.
- construct a conceptual understanding and intuition for the fundamental principles of mechanical waves including standing waves, normal modes and sound.
- apply the concepts of mechanical waves and basic electromagnetic theory to describe light (electromagnetic radiation) and its properties including reflection, refraction, polarization, geometric and wave optics.
- construct a conceptual understanding and intuition for the fundamental principles of special relativity.
- construct a conceptual understanding and intuition for the fundamental principles of quantum, nuclear and particle physics.
- SLO#2--SOLVE CONCEPTUAL, SYMBOLIC AND NUMERIC PHYSICAL PROBLEMS AT AN APPROPRIATE LEVEL USING MATH UP TO CALCULUS.
- identify and solve problems of thermodynamics systems that include heat capacities, heat transfer, calorimetry, heat engines, entropy and PV diagrams.
- solve problems dealing with mechanical waves, sound, standing waves, and normal modes.
• identify and solve problems dealing with the laws of reflection and refraction (Snell's Law) and polarization.
• solve problems dealing with lenses and/or mirrors and create ray-tracing diagrams to identify the location of images.
• prove the laws of reflection and refraction using Huygen’s and/or Fermat’s principles.
• solve basic problems dealing with special relativity.
• solve basic problems in the areas of elementary quantum, nuclear and particle physics.
• SLO#3--DEVELOP BASIC LAB SKILLS AND APPLY AND EVALUATE METHODS FOR DISPLAYING AND INTERPRETING EXPERIMENTAL DATA.
• design, build, conduct and analyze experiments in the field of thermodynamics, mechanical waves, sound, geometrical optics, and modern physics.
• create and analyze graphical representations of experimental data and compare them to theoretical predictions.
• clearly communicate experimental procedures, data and results in writing.

PHYS 495 Independent Studies in Physics

| Units: | 1 - 3 |
| Hours: | 54 - 162 hours LAB |
| Prerequisite: | None. |
| Transferable: | CSU |
| Catalog Date: | June 1, 2020 |

An independent studies project involves an individual student or small group of students in study, research, or activities beyond the scope of regularly offered courses. See the current catalog section of "Special Studies" for full details of Independent Studies.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

• SLO #1: Actively engage in intellectual inquiry beyond that required in order to pass a course of study (College Wide Learning Outcome – Area 4).
• Discuss and outline a proposal of study (that can be accomplished within one semester term) with a supervising instructor qualified within the discipline.
• Design an independent study (to be completed individually or by collaboration of a small group) to foster special knowledge, skills, and experience that are not available in any one regularly scheduled course.
• Use information resources to gather discipline-specific information.
• SLO #2: Utilize modes of analysis and critical thinking to apply theoretical perspectives and/or concepts in the major discipline of study to significant problems and/or educational activities (College Wide Learning Outcome – Area 3).
• Analyze and apply the knowledge, skills and experience that are involved in the independent study to theoretical perspectives and/or concepts in the major discipline of study.
• Explain the importance of the major discipline of study in the broader picture of society.
• SLO #3: Communicate a complex understanding of content matter of the major discipline of study (College Wide Outcome – Area 3).
• Demonstrate competence in the skills essential to mastery of the major discipline of study that are necessary to accomplish the independent study.
• SLO #4: Identify personal goals and pursue these goals effectively (College Wide Outcome – Area 4).
• Utilize skills from the "academic tool kit" including time management, study skills, etc., to accomplish the independent study within one semester term.

PHYS 498 Work Experience in Physics
This course provides students with opportunities to develop marketable skills in preparation for employment in their major field of study or advancement within their career. It is designed for students interested in work experience and/or internships in transfer level degree occupational programs. Course content includes understanding the application of education to the workforce; completion of required forms which document the student's progress and hours spent at the work site; and developing workplace skills and competencies. Appropriate level learning objectives are established by the student and the employer. During the semester, the student is required to participate in a weekly orientation and 75 hours of related paid work experience, or 60 hours of unpaid work experience for one unit. An additional 75 or 60 hours of related work experience is required for each additional unit. Work Experience may be taken for a total of 16 units when there are new or expanded learning objectives. Only one Work Experience course may be taken per semester.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- **DEMONSTRATE AN UNDERSTANDING AND APPLICATION OF PROFESSIONAL WORKPLACE BEHAVIOR IN A FIELD OF STUDY RELATED ONE'S CAREER. (SLO 1)**
  - Understand the effects time, stress, and organizational management have on performance.
  - Demonstrate an understanding of consistently practicing ethics and confidentiality in a workplace.
  - Examine the career/life planning process and relate its relevancy to the student.
  - Demonstrate an understanding of basic communication tools and their appropriate use.
  - Demonstrate an understanding of workplace etiquette.

- **DESCRIBE THE CAREER/LIFE PLANNING PROCESS AND RELATE ITS RELEVANCY TO ONE'S CAREER. (SLO 2)**
  - Link personal goals to long-term achievement.
  - Display an understanding of creating a professional first impression.
  - Understand how networking is a powerful job search tool.
  - Understand necessary elements of a résumé.
  - Understand the importance of interview preparation.
  - Identify how continual learning increases career success.

- **DEMONSTRATE APPLICATION OF INDUSTRY KNOWLEDGE AND THEORETICAL CONCEPTS AS WRITTEN IN LEARNING OBJECTIVES IN PARTNERSHIP WITH THE EMPLOYER WORK SITE SUPERVISOR. (SLO 3)**
Plant Science | Cosumnes River College

This CRC program offers courses designed for students in the Agriculture, Agriculture Business, and Horticulture programs.

reitzn@crc.losrios.edu

Plant Science (PLTS)

PLTS 300 Introduction to Plant Science

3 units
36 hours LEC; 54 hours LAB
None.
CSU; UC
AA/AS Area IV
June 1, 2020

This course is designed to provide the students with a working knowledge of the fundamental structures and processes of plants. Principles to be applied cover plant structures, physiology, heredity, environmental relationship to growth, adaptation, and management of crops. Techniques of research, exploration of plant growth, and identification of economical crops will be included. Fields trips may be required.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO 1: Demonstrate independent learning and effective communication skills.
  - Operate independently by attending class regularly.
  - Utilize time management effectively and prioritize tasks to meet deadlines.
  - Communicate effectively (orally and/or written)

- SLO 2: Demonstrate a fundamental understanding of the California agriculture industry.
  - Identify the major markets of the agriculture industry and verify how these markets function in their county in the state of California.
  - Identify and evaluate the various agricultural occupations and the associated employment requirements and opportunities.
  - Identify and evaluate common practices of various agricultural business types.

- SLO 3: Demonstrate a fundamental understanding of basic botany and plant genetics as it relates to plant science and production agriculture.
  - Assess the role of plant cells, cells structures, and basic genetics in vegetative development, plant growth, and plant production.
  - Recognize the major structures of plants and explain the function of each major plant structure.
  - Identify and explain the requirements of plant growth.
  - Explain plant identification and botanical terminology.
  - Examine the role of plants in genetic engineering and biotechnology.
  - Analyze the characteristics and qualities of agronomic, vegetable, and ornamental crops.
Assess plant propagation through sexual and asexual methods.

SLO 4: Demonstrate a fundamental understanding of soils and soil-water, soil-water-plant relationships. Explain soil development and structure, and describe sustainable soil maintenance and management practices.

Evaluate various plant species’ nutritional needs, and measure, mix, and apply fertilizers.

Evaluate soil-water and soil-water-plant relationships.

Evaluate water efficient irrigation methods and estimate watering needs.

SLO 5: Demonstrate a fundamental understanding of common agricultural practices.

Identify common agricultural / horticultural tools and equipment.

Describe the methods utilized to plant and care for various crops.

Compare various cultural practices, and the resulting effect of each on plant health and development.

Describe the process of plant selection.

Recognize symptoms and signs of plant diseases and pests, and identify past damage.

Identify and explain common integrated pest management practices.

Analyze the methods and practices utilized in the establishment, production, and management of vegetable crops.

Analyze the methods and practices utilized in the establishment, production, and management of fruit and nut crops.

Analyze the methods and practices utilized in the establishment, production, and management of flower and foliage crops.

Analyze the methods and practices utilized in the establishment, production, and management of forage and ornamental grasses.

Evaluate the some of the roles plants play in herbology and pharmacology.

---

PLTS 310 Soils, Soil Management, and Plant Nutrition

Same As: HORT 302
Units: 3
Hours: 36 hours LEC; 54 hours LAB
Prerequisite: None.
Advisory: CSU; UC
Transferable: AA/AS Area IV; CSU Area B1; CSU Area B3; IGETC Area 5A; IGETC Area 5C
C-ID AG - PS 128L
Catalog Date: June 1, 2020

This course provides a basic knowledge of the physical, chemical, and biological properties of soils. The course includes factors of: fundamental soil properties, soil and plant relationships, principles of soil formation, fertilizers and soil management, salinity, pH, erosion management, and non-agricultural uses. Field trips may be required. This course is the same as Hort 302, and only one may be taken for credit.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO 1: Demonstrate independent learning and effective communication skills.
- Operate independently by attending and / or logging into class regularly when the course is offered online or an online component is utilized as part of the course.
- Utilize time management effectively and prioritize tasks to meet deadlines.
- Demonstrate effective oral and written communication.
- SLO 2: Demonstrate a fundamental understanding of the physical and chemical properties of soils.
- Apply the Scientific Method of research through soils and plant specific laboratory applications.
- Compare the textural classes of soil through laboratory analysis.
- Explain the role of soil structure and evaluate the effects of tillage management in soil productivity.
• Analyze the physical, chemical, and biological properties of soils, and understand their formation and how they are reservoirs for nutrients, water, and microscopic life.

• Assess the physical and chemical properties of soil through laboratory analysis.

• SLO 3: Demonstrate a fundamental understanding of the role of soil in plant nutrition.

• Identify the chemical elements necessary for plant growth through laboratory analysis.

• Diagnose common chemical deficiency and toxicity symptoms.

• Examine common cultural practices utilized to keep a soil's nutritional elements in an adequate supply and proper balance.

• Validate the fundamentals of plant nutrition through laboratory analysis.

• SLO 4: Demonstrate a fundamental understanding of best soil management practices in sustainable horticulture.

• Explain why our soils, as a natural resource, must be managed and preserved.

• Demonstrate how to effectively manage the physical, chemical, and biological properties of soils for sustained productivity.

• Examine the methods and means of utilizing organic matter to improve soil structure, support soil biology, and to maintain and stimulate soil health.

• Analyze the effects of soil compaction in crop production and horticultural situations, and explain common methods utilized to alleviate soil compaction.

• Analyze the effects of soil erosion in crop production and horticultural situations, and explain common methods utilized to prevent soil erosion.

• Explain why irrigated soils must be managed in special ways to preserve its productivity.

• Explain the effects of salts and high sodium levels on soil structure, pH, drainage, and plant productivity.

• Validate the fundamentals of soil management through laboratory analysis.

PLTS 332 Integrated Pest Management

Same As: HORT 303
Units: 3
Hours: 36 hours LEC; 54 hours LAB
Prerequisite: None.
Advisory: HORT 300 and PLTS 300
Transferable: CSU
Catalog Date: June 1, 2020

This course is a study of local plant pests including weeds, diseases, invertebrates, and vertebrates. It includes recognition of symptoms and causes, life cycle of the pests, host and habitat relationships, and the integrated pest management strategies and best management practices to achieve control. Field trips may be required. This course is the same as HORT 303, and only one may be taken for credit.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

• SLO 1: Demonstrate independent learning and effective communication skills.

• Operate independently by attending or logging into class regularly.

• Utilize time management effectively and prioritize tasks to meet deadlines.

• Demonstrate effective oral and written communication.

• SLO 2: Demonstrate a fundamental understanding of jobsite safety and effective and efficient work habits.

• Validate and demonstrate safety consciousness in work dress/apparel, tool use, jobsite demeanor, and personal protective equipment use.

• Assess jobsite hazards, reduce work related risks, and influence others to work in a safe and efficient manner.

• Select appropriate personal protective equipment for a given pesticide.

• Demonstrate the safe and efficient use of pesticide application equipment.

• SLO 3: Assess, evaluate, and implement the principles and practices of integrated pest management.
- Evaluate the economic significance of plant pest problems in horticulture.
- Assess the reasons conventional pest control options are no longer desirable.
- Demonstrate the ability to diagnose and analyze pest damage, recommend integrated pest management strategies, and select proper control measures.
- Identify insects and closely related plant pests, common diseases and abiotic plant disorders, weed species, and beneficial organisms as evident from existing signs and symptoms.
- Compare and contrast various methods of conventional and integrated pest management strategies.
- Demonstrate the ability to safely and accurately prepare pesticide application equipment.
- Demonstrate the ability to safely and efficiently operate pesticide application equipment through the application of pesticide materials during a simulated exercise.
- Formulate a seasonal pest management plan using the principles of integrated pest management.

SLO 4: Demonstrate a fundamental understanding of licensing and/or certification, and business and professional standards in integrated pest management.

- Analyze landscape pest management professions and identify and explain requirements for employment and/or licensing or certification.
- Recognize and explain the benefits of additional/supplemental licensing and certification through state agencies and professional associations.
- Examine and explain the California state Department of Pesticide Regulation laws and regulations, and the CDPR rules governing the Qualified Applicator's Certificate and Landscape Maintenance Gardener's pesticide license.
- Validate and demonstrate the importance of professionalism in the landscape industry, and described the professional industry associations and certification programs.
- Recognize and explain the standard practices of various types of landscape construction/maintenance businesses, including estimating and bidding procedures, business practices, and working with state agencies.

An independent studies project involves an individual student or small group of students in study, research, or activities beyond the scope of regularly offered courses. See the current catalog section of "Special Studies" for full details of Independent Studies.

### Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO #1: Actively engage in intellectual inquiry beyond that required in order to pass a course of study (College Wide Learning Outcome – Area 4).
- Discuss and outline a proposal of study (that can be accomplished within one semester term) with a supervising instructor qualified within the discipline.
- Design an independent study (to be completed individually or by collaboration of a small group) to foster special knowledge, skills, and experience that are not available in any one regularly scheduled course.
- Use information resources to gather discipline-specific information.
- SLO #2: Utilize modes of analysis and critical thinking to apply theoretical perspectives and/or concepts in the major discipline of study to significant problems and/or educational activities (College Wide Learning Outcome – Area 3).
- Analyze and apply the knowledge, skills and experience that are involved in the independent study to theoretical perspectives and/or concepts in the major discipline of study.
- Explain the importance of the major discipline of study in the broader picture of society.
- SLO #3: Communicate a complex understanding of content matter of the major discipline of study (College Wide Outcome – Area 3).
- Demonstrate competence in the skills essential to mastery of the major discipline of study that are necessary to accomplish the independent study.

- SLO #4: Identify personal goals and pursue these goals effectively (College Wide Outcome – Area 4).

- Utilize skills from the "academic tool kit" including time management, study skills, etc., to accomplish the independent study within one semester term.

This course provides students with opportunities to develop marketable skills in preparation for employment in their major field of study or advancement within their career. It is designed for students interested in work experience and/or internships in transfer level degree occupational programs. Course content includes understanding the application of education to the workforce; completion of required forms which document the student's progress and hours spent at the work site; and developing workplace skills and competencies. Appropriate level learning objectives are established by the student and the employer. During the semester, the student is required to participate in a weekly orientation and 75 hours of related paid work experience, or 60 hours of unpaid work experience for one unit. An additional 75 or 60 hours of related work experience is required for each additional unit. Work Experience may be taken for a total of 16 units when there are new or expanded learning objectives. Only one Work Experience course may be taken per semester.

### Student Learning Outcomes

Upon completion of this course, the student will be able to:

- **DEMONSTRATE AN UNDERSTANDING AND APPLICATION OF PROFESSIONAL WORKPLACE BEHAVIOR IN A FIELD OF STUDY RELATED ONE’S CAREER.(SLO 1)**
  - Understand the effects time, stress, and organizational management have on performance.
  - Demonstrate an understanding of consistently practicing ethics and confidentiality in a workplace.
  - Learn the career/life planning process and relate its relevancy to the student.
  - Demonstrate an understanding of basic communication tools and their appropriate use.
  - Demonstrate an understanding of workplace etiquette.

- **DESCRIBE THE CAREER/LIFE PLANNING PROCESS AND RELATE ITS RELEVANCY TO ONE’S CAREER.(SLO 2)**
  - Link personal goals to long term achievement.
  - Display an understanding of creating a professional first impression.
  - Understand how networking is a powerful job search tool.
  - Understand necessary elements of a résumé.
  - Understand the importance of interview preparation.
  - Identify how continual learning increases career success.

- **DEMONSTRATE APPLICATION OF INDUSTRY KNOWLEDGE AND THEORETICAL CONCEPTS AS WRITTEN IN LEARNING OBJECTIVES IN PARTNERSHIP WITH THE EMPLOYER WORK SITE SUPERVISOR.(SLO 3)**
Political Science  
| Cosumnes River College

The study of political science and international relations involves not only the examination of the structure of government and political systems but the examination of the interaction of individuals and institutions within those systems. These courses offer valuable insight into events on the local, state, national and international levels and they also encourage involvement of the citizenry.

Associate Degree for Transfer

A.A.-T. in Political Science

The Associate in Arts for Transfer degree in Political Science provides a clearly articulated curricular track for students who wish to transfer to a UC or CSU campus, while also serving the diverse needs of students interested in the breadth and depth of the field of Political Science. Additionally, this degree exposes students to the core principles and practices of the field in order to build a foundation for their future personal, academic, or vocational paths.

Note: It is highly recommended that students consider an internship offered by a participating agency or department.

The Associate in Arts degree in Political Science for Transfer provides students with a major that fulfills the general requirements of the California State University for transfer. Students with this degree will receive priority admission with junior status to the California State University system. The Associate in Arts degree in Political Science for Transfer (AA-T) may be obtained by the completion of 60 transferable, semester units with a minimum 2.0 GPA, including (a) the major or area of emphasis described in the Required Program outlined below (earning a C or better in these courses) and (b) either the Intersegmental General Education Transfer Curriculum (IGETC) or the California State University General Education-Breadth Requirements.

Catalog Date: June 1, 2020

The Associate in Arts in Political Science for Transfer (AA-T) degree may be obtained by completion of 60 transferable, semester units with a minimum 2.0 GPA, including (a) the major or area of emphasis described in the Required Program, and (b) either the Intersegmental General Education Transfer Curriculum (IGETC) or the California State University General Education-Breadth Requirements.

Student Learning Outcomes

Upon completion of this program, the student will be able to:

- Describe the fundamentals of political science and governance. (PSLO 1)
- Compare and contrast contemporary comparative systems and governance. (PSLO 2)
- Evaluate the relationship between the governing process and public policy. (PSLO 3)
- Examine how citizen and interest group participation influence political systems. (PSLO 4)
- Analyze the role of culture and its influence on politics. (PSLO 5)
- Assess how the design of political institutions and processes affect policy and stability. (PSLO 6)
- Analyze politics and diplomacy in the international system. (PSLO 7)
- Apply basic research methods to political science. (PSLO 8)
- Analyze political and public policy making processes, and relate these to current issues and problems, for evaluating political events and their role in the political system. (PSLO 9)
- Compare and contrast various theories of justice and the just state. (PSLO 10)
- Evaluate various theories of the purpose of government and apply to a critical analysis of current political events. (PSLO 11)

Career Information

Career opportunities in political science include, but are not limited to, advocate/organizer, campaign worker, diplomat, educator/teacher, events planner, foreign affairs specialist, lawyer, legislative aide (state and federal), lobbyist, political consultant, and public relations specialist.

Political Science (POLS)

POLS 301 Introduction to Government: United States

| Units: | 3 |
| Hours: | 54 hours LEC |
| Prerequisites: | None. |
| Advisory: | ENGWR 101 with a grade of “C” or better; or equivalent skills demonstrated through the assessment process for eligibility for ENGWR 300. |
| Transferable: | CSU; UC |
| General Education: | AA/AS Area V(a); CSU Area DB; CSU Area F2; CSU Area F3; IGETC Area 4H |
| C-ID: | C-ID POLS 110 |
| Catalog Date: | June 1, 2020 |
An introduction to Political Science, American government and politics. Structured to promote political and analytical understanding and thinking regarding American politics and government. Areas of concentration include principles, institutions, problems, processes, theory, philosophy, and ideology. Satisfies the State requirement regarding the Constitution, American Institutions, and State and Local Government.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO #1: demonstrate comprehension of the complexity of the American democratic system.
- define key terms used in the study of the American system.
- explain how the American system affects the student's life in terms of freedoms, restraints, and public policy.
- SLO #2: explain the conditions and values necessary for political democracy to exist.
- SLO #3: illustrate the relationship between national, state and local governments and evaluate the effectiveness of the federal system.

POLS 302 Comparative Politics

This is a comparative study and analysis of political systems, ideologies, institutions, policies, cultures, histories, and the development of selected foreign governments. Special emphasis is placed on the cultural and social dimensions of political behavior and attitudes in connection with governmental and political practices typical of particular geographical regions. Coverage includes an examination of selected developed and lesser developed nation-states from a global perspective.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- analyze, synthesize and explain the differences and similarities of world governments as to their composition, function and policies (SLO #1)
- identify problems and prospects of specific nations by utilizing comparative data analysis or demographics.
- demonstrate an understanding of cultures through politics, political culture, popular civic participation (SLO #2)
- compare specific countries by identifying common denominators and symbiotic relationships

POLS 304 Introduction to Government: California

This course covers the essential organization, institutions, and processes of California state and local government. It fulfills the California State University requirement for state and local government, but not the requirement for the U.S. Constitution.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO #1: Assess the relationship between citizens and the state of California with emphasis on the impacts of cultural, economic, political, and social diversity
- SLO #2 Describe the various institutions of California government and how each functions in the policymaking process.
- SLO #3 Compare and contrast the California and U.S. Constitutions and the effect of these differences on policy making, civil rights and liberties, and political behavior.
- SLO #4 Analyze the effects of structural differences between the federal model and the structure of California government institutions on the policy making process and political behavior.
- SLO #5 Examine public financing in California and analyze the interconnectedness of federal, state, and local budgets.
- SLO #6 Analyze public opinion and the political behavior of California citizens.
- Compare and contrast the structure of California government and the federal model.

POLS 310 Introduction to International Relations

- Units: 3
- Hours: 54 hours LEC
- Prerequisites: None.
- Advisory: ENGW 101 with a grade of "C" or better; or equivalent skills demonstrated through the assessment process for eligibility for ENGW 300.
- Transferable: CSU; UC
- General Education: AA/AS Area V(b); CSU Area DB; IGETC Area 4H
- C-ID: C-ID POLS 140
- Catalog Date: June 1, 2020

This is an introduction to international relations and a survey of the nation-state system, techniques of interaction, the issue of war, nationalism, power alignments, international actors, transnational movements, diplomacy, political economy, and perceptions in world politics. Particular emphasis is placed on an analysis of the world outlook of Central and Eastern Europe, Russia, the United States, the major western allies, China, and the lesser developed world.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- discuss the field of International Relations and global analysis (SLO #1)
- examine the historical development of the academic field of International Relations.
- compare and contrast the models and theories basic to the study of International Relations.
- provide an in-depth analysis of the primary topics of focus of the field, including but not limited to: Power, Balance of Power, Ideology, International Security, The Formulation and Implementation of Foreign Policy, the Causes and Nature of War, International Political Economy, Transnational Movements, Diplomacy, and International Trade, Monetary Exchange, Law, and Organizations.
- recognize the nature of problems, and importance of, the current nation-state system (SLO #2)
- relate the reasons behind, and nature of, the perceptions of global politics and issues held by the United States, Russia, China, America’s allies and the lesser developed nations-states of the world.
- think critically regarding the subject of global politics necessary for success in higher education.

POLS 311 International Political Economy

- Units: 3
- Hours: 54 hours LEC
- Prerequisites: None.
- Advisory: ENGW 300, or placement through the assessment process.
- Transferable: CSU; UC
- General Education: CSU Area DB; IGETC Area 4H
- Catalog Date: June 1, 2020

This course is designed to introduce students to the major theories, institutions and issues in international political economy. International political economy examines the interaction between politics and economics on a global scale; in particular, how political forces influence markets, and how market forces influence politics. In this course of study, students will examine the major theoretical perspectives on political economy, such as mercantilism, liberalism, Marxism and statism. Students are then introduced to the major components of the international economy: multilateral trade, domestic trade policy, international finance and currency policy. Last, this course focuses on several major issues in international political economy. Examples might include the gap between the developed and developing world, the globalized economy, the role of transnational corporations, the political economies of oil, migration, food, or the environment.
Upon completion of this course, the student will be able to:

- **DEMONSTRATE AN UNDERSTANDING OF STATES, OF MARKETS, AND HOW THEY INTERACT. (SLO#1)**
  
  Understand the different priorities of states and markets and how they allocate resources differently.

  Understand the different degrees of state-market interaction, including but not limited to laissez faire capitalism, social market systems (mixed systems) and command economies.

- **EXAMINE THE MAJOR THEORETICAL APPROACHES TO INTERNATIONAL POLITICAL ECONOMY, INCLUDING BUT NOT LIMITED TO MERCANTILISM/NEO-MERCANTILISM, LIBERALISM/NEO-LIBERALISM, RATIONAL CHOICE THEORY AND MARXIST CRITIQUES. (SLO#2)**
  
  Understand the linkages between mercantilism/neo-mercantilism and protectionist trade policy.

  Examine Ricardo's liberal theory of comparative advantage.

  Understand the linkages between liberalism/neo-liberalism and free trade policy.

  Understand the linkages between liberalism/neo-liberalism and its offshoots, including but not limited to Keynesianism.

  Understand the contribution of rational choice theory and models to overcoming the problem of international economic cooperation.

  Understand the contribution of Marxist critiques, including but not limited to Modern World Systems Theory and Dependency Theory, in challenging the premise of free trade and explaining the puzzle of uneven development.

  Describe how globalization has increased the tension between mercantilism/neo-mercantilism and liberal/neo-liberal approaches.

- **DEMONSTRATE AN UNDERSTANDING OF THE BASIC PREMISES OF INTERNATIONAL TRADE AND TRADE POLICY. (SLO#3)**
  
  Articulate the founding premises of liberal trade theory that everyone benefits from free trade and that free trade ensures the most efficient use of resources.

  Identify common problems in trade cooperation.

  Describe barriers to trade including but not limited to traditional tariff barriers and modern non-tariff barriers such as procurement practices, import quotas and protection of intellectual property.

  Understand the terminology of international trade, including but not limited to such concepts as absolute and comparative advantage, and factor endowments.

  Understand the history and development of the World Trade Organization (WTO).

- **DEMONSTRATE AN UNDERSTANDING OF THE DOMESTIC ORIGINS OF NATIONAL TRADE POLICIES. (SLO#4)**
  
  Identify the different ways in which capital, labor and other societal groups may interact to influence trade policy.

  Describe the Stolper-Samuelson theory of factor endowments and varying trade preferences.

  Describe the sectoral conflict model of competing preferences among exporting and importing economic sectors.

  Describe the society-centered approach to explaining trade policy outcomes.

  Demonstrate an understanding of the history of US trade policy, including but not limited to such events as the Smoot-Hawley Act, the gradual removal of trade policy from Congress and the rise of fast-track trade legislation.

- **DEMONSTRATE AN UNDERSTANDING OF THE FOUNDATIONS OF INTERNATIONAL FINANCE. (SLO#5)**
  
  Demonstrate an understanding of the basic concepts of international finance, including but not limited to the balance of payments, capital and finance accounts, current accounts, surpluses, and deficits.

  Describe the consequences of a current account imbalance, including but not limited to the effect on currency.

  Demonstrate an understanding of the system of exchange rates, including but not limited to the difference between fixed and floating exchange rates.

  Describe the effect of inflation and interest rates on exchange rates.

  Describe the concepts of international purchasing power, and strong versus weak currencies.

  Examine government options for addressing balance of payment problems, including but not limited to currency manipulation, fiscal policy and monetary policy.
Demonstrate an understanding of the history of the international monetary system, including but not limited to the Bretton Woods system, the rise and role of the International Monetary Fund, the collapse of the Bretton Woods system, and international finance in a globalized world.

• DEMONSTRATE AN UNDERSTANDING OF THE PROBLEMS BETWEEN THE DEVELOPED AND DEVELOPING WORLD (ALSO DESCRIBED AS NORTH-SOUTH RELATIONS). (SLO#6)

Describe the impact of colonization and de-colonization on the economies of the developing world.

Understand the premises, strengths and weaknesses of dependency theory.

Understand the linkages between dependency theory and the various economic policies of the developing world, including but not limited to autarky and Import Substitution Industrialization (ISI).

Describe the logic and policies of ISI as well as the outcomes of it.

Examine the history of foreign aid and foreign loans, including the accumulation of international debt.

Examine the history, responses to, and outcomes of the Latin American debt crisis.

Examine the Asian model of development.

Contrast the Latin American model of development with the Asian model.

Identify the current problems of development and approaches to solving the problems of development, including but not limited to micro-credit.

DEMONSTRATE AN UNDERSTANDING OF THE CONCEPT AND ROLES OF A TRANS-NATIONAL CORPORATION (TNC). (SLO#7)

Identify the characteristics of a TNC.

Describe the different models of TNCs (vertically integrated versus horizontally integrated).

Describe the potential impacts of TNCs, including both the positive and negative impacts.

Describe the potential of a TNC to impact the political process.

Examine efforts on the part of states and the international community to regulate.

DEMONSTRATE AN UNDERSTANDING OF THE PROCESS OF GLOBALIZATION AND ECONOMIC INTEGRATION. (SLO#8)

Examine the history of globalization.

Identify periods of high levels of global integration as well as periods of low levels of integration.

Examine the potential impact of globalization and interdependence on such concepts as peace, domestic economic stability, and uneven development.

Examine the history of European integration and the development of the single market.

Describe the economic policies underlying European integration, including, but not limited to, the Common Agricultural Policy, Regional Development Funds, and the Euro.

IDENTIFY CURRENT EVENTS RELATED TO INTERNATIONAL POLITICAL ECONOMY. (SLO#9)

Describe current issues and problems in the international economy.

POLS 312 Politics of the Middle East

Units: 3
Hours: 54 hours LEC
Prerequisite: None.
Advisory: ENGWR 101
Transferable: CSU; UC
General Education: AA/AS Area V(b); CSU Area DB; IGETC Area 4H
Catalog Date: June 1, 2020
Area Studies courses cover the government and politics of selected nations within a distinct geopolitical area of the world in order to gain understanding of the institutions and dynamics of the area. This Area Studies survey course is designed to give students an understanding of the Middle East. It covers the region in biblical times, its history as part of the Ottoman Empire, its independence and inclusion in the Mandate system and its modern day existence through the twentieth century. The impact of religion, colonialism, the natural resource situation, socio-economics, ideology, conflict and resolution and foreign and domestic policies will be examined in the region on a country-by-country basis. The Palestinian Question, from both the Israeli and Palestinian perspectives will also be analyzed. Countries to be covered include Saudi Arabia, Iran, Egypt, Israel, Jordan, Iraq, Syria, and Lebanon. The course concludes with a summation of the region as it stands today and an assessment of where it is likely to go in the near future.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO 1 explain the origins, evolution and organization of area cultures and politics.
- describe the factors that influence the development and organization of cultures and politics.
- trace the impact of those factors by describing the major events in the history of the region.
- compare and contrast the impact of those factors on specific aspects of the cultural and political development of the Middle East.
- SLO 2 describe the dynamics of the area's political processes in the contexts of social and economic forces of globalization, regional integration and disintegration;
- describe major forces of globalization and regional integration and disintegration.
- assess the impact of these forces on specific political processes in the Middle East.
- SLO 3 compare and contrast theories and concepts utilized in the disciplined study of countries and regions.
- SLO 4 synthesize and refine their process of thinking and communicating with regard to other cultures, nations and regions, enhancing critical analysis skills and independent action.
- evaluate texts and other sources critically and be able to draw rational conclusions from that reading.
- communicate effectively about cultures, nations, and regions both verbally and in short and long written formats.
- research information concerning the politics and cultures of the Middle East and produce a research paper based on this information.

POLS 313 Latin America

Units: 3
Hours: 54 hours LEC
Prerequisite: None.
Advisory: ENGWR 101
Transferable: CSU; UC
General Education: AA/AS Area V(b); CSU Area DB; IGETC Area 4H
Catalog Date: June 1, 2020

Area Studies courses cover the government and politics of selected nations within a distinct geopolitical area of the world in order to gain understanding of the institutions and dynamics of the area. This Area Studies survey course is designed to give students an understanding of Latin America. It covers the region in the pre-Columbian era, its history as part of the Spanish Empire, the independence movements of the nineteenth century and the modern day existence of each nation state in the area to the twenty-first century. The impact of religion, colonialism, the natural resource situation, socio-economics, ideology, conflict and resolution and foreign and domestic policies will be examined in the region on a country-by-country basis. The course includes an examination of dominant political institutions, actors, processes and belief systems within the context of political culture and history and an analysis of area political economy and foreign policy in the environment of global interdependence. Countries to be covered include Mexico, Guatemala, El Salvador, Nicaragua, Venezuela, Peru, Bolivia, Colombia, Ecuador, Chile, Argentina, Uruguay, Cuba, Haiti, Jamaica and the Dominican Republic. The course concludes with a summation of the region as it stands today and an assessment of where it is likely to go in the near future.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO 1 Explain the origins, evolution and organization of area cultures and politics; describe the factors that influence the development and organization of cultures and politics; trace the impact of those factors by describing the major events in the history of the region; compare and contrast the impact of those factors on specific aspects of the cultural and political development of Latin America.
• SLO 2 Describe the dynamics of the area's political processes in the contexts of social and economic forces of globalization, regional integration and disintegration; describe major forces of globalization and regional integration and disintegration; assess the impact of these forces on specific political processes in Latin America.

• SLO 3 Compare and contrast theories and concepts utilized in the disciplined study of countries and regions.

• SLO 4 Synthesize and refine their process of thinking and communicating with regard to other cultures, nations and regions, enhancing critical analysis skills and independent action; evaluate texts and other sources critically and be able to draw rational conclusions from that reading; communicate effectively about cultures, nations, and regions both verbally and in short and long written formats; research information concerning the politics and cultures of Latin America and produce a research paper based on this information.

POLS 314 Modern Europe and the Unification Process

Units: 3
Hours: 54 hours LEC
Prerequisite: None.
Advisory: ENGWR 101
Transferable: CSU; UC
General Education: AA/AS Area V(b); CSU Area DB; IGETC Area 4H
Catalog Date: June 1, 2020

Area Studies courses cover the government and politics of selected nations within a distinct geopolitical area of the world in order to gain understanding of the institutions and dynamics of the area. This Area Studies survey course is designed to give students an understanding of modern Europe and the trends, processes and issues surrounding unification.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

• SLO 1 explain the origins, evolution and organization of area cultures and politics.
• describe the factors that influence the development and organization of cultures and politics.
• trace the impact of those factors by describing the major events in the history of the region.
• compare and contrast the impact of those factors on specific aspects of the cultural and political development of Europe.
• SLO 2 describe the dynamics of the area's political processes in the contexts of social and economic forces of globalization, regional integration and disintegration;
• describe major forces of globalization and regional integration and disintegration.
• assess the impact of these forces on specific political processes in Europe.
• SLO 3 compare and contrast theories and concepts utilized in the disciplined study of countries and regions.
• SLO 4 synthesize and refine their process of thinking and communicating with regard to other cultures, nations and regions, enhancing critical analysis skills and independent action.
• evaluate texts and other sources critically and be able to draw rational conclusions from that reading.
• communicate effectively about cultures, nations, and regions both verbally and in short and long written formats.
• research information concerning the politics and cultures of Europe and produce a research paper based on this information.

POLS 315 Pacific Rim

Units: 3
Hours: 54 hours LEC
Prerequisite: None.
Advisory: ENGWR 101
Transferable: CSU; UC
General Education: AA/AS Area V(b); CSU Area D; IGETC Area 4
Catalog Date: June 1, 2020

Area Studies courses cover the government and politics of selected nations within a distinct geopolitical area of the world in order to gain understanding of the institutions and dynamics of the area. This Area Studies survey course is designed to give students an understanding of the Pacific Rim and its trends, processes and issues.
Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO 1 explain the origins, evolution and organization of area cultures and politics.
- describe the factors that influence the development and organization of cultures and politics.
- trace the impact of those factors by describing the major events in the history of the region.
- compare and contrast the impact of those factors on specific aspects of the cultural and political development of the Pacific Rim.
- SLO 2 describe the dynamics of the area's political processes in the contexts of social and economic forces of globalization, regional integration and disintegration;
- describe major forces of globalization and regional integration and disintegration.
- assess the impact of these forces on specific political processes in the Pacific Rim.
- SLO 3 compare and contrast theories and concepts utilized in the disciplined study of countries and regions.
- SLO 4 synthesize and refine their process of thinking and communicating with regard to other cultures, nations and regions, enhancing critical analysis skills and independent action.
- evaluate texts and other sources critically and be able to draw rational conclusions from that reading.
- communicate effectively about cultures, nations, and regions both verbally and in short and long written formats.
- research information concerning the politics and cultures of the Pacific Rim and produce a research paper based on this information.

POLS 317 Global Studies: Africa

Units: 3
Hours: 54 hours LEC
Prerequisite: ENGWR 101
Advisory: CSU; UC
Transferable: AA/AS Area V(b); CSU Area D; IGETC Area 4
Catalog Date: June 1, 2020

Global Studies courses cover the government and politics of selected nations within a distinct geopolitical area of the world in order to gain understanding of the institutions and dynamics of the area. This Global Studies survey course is designed to give students an understanding of Africa. It covers the region's history, its independence movements and the modern day existence of nation states in the area to the twenty-first century. The impact of history, colonialism, the natural resource situation, socio-economics, ideology, conflict and resolution and foreign and domestic policies will be examined in the region on a country-by-country basis. The course includes an examination of dominant political institutions, actors, processes and belief systems within the context of political culture and history and an analysis of area political economy and foreign policy in the environment of global interdependence. The course concludes with a summation of the region as it stands today and an assessment of where it is likely to go in the near future.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO #1: Explain the origins, evolution and organization of area cultures and politics.
- Describe the factors that influence the development and organization of cultures and politics.
- Trace the impact of those factors by describing the major events in the history of the region.
- Compare and contrast the impact of those factors on specific aspects of the cultural and political development of Africa.
- SLO #2: Describe the dynamics of the area's political processes in the contexts of social and economic forces of globalization, regional integration and disintegration.
- Describe major forces of globalization and regional integration and disintegration.
- Assess the impact of these forces on specific political processes in Africa.
- SLO #3: Compare and contrast theories and concepts utilized in the disciplined study of countries and regions.
- SLO #4: Synthesize and refine their process of thinking and communicating with regard to other cultures, nations and regions, enhancing critical analysis skills and independent action.
**POLS 318 Global Studies: Central Asia**

- **Units:** 3
- **Hours:** 54 hours LEC
- **Prerequisite:** None.
- **Advisory:** ENGWR 300
- **Transferable:** CSU; UC
- **General Education:** CSU Area DB; IGETC Area 4H
- **Catalog Date:** June 1, 2020

Global Studies courses cover the government and politics of selected nations within a distinct geopolitical area of the world in order to gain understanding of the institutions and dynamics of the area. This Global Studies survey course is designed to give students an understanding of Central Asia. It covers the region's history, its natural resource situation, socio-economics, ideology, conflict and resolution and foreign and domestic policies on a country-by-country basis. The course includes an examination of dominant political institutions, actors, processes and belief systems within the context of political culture and history and an analysis of area political economy and foreign policy in the environment of global interdependence. The course concludes with a summation of the region as it stands today and an assessment of where it is likely to go in the near future.

**Student Learning Outcomes**

Upon completion of this course, the student will be able to:

- **SLO #1:** Explain the origins, evolution and organization of area cultures and politics.
- **SLO #2:** Describe the factors that influence the development and organization of cultures and politics.
- **SLO #3:** Trace the impact of those factors by describing the major events in the history of the region.
- **SLO #4:** Compare and contrast the impact of those factors on specific aspects of the cultural and political development of Central Asia.

**POLS 319 Global Studies: Southeast Asia**

- **Units:** 3
- **Hours:** 54 hours LEC
- **Prerequisite:** None.
- **Advisory:** ENGWR 300
- **Transferable:** CSU; UC
- **General Education:** CSU Area DB; IGETC Area 4H
- **Catalog Date:** June 1, 2020

Evaluate texts and other sources critically and be able to draw rational conclusions from that reading.
Research information concerning the politics and cultures of Central Asia and produce a research paper based on this information.
Communicate effectively about cultures, nations, and regions both verbally and in short and long written formats.
Global Studies courses cover the government and politics of selected nations within a distinct geopolitical area of the world in order to gain understanding of the institutions and dynamics of the area. This Global Studies survey course is designed to give students an understanding of Southeast Asia. It covers the region's history, its natural resource situation, socio-economics, ideology, conflict and resolution and foreign and domestic policies on a country-by-country basis. The course includes an examination of dominant political institutions, actors, processes and belief systems within the context of political culture and history and an analysis of area political economy and foreign policy in the environment of global interdependence. The course concludes with a summation of the region as it stands today and an assessment of where it is likely to go in the near future.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO #1: Explain the origins, evolution and organization of area cultures and politics.
- Describe the factors that influence the development and organization of cultures and politics.
- Trace the impact of those factors by describing the major events in the history of the region.
- Compare and contrast the impact of those factors on specific aspects of the cultural and political development of Southeast Asia.
- SLO #2: Describe the dynamics of the area's political processes in the contexts of social and economic forces of globalization, regional integration and disintegration.
- Describe major forces of globalization and regional integration and disintegration.
- Assess the impact of these forces on specific political processes in Southeast Asia.
- SLO #3: Compare and contrast theories and concepts utilized in the disciplined study of countries and regions.
- SLO #4: Synthesize and refine their process of thinking and communicating with regard to other cultures, nations and regions, enhancing critical analysis skills and independent action.
- Evaluate texts and other sources critically and be able to draw rational conclusions from that reading.
- Research information concerning the politics and cultures of Southeast Asia and produce a research paper based on this information.
- Communicate effectively about cultures, nations, and regions both verbally and in short and long written formats.

POLS 320 Introduction to Political Theory

In this course, students will examine theoretical approaches to politics and ways of thinking about politics, covering important thinkers and topics during the ancient, medieval, and modern periods.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO 1: demonstrate an understanding of the Greco-Roman and Judeo-Christian origins of the Western political thought.
- explain the development of a particular category of thought in its own historical context.
- recognize the life and times of various political thinkers.
- SLO 2: describe the logical coherence of a particular category of thought through different historical periods.
- verify thought empirically, testing the philosophical underpinning of a particular thought through observation.
- distinguish continuity from changes in the respective transitions from classic to medieval, to modern and to postmodern periods.
- compare the predominant thought with alternative thoughts in a particular period of time.
- evaluate significant historical events that give birth to the fundamental assumptions of a political thought.
SLO 3: Integrate thought with practice, using thought as guidance to critically analyze current affairs.

SLO 4: Determine which political thought offers more promise, best responds to particular challenges, and best meets the needs of the people.

**POLS 324 Revolutions & Ideologies**

**Units:** 3  
**Hours:** 54 hours LEC  
**Prerequisite:** None.  
**Advisory:** ENGWR 101  
**Transferable:** CSU; UC  
**General Education:** CSU Area DB; IGETC Area 4H  
**Catalog Date:** June 1, 2020

This course seeks to study ideologies and revolutions. Revolutions herald change in political systems. They can be based on ideologies or economic, religious or other differences.

**Student Learning Outcomes**

Upon completion of this course, the student will be able to:

- SLO #1: Understand the potential causes of revolutions.  
- SLO #2: Identify causes in society that can lead to a revolution.  
- SLO #3: Explain the theories underpinning a revolutionary movement.  
- SLO #4: Report on the course of a revolution.  
- SLO #5: Explain the consequences of revolutions on established institutions.  
- SLO #6: Evaluate the potential for and explain the consequences of a counter-revolution.

**POLS 380 Introduction to Research Design and Methodology**

**Units:** 3  
**Hours:** 54 hours LEC  
**Prerequisite:** POLS 301, 302, or 310 with a grade of "C" or better  
**Transferable:** CSU; UC  
**General Education:** CSU Area D; IGETC Area 4  
**C-ID:** C-ID POLS 160  
**Catalog Date:** June 1, 2020

This course is designed to introduce students to the political science research process. The course will address research design, quantitative and qualitative analysis and contemporary methodologies.

**Student Learning Outcomes**

Upon completion of this course, the student will be able to:

- **UNDERSTAND THE PROCESS AND STAGES OF POLITICAL SCIENCE RESEARCH. (SLO 1)**  
- Describe the role of theoretical models in research.  
- Properly apply deductive reasoning models such as game theory.  
- Explain the relationship between observation and the inductive development of theoretical models  
- Evaluate causal relationships and testable hypotheses.  
- **PERFORM STATISTICAL TESTS, INCLUDING BUT NOT LIMITED TO DESCRIPTIVE STATISTICS, TABULAR ANALYSIS, BI-VARIATE AND MULTI-VARIATE REGRESSION. (SLO 2)**  
- Analyze statistical tests, including but not limited to descriptive statistics, tabular analysis, bi-variate and multi-variate regression.  
- Use statistical software programs to perform statistical tests.
- Evaluate overall research findings on the combined basis of its research design, data collection, validity and reliability. (SLO 3)
- Evaluate a research design on the basis of its methodology
- Appraise a data set on the basis of its collection practices.
- Estimate the validity and reliability of research based on its methodology.
- Apply knowledge of the research process to the evaluation of political science research and news reports.

**POLS 382 Statistics for Social Science**

**Units:** 3
**Hours:** 54 hours LEC
**Prerequisite:** MATH 120 or 125 with a grade of "C" or better, or placement through the assessment process.
**Transferable:** CSU; UC (POLS 382, ECON 310, PSYC 330, STAT 300 and STAT 480 combined: maximum credit, 1 course)
**General Education:** AA/AS Area II(b) (effective Summer 2020)
**Catalog Date:** June 1, 2020

This course focuses upon the concepts and applications of descriptive and inferential statistics in political science and other social sciences. Topics include descriptive statistics, probability and sampling distributions, hypothesis testing, statistical inference, correlation and regression, chi-square, t-tests, and analysis of variance procedures. This course will analyze and interpret social science data sets using both hand computation and statistical software.

**Student Learning Outcomes**

Upon completion of this course, the student will be able to:

- SLO 1: ORGANIZE AND ANALYZE DATA.
  - Organize raw data into tables, frequency distributions, charts, and graphs.
  - Differentiate between discrete and continuous variables.
  - Identify different kinds of measurement including nominal, ordinal, interval, and ratio measures.
- SLO 2: CALCULATE AND ANALYZE DATA USING DESCRIPTIVE STATISTICS.
  - Calculate simple statistics such as frequencies and percentages, and measures of central tendency such as mean, median, and mode.
  - Describe the variability of a data set using concepts such as range, variance, and standard deviation.
- SLO 3: DEMONSTRATE AN UNDERSTANDING OF THE PRINCIPLES OF PROBABILITY AND HYPOTHESIS TESTING.
  - Understand the role of the Central Limit Theorem. distributions.
  - Construct and interpret confidence intervals.
  - Apply the principles of probability using probability distributions including Z scores, student t distributions, and Chi-Square distributions.
  - Differentiate between one and two tailed tests.
  - Determine and interpret levels of statistical significance.
  - Distinguish the difference between Type I and Type II errors.
- SLO 4: ANALYZE BIVARIATE AND MULTIVARIATE RELATIONSHIPS USING REGRESSION.
  - Estimate relationships using Ordinary Least Squares (OLS) regression techniques.
  - Test for statistical significance using ANOVA and F tests.
  - Identify and test for known violations of OLS regression in data analysis, including multi-collinearity and non-linearity.
- SLO 5: DEMONSTRATE MATHEMATICAL COMPETENCY AND THE APPLICATION OF QUANTITATIVE REASONING.
  - Calculate simple statistics such as frequencies, percentages, standard deviations, and variance by hand.
  - Calculate more sophisticated statistical estimations, such as regression, using statistical software such as SPSS.
POLS 481 Introduction to Government: United States - Honors

Upon completion of this course, the student will be able to:

- **SLO 1: UTILIZE MODES OF ANALYSIS AND CRITICAL THINKING IN THE STUDY OF AMERICAN GOVERNMENT AS APPLIED TO SIGNIFICANT ISSUES AND/OR PROBLEMS.**
  - Describe the nature of government and its theoretical foundations and functions.
  - Relate American political thought, the Constitution, and governing institutions to one another.
  - Identify and explain the structures and functions of the United States and California governments prescribed by their respective constitutions.
  - Compare and contrast the federal, state and local governments with respect to their political foundations, functions, and contemporary problems.
  - Explain the civil liberties and civil rights of individuals as articulated in the United States Constitution and federal court decisions.
  - Identify and evaluate political processes within the United States and California, including the development of political ideologies, voting behavior and other forms of political participation.

- **SLO 2: ACTIVELY ENGAGE IN INTELLECTUAL INQUIRY AND CRITICAL THINKING BEYOND THAT REQUIRED IN ORDER TO PASS A COURSE OF STUDY IN AMERICAN DEMOCRACY.**
  - Analyze complex readings and processes as they apply to contemporary issues in American Politics.
  - Illustrate and appraise the relationship between national, state, and local governments and evaluate the effectiveness of the federal system.
  - Discuss and analyze contemporary political issues and operations in the United States and California.

- **SLO 3: RECOGNIZE THE ETHICAL DIMENSIONS OF DECISIONS AND ACTIONS.**
  - Hypothesize the conditions under which various political outcomes are likely to occur and provide theoretical explanations for said outcomes.

- **SLO 4: ARTICULATE AN AWARENESS OF THE VARIETY OF PERSPECTIVES WITHIN POLITICAL SCIENCE AND THE RELEVANCE OF THESE PERSPECTIVES TO ONE'S OWN LIFE.**
  - Evaluate and explain how the American system affects the student's life in terms of freedoms, restraints, and public policy.
  - Analyze the role of culture, diversity, and ideology in shaping public opinion and public policy in the United States and California.

- **SLO 5: EXPRESS IDEAS CLEARLY IN WELL-ORGANIZED WRITTEN MESSAGES**
POLS 495 Independent Studies in Political Science

Units: 1 - 3
Hours: 54 - 162 hours LAB
Prerequisite: None.
Transferable: CSU
Catalog Date: June 1, 2020

An independent studies project involves an individual student or small group of students in study, research, or activities beyond the scope of regularly offered courses. See the current catalog section of “Special Studies” for full details of Independent Studies.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- **SLO #1**: Actively engage in intellectual inquiry beyond that required in order to pass a course of study (College Wide Learning Outcome – Area 4).
- Discuss and outline a proposal of study (that can be accomplished within one semester term) with a supervising instructor qualified within the discipline.
- Design an independent study (to be completed individually or by collaboration of a small group) to foster special knowledge, skills, and experience that are not available in any one regularly scheduled course.
- Use information resources to gather discipline-specific information.
- **SLO #2**: Utilize modes of analysis and critical thinking to apply theoretical perspectives and/or concepts in the major discipline of study to significant problems and/or educational activities (College Wide Learning Outcome – Area 3).
- Analyze and apply the knowledge, skills and experience that are involved in the independent study to theoretical perspectives and/or concepts in the major discipline of study.
- Explain the importance of the major discipline of study in the broader picture of society.
- **SLO #3**: Communicate a complex understanding of content matter of the major discipline of study (College Wide Outcome – Area 3).
- Demonstrate competence in the skills essential to mastery of the major discipline of study that are necessary to accomplish the independent study.
- **SLO #4**: Identify personal goals and pursue these goals effectively (College Wide Outcome – Area 4).
- Utilize skills from the “academic tool kit” including time management, study skills, etc., to accomplish the independent study within one semester term.
Psychology | Cosumnes River College

Psychology concerns itself with the study of behavior of humans and other animals. Part of its appeal and fascination is the fact that it involves both pure science and the practical application of science to matters of everyday life. Those pursuing psychology as a field of study will find many Career Opportunities centering around helping others understand, predict and control their own behavior and the behavior of others. Training in psychology also provides a valuable foundation for other professions that deal with people.

Associate Degree for Transfer

A.A.-T. in Psychology

The Cosumnes River College Psychology Associate of Arts Degree for Transfer Program is designed to facilitate successful transfer to baccalaureate psychology degree programs. This degree provides students with the lower division breadth and depth of the field of psychology. Additionally, this degree exposes students to the core principles and practices in the field. Students will learn to: apply psychological theory and the scientific method; compare and contrast the major theoretical orientations in psychology; integrate content knowledge, cognitive and affective skills and technical proficiency; evaluate psychological data; apply psychological principles to the development of interpersonal, occupational and social skills; and recognize the complexity of social, cultural, and international diversity and the principles of equity, justice and inclusion in their lives.

Catalog Date: June 1, 2020

Total Units: 19
If PSYC 320 or PSYC 371 is not taken as part of the required core sequence, a student may choose it as one of the options listed above.

The Associate in Arts in Psychology for Transfer (AA-T) degree may be obtained by completion of 60 transferable, semester units with a minimum 2.0 GPA, including (a) the major or area of emphasis described in the Required Program, and (b) either the Intersegmental General Education Transfer Curriculum (IGETC) or the California State University General Education-Breadth Requirements.

Student Learning Outcomes

Upon completion of this program, the student will be able to:

- Differentiate between scientifically derived knowledge and myth and conjecture about the topics of psychology and demonstrate understanding of psychological theory and scientific method. This includes the abilities to: Recognize the way in which research leads to generally accepted conclusions and the integration of new research data with the building of a body of scientific knowledge; Demonstrate critical thinking skills shown by the analysis of data sets, testing of assumptions, and synthesizing information to draw a logical conclusion.

- Compare and contrast the major theoretical orientations in psychology, demonstrate knowledge of basic psychological terminology regarding behavior, cognition, and emotion, and be able to express this clearly when writing or speaking about psychology. This includes the abilities to: Write clear responses to essay questions without including extraneous information or omitting key information necessary to provide a clear, concise, college-level answer; utilize test-taking skills such as critical analysis of information, test-time management and focused writing; analyze the logic of a multiple choice question and choose the correct response among related items; use appropriate computer software, databases, and other technology to enhance knowledge; tolerate the ambiguity that accompanies a consideration of complex information and multiple perspectives.

- Integrate content knowledge, cognitive and affective skills and technical proficiency in completing exams, term papers, presentations and other class assignments. These skills include: ambiguity tolerance, learning, memory, logical thinking, problem solving, decision-making, and critical thinking. This includes the abilities to: Write clear responses to essay questions without including extraneous information or omitting key information necessary to provide a clear, concise, college-level answer; utilize test-taking skills such as critical analysis of information, test-time management and focused writing; analyze the logic of a multiple choice question and choose the correct response among related items; use appropriate computer software, databases, and other technology to enhance knowledge; tolerate the ambiguity that accompanies a consideration of complex information and multiple perspectives.

- Evaluate psychological data, draw reasonable conclusions, recognize the ethical implications of these conclusions, and apply these conclusions to personal, community, and scientific problems. This includes the abilities to: Conduct a thorough literature review; Choose appropriate research design, methodology, and statistical analyses in support of a specific hypothesis; Design and conduct a research study which may include the following techniques: observation, interviews, focus group, surveys, case studies, correlational and experimental designs; Collect data and keep organized records; Analyze and interpret data, draw appropriate conclusions and make recommendations; Reach and clearly express logical conclusions based on data; Relate, in presentations and/or in written reports, how psychological information is relevant to personal and community issues; Recognize the ethical implications of psychological research and the responsibility to use knowledge wisely.

- Apply psychological principles to the development of interpersonal, occupational and social skills and life-long personal growth. This includes the abilities to: Understand the concept of self-, personal-, social-, and ethnic- identity, and its role in the development of self-esteem and morals; Recognize the dynamic interaction of relationships and how it affects our ability to be socially successful with peers, family, and genders; Understand how group processes affect behavior such as attribution theory, attitude formation, prejudice, stereotyping, conformity, compliance, and obedience.

- Recognize the complexity of social, cultural, and international diversity and the principles of equity, justice and inclusion in their lives. This includes the abilities to: Weigh evidence and develop an understanding of different perspectives (e.g. gender, cross cultural, international); Demonstrate knowledge of ethical issues faced by psychologists; Reflect on own personal and professional values and biases by discussing and documenting dialogue, activities and interactions in journals, portfolios, and other documentation methods; Recognize, understand, and respect the complexity of socio-cultural and international diversity through classroom discussions, essays, analysis of biases in published literature, and participation in community, classroom and cultural events; Evaluate all practices, personal and professional, for equality, justice, and inclusion as reflected in internal thoughtful introspection and external application of appropriate interventions, processes, and/or strategies.

Career Information

Psychologists with advanced degrees and professional certificates have a broad range of employment opportunities including, but not limited to, clinical practice, research, and teaching. Clinical and counseling psychologists work in a variety of settings and with a wide range of clients. Research psychologists work in a range of fields associated with the study of human behavior, including biomedical, organizational psychology, sports psychology, and cognitive neuroscience. NOTE TO TRANSFER STUDENTS: The Associate Degree for Transfer program is designed for students who plan to transfer to a campus of the California State University (CSU). Other than the required core, the courses you choose to complete this degree will depend to some extent on the selected CSU for transfer. In addition, some CSU-GE Breadth or IGETC requirements can also be completed using courses required for this associate degree for transfer major (known as “double-counting”). Meeting with a counselor to determine the most appropriate course choices will facilitate efficient completion of your transfer requirements. For students wishing to transfer to other universities (UC System, private, or out-of-state), the Associate Degree for Transfer may not provide adequate preparation for upper-division transfer admissions; it is critical that you meet with a CRC counselor to select and plan the courses for the major, as programs vary widely in terms of the required preparation.

Psychology (PSYC)
PSYC 300 General Principles

This course is an introduction to the scientific study of human behavior. Topics include scientific method, the biological basis of behavior, sensation, perception, consciousness, conditioning and learning, memory, cognition, developmental psychology, motivation, emotion, stress and health, personality, abnormal psychology, psychotherapy, and social psychology. PSYC 300 is designed for psychology majors, behavioral science majors, and other students who desire a comprehensive overview of general principles of contemporary psychology.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- **SLO #1.** Differentiate between scientifically derived knowledge and myth and conjecture about the topics of psychology and demonstrate understanding of psychological theory and scientific method.
- compare and contrast the scientific method to other approaches to understanding human behavior.
- compare and contrast experimental and non-experimental methods.
- **SLO #2.** Evaluate psychological data, draw reasonable conclusions, recognize the ethical implications of these conclusions, and apply these conclusions to personal, community, and scientific problems.
- reach and clearly express logical conclusions based on data derived from inquiry in the field of psychology.
- recognize the ethical implications of psychological research and the responsibility to pursue and use knowledge wisely.
- **SLO #3.** Compare and contrast the major theoretical orientations in psychology, demonstrate knowledge of basic psychological terminology regarding behavior, cognition, and emotion, and be able to express this clearly when writing or speaking about psychology.
- compare and contrast the major perspectives in psychology.
- synthesize and/or apply knowledge of concepts, theory, and research findings surveyed within the following sub-disciplines in psychology: biology of behavior, sensation, perception, consciousness, conditioning and learning, memory, cognition, developmental psychology, motivation, emotion, stress and health, personality, abnormal psychology, psychotherapy, and social psychology.
- **SLO #4.** Integrate content knowledge, cognitive and affective skills and technical proficiency in completing exams, term papers, presentations and other class assignments. These skills include: ambiguity tolerance, learning, memory, logical thinking, problem-solving, decision-making, and critical thinking.
- **SLO #5.** Apply psychological principles to the development of interpersonal, occupational and social skills and life-long personal growth.
- demonstrate the application of psychological principles to personal, interpersonal, occupational, and social contexts.
- **SLO #6.** Recognize the complexity of social, cultural, and international diversity and the principles of equity, justice and inclusion in their lives.
- demonstrate understanding of individual and sociocultural differences with respect to the topics addressed in general psychology.

PSYC 312 Biological Psychology

| Units: | 4 |
| Hours: | 54 hours LEC; 54 hours LAB |
| Prerequisite: | PSYC 300 with a grade of "C" or better |
| Transferable: | CSU; UC |
| General Education: | AA/AS Area IV; CSU Area B2; CSU Area B3; CSU Area D9; IGETC Area 5B; IGETC Area 5C |
| C-ID: | C-ID PSY 150 |
| Catalog Date: | June 1, 2020 |
This course examines the biochemical, cellular, and organismal physiological substrates of normal and abnormal behavior. The course content focuses on interactions of the central nervous system, peripheral nervous system, endocrine and immune systems to produce consciousness, sensation, perception, thinking, motivation and emotion. These areas will be addressed within an evolutionary context that emphasizes developmental plasticity of the individual and the species. Current methods of obtaining data (e.g. neuroimaging techniques) will be examined and evaluated. Students will be required to perform anatomical identification of brain structures using a mammalian brain (e.g. sheep brain).

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO #1. Differentiate between scientifically derived knowledge and myth and conjecture about the topics of psychology and demonstrate understanding of psychological theory and scientific method.
- compare and contrast the scientific method and other approaches to understanding human behavior.
- evaluate current physiological research methods such as ablations, skin conductance levels (SCL), evoked-response potentials via electroencephalogram (EEG), magnetic resonance imaging (MRI) and positron emission tomography (PET).
- understand cognitive neuropsychology and evaluate neuropsychological testing.
- SLO #2. Compare and contrast the major theoretical orientations in biopsychology, demonstrate knowledge of basic psychological terminology regarding behavior, cognition, and emotion, and be able to express this clearly when writing or speaking about biopsychology.
- analyze behavior at biochemical, cellular and organismal levels.
- identify parts of the neuron and describe their action potentials as a result of naturally-occurring neurotransmitters, hormones, and cytokines.
- recognize how an organism’s physiology and behavior have been fine tuned by its ontological (individual) development and its phylogenetic (species) development.
- identify structures of the nervous, endocrine and immune systems and their interactions.
- SLO #3. Evaluate psychological data, draw reasonable conclusions, recognize the ethical implications of these conclusions, and apply these conclusions to personal, community, and scientific problems.
- test hypothesis through application of scientific method in the context of biopsychological inquiry.
- demonstrate familiarity with the APA guidelines for ethical research with humans and animals.
- evaluate the implications of biopsychological research findings and demonstrate familiarity with bioethical issues.
- SLO #4. Integrate content knowledge, cognitive and affective skills and technical proficiency in completing exams, term papers, presentations and other class assignments. These skills include: ambiguity tolerance, learning, memory, logical thinking, problem-solving, decision-making, and critical thinking.
- SLO #5. Apply psychological principles to the development of interpersonal, occupational and social skills and life-long personal growth.
- describe the etiology and outcomes of neurological diseases such as psychoses, cognitive disorders, mood disorders and motor disorders.
- predict the actions of pharmacological agents and explain how they exert their effects in domains such as eating, sexuality, consciousness, sleep, motor activity, mood and addiction.

PSYC 320 Social Psychology

Units: 3
Hours: 54 hours LEC
Prerequisite: None.
Transferable: CSU; UC
General Education: AA/AS Area V(b); CSU Area D9; IGETC Area 4I
C-ID: C-ID PSY 170
Catalog Date: June 1, 2020

This course focuses on the scientific study of human interaction, with an emphasis on the individual within a social context. Study includes: social perception, social cognition, attitudes and attitude change, the self and social identity, prejudice, interpersonal attraction, close relationships, social influence, prosocial behavior, aggression, and group behavior.

Student Learning Outcomes
Upon completion of this course, the student will be able to:

- SLO #1. Differentiate between scientifically derived knowledge and myth and conjecture about the topics of social behavior and demonstrate understanding of psychological theory and scientific method.
- compare and contrast the scientific method to other approaches to understanding social behavior.
- compare and contrast experimental and non-experimental methods.
- SLO #2. Evaluate psychological data, draw reasonable conclusions, recognize the ethical implications of these conclusions, and apply these conclusions to personal, community, and scientific problems.
- reach and clearly express logical conclusions based on data derived from inquiry in the field of social psychology.
- recognize the ethical implications of social psychological research and the responsibility to pursue and apply knowledge wisely.
- SLO #3. Compare and contrast the major theoretical orientations in social psychology, demonstrate knowledge of basic psychological terminology regarding social behavior and be able to express this clearly when writing or speaking about social psychological topics.
- compare and contrast the major perspectives in social psychology.
- synthesize and/or apply knowledge of concepts, theories, and research findings surveyed within the following lines of inquiry within the discipline of social psychology: social cognition, social perception, attitudes and attitude change, the self and social identity, prejudice and discrimination, interpersonal attraction, close relationships, social influence, prosocial behavior, aggression, and group behavior.
- SLO #4. Integrate content knowledge, cognitive and affective skills and technical proficiency in completing exams, term papers, presentations and other class assignments. These skills include: ambiguity tolerance, learning, memory, logical thinking, problem-solving, decision-making, and critical thinking.
- apply critical thinking to the analysis of social behavior and related issues.
- SLO #5. Apply social psychological principles to the development of interpersonal, occupational and social skills and life-long personal growth.
- demonstrate the application of social psychological principles to personal, interpersonal, organizational, and social contexts.
- SLO #6. Recognize the complexity of social, cultural, and international diversity and the principles of equity, justice and inclusion in their lives.
- demonstrate understanding of individual and sociocultural differences with respect to the topics addressed in social psychology.

PSYC 330 Introductory Statistics for the Behavioral Sciences

- Units: 3
- Hours: 54 hours LEC
- Prerequisite: MATH 120 or 125 with a grade of "C" or better; or the equivalent.
- Transferable: CSU; UC (POLS 382, ECON 310, PSYC 330, STAT 300 and STAT 480 combined: maximum credit, 1 course)
- General Education: AA/AS Area II(b); CSU Area B4; IGETC Area 2
- C-ID: C-ID MATH 110
- Catalog Date: June 1, 2020

This course focuses on the concepts and applications of descriptive and inferential statistics in psychology and other behavioral sciences. Topics include: descriptive statistics; sample spaces and probability; random variables and expected value; discrete and continuous distributions -- binomial, t-tests for two populations; and applications using data from disciplines including business, social sciences, life science, health science, and education; parametric and nonparametric statistical methods, hypothesis testing, statistical inference and p-values, effect size and power; correlation and regression regarding prediction; chi-square; t-tests; and analysis of variance procedures. Application of both hand computation and statistical software (e.g. SPSS) to data in a behavioral and social science contexts will be emphasized to include the interpretation of the relevance of the statistical findings.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO #1. Evaluate psychological data, draw reasonable conclusions, recognize the ethical implications of these conclusions, and apply these conclusions to personal, community, and scientific problems.
- perform statistical calculations.
- organize raw data appropriately and meaningfully.
Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO #1. Differentiate between scientifically derived knowledge and myth and conjecture about the topics of psychology and demonstrate understanding of psychological theory and scientific method.
- compare and contrast the scientific method to other approaches to understanding human behavior.
- compare and contrast experimental and non-experimental methods.
- SLO #2. Evaluate psychological data, draw reasonable conclusions, recognize the ethical implications of these conclusions, and apply these conclusions to personal, community, and scientific problems.
- formally state hypotheses and test them using the scientific method.
- conduct a thorough literature review.
- choose appropriate research design, methodology, and statistical analyses in support of a specific hypothesis.
- demonstrate knowledge of the APA Code of Ethics in the treatment of human and nonhuman participants in the design, data collection, interpretation, and reporting of psychological research.
- design research studies which may include the following techniques: observation, interviews, focus group, surveys, case studies, correlational and experimental designs.
- collect data and keep organized records.
- reach and clearly express logical conclusions based on data.
recognize the ethical implications of psychological research and the responsibility to use knowledge wisely.

SLO #3. Compare and contrast the major theoretical orientations in psychology, demonstrate knowledge of basic psychological terminology regarding behavior, cognition, and emotion, and be able to express this clearly when writing or speaking about psychology.

utilize APA style effectively in the production of a research report.

SLO #4. Integrate content knowledge, cognitive and affective skills and technical proficiency in completing exams, term papers, presentations and other class assignments. These skills include: ambiguity tolerance, learning, memory, logical thinking, problem-solving, decision-making, and critical thinking.

analyze and interpret data, draw appropriate conclusions and make recommendations.

analyze data using Statistical Package for the Social Sciences (SPSS) software.

SLO #5. Apply psychological principles to the development of interpersonal, occupational and social skills and life-long personal growth.

relate, in presentations and/or in written reports, how psychological information is relevant to personal and community issues.

reach and clearly express logical conclusions based on data derived from inquiry in the field of psychology.

use appropriate computer software, databases, and other technology to enhance knowledge.

identify the components of evaluation research and its application.

PSYC 340 Abnormal Behavior

Units: 3
Hours: 54 hours LEC
Prerequisite: None.
Transferable: CSU; UC
General Education: AA/AS Area V(b); AA/AS Area III(b); CSU Area D9; CSU Area E1; IGETC Area 4I
C-ID: C-ID PSY 120
Catalog Date: June 1, 2020

This course is an exploration of the broad questions of normality and abnormality. It offers the investigation of specific mental, emotional, and behavioral difficulties and current approaches to psychological intervention including present community mental health practice. This course considers the contribution of biological, psychological and social factors to the development and persistence of behavior disorders. PSYC 340 is a useful course for students majoring in Human Services and/or preparing for a career in psychology or the helping professions.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- Differentiate between scientifically derived knowledge and myth and conjecture about the topics of abnormal psychology and demonstrate understanding of psychological theory and scientific method. [SLO #1]

- compare and contrast the scientific method and other approaches to addressing abnormal behavior.

- compare and contrast experimental and non-experimental methods.

- apply the DSM-V classification system and evaluate approaches to clinical assessment and the diagnosis of psychological disorders.

- Compare and contrast the major theoretical orientations in abnormal psychology, demonstrate knowledge of basic psychological terminology regarding behavior, cognition, and emotion, and be able to express this clearly when writing or speaking about abnormal psychology. [SLO #2]

- compare and contrast the major perspectives in the study of psychopathology.

- identify and describe specific mental, emotional, and behavioral difficulties.

- synthesize and appraise the contributions of biological, psychological, and social factors to the development and persistence of behavioral disorders.

- evaluate issues that pertain to people experiencing severe problems in adaptive behavior.

- Evaluate psychological data, draw reasonable conclusions, recognize the ethical implications of these conclusions, and apply these conclusions to personal, community, and scientific problems. [SLO #3]

- reach and clearly express logical conclusions based on data derived from inquiry in the field of abnormal psychology.
think critically with respect to individual expression of psychological disorders and to community and social issues that pertain.

recognize the ethical implications of research in the field of psychopathology and the responsibility to pursue and use empirical knowledge wisely.

Integrate content knowledge, cognitive and affective skills and technical proficiency in completing exams, term papers, presentations and other class assignments. These skills include: ambiguity tolerance, learning, memory, logical thinking, problem-solving, decision-making, and critical thinking. [SLO #4]

Apply psychological principles to the development of interpersonal, occupational and social skills and life-long personal growth. [SLO #5]

c ompare, contrast, and evaluate medical, behaviorist, cognitive, humanistic, psychodynamic and other approaches to psychological intervention including present community health practices.

apply theories of change to behavioral issues involving “diseases of lifestyle”; such as substance abuse, eating disorders, and stress related disorders.

Recognize the complexity of social, cultural, and international diversity and the principles of equity, justice and inclusion in their lives. [SLO #6]

demonstrate understanding of individual and cultural differences pertaining to the topics addressed in the study of psychopathology and psychotherapy.

demonstrate understanding of clinical ethics, patients' rights, and the broader sociopolitical issues associated with the problem of abnormal behavior.

PSYC 356 Human Sexuality

This course provides a balanced scientific understanding of human sexual thoughts, feelings, and behavior grounded in both female and male perspectives and experiences. Course topics include an examination of the methodology of sexology, gender issues, sexual anatomy and physiology, sexual arousal and response, love and communication, sexual behavior patterns, sexual orientations, contraception, conception and childbirth, sexual development across the lifespan, adult living patterns, sexual difficulties and solutions, sexually transmitted diseases, atypical sexual behavior, sexual coercion, and pornography and prostitution.

Upon completion of this course, the student will be able to:

- SLO #1 Differentiate between scientifically derived knowledge and myth and conjecture about the topics addressed by the study of human sexuality and demonstrate understanding of psychological theory and scientific method.

- Compare and contrast experimental and non-experimental methods.

- Demonstrate an understanding of the impact of social/historical context and politics on human sexual thoughts, feelings, and behaviors.

- Dispel myths, doubts, and anxieties related to knowledge, attitudes, and behaviors about sexuality.

- SLO #2. Compare and contrast the major theoretical orientations in the study of human sexual behavior, demonstrate knowledge of basic biological, psychological, and socio-cultural terminology regarding sexual behavior and be able to express this clearly when writing or speaking about human sexual behavior.

- compare and contrast the major perspectives in the study of human sexual behavior.

- demonstrate an understanding of the key sex research findings.

- identify and explain the processes involved in female and male reproductive and sexual physiology and interpersonal attachment.

- develop an understanding of variation in human sexual behavior and motivation.

- demonstrate an understanding of the factors that influence sexual development and interaction across the life span.

- describe the causes and correlates of sexual difficulties and variances.
• identify and explain the mechanisms and associated issues relevant to contraception, conception, pregnancy, labor and birth, breastfeeding, and postpartum sexuality.
• compare and contrast approaches that offer alternatives to conventional pregnancy.
• identify guidelines for safeguarding and improving sexual health and well-being.
• identify guidelines for improving the health and well-being of the new mother, her partner, her newborn, and her family.
• compare and contrast the symptoms and impact of common sexually transmitted diseases.
• demonstrate an understanding of medical risk and vulnerability.
• identify guidelines for safeguarding sexual health and well-being.
• recognize the defining features of sexual coercion, pornography, and prostitution and their implications for behavior.
• compare and contrast the research findings on rape, incest, sexual harassment, pornography, and prostitution.
• compare and contrast effective and ineffective communication strategies.
• SLO #3. Evaluate psychological data, draw reasonable conclusions, recognize the ethical implications of these conclusions, and apply these conclusions to personal, community, and scientific problems.
• recognize the ethical implications of research in the study of human sexual behavior and the responsibility to pursue and use empirical knowledge wisely.
• reach and clearly express logical conclusions based on data derived from inquiry in the field of human sexual behavior.
• apply critical thinking skills to the analysis of research findings on sexual motivation, variety, difficulties, and issues.
• SLO #4. Integrate content knowledge, cognitive and affective skills and technical proficiency in completing exams, term papers, presentations and other class assignments. These skills include: ambiguity tolerance, learning, memory, logical thinking, problem-solving, moral reasoning, decision-making, and critical thinking.
• think critically with respect to individual expression of human sexual behavior and to community and social issues that pertain.
• apply critical thinking skills to the analysis of research findings on childhood, adolescent, and adult sexuality.
• SLO #5. Apply biopsychosocial principles derived from the study of human sexual behavior to the development of interpersonal, occupational and social skills and life-long personal growth.
• apply communication skills for sharing thoughts and feelings about human sexuality.
• apply critical thinking skills to the analysis of research findings on sexual behavior.
• apply critical thinking skills and guidelines for avoiding and/or coping with nonconsensual and/or gratuitous sexual circumstances.
• comprehend the implications of this knowledge for daily life.
• make responsible and intelligent choices based on personal needs, desires, and values rather than on elements like guilt, fear, pressure, or ignorance.
• SLO #6. Recognize the complexity of social, cultural, and international diversity and the principles of equity, justice and inclusion in their lives.
• demonstrate understanding of individual and cultural differences pertaining to the topics addressed in the study of human sexual behavior.
• demonstrate understanding of the ethical issues and broader sociopolitical issues associated with the study of human sexual behavior.

PSYC 368 Cross Cultural Psychology

Units: 3
Hours: 54 hours LEC
Prerequisite: None.
Transferable: CSU; UC
General Education: AA/AS Area V(b); AA/AS Area Vl; CSU Area D; IGETC Area 4
Catalog Date: June 1, 2020

This course explores the impact of cultural influences on the psychological and individual development of ethnic group members. Emphasis will be placed on integrating traditional theoretical approaches and current cross-cultural statistical research and theory in the study of African-Americans, Asian Americans, Hispanic Americans, Native Americans, gays & lesbians, the elderly, and the disabled.
Upon completion of this course, the student will be able to:

- SLO #1. Differentiate between scientifically derived knowledge and myth and conjecture about the topics of cross cultural psychology and demonstrate understanding of psychological theory and scientific method.
- compare and contrast research biases in the study of individuals from diverse populations.
- research psychological concepts applied to diverse groups from a theoretical perspective and research orientation.
- SLO #2. Compare and contrast the major theoretical orientations in cross cultural psychology, demonstrate knowledge of basic psychological terminology regarding behavior, cognition, and emotion, and be able to express this clearly when writing or speaking about cross cultural psychology.
- define culture; ethnic group demographics; family and gender roles; collectivism and individualism; research methodologies; identity formation and ethnicity; stereotypes, prejudice and discrimination; cognition and intelligence; language, bilingualism and non verbal communication; psychosocial stressors; and behavior disorders.
- demonstrate an understanding of, describe, and critically analyze the research on the impact of culture and minority status on basic psychological processes.
- describe and analyze specific empirical studies of psychological issues among diverse individuals.
- synthesize the research on the influence of culture on issues related to physical and mental health.
- SLO #3. Integrate content knowledge, cognitive and affective skills and technical proficiency in completing exams, term papers, presentations and other class assignments. These skills include: ambiguity tolerance, learning, memory, logical thinking, problem-solving, decision-making, and critical thinking.
- SLO #4. Evaluate cross cultural psychological data, draw reasonable conclusions, recognize the ethical implications of these conclusions, and apply these conclusions to personal, community, and scientific problems.
- demonstrate an understanding of cross cultural research and its application to minority populations identified issues and problems.
- SLO #5. Apply cross cultural psychological principles to the development of interpersonal, occupational and social skills and life-long personal growth.
- understand and analyze psychological issues related to individual and institutionalized ethnocentrism, stereotyping, and prejudice, including recognizing one's own ethnocentrism, stereotypes and prejudice.
- SLO #6. Recognize the complexity of social, cultural, and international diversity and the principles of equity, justice and inclusion in their lives.
- explain how issues of diverse populations are interwoven with social and political institutions.

PSYC 371 Life Span Developmental Psychology

Upon completion of this course, the student will be able to:

- SLO #1. Differentiate between scientifically derived knowledge and myth and conjecture about the topics of life span developmental psychology and demonstrate understanding of developmental psychological theory and scientific method.
- compare and contrast the scientific method to other approaches to understanding human development.
compare and contrast the major theoretical orientations in life span developmental psychology, demonstrate knowledge of basic psychological terminology regarding behavior, cognition, and emotion, and be able to express this clearly when writing or speaking about life span developmental psychology.

SLO #2: Evaluate psychological data, draw reasonable conclusions, recognize the ethical implications of these conclusions, and apply these conclusions to personal, community, and scientific problems.

reach and clearly express logical conclusions based on data derived from inquiry in the field of developmental psychology

recognize the ethical implications of psychological research and the responsibility to pursue and use knowledge wisely.

SLO #3: Compare and contrast the major theoretical orientations in life span developmental psychology, demonstrate knowledge of basic psychological terminology regarding behavior, cognition, and emotion, and be able to express this clearly when writing or speaking about life span developmental psychology.

synthesize and/or apply knowledge of concepts, theory, and research findings surveyed within the field of life span developmental psychology.

SLO #4: Integrate content knowledge, cognitive and affective skills and technical proficiency in completing exams, term papers, presentations and other class assignments. These skills include: ambiguity tolerance, learning, memory, logical thinking, problem-solving, decision-making, and critical thinking.

SLO #5: Recognize the complexity of social, cultural, and international diversity and the principles of equity, justice and inclusion in their lives.

demonstrate understanding of individual and sociocultural differences with respect to the topics addressed in life span developmental psychology.

SLO #6: Apply life span developmental psychological principles to the development of interpersonal, occupational and social skills and life-long personal growth.

demonstrate the application of life span developmental psychological principles to personal, interpersonal, occupational, and social contexts.

PSYC 495 Independent Studies in Psychology

Units: 1 - 3
Hours: 54 - 162 hours LAB
Prerequisite: None.
Transferable: CSU
Catalog Date: June 1, 2020

An independent studies project involves an individual student or small group of students in study, research, or activities beyond the scope of regularly offered courses. See the current catalog section of “Special Studies” for full details of Independent Studies.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO #1: Actively engage in intellectual inquiry beyond that required in order to pass a course of study (College Wide Learning Outcome – Area 4).

- Discuss and outline a proposal of study (that can be accomplished within one semester term) with a supervising instructor qualified within the discipline.

- Design an independent study (to be completed individually or by collaboration of a small group) to foster special knowledge, skills, and experience that are not available in any one regularly scheduled course.

- Use information resources to gather discipline-specific information.

- SLO #2: Utilize modes of analysis and critical thinking to apply theoretical perspectives and/or concepts in the major discipline of study to significant problems and/or educational activities (College Wide Learning Outcome – Area 3).

- Analyze and apply the knowledge, skills and experience that are involved in the independent study to theoretical perspectives and/or concepts in the major discipline of study.

- Explain the importance of the major discipline of study in the broader picture of society.

- SLO #3: Communicate a complex understanding of content matter of the major discipline of study (College Wide Outcome – Area 3).

- Demonstrate competence in the skills essential to mastery of the major discipline of study that are necessary to accomplish the independent study.

- SLO #4: Identify personal goals and pursue these goals effectively (College Wide Outcome – Area 4).
Utilize skills from the "academic tool kit" including time management, study skills, etc., to accomplish the independent study within one semester term.
Radio, Television and Film Production  
| Cosumnes River College

This instructional program is designed to train students for skills needed in jobs requiring basic knowledge in Radio, Television or Film Production. Training includes classes in radio, television, film, broadcasting, broadcast and print journalism, editing, and design. Students will be prepared for entry-level jobs in education, government, broadcasting, advertising and public relations, as well as having a base for transfer to a four-year institution.

Dean

 (916) 691-7170

 BedforB@crc.losrios.edu

Associate Degree

A.A. in Radio Production

This Program concentrates on the audio portion of broadcasting, with emphasis on performing, editing, production and knowledge of radio programming. Students will learn to prepare both professional live and pre-recorded radio programs for the campus internet radio station. This option can lead to an entry-level position with a commercial radio station.

Highlights include:

* Internship opportunities at local radio stations
* Practical experience at the campus radio station, internet broadcasting and podcasting on the campus radio station.

Note to Transfer Students:
If you are interested in transferring to a four-year college or university to pursue a bachelor's degree in this major, it is critical that you meet with a CRC counselor to select and plan the courses for your major. Schools vary widely in terms of the required preparation. The courses that CRC requires for an Associate’s degree in this major may be different from the requirements needed for the Bachelor’s degree.

Catalog Data: June 1, 2020

The Radio Production Associate in Arts (A.A.) degree may be obtained by completion of the required program, plus general education requirements, plus sufficient electives to meet a 60-unit total. See CRC graduation requirements.

**Student Learning Outcomes**

Upon completion of this program, the student will be able to:

- Write in clear, concise English in the production of radio copy. (PSLO-1)
- Demonstrate knowledge of the history, processes and current structure of the electronic media. (PSLO-2)
- Use radio, communication information and entertainment to serve diverse audiences in culturally responsive ways (PSLO-3)
- Demonstrate sensitivity to variations and processes of media and the attitudes held by races, religions, political and social groups. (PSLO-4)
- Understand how to plan, produce, write and direct radio projects using analog and digital technology. (PSLO-5)
- Demonstrate an achievement of professional-level skills in radio production. (PSLO-6)

**Career Information**

Disc Jockey; Announcer; Sportscaster; Studio Technician; Newscaster; Audio Technician; Radio Producer; Promotions Coordinator Some career options may require more than two years of college study. Classes beyond the associate degree may be required to fulfill some career options or for preparation for transfer to a university program.

**Certificate of Achievement**

**Radio Production Certificate**

This program is designed to provide skills in radio production through the preparation of programming for the campus radio station and through podcasting. This option can lead to entry level jobs in radio stations, audio production companies and Cable TV business or serve as preparation for transfer to a four-year institution.

**Catalog Date:** June 1, 2020

**Student Learning Outcomes**

Upon completion of this program, the student will be able to:

- Demonstrate an advanced understanding of the fundamentals of radio production. (PSLO #1)
- Articulate, critique, recognize and demonstrate commercial radio station operations.
- Demonstrate proper microphone placement for public address or recording.
- Perform basic studio and non-studio audio recording tasks. (PSLO #2)
- Demonstrate analog and digital techniques used in audio production.

**Career Information**

Disc Jockey; Announcer; Sportscaster; Studio Technician; Newscaster; Audio Technician; Radio Producer; Promotions Coordinator.
Radio, Television and Film Production
| Cosumnes River College

This instructional program is designed to train students for skills needed in jobs requiring basic knowledge in Radio, Television or Film Production. Training includes classes in radio, television, film, broadcasting, broadcast and print journalism, editing, and design. Students will be prepared for entry-level jobs in education, government, broadcasting, advertising and public relations, as well as having a base for transfer to a four-year institution.

Associate Degree for Transfer

A.S.-T. in Film, Television and Electronic Media

The Associate in Science in Film, Television and Electronic Media for Transfer degree provides students with a major that fulfills the general requirements of the California State University for transfer to baccalaureate degree programs in film, television and electronic media. Students with this degree will receive priority admission with junior status to the California State University System. The Associate in Science Degree in Film, Television and Electronic Media for Transfer is comprised of lower division coursework typically required by CSU institutions.

Students must complete the following Associate Degree for Transfer requirements (Pursuant to SB1440, §66746):

• 60 semester or 90 quarter CSU-transferable units
• the California State University-General Education-Breadth pattern (CSU GE-Breadth); OR the Intersegmental General Education Transfer Curriculum (IGETC) pattern
• a minimum of 18 semester or 27 quarter units in the major or area of emphasis as determined by the community college district
• obtain a minimum grade point average (GPA) of 2.0
• earn a grade of C or better in all courses required for the major or area of emphasis

Upon successful completion of the Associate in Science Degree in Film, Television and Electronic Media for Transfer degree requirements, students will be guaranteed admission to the CSU system with junior status and will not have to repeat lower division coursework. Each California State University may have slightly different requirements for transfer so it is critical for students to work with their counselors to develop individual academic plans.

Catalog Date: June 1, 2020

1 Or any course not used above. RTVF 330 is a prerequisite to this course and must be taken first.

2 Or any course not used above.

The Associate in Science in Film, Television and Electronic Media for Transfer (AS-T) degree may be obtained by completion of 60 transferable, semester units with a minimum 2.0 GPA, including (a) the major or area of emphasis described in the Required Program, and (b) either the Intersegmental General Education Transfer Curriculum (IGETC) or the California State University General Education-Breadth Requirements.

Student Learning Outcomes

Upon completion of this program, the student will be able to:

- Write in clear, concise English. (SLO-1)
- Research critically, filter the results and present them in a cogent manner. (SLO-2)
- Resolve and execute standard pre-production skills including planning, script, script breakdown, budgeting, storyboard creation, and crew and equipment selection. (SLO-3)
- Utilize basic field production equipment correctly, safely and creatively, including cameras, lights and audio.
- Operate essential post production equipment for audio and film/video editing and distribution in a variety of contemporary and emerging methods.
- Demonstrate a hands-on ability to perform the professional level critical thinking needed for successful teamwork in media. (SLO-4)
- Using audio, communicate information and entertainment to serve diverse audiences in culturally responsive ways (SLO-5)
- Analyze, interpret, and exercise critical judgment in the evaluation of media productions.

Career Information

Career Opportunities upon successful completion of a baccalaureate degree in film, television or electronic media include but are not limited to positions as: Radio Personality; Camera Operator; Cinematographer; Director of Photography; Lighting Director; Computer Graphic Artist; Non-Linear Video Editor; Audio Engineer; Radio Producer; Broadcast Technician; Gaffer; Production Coordinator; Production Assistant; TV, Film, DVD, or Internet Producer/Director; and Personal or Corporate Video.

Radio, Television, and Film (RTVF)

RTVF 295 Independent Studies in Radio, Television, and Film
An independent studies project involves an individual student or small group of students in study, research, or activities beyond the scope of regularly offered courses. See the current catalog section of "Special Studies" for full details of Independent Studies.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO #1: Actively engage in intellectual inquiry beyond that required in order to pass a course of study (College Wide Learning Outcome – Area 4).
- Discuss and outline a proposal of study (that can be accomplished within one semester term) with a supervising instructor qualified within the discipline.
- Design an independent study (to be completed individually or by collaboration of a small group) to foster special knowledge, skills, and experience that are not available in any one regularly scheduled course.
- Use information resources to gather discipline-specific information.
- SLO #2: Utilize modes of analysis and critical thinking to apply theoretical perspectives and/or concepts in the major discipline of study to significant problems and/or educational activities (College Wide Learning Outcome – Area 3).
- Analyze and apply the knowledge, skills and experience that are involved in the independent study to theoretical perspectives and/or concepts in the major discipline of study.
- Explain the importance of the major discipline of study in the broader picture of society.
- SLO #3: Communicate a complex understanding of content matter of the major discipline of study (College Wide Outcome – Area 3).
- Demonstrate competence in the skills essential to mastery of the major discipline of study that are necessary to accomplish the independent study.
- SLO #4: Identify personal goals and pursue these goals effectively (College Wide Outcome – Area 4).
- Utilize skills from the "academic tool kit" including time management, study skills, etc., to accomplish the independent study within one semester term.

RTVF 300 Mass Media and Society

Survey of the mass media: history, philosophy, structure and trends, as well as theories which help to explain effects and the importance as a social institution. Exploration of economics, technology, law, ethics, and social issues, including cultural and ethnic diversity. This course is the same as JOUR 310, and only one may be taken for credit. (C-ID JOUR 100)

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- apply the basic vocabulary and concepts of mass communication verbally and in clear, concise English (SLO #1 GE Vb a).
- define the various roles of mass media professionals.
- compare and contrast the origins, development, functions and effects of various mass media.
- research critically, filter the results and present them in a cogent manner (SLO #2).
- evaluate the possible causes and suggest solutions to introductory problems of a conceptual nature using the methods appropriate to the study of Mass communication (SLO #3/ GE Vb b).
- analyze the economics of the mass media.
- assess the impact of media messages on various audiences.
- recognize the use and misuse of social and behavioral science concepts in society including politics and the media (SLO #4/ GE Vb c).
- identify basic media theories and their application to contemporary media use and behavior.
- predict future roles and developments in mass media.
- analyze, interpret, and exercise critical judgment in the evaluation of media productions (SLO #5).
- create a simple content analysis of a media product.
- demonstrate that with the power of a communicator, comes moral and ethical responsibility (SLO #6).
- explain and analyze the legal and ethical rights, regulations and responsibilities of the media in America.

RTVF 302 Introduction to Digital Design & Storytelling

| Units: | 3 |
| Hours: | 54 hours LEC |
| Prerequisite: | None. |
| Transferable: | CSU |
| General Education: | AA/AS Area I |
| Catalog Date: | June 1, 2020 |

The course explores computer-based images, text, graphics, narration, video and music in today's visual and social media. Students will analyze media literacy, audience, narrative elements, themes and the review of visual media through the lens of story structure.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO #1: Analyze media literacy.
- Determine applicable uses for graphic, audio and video files in storytelling.
- SLO #2: Communicate through technology with an ever-expanding community, gather information, and produce content and create a narrative.
- The ability to understand the process of creating a narrative through the use of production of visual images and sound
- SLO #3: Express an analyses and interpretation of media applications and concepts.
- SLO #4: Use vocabulary appropriate to the field.
- SLO #5: Analyze, interpret, and exercise critical judgment in the evaluation of media forms from different cultures.

RTVF 304 Introduction to Multimedia

| Units: | 3 |
| Hours: | 36 hours LEC; 54 hours LAB |
| Prerequisite: | None. |
| Advisory: | CISC 302 or JOUR 330 |
| Transferable: | CSU |
| Catalog Date: | June 1, 2020 |

This course is designed to familiarize students with designing and producing multimedia presentations. Emphasis will be given to developing skills in producing photographic, graphic, video and audio materials used for the World Wide Web and multimedia presentations. The course presents a description and history of computer-interactive multimedia. Students explore current uses of these technologies and receive instruction in practical application. Each student conceives, writes, and designs a high-level multimedia program, using a user-friendly system. Some applications for multimedia include: professional presentations, specialized instruction research, Internet web pages, job training, interactive newsletters, computer games and point-of-purchase marketing.

Student Learning Outcomes

Upon completion of this course, the student will be able to:
RTVF 305 Film History

An introduction to the art of motion pictures, using both lectures and films. Students will briefly study the history of motion pictures and will view, evaluate, and critique films which are landmarks in the art of movie making. This course is the same as FMS 305, and only one may be taken for credit.

Upon completion of this course, the student will be able to:

- analyze, interpret, and exercise critical judgment in the evaluation of film and media forms and cultures (SLO-1).
- analyze film critically through stylistic, narrative, and thematic analyzes.
- critique and understand films as art, literature, and communication.
- recognize, articulate, and judge the visual, verbal, and audio conventions through which images, words, and sounds make meaning in film and media texts (SLO-2).
- critique the stylistic, narrative, and thematic concerns in major works of film art.
- identify, understand, and evaluate the language of film narration, editing, and cinematography.
- develop and apply the technical language of film art and industry in evaluating film production and direction.
- demonstrate an understanding of the professional, technical, and formal choices that realize, develop, or challenge existing practices and traditions in film (SLO-3).
- employ basic critical approaches (formalistic, psychological, socio-political, and generic) in analyzing films and their cultural implications.
- evaluate the role of technologies in the development of film art.
- assess what type of information is needed for a research question, problem, or issue and identify, evaluate and effectively apply this information in scholarly or visual projects (SLO-4).
- describe the history, development, genre, and movements of the film medium and recognize the contributions of national, minority, diasporic, and subaltern filmmakers (SLO-5).
- classify and critique the periods, movements, major figures, landmark films, genres, and codes of film.
- compare and contrast the work of different directors and the concerns of different national cinema.
- recognize and evaluate the contributions of women and minorities to film.
This course introduces the close analysis of film and television texts to students. It examines the broad questions of form and content, aesthetics and meaning, and history and culture. Students explore the diverse possibilities presented by the cinematic art form through an examination of a wide variety of productions, national cinemas, and film movements. Topics include modes of production, narrative and non-narrative forms, visual design, editing, sound, genre, ideology and critical analysis.

**Student Learning Outcomes**

Upon completion of this course, the student will be able to:

- Critically analyze film and television as a technology, business, cultural production/cultural artifact, entertainment medium and art form. (SLO #1).
- Demonstrate the ability to critically analyze, interpret, and write about film and electronic media using film-specific language.
- Demonstrate visual literacy through the application of the analytical tools of categories, theories and ideologies to understand the cinematic arts' complex role and function in society.
- Recognize, describe and analyze formal aesthetic elements of the cinematic arts. (i.e.: Cinematography, Editing, Mise-en-scene, Sound) (SLO #2)
- Prepare analytical essays regarding the technical, aesthetic, and cultural aspects of the cinematic arts. (SLO #3)

**RTVF 310 History of American Radio 1920-1950**

An introductory study of radio as a cultural medium in American society from the 1920's to the 1950's. Examples from popular programs in comedy, news, sports, mystery and adventure, serials, music and drama are included. Formerly known as CMED 310.

**Student Learning Outcomes**

Upon completion of this course, the student will be able to:

- understand the unique qualities and contribution of radio from the 1920's to the 1950's (70% accuracy).
- identify the characteristics of radio's most popular programs and personalities (70% accuracy).
- analyze the sound-silence-music-dialogue combination used on certain radio programs to stimulate imaginative listener response.

**RTVF 312 Beginning Radio Production**

This is an introductory course in theory and application of audio production techniques for radio. Students will gain a basic understanding of audio equipment in both live and pre-recorded broadcasting. This includes recording equipment, mixers, digital audio production, radio program formats, broadcast writing and announcing skills. This course should be taken prior to Radio Workshop, RTVF 316.

**Student Learning Outcomes**

Upon completion of this course, the student will be able to:
Student Learning Outcomes

Upon completion of this course, the student will be able to:

- Demonstrate improvement in personal speech production within broadcasting (SLO #1).
- Achieve effective, vivid, and expressive vocal variation.
- Develop a pleasant vocal quality by eliminating such defects as breathiness, harshness, vocal fry, nasality, throatiness and/or hoarseness.
- Develop control over the elements of pitch, rate, volume, accent, and inflection/intonation (SLO #2).
- Identify, evaluate and apply appropriate articulation techniques.
- Demonstrate proper microphone placement for public address or recording (SLO #3).
- Demonstrate critical listening skills of message content as well as the technical quality in recording.
- Prepare scripts and written materials for oral presentations.

RTVF 316 Introduction to Radio Workshop

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO #1 Demonstrate an advanced understanding of the fundamentals of radio production.
- Articulate, comprehend, recognize and demonstrate commercial radio station operations.
- Demonstrate analog and digital techniques used in audio production.
- Demonstrate critical thinking skills and conceptual problem-solving skills to create a portfolio of work in audio production.
- Discuss, analyze and write about audio productions.

RTVF 319 Beginning Audio Production

Units: 3
Hours: 36 hours LEC; 54 hours LAB
Prerequisite: None.
Transferable: CSU
Catalog Date: June 1, 2020

This course serves as an introduction to the theory and practice of audio production for radio, television, film and digital recording applications. Students will learn the fundamentals of sound design and aesthetics, microphone use, and digital recording equipment. Students gain hands on experience recording, editing, mixing and mastering audio. Upon completion, students will have basic knowledge of applied audio concepts, production workflow, equipment functions, and audio editing software.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- understand basic physics of sound terminology; the sound wave, frequency/pitch, amplitude/loudness, phase, and timbre (SLO #1)
- comprehend acoustics; microphone classification, placement and use; theory and practical use of consoles, computers and software; analog/digital recording and storage devices; patching; editing; time code; signal processors; loudspeakers
- perform complex audio production techniques (SLO #2)
- describe audio production software interface
- demonstrate refined techniques for audio production using Pro Tools or other appropriate audio software
- understand audio used in studio and on-location production for radio, television and film
- create sound effects and original sound clips for dynamic media.
- collect, create, analyze, and evaluate digital audio clips.
- articulate the process of waveform editing.
- outline the basic process for digitizing audio clips.
- understand audio processes for voice recording, multimedia production, sound design
- outline the basic process for digitizing audio clips
- complete applied projects to assess the student’s knowledge of recording, editing, mixing, and balancing
- evaluate and conduct both destructive and nondestructive waveform editing procedures
- explore the emotional and physical perception of music, voice and sound and the aesthetics of audio mixing
- demonstrate appropriate workplace behavior in a studio setting (SLO #3)

RTVF 330 Beginning Single Camera Production

Units: 3
Hours: 36 hours LEC; 54 hours LAB
Prerequisite: None.
Transferable: CSU
C-ID: C-ID FTVE 130
Catalog Date: June 1, 2020
This course provides an introduction to the theory, terminology, and operation of single camera video production, including composition and editing techniques, camera operation, portable lighting, video recorder operation, audio control and basic editing. This course focuses on the aesthetics and fundamentals of scripting, producing, directing on location, post production, and exhibition/distribution.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- demonstrate both the technical and aesthetic aspects of video field production and knowledge of basic production techniques (SLO 1)
- operate and set up portable video and sound equipment including camera and microphones and complete a basic edit of the material
- incorporate professional pre-production planning including proper use of forms for scripting, budgeting, script breakdown and lists
- operate video field recording equipment correctly to acquire quality video and audio products (SLO 2)
- conceive and execute appropriate approaches to editing field footage into cohesive projects (SLO 3)
- analyze professional and student work and evaluate proper technique and areas for improvement
- apply post production theory (i.e. continuity and dynamic editing) plus basic operation for nonlinear editing including ingest, editing operation and distribution
- demonstrate the skills needed for successful teamwork in television, film or other media employment (SLO 4)
- demonstrate through projects that with the power of a communicator, comes moral and ethical responsibility (SLO 5)
- assemble a final individual project suitable for review and evaluation during a department showcase.

RTVF 331 Beginning Television Studio Production

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- write in clear, concise English. (SLO-1)
- write original scripts, program proposals and reviews of professional and student work.
- improve writing proficiency over time.
- conceive and execute standard pre-production skills including planning, scripting, budgeting, and crew and equipment selection. (SLO-2)
- categorize and explain different scripting formats and show run downs.
- plan group projects exploring how productions are developed.
- utilize basic video production equipment correctly, safely and creatively, including cameras, lights and audio, and control room equipment such as audio mixers, switchers, video recording, character generation and teleprompter. (SLO-3)
- describe essential post production equipment for audio and video editing. (SLO-4)
- analyze, interpret, and exercise critical judgment in the evaluation of media productions. (SLO-5)
- demonstrate a hands-on ability to perform appropriate critical thinking needed for successful teamwork in television, film or media employment. (SLO-6)
Within this course, students plan the total operational process for actual television programs (on air or closed-circuit), as well as participate in and take responsibility for various aspects of the finished program, such as camera operation, audio, switching, lighting, sets, graphics, editing and directing.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- write in clear, concise English (SLO-1).
- write clear and correct sentences using correct capitalization, spelling and punctuation suitable for use in a business environment.
- recognize and correct major writing errors to eliminate fragments, run-on sentences, subject-verb agreement, pronoun agreement and references.
- utilize appropriate presentation of written materials to demonstrate an awareness of the effects of style, design and packaging in working with business professionals.
- write increasingly complex scripts and program proposals for consideration as possible programs for production.
- write in-depth reviews of professional and student work.
- improve writing proficiency over time.
- resolve and execute standard pre-production skills including planning, scripting, budgeting, and crew and equipment selection. (SLO-2)
- categorize and explain different scripting formats and show rundowns.
- plan group projects exploring how productions are developed in a professional way.
- utilize all levels of video production equipment (consumer/professional) correctly, safely and creatively, including cameras, lights and audio, and control room equipment such as audio mixers, switchers, video recording, character generation and teleprompter. (SLO-3)
- operate equipment safely according to professional standards.
- utilize studio cameras, tripods, microphones, lights, dimmer boards, character generator, switcher/special effects generator with digital video effects (DVE).
- explore increasingly complex approaches to program production including alternative angles, lighting, increased use of graphics and effects, and crew utilization and control.
- operate an audio mixer correctly, setting levels, balancing multiple inputs, and meeting professional standards for quality.
- participate as crew member in multiple student productions intended for broadcast on cable television.
- operate essential post production equipment for audio and video editing. (SLO-4)
- utilize non-linear editing equipment to produce individual and/or group projects incorporating digital capture into a computer, editing audio and video with graphics and exporting projects for use in student programming and other distribution methods.
- analyze, interpret, and exercise critical judgment in the evaluation of media productions. (SLO-5)
- critique student production technique and process in written and verbal form.
- describe advanced television production techniques and crew responsibilities, including anticipating common errors and how to avoid them.
- criticize evaluate and react to student productions, explaining whether projects meet their anticipated goals.
- demonstrate a hands-on ability to perform the professional level critical thinking needed for successful teamwork in television, film or other media employment. (SLO-6)
- integrate theoretical program production application into practice with increasing understanding of appropriate professional conduct.
RTVF 341 Television Production Workshop II

Within this course, students gain additional experience in creating television programming for cable TV, internet or DVD distribution. Besides production experience, they may take more active roles as producers, directors and production managers. Participation as production crew positions and with field remotes are required.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- write in clear, concise English. (SLO-1)
- write clear and correct sentences using correct capitalization, spelling and punctuation suitable for use in a business environment.
- recognize and correct major writing errors to eliminate fragments, run-on sentences, subject-verb agreement, pronoun agreement and references.
- utilize appropriate presentation of written materials to demonstrate higher levels of effective communication for use in video and multimedia.
- write increasingly complex scripts and program proposals demonstrating increased ability to combine writing and visual presentation techniques and audience effect.
- improve writing proficiency over time.
- resolve and execute standard pre-production skills including planning, scripting, budgeting, and crew and equipment selection. (SLO-2)
- categorize and explain different show rundowns and broadcast approaches including fictional narrative, documentary and alternative approaches.
- plan group projects exploring how productions are developed in a professional way.
- utilize all levels of video production equipment (consumer/professional) correctly, safely and creatively, including cameras, lights and audio, and control room equipment such as audio mixers, switchers, video recording, character generation and teleprompter. (SLO-3)
- operate equipment safely according to professional standards.
- explore increasingly complex approaches to program production including both visual and audio aspects of communication.
- operate essential post production equipment for audio and video editing. (SLO-4)
- utilize non-linear editing equipment to produce individual and/or group projects incorporating digital capture into a computer, editing audio and video with graphics and exporting projects for use in student programming and other distribution methods.
- incorporate advanced editing techniques, possibly including compositing, chroma key, and integrated graphics and animation from alternate computer software applications.
- analyze interpret, and exercise critical judgment in the evaluation of media productions. (SLO-5)
- critique student production technique and process in written and verbal form.
- criticize evaluate and react to student and professional productions, explaining whether projects likely met their anticipated goals.
- demonstrate a hands-on ability to perform the professional level critical thinking needed for successful teamwork in television, film or other media employment. (SLO-6)
- integrate theoretical program production application into practice with increasing understanding of appropriate professional conduct.

RTVF 342 Television Production Workshop III

Units: 2
Hours: 108 hours LAB
Prerequisite: RTVF 340 with a grade of "C" or better
Transferable: CSU
Catalog Date: June 1, 2020
This course is designed for the production of new types of video programming for cable, business, industry and special groups - religious, ethnic, minorities, children, and women.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- write in clear, concise English. (SLO-1)
- write clear and correct sentences using correct capitalization, spelling and punctuation suitable for use in broadcasting.
- recognize and correct major writing errors to eliminate fragments, run-on sentences, subject-verb agreement, pronoun agreement and references.
- utilize appropriate presentation of written materials to demonstrate increasing skill in using technology to communicate ideas.
- write increasingly complex script focusing on special populations.
- improve broadcast writing proficiency over time.
- resolve and execute standard pre-production skills including planning, scripting, budgeting, and crew and equipment selection. (SLO-2)
- categorize and explain different show rundowns and broadcast approaches including fictional narrative, documentary and alternative approaches.
- plan group projects exploring how productions are developed in a professional way.
- utilize all levels of video production equipment (consumer/professional) correctly, safely and creatively, including cameras, lights and audio, and control room equipment such as audio mixers, switchers, video recording, character generation and teleprompter. (SLO-3)
- operate equipment safely according to professional standards.
- explore increasingly complex approaches to program production including both visual and audio aspects of communication.
- operate essential post production equipment for audio and video editing. (SLO-4)
- utilize non-linear editing equipment to produce individual and/or group projects incorporating digital capture into a computer, editing audio and video with graphics and exporting projects for use in student programming and other distribution methods.
- incorporate advanced editing techniques, possibly including compositing, chroma key, and integrated graphics and animation from alternate computer software applications.
- analyze interpret, and exercise critical judgment in the evaluation of media productions. (SLO-5)
- critique student production technique and process in written and verbal form.
- criticize evaluate and react to student and professional productions, explaining whether projects likely met their anticipated goals.
- demonstrate a hands-on ability to perform the professional level critical thinking needed for successful teamwork in television, film or other media employment. (SLO-6)
- integrate theoretical program production application into practice with increasing understanding of appropriate professional conduct.

RTVF 343 Television Production Workshop IV

This course is designed for students preparing for industry jobs as producers, directors and production managers. Students provide focused attention in the process of pre-production, production and post-production. Participation as production crew positions and with field remotes is required.
Upon completion of this course, the student will be able to:

- write in clear, concise English. (SLO-1)
- write clear and correct sentences using correct capitalization, spelling and punctuation suitable for professional broadcasting.
- recognize and correct major broadcast style writing error, including pronunciation notes, split page script formatting, and broadcast attribution for both audio and text generation.
- utilize appropriate presentation of written materials to demonstrate an awareness of the effects of style, design and packaging creating profession video projects for broadcast.
- write increasingly complex scripts and program proposals for possible inclusion in a job portfolio.
- improve writing proficiency over time.
- resolve and execute standard pre-production skills including planning, scripting, budgeting, and crew and equipment selection. (SLO-2)
- categorize and explain different show rundowns and broadcast approaches including fictional narrative, documentary and alternative approaches.
- plan group projects exploring how productions are developed in a professional way.
- utilize all levels of video production equipment (consumer/professional) correctly, safely and creatively, including cameras, lights and audio, and control room equipment such as audio mixers, switchers, video recording, character generation and teleprompter. (SLO-3)
- operate equipment safely according to professional standards.
- explore increasingly complex approaches to program production including both visual and audio aspects of communication.
- operate essential post production equipment for audio and video editing. (SLO-4)
- utilize non-linear editing equipment to produce individual and/or group projects incorporating digital capture into a computer, editing audio and video with graphics and exporting projects for use in student programming and other distribution methods.
- incorporate advanced editing techniques, possibly including compositing, chroma key, and integrated graphics and animation from alternate computer software applications.
- analyze interpret, and exercise critical judgment in the evaluation of media productions. (SLO-5)
- critique student production technique and process in written and verbal form.
- criticize evaluate and react to student and professional productions, explaining whether projects likely met their anticipated goals.
- demonstrate a hands-on ability to perform the professional level critical thinking needed for successful teamwork in television, film or other media employment. (SLO-6)
- integrate theoretical program production application into practice with increasing understanding of appropriate professional conduct.

### RTVF 350 Intermediate Film / Digital Cinema Production

**Units:** 3  
**Hours:** 36 hours LEC; 54 hours LAB  
**Prerequisite:** RTVF 330 with a grade of "C" or better  
**Transferable:** CSU  
**Catalog Date:** June 1, 2020

This course provides a hands-on project-based opportunity for students to create single-camera projects using a Hollywood-style field production. Students focus on producing and directing skills as well as understanding the roles of field production crews. Development of narrative and documentary ideas for field production using both guerrilla and conventional set techniques are emphasized. Topics include scriptwriting, cinematography, directing, and non-linear editing. Off-campus field trips or production opportunities outside of class time may be required. This course may be taken twice for credit.

### Student Learning Outcomes

Upon completion of this course, the student will be able to:

- write in clear, concise English. (SLO-1)
Student Learning Outcomes

Upon completion of this course, the student will be able to:

- write clear and correct sentences using correct capitalization, spelling and punctuation suitable for use in a business environment.
- recognize and correct major writing errors to eliminate fragments, run-on sentences, subject-verb agreement, pronoun agreement and references.
- utilize appropriate presentation of written materials to demonstrate an awareness of the effects of style, design and packaging in working with business professionals.
- write project proposals, scripts, and evaluations of student and professional work.
- resolve and execute standard pre-production skills including planning, scripting, budgeting, and crew and equipment selection. (SLO-2)
- demonstrate proper use of standard film production forms, terms and techniques.
- evaluate scheduling, planning and budgeting using standards designed to promote project success.
- utilize basic film and video production equipment correctly, safely and creatively including cameras, lights and audio. (SLO-3)
- practice appropriate safety techniques in film production.
- demonstrate a capacity to critically evaluate changing production situations and adapt to newly defined production parameters.
- operate essential post production equipment for audio and video editing and distribution in a variety of contemporary and emerging methods. (SLO-4)
- demonstrate the ability to use non-linear editing equipment for import, editing of audio and video and export.
- evaluate a variety of contemporary distribution formats and opportunities.
- analyze, interpret, and exercise critical judgment in the evaluation of media productions. (SLO-5)
- demonstrate through projects that with the power of a communicator, comes moral and ethical responsibility. (SLO-6)
- demonstrate a hands-on ability to perform the professional level critical thinking needed for successful teamwork in television, film or other media employment. (SLO-7)
- demonstrate an understanding of the professional, technical, and formal choices that realize, develop, or challenge existing practices and traditions in film. (SLO-8)
- describe a variety of methods for creative story-telling in a variety of genre.
- experiment with non-traditional shots, angles and approaches to the visual image
- produce projects that demonstrate an understanding of camera coverage, frame composition and mise-en-scene, camera perspective and blocking, editorial rhythm, pace, structure and style. (SLO-10)
- create personal, individual projects by design through delivery.
- identify job titles, roles and effectively participate in teams to create group-oriented projects from design to delivery.

RTVF 354 Audio Editing for Film & Video Post Production

3 Units: 36 hours LEC; 54 hours LAB
None.
RTVF 362; For best success, students taking Audio Editing for Film and Video using the Soundtrack Pro software, should complete RTVF 362 before taking this course.
CSU
June 1, 2020

This hands-on course provides understanding of how to edit audio and video files, repair field recordings, perform multi-track arranging and mixing, synchronize audio and video, analyze and fix common audio problems, and perform other creative sound design techniques. This course focuses on practical, professional techniques used to add music and sound effects to video and multimedia projects. This course is particularly designed for students who want to learn more about the basics of audio content creation, editing, and mixing in Soundtrack Pro as part of the Apple Final Cut Pro Studio. Students may choose to pay an additional fee and take an Apple Certified End User exam at the conclusion of this course.
• use and define the terms and procedures used in the process of audio production and editing for film and video on a computer. (SLO-1)
• operate essential post-production equipment for audio and video editing and distribution in a variety of contemporary and emerging methods. (SLO-2)
• incorporate improved utilization of audio editing tools in the Final Cut Pro Studio.
• plan, design, and revise projects using Apple’s Final Cut Pro and Soundtrack Pro.
• assemble projects by using prerecorded music, dialog and sound effects, or by creating original sound and music files.
• explain and use Automated Dialog Replacement, editing dialog and other advanced mixing techniques.
• analyze, interpret, and exercise critical judgment in the evaluation of media productions. (SLO-3)
• evaluate the aesthetics of projects and choose methods for improvement.
• demonstrate a hands-on ability to perform the professional level critical thinking needed for successful teamwork in television, film or other media employment. (SLO-4)
• plan and construct a final project utilizing the process demonstrated and export for use in film, a DVD, the Internet, or other multimedia production.

RTVF 360 Introduction to Motion Graphics: Adobe After Effects

Units: 3
Hours: 36 hours LEC; 54 hours LAB
Prerequisite: None.
Transferable: CSU
Catalog Date: June 1, 2020

This course is an introductory motion graphics course for students interested in digital video, multimedia, 3-D computer animation, and emerging broadcast technologies. Students will gain hands-on experience with picture and video manipulation, 3-D composing, paint and draw applications for film, broadcast, multimedia and the Internet.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

• write in clear, concise English. (SLO-1)
• write clear and correct sentences using correct capitalization, spelling and punctuation suitable for use in a business environment.
• recognize and correct major writing errors to eliminate fragments, run-on sentences, subject-verb agreement, pronoun agreement and references.
• create digital media projects that demonstrate effective use of established design principles for typography, color, images, animation, sound and video (SLO-2)
• plan, design and revise projects using Adobe After Effects.
• assemble animation projects using filters, transitions and 3-D motion.
• explain and use key frames, motion paths, layered elements and primary tools within Adobe After Effects.
• describe and apply the basic principles and processes used in traditional and digital graphic and multimedia design. (SLO-3)
• use and define the terms and procedures used in the production of motion graphics on a computer.
• differentiate between pixel based objects and vector based objects and create 2-D elements for use in motion graphic animation.
• operate essential post production equipment for audio and video editing and distribution in a variety of contemporary and emerging methods. (SLO-4)
• plan and construct a final project utilizing the process demonstrated and export the animation as video, for a DVD / CD-ROM or for the Internet or other emerging technologies.
• analyze, interpret, and exercise critical judgment in the evaluation of media productions. (SLO-5)
• evaluate the esthetics of projects and choose methods for improvement.
• demonstrate through projects that with the power of a communicator, comes moral and ethical responsibility. (SLO-6)

• demonstrate a hands-on ability to perform the professional level critical thinking needed for successful teamwork in television, film or other media employment. (SLO-7)

RTVF 361 Intermediate Motion Graphics: Adobe After Effects

Units: 3
Hours: 36 hours LEC; 54 hours LAB
Prerequisite: RTVF 360 with a grade of "C" or better
Transferable: CSU
Catalog Date: June 1, 2020

The course presents an intermediate level exploration of the theory and practice of animation for video, film and the Internet. Students study the contemporary uses of the techniques of computer animation. Intermediate level skills are developed in Adobe After Effects including advanced techniques of graphic motion over time. Techniques for creating 3-D graphics are explored in depth. Exposure to additional computer applications may include Apple's Motion, Animation Master or others.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

• write in clear, concise English. (SLO 1)
• write clear and correct sentences using correct capitalization, spelling and punctuation suitable for use in a business environment.
• recognize and correct major writing errors to eliminate fragments, run-on sentences, subject-verb agreement, pronoun agreement and references.
• utilize appropriate presentation of written materials to demonstrate an awareness of the effects of style, design and packaging in working with business professionals.
• describe and apply the basic principles and processes used in traditional and digital graphic and multimedia design. (SLO 2)
• Analyze, describe and name the aesthetic value of motion graphics in communication for film, video, commercials, and the Internet.
• operate Adobe's After Effects software for advanced compositing of graphics in motion over video and moving backgrounds. Students will produce projects in other software applications to create 3D models with extrusion to be used with elements exported into Adobe's After Effects.
• formulate and construct layers video projects and prepare their computer projects for export to video tape, CD or DVD and the Internet.
• explain and demonstrate a professional production approach and analysis of personal projects, other student work, and professional video projects. (SLO 3)
• Operate 2-D and 3-D software correctly to create professional quality animations and video projects. (SLO 4)
• analyze, interpret, and exercise critical judgment in the evaluation of media productions. (SLO 5)
• evaluate their projects and contrast the quality of their work against the work of professionals and other students.
• Produce a variety of individual projects utilizing correct design and implementation of professional theory and technique. (SLO 6)
• assemble a finished animation/project, export to a computer file and print to tape as necessary following both written and verbal instructions.
• demonstrate a hands-on ability to perform the professional level critical thinking needed for successful teamwork in television, film or other media employment. (SLO 7)

RTVF 362 Digital Non-Linear Video Editing
This course will provide an overview of the theory and practice of nonlinear editing for video and film utilizing nonlinear digital editing workstations. Student will examine the technical and aesthetic requirements of editing through the use of professional film and video dailies. Projects will explore computer graphics, computer animation, audio/visual applications and digital video.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- demonstrate both the technical and aesthetic aspects of non-linear editing and demonstrate knowledge of basic production techniques. (SLO 1)
- demonstrate sound and picture continuity and multiple track manipulation including transitions and multi-cam editing function.
- modify audio and video clips available in class to learn desktop non-linear video editing techniques including the use of timecode, on-line and off-line uses, and problems of RGB to NTSC transference.
- design and construct projects with character generation, transitions and typical Hollywood style construction.
- operate hardware and software building professional sound projects. (SLO 2)
- utilize or create basic art/objects and import, modify pictures from the Internet.
- compare and contrast theories about the future for video in support of multimedia, Internet applications and professional video including the commercial, corporate and mass media audience.
- operate additional hardware including digital cameras, DVD players, VCR’s, computer projections systems, and external digital storage devices like portable hard drives or Flash drives.
- produce a final individual project utilizing correct design and implementation of professional theory and technique (SLO 3)
- demonstrate how to move video from the computer back to video tape or as Quicktime movies for CD-ROM, DVD or the Internet.
- critique professional and student work and evaluate proper technique and areas for improvement.
- describe television technology and technique in spoken and written English (SLO 4)
- define basic concepts of digital video including sampling rates, frame rates, compression, color and sound manipulation.
- analyze terms and procedures typical in audio/video production and desktop editing.

RTVF 365 Intermediate Film & Video Editing

Upon completion of this course, the student will be able to:

- write in clear, concise English. (SLO #1, pSLO-1)
- write clear and correct sentences using correct capitalization, spelling and punctuation suitable for use in a business environment.
- recognize and correct major writing errors to eliminate fragments, run-on sentences, subject-verb agreement, pronoun agreement and references.
RTVF 368 Scriptwriting for Film, Video & Multimedia

Students will learn the mechanics of scriptwriting and formatting used for film and television as well as the writer's role in pre-production and production. Additionally, students are introduced to non-linear writing for new interactive multimedia technologies.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO #1: Describe what a motion picture or television treatment is and why treatments are important.
- Construct and pitch an idea and selling that idea, citing project cost, target audience, and why the project would be a success.
- SLO #2: Produce an interactive multimedia product illustrating the use of a back-story for leading characters in scripts.
- SLO #3: Work creatively with character, conflict, plot, theme, setting, dialogue, subtext, style, tone, genre, scene, sequence, act, climax, protagonist, antagonism, and other particular elements of the well-crafted screenplay.
- Convey story ideas both orally and in writing with clarity, conviction and style.
- Understand the role of screenwriters and others in the industry, and how to present screenplays and story ideas to industry gatekeepers.
- SLO #4: Use vocabulary appropriate to the field.
- SLO #5: Analyze, interpret, and exercise critical judgment in the evaluation of media forms from different cultures.

RTVF 370 Broadcast Writing & Announcing

Students learn fundamental techniques of broadcasting with an emphasis upon speaking and writing. Students practice with specified formats in the television studio and radio workshop. Lab experiences and review of microphone use and performance in front of the camera are included. A variety of non-news writing styles are explored.
Upon completion of this course, the student will be able to:

- write in clear, concise English (SLO-1).
- write clear and correct sentences using correct capitalization, spelling and punctuation suitable for use in a professional environment.
- recognize and correct major writing errors to eliminate fragments, run-on sentences, subject-verb agreement, pronoun agreement and references.
- utilize appropriate presentation of written materials to demonstrate an awareness of the effects of style, design and packaging in working with broadcasting or industry professionals.
- write increasingly complex scripts and program proposals for consideration as possible programs for production.
- write in-depth reviews of professional and student work.
- improve writing proficiency over time.
- resolve and execute standard pre-production skills including planning, scripting, budgeting, and crew and equipment selection. (SLO-2)
- categorize and explain different scripting formats and show rundowns.
- plan group projects exploring how productions are developed in a professional way.
- utilize production equipment (consumer/professional) correctly, safely and creatively, including an exposure to cameras, microphones, and lighting. (SLO-3)
- demonstrate proper microphone placement.
- examine a variety of performance techniques and styles for both sound and video.
- practice appropriate warm-up techniques and drills in preparation for recording sessions.
- Demonstrate an understanding of how to prepare and perform scene and monologues.
- analyze, interpret, and exercise critical judgment in the evaluation of media productions. (SLO-4)
- critique student production technique and process in written and verbal form.
- criticize, evaluate and react to student productions, explaining whether projects meet their anticipated goals.
- demonstrate a hands-on ability to perform the professional level critical thinking needed for successful teamwork in television, film or other media employment. (SLO-5)
- integrate theoretical program production application into practice with increasing understanding of appropriate professional conduct.

### RTVF 371 Hollywood TV and Film Studios: A Behind the Scenes Experience

| Units: | 1 |
| Hours: | 18 hours LEC |
| Prerequisites: | RTVF 330 or 331 with a grade of "C" or better |
| Transferable: | CSU |
| Catalog Date: | June 1, 2020 |

This course provides an overview and introduction to video and film production techniques utilized by professionals in and around Hollywood, CA. Students will learn about the operation of motion picture and television studios from behind the scenes. A variety of topics including preproduction, production and post-production techniques, set design and lighting, and the history of Hollywood-style production will be included. Guest speakers will provide a professional perspective on entry-level job skills and analysis of current workforce development.

### Student Learning Outcomes

Upon completion of this course, the student will be able to:

- analyze, interpret, and exercise critical judgment in the evaluation of media productions. (SLO-1, PSLO-6)
- analyze the relationships among working professionals in the technical and creative job categories of production.
- develop an appreciation of the standards of professionalism in the workplace.
- demonstrate a hands-on ability to perform the professional level critical thinking needed for successful teamwork in television, film or other media employment. (SLO-2, PLSO-8)
- recognize various film, video or digital production techniques currently in use or under development
- inventory entry-level job skills for employment at a major professional production facility.
- compare and contrast major forces driving the entertainment industry from a cultural and economic perspective.

RTVF 376 Advertising

Same As: MKT 314
Units: 3
Hours: 54 hours LEC
Prerequisite: None.
Transferable: CSU
Catalog Date: June 1, 2020

This course is an introduction to the field of advertising, its history, purpose, institutions, and functions. Studies are made of the various media used in general advertising, as well as the effective use of these media. Students will produce ads and advertising campaigns. This course is the same as MKT 314, and only one may be taken for credit.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO 1: DEMONSTRATE THE ABILITY TO THINK CRITICALLY AND ANALYZE PROBLEMS.
- Establish criteria for planning, advertising, and selecting appropriate media.
- Evaluate state and federal laws applicable in the field of advertising.
- SLO 2: DEMONSTRATE SKILL AND COMPREHENSION IN ADVERTISING FORMATS (AS INDICATED BY COURSE OUTCOMES).
- Demonstrate an awareness of the importance of advertising in our economy and society.
- Establish criteria for recognizing and analyzing various forms of advertising.

RTVF 378 Acting for the Camera

Same As: TA 356
Units: 3
Hours: 36 hours LEC; 54 hours LAB
Prerequisite: RTVF 370 or TA 350 with a grade of "C" or better
Transferable: CSU; UC
General Education: CSU Area C1
Catalog Date: June 1, 2020

This is an introductory course in the theory and techniques of acting for film and video, comparing the differences between stage acting and acting for the camera. Scenes and commercials are enacted and played back on videotape for class critiquing. Students experience single camera and multiple-camera studio production and performance techniques. This course is the same as TA 356, and only one may be taken for credit.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- write in clear, concise English (SLO-1).
- analyze, interpret, and exercise critical judgment in the evaluation of media productions (SLO-2).
- analyze a scene from an observer’s point of view and identify strengths and weaknesses of that presentation from a fundamental technique view point.
- formulate alternative solutions to theatrical production situations as an on-camera participant in theatre productions (SLO-3).
- demonstrate a firm foundation in the basic fundamentals of the craft of acting for the camera.
• investigate the technical and stylistic differences between stage acting and acting for the camera.
• demonstrate acting skills and talents in a video studio setting, and in a single camera out-of-order shoot.
• demonstrate understanding of performance technique using microphones.
• audition and/or perform in community, educational, or professional productions (SLO-4).
• demonstrate through projects that with the power of a communicator, comes moral and ethical responsibility (SLO-5).
• demonstrate a hands-on ability to perform the professional level critical thinking needed for successful teamwork in television, film or other media employment (SLO-6).
• demonstrate performance techniques for work in professional commercials, industrial films, theatrical films, cable and broadcast video.
• describe the steps involved in entering the business of acting for films and video.

RTVF 380 Broadcast Journalism

Units: 3
Hours: 36 hours LEC; 54 hours LAB
Prerequisite: None.
Advisory: JOUR 300, RTVF 362, and RTVF 370; and the ability to type.
Transferable: CSU
Catalog Date: June 1, 2020

The student will gain a general knowledge of the field of radio/television news writing and production. Through theoretical and practical application, the student will understand and practice writing, filming, editing, and broadcasting radio and television news.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

• write in clear, concise English. (SLO #1)
• write clear and correct sentences using correct capitalization, spelling and punctuation suitable for use in a business environment.
• recognize and correct major writing errors to eliminate fragments, run-on sentences, subject-verb agreement, pronoun agreement and references.
• utilize appropriate presentation of written materials to demonstrate an awareness of the effects of style, design and packaging in working with business professionals.
• research critically, filter the results and present them in a cogent manner. (SLO #2)
• investigate and gather information for use in public presentation using library, Internet, and personal interviews.
• structure and craft messages in ways appropriate for specific audiences, including through a variety of technical skills for use in multi-media, Internet, television, film or radio delivery. (SLO #3)
• identify the varied responsibilities of Radio-TV-Internet News personnel.
• explain functional aspects of the broadcast newsroom, including duties of the assignment editor, writer, anchor, reporter, sportscaster, producer and technical staff.
• produce examples of professional-level work including writing, announcing, on-air performance and demonstrate the ability to work as a member of a team. (SLO #4)
• demonstrate through projects that with the power of a communicator, comes moral and ethical responsibility. (SLO #5)
• recognize and overcome biases, prejudices and limited viewpoints (including his or her own) so that he or she can communicate effectively in a diverse world.
• analyze and observe local and network news reports and broadcasts for effectiveness and style.

RTVF 495 Independent Studies in Radio, Television, and Film
An independent studies project involves an individual student or small group of students in study, research, or activities beyond the scope of regularly offered courses. See the current catalog section of "Special Studies" for full details of Independent Studies.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- **SLO #1**: Actively engage in intellectual inquiry beyond that required in order to pass a course of study (College Wide Learning Outcome – Area 4).
- Discuss and outline a proposal of study (that can be accomplished within one semester term) with a supervising instructor qualified within the discipline.
- Design an independent study (to be completed individually or by collaboration of a small group) to foster special knowledge, skills, and experience that are not available in any one regularly scheduled course.
- Use information resources to gather discipline-specific information.
- **SLO #2**: Utilize modes of analysis and critical thinking to apply theoretical perspectives and/or concepts in the major discipline of study to significant problems and/or educational activities (College Wide Learning Outcome – Area 3).
- Analyze and apply the knowledge, skills and experience that are involved in the independent study to theoretical perspectives and/or concepts in the major discipline of study.
- Explain the importance of the major discipline of study in the broader picture of society.
- **SLO #3**: Communicate a complex understanding of content matter of the major discipline of study (College Wide Outcome – Area 3).
- Demonstrate competence in the skills essential to mastery of the major discipline of study that are necessary to accomplish the independent study.
- **SLO #4**: Identify personal goals and pursue these goals effectively (College Wide Outcome – Area 4).
- Utilize skills from the “academic tool kit” including time management, study skills, etc., to accomplish the independent study within one semester term.

RTVF 498 Work Experience in Radio, Television and Film

This course provides students with opportunities to develop marketable skills in preparation for employment in their major field of study or advancement within their career. It is designed for students interested in work experience and/or internships in transfer level degree occupational programs. Course content includes understanding the application of education to the workforce; completion of required forms which document the student's progress and hours spent at the work site; and developing workplace skills and competencies. Appropriate level learning objectives are established by the student and the employer. During the semester, the student is required to participate in a weekly orientation and 75 hours of related paid work experience, or 60 hours of unpaid work experience for one unit. An additional 75 or 60 hours of related work experience is required for each additional unit. Work Experience may be taken for a total of 16 units when there are new or expanded learning objectives. Only one Work Experience course may be taken per semester.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- **DEMONSTRATE AN UNDERSTANDING AND APPLICATION OF PROFESSIONAL WORKPLACE BEHAVIOR IN A FIELD OF STUDY RELATED ONE’S CAREER(SLO 1)**
- Understand the effects time, stress, and organizational management have on performance.
- Demonstrate an understanding of consistently practicing ethics and confidentiality in a workplace.
- Examine the career/life planning process and relate its relevancy to the student.
- Demonstrate an understanding of basic communication tools and their appropriate use.
- Demonstrate an understanding of workplace etiquette.
- DESCRIBE THE CAREER/LIFE PLANNING PROCESS AND RELATE ITS RELEVANCY TO ONE'S CAREER (SLO 2)
- Link personal goals to long term achievement.
- Display an understanding of creating a professional first impression.
- Understand how networking is a powerful job search tool.
- Understand necessary elements of a résumé.
- Understand the importance of interview preparation.
- Identify how continual learning increases career success.

- DEMONSTRATE APPLICATION OF INDUSTRY KNOWLEDGE AND THEORETICAL CONCEPTS AS WRITTEN IN LEARNING OBJECTIVES IN PARTNERSHIP WITH THE EMPLOYER WORK SITE SUPERVISOR (SLO 3)
Real Estate | Cosumnes River College

CRC offers, in addition to a Real Estate A.A. Degree, a variety of courses available which satisfy State of California prerequisites for Real Estate Salesperson and Real Estate Broker examinations.

Dean

(916) 691-7226

PowellJ@crc.losrios.edu

Associate Degree

A.A. in Real Estate

CRC offers, in addition to a Real Estate AA Degree, a variety of courses available which satisfy State of California prerequisites for Real Estate Salesperson and Real Estate Broker examinations.

Highlights include:

* Instruction by trained, working real estate professionals
* Preparation for State of California real estate license examinations
* Training in one of the most lucrative careers in today’s world
* A lab with tutorial assistance

APPLICANTS FOR THE REAL ESTATE SALESPERSON EXAM:

To qualify to take an examination for a Real Estate Salesperson License, an applicant must submit evidence (transcripts) of having completed a college-level course in Real Estate Principles.

In addition to Real Estate Principles the applicant must also (either when qualifying for the examination, when applying for the original license or within eighteen months after license issuance) submit evidence of having completed TWO additional basic real estate courses from the following CRC course offerings. (It is recommended that Real Estate Practice be one of the courses selected.)

- Accounting 301 (1A)
- Business Law 340 (18A)
- Introduction to Escrow Procedures
- Legal Aspects of Real Estate
- Real Property Management
- Real Estate Appraisal
- Real Estate Economics
- Real Estate Finance
- Real Estate Practice

APPLICANTS FOR THE REAL ESTATE BROKER EXAMINATION:

An applicant for the Broker examination must have completed eight college-level courses, in addition to the experience/educational requirements. These eight courses should include the following CRC course offerings:

- Real Estate Principles
- Real Estate Practice
- Legal Aspects of Real Estate
- Real Estate Finance
- Real Estate Appraisal
- Real Estate Economics or Accounting 301 (1A)
- and two courses from the following group: *
  - Business Law 340 (18A)
  - Real Property Management
  - Introduction to Escrow Procedures
  - Advanced Appraisal

* If applicant completes both Accounting and Real Estate Economics, only one additional course is required.
Note to Transfer Students:
If you are interested in transferring to a four-year college or university to pursue a bachelor's degree in this major, it is critical that you meet with a CRC counselor to select and plan the courses for your major. Schools vary widely in terms of the required preparation. The courses that CRC requires for an Associate's degree in this major may be different from the requirements needed for the Bachelor's degree.

Real Estate Sales Certificate
CRC offers, in addition to a Real Estate AA Degree, a variety of courses available which satisfy State of California prerequisites for Real Estate Salesperson and Real Estate Broker examinations.

Highlights include:
* Instruction by trained, working real estate professionals
* Preparation for State of California real estate license examinations
* Training in one of the most lucrative careers in today's world
* A lab with tutorial assistance

APPLICANTS FOR THE REAL ESTATE SALESPERSON EXAM
To qualify to take an examination for a Real Estate Salesperson License, an applicant must submit evidence (transcripts) of having completed a college-level course in Real Estate Principles.

In addition to Real Estate Principles the applicant must also (either when qualifying for the examination, when applying for the original license or within eighteen months after license issuance) submit evidence of having completed TWO additional basic real estate courses from the following CRC course offerings. (It is recommended that Real Estate Practice be one of the courses selected.)
• Accounting 301 (1A)
• Business Law 340 (18A)
• Introduction to Escrow Procedures
• Legal Aspects of Real Estate
• Real Property Management
• Real Estate Appraisal
• Real Estate Economics
• Real Estate Finance
• Real Estate Practice

Total Units: 9

Real Estate (RE)

RE 110 Legal Aspects of Real Estate

Units: 3
Hours: 54 hours LEC
Prerequisite: None.
Catalog Date: June 1, 2020

This course is a study of California real estate laws. Topics include: the sources of law and the judicial system; agency; duties and responsibilities of licensees; contracts and their application to real estate; property ownership and management; real estate security devices; property rights, liens and homesteads; landlord-tenant law, land use controls, and title insurance and escrow. Completion of the course applies toward the California Department of Real Estate education requirements for the broker's examination.

Student Learning Outcomes

Upon completion of this course, the student will be able to:
RE 120 Real Estate Practice

Upon completion of this course, the student will be able to:

- SLO 1: DEMONSTRATE SKILL AND COMPREHENSION IN RESPECTIVE SUBJECT AREAS AS INDICATED BY COURSE OUTCOMES.
  - Demonstrate an understanding of real estate practices and transactions.
- SLO 2: EXPRESS IDEAS AND FACTS CLEARLY AND COMPLETELY.
  - Demonstrate a basic understanding of the fundamental concepts and practices of real estate with an emphasis on residential property.
  - Define the technical terminology involved in the real estate field.
  - Describe the necessary background and qualifications for the California Real estate Broker's license examination.

RE 130 Real Estate Finance

Upon completion of this course, the student will be able to:

- SLO 1: DEMONSTRATE SKILL AND COMPREHENSION IN RESPECTIVE SUBJECT AREAS AS INDICATED BY COURSE OUTCOMES PERTAINING TO REAL ESTATE FINANCE.
  - Demonstrate understanding of the workings of the real estate finance system.
  - Identify sources of funds and the various entities which affect qualifications therefore and availability thereof.
  - Demonstrate skills in the theoretical applications of real estate financing.
- SLO 2: DEMONSTRATE THE ABILITY TO THINK CRITICALLY AND ANALYZE PROBLEMS.
Demonstrate ability to analyze various aspects of real estate finance including loan processing, appraisal for lenders, foreclosure, secondary markets, construction loans, mathematics of real estate finance and creative techniques.

RE 140 Real Estate Appraisal

- **Units:** 3
- **Hours:** 54 hours LEC
- **Prerequisite:** None.
- **Catalog Date:** June 1, 2020

This course covers the purposes of appraisals; the appraisal process; and the different approaches, methods and techniques used to determine the value of various types of property. The course emphasizes residential single family properties and applies toward the educational requirement for the Real Estate Broker's License, and Licensed and General Appraiser's License.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- **SLO 1:** DEMONSTRATE SKILL AND COMPREHENSION IN RESPECTIVE SUBJECT AREAS AS INDICATED BY COURSE OUTCOMES PERTAINING TO REAL ESTATE APPRAISAL.
  - Demonstrate understanding of various methods of analyzing market data, building cost data, depreciation, and income and expense data.
  - Demonstrate the necessary background for passing the Appraisal license examination.
  - Demonstrate knowledge of the appraisal process, the nature of problems that may be encountered, and the tools and procedures necessary to solve these problems.

RE 141 Advanced Appraisal

- **Units:** 3
- **Hours:** 54 hours LEC
- **Prerequisite:** RE 140 with a grade of "C" or better
- **Catalog Date:** June 1, 2020

This course discusses advanced appraisal concepts with an emphasis on market and income analysis, capitalization techniques, rate derivation, compound interest tables, cost and sales comparison approaches; and the appraisal of specific income properties such as apartments, office buildings, shopping centers and industrial properties.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- **SLO 1:** DEMONSTRATE SKILL AND COMPREHENSION IN RESPECTIVE SUBJECT AREAS AS INDICATED BY COURSE OUTCOMES PERTAINING TO THE ADVANCED APPRAISAL PROCESS.
  - Understand the various methods of adjusting comparable sales to indicate the value of the appraised property, including the reason for and the ability to adjust for nonstandard financing, where appropriate.
  - Identify the primary motivation for purchasing real property, recognize the relationship between the various rates of return, see the interrelationships among present and future worth functions; develop and property use capitalization rates; and computer an overall capitalization rate and properly apply it to net operating income.
  - Describe several methods for capitalizing income; determine which of the residual techniques of capitalization is most applicable in determining and estimate of value under circumstances; understand the comparative strengths and weaknesses of each of the residual techniques.

- **SLO 2:** DEMONSTRATE THE ABILITY TO THINK CRITICALLY AND ANALYZE PROBLEMS.
  - Distinguish among leased fee, leasehold estate, and fee simple interest and understand how to value a leased fee interest, a leasehold estate, and a sandwich lease.

- **SLO 3:** EXPRESS IDEAS AND FACTS CLEARLY AND COMPLETELY.
  - Determine appropriate time to use the depreciated cost approach; distinguish between economic life and physical life; and compute cost and depreciation using different methods.
Identify why typical management is assumed in conducting market value appraisals; distinguish between potential gross income and effective gross income; understand the need to undertake a comprehensive lease analysis, recognize different conditions that can distort rental income and expenses; reconstruct an owner’s operating expense statement; discern the difference between capital and operating expenditures; and understand the proper ways of setting up allowances for replacements.

**RE 150 Real Estate Economics**

| Units: | 3 |
| Hours: | 54 hours LEC |
| Prerequisite: | None. |
| Catalog Date: | June 1, 2020 |

This course covers nature and classification of real estate and real estate investments, economic development of real property, real estate cycles and market trends. Governmental and private sector influence on the economics of real estate is covered. It is recommended that this course be taken last in the real estate course series.

**Student Learning Outcomes**

Upon completion of this course, the student will be able to:

- **SLO 1: DEMONSTRATE SKILL AND COMPREHENSION IN RESPECTIVE SUBJECT AREAS AS INDICATED BY COURSE OUTCOMES PERTAINING TO REAL ESTATE ECONOMICS.**
- Describe the economic principles that govern real estate markets and buyer/seller behavioral patterns.
- **SLO 2: DEMONSTRATE THE ABILITY TO THINK CRITICALLY AND ANALYZE PROBLEMS.**
- Describe the economic impacts of income and property taxation on market value.
- Logically interpret national, regional, and community trends in terms of their effects on real estate.
- Analyze and apply sound economic principles to income processing through the use of break-even analysis, cash equivalents, capitalization theory, and internal fair rates of return.

**RE 160 Introduction to Escrow Procedures**

| Units: | 3 |
| Hours: | 54 hours LEC |
| Prerequisite: | None. |
| Catalog Date: | June 1, 2020 |

This course covers the functions and responsibilities of the escrow holder, including actual preparation of escrow instructions and documents in a typical real estate transaction. Audit, disbursement, the issuance of closing statements and analysis of title insurance policies are covered.

**Student Learning Outcomes**

Upon completion of this course, the student will be able to:

- **SLO 1: DEMONSTRATE THE ABILITY TO THINK CRITICALLY AND ANALYZE PROBLEMS.**
- Acquire and demonstrate basic understanding of the fundamental principles and procedures involved in ordinary escrow transactions.
- Demonstrate knowledge of the content, purpose and use of the basic forms/formats generally used in the processing of an escrow.
- Analyze the various types of title insurance policies.
- **SLO 2: EXPRESS IDEAS AND FACTS CLEARLY AND COMPLETELY.**
- Explain the procedures used in opening, processing, and closing an escrow.
- Define, understand and use the technical terminology used in the escrow industry.
RE 161 Advanced Escrow Procedures

This course covers unusual and difficult types of escrow, including the evaluation of possible solutions with emphasis on real estate loans, financing instruments and exchanges.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO 1: DEMONSTRATE THE ABILITY TO THINK CRITICALLY AND ANALYZE PROBLEMS.
  - Identify the problems of unusual escrows.
  - Analyze escrow situations and offer solutions to the situations and/or problems.
  - Demonstrate application of escrow procedures in the real estate field.
  - Prepare escrows.
- SLO 2: DEMONSTRATE SKILL AND COMPREHENSION IN RESPECTIVE SUBJECT AREAS AS INDICATED BY COURSE OUTCOMES.
  - Understand escrow procedures for complex real estate transactions.

RE 190 Real Property Management

This course covers the day-to-day operation and management of real property including: marketing procedures, leases, maintenance, accounting and economics, recordkeeping, management forms, legal requirement, laws, human relations, employer responsibilities and management.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO 1: DEMONSTRATE THE ABILITY TO THINK CRITICALLY AND ANALYZE PROBLEMS.
  - Identify and apply the basis of economic management forms used for all management requirements of tenant and owner.
  - Apply knowledge and skill in the legal aspects of rental management.
- SLO 2: DEMONSTRATE SKILL AND COMPREHENSION IN RESPECTIVE SUBJECT AREAS AS INDICATED BY COURSE OUTCOMES PERTAINING TO REAL ESTATE PROPERTY MANAGEMENT.
  - Explain the history of industry in commercial and residential properties.
  - Demonstrate an understanding of the human element in income property management.

RE 295 Independent Studies in Real Estate

An independent studies project involves an individual student or small group of students in study, research, or activities beyond the scope of regularly offered courses. See the current catalog section of “Special Studies” for full details of Independent Studies.

Student Learning Outcomes
Upon completion of this course, the student will be able to:

- SLO #1: Actively engage in intellectual inquiry beyond that required in order to pass a course of study (College Wide Learning Outcome – Area 4).
- Discuss and outline a proposal of study (that can be accomplished within one semester term) with a supervising instructor qualified within the discipline.
- Design an independent study (to be completed individually or by collaboration of a small group) to foster special knowledge, skills, and experience that are not available in any one regularly scheduled course.
- Use information resources to gather discipline-specific information.
- SLO #2: Utilize modes of analysis and critical thinking to apply theoretical perspectives and/or concepts in the major discipline of study to significant problems and/or educational activities (College Wide Learning Outcome – Area 3).
- Analyze and apply the knowledge, skills and experience that are involved in the independent study to theoretical perspectives and/or concepts in the major discipline of study.
- Explain the importance of the major discipline of study in the broader picture of society.
- SLO #3: Communicate a complex understanding of content matter of the major discipline of study (College Wide Outcome – Area 3).
- Demonstrate competence in the skills essential to mastery of the major discipline of study that are necessary to accomplish the independent study.
- SLO #4: Identify personal goals and pursue these goals effectively (College Wide Outcome – Area 4).
- Utilize skills from the “academic tool kit” including time management, study skills, etc., to accomplish the independent study within one semester term.

RE 296 Internship in Real Estate

Units: 3
Hours: 18 hours LEC; 108 hours LAB
Prerequisite: RE 300 with a grade of "C" or better
Catalog Date: June 1, 2020

This course provides students with a supervised, structured, hands-on experience in real estate sales and introduces/develops the skills necessary to assist them in obtaining employment in the real estate industry. Course content will include understanding the benefits and responsibilities of an internship, developing workplace skills identified by local real estate professionals, applying student learning outcomes to work-related activities, and acquiring/enhancing knowledge of the real estate industry through lecture, textbook readings, and guest speakers. In addition to 18 hours of lecture, the student is required to complete 108 hours of work-related internship over the semester.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO #1: Apply principles and information from prior classroom study to the daily activities of a real estate salesperson through supervised on-the-job experience.
- Describe the duties and expectations of a real estate salesperson.
- Explain the process of buying and selling a parcel of real estate.
- Discuss different methods used in the real estate industry for building a clientele.
- Describe the role of financing in the real estate purchasing process.
- Know and explain the different types of disclosures and inspections a buyer and/or lender may require during the purchase and financing of a property.
- Describe the roles and responsibilities of other entities and professionals in the real estate industry.

RE 300 California Real Estate Principles
This fundamental real estate course covers the basic laws and principles of California real estate, giving understanding, background, and terminology necessary for advanced study in specialized courses. This course is required by the California Department of Real Estate prior to taking the real estate salesperson's examination.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- **SLO 1: DEMONSTRATE THE ABILITY TO UNDERSTAND IMPORTANT REAL ESTATE PRINCIPLES, CONCEPTS, AND TERMINOLOGY AND HOW THEY IMPACT THE BUSINESS OF REAL ESTATE.**
  - Understand the various methods of acquiring and transferring real property.
  - Understand and describe the methods available for holding title to real estate, the requirements of a valid deed, and how legal encumbrances (liens, easements, and encroachments) affect the use and value of real property.
  - Describe the necessary background and qualifications for the California Real Estate Salesperson's and Broker's License and understand the requirements of the state licensing examination.
  - Understand the concept of agency, including how agency relationships are formed, duties of agent and principal, and the liability of the parties. Describe the fiduciary responsibilities arising from an agency relationship. Discuss the concept of ethics and its role in the real estate transaction process.
  - Understand the essential elements of a valid real estate contract and describe the common forms used in a real estate transaction, including the listing agreement, purchase contract, and required disclosures.
  - Identify and describe the various approaches to real estate appraisal and which valuation approach is best for a particular situation.
  - Understand the landlord and tenant relationship and the duties owed to each other.
  - Evaluate the consequences of failing to comply with state and federal laws pertaining to fair housing, environmental impact, and subdivisions.

- **SLO 2: DEMONSTRATE THE ABILITY TO THINK CRITICALLY AND ANALYZE PROBLEMS SO AS TO BE ABLE TO APPLY REAL ESTATE PRINCIPLES AND CONCEPTS TO RESOLVE REAL AND HYPOTHETICAL REAL ESTATE ISSUES.**
  - Analyze real estate statutory and case law to understand important legal principles and apply the legal rules to fact patterns to reach defensible legal conclusions.
  - Demonstrate the ability to utilize the internet and other media and web based content to conduct research and complete the real estate transaction process.

RE 495 Independent Studies in Real Estate

An independent studies project involves an individual student or small group of students in study, research, or activities beyond the scope of regularly offered courses. See the current catalog section of "Special Studies" for full details of Independent Studies.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- **SLO #1: Actively engage in intellectual inquiry beyond that required in order to pass a course of study (College Wide Learning Outcome – Area 4).**
  - Discuss and outline a proposal of study (that can be accomplished within one semester term) with a supervising instructor qualified within the discipline.
  - Design an independent study (to be completed individually or by collaboration of a small group) to foster special knowledge, skills, and experience that are not available in any one regularly scheduled course.
RE 498 Work Experience in Real Estate

This course provides students with opportunities to develop marketable skills in preparation for employment in their major field of study or advancement within their career. It is designed for students interested in work experience and/or internships in transfer level degree occupational programs. Course content includes understanding the application of education to the workforce; completion of required forms which document the student's progress and hours spent at the work site; and developing workplace skills and competencies. Appropriate level learning objectives are established by the student and the employer. During the semester, the student is required to participate in a weekly orientation and 75 hours of related paid work experience, or 60 hours of unpaid work experience for one unit. An additional 75 or 60 hours of related work experience is required for each additional unit. Work Experience may be taken for a total of 16 units when there are new or expanded learning objectives. Only one Work Experience course may be taken per semester.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- DEMONSTRATE AN UNDERSTANDING AND APPLICATION OF PROFESSIONAL WORKPLACE BEHAVIOR IN A FIELD OF STUDY RELATED TO ONE’S CAREER.(SLO 1)
  - Understand the effects time, stress, and organizational management have on performance.
  - Demonstrate an understanding of consistently practicing ethics and confidentiality in a workplace.
  - Examine the career/life planning process and relate its relevancy to the student.
  - Demonstrate an understanding of basic communication tools and their appropriate use.
  - Demonstrate an understanding of workplace etiquette.

- DESCRIBE THE CAREER/LIFE PLANNING PROCESS AND RELATE ITS RELEVANCY TO ONE’S CAREER.(SLO 2)
  - Link personal goals to long term achievement.
  - Display an understanding of creating a professional first impression.
  - Understand how networking is a powerful job search tool.
  - Understand necessary elements of a résumé.
  - Understand the importance of interview preparation.
  - Identify how continual learning increases career success.

- DEMONSTRATE APPLICATION OF INDUSTRY KNOWLEDGE AND THEORETICAL CONCEPTS AS WRITTEN IN LEARNING OBJECTIVES IN PARTNERSHIP WITH THE EMPLOYER WORK SITE SUPERVISOR.(SLO 3)
Science | Cosumnes River College

CRC students may choose courses in the various disciplines of science to meet any of several objectives. Courses are designed to: Prepare students for transfer and continuation of studies at other colleges or universities (chemistry, biology, medicine, etc.); meet general education requirements for non-science majors; prepare students for immediate entry into a science-based technology career; and provide for career advancement and continuing education.

Many courses include hands-on practical experience and/or opportunities for work experience in local industry and business.

The student, in consultation with a counselor, should choose science courses to meet his or her program, transfer, or general education requirements. The Counseling Center also has information regarding science requirements for transfer to other four-year institutions.

Associate Degrees

A.S. in Environmental Studies & Sustainability

The Environmental Studies & Sustainability Associate of Science degree is an interdisciplinary and multidisciplinary program of study that presents a broad overview of ecological issues from a variety of perspectives in the natural, physical, and social sciences. The coursework examines the interplay between natural and social systems, and the ideological foundations of humankind's attitudes and behaviors with respect to their ever-changing environment. This program is designed to prepare students to research, analyze, and propose solutions to the myriad environmental challenges facing the world today.

This degree is designed to correlate with the lower division courses required to transfer into an Environmental Studies program at many four-year institutions as well as provide broad-based environmental education for transfer in related disciplines.

The disciplines of environmental studies and geography are complementary fields, both focused on aspects of human-environment interaction. This complementarity is reflected in the many 4-year institutions that house combined Geography and Environmental Study programs. Students interested in double-majoring in these two closely-related disciplines, and/or simultaneously earning a Certificate in Geographic Information Systems, are encouraged to examine the required coursework and plan their program of study accordingly.

Students should use PROJECT ASSIST (http://www.assist.org) to research lower division major requirements at the transfer institution of their choice and should also work with the program adviser and a counselor to determine the appropriate transfer coursework.

Students interested in pursuing an Environmental Science major should consult with science faculty and counselors to tailor the specific coursework necessary to transfer to the 4-year institution of their choice.

Catalog Date: June 1, 2020

The Environmental Studies & Sustainability Associate in Science (A.S.) degree may be obtained by completion of the required program, plus general education requirements, plus sufficient electives to meet a 60-unit total. See CRC graduation requirements.

Student Learning Outcomes

Upon completion of this program, the student will be able to:

- **PSLO-1**: Articulate an understanding of the natural environment and human societies' relationship to it. This includes the ability to:
  1. Communicate effectively about environmental issues and sustainability, correctly utilizing vocabulary while indicating a complex understanding of disciplines in the program.
  2. Articulate an awareness of the relevance of environmental studies to the student's life and wider community at both local and global scales.
  3. Recognize the importance of interdisciplinary and multidisciplinary approaches to solving environmental problems.

- **PSLO-2**: Evaluate and analyze environmental processes and human impacts on the natural environment. This includes the ability to:
  1. Use logical and quantitative reasoning to solve environmental problems.
  2. Analyze critical environmental problems facing the world today.
  3. Evaluate data and draw reasonable conclusions.
  4. Utilize the scientific method.
  5. Employ information-gathering tools to investigate environmental ideas.

- **PSLO-3**: Recognize the ethical dimensions of decisions and actions and engage in the ethical reasoning necessary to be a responsible local and global citizen. This includes the ability to:
  1. Recognize the ethical implications of research and the responsibility to use knowledge wisely.
  2. Articulate the value of understanding environmental systems.

- **PSLO-4**: Transfer to a 4-year program and further prepare for employment in an environmental career.

Career Information

Natural Resource Management; Forestry; Range Management; Park Ranger; Wildlife Biology; Agriculture; Soil and Water Conservation; Land Use Planning; Waste Management; Environmental Education; Environmental Policy And Planning; Environmental Law; Environmental Consulting; Environmental Lobbying; Environmental Planning; Environmental Protection; Environmental Compliance; Environmental Engineering; Air Quality Control; Landscape Architecture; Urban and Regional Planning; Alternative Energy Development; Risk Analysis; Contaminated Lands Reclamation; Research; Consulting

A.S. in Geography

Geography is the science of place and space. Geographers study the relationships among geographic places, natural systems, society, cultural activities, and the interdependence of all these over space.

There are two main branches of geography: human geography and physical geography. Human geography is concerned with the spatial aspects of human existence – how people and their activities are distributed in space, how people use and perceive space, and how people create and sustain the places that make up Earth's surface. Physical geographers study the physical elements and spatial processes that make up and shape the environment, including energy, air, water, weather, climate, landforms, soils, animals, plants, etc. Many human and physical geographers have skills in cartography and Geographic Information Systems (GIS).
Geographers also study the linkages between human activity and natural systems. Geographers were, in fact, among the first scientists to sound the alarm that human-induced changes to the environment were beginning to threaten the balance of life itself. Geographers today are active in the study of global warming, desertification, deforestation, loss of biodiversity, groundwater pollution, flooding, and more.

The CRC Geography program offers courses that satisfy lower division General Education requirements in both the physical and social sciences. In addition, the program offers an Associate Degree in Geography that provides students with a solid foundation in geography as well as the standard prerequisites for upper-division coursework leading to the baccalaureate degree. Students may also earn a certificate in Geographic Information Systems (GIS). Students planning to transfer to a four-year school with a major in Geography should consult the lower division requirements at the university they plan to attend.

Note to Transfer Students:
If you are interested in transferring to a four-year college or university to pursue a bachelor's degree in this major, it is critical that you meet with a CRC counselor to select and plan the courses for your major. Schools vary widely in terms of the required preparation. The courses that CRC requires for an Associate's degree in this major may be different from the requirements needed for the Bachelor's degree.

Highlights include:
* Comprehensive course offerings including a Physical Laboratory as well as specialized training in Geographic Information Systems (GIS)
* Program's students have won top awards at state-level competitions annually since 1999
* Field study courses to Yosemite, Pt. Reyes, Monterey/Big Sur, Tahoe, and the Eastern Sierra
* Internships available with State of California, County of Sacramento, and Federal Land Management Agencies
* Three courses fulfill the CRC and CSU multicultural requirement
* Day, evening, and online sections

**Catalog Date:** June 1, 2020

1A minimum of 60 units is required for the A.S. degree which includes core courses, electives, and general education (GE) graduation requirements. Geography majors are encouraged to complete additional GE requirements from a list of suggested courses on file in the Geography Department and at the Counseling Center. Students should use PROJECT ASSIST (http://www.assist.org) to research lower division major requirements at the transfer institution of their choice and also work with a counselor to determine the most appropriate transfer coursework.

The Geography Associate in Science (A.S.) degree may be obtained by completion of the required program, plus general education requirements, plus sufficient electives to meet a 60-unit total. See CRC graduation requirements.

Student Learning Outcomes

Upon completion of this program, the student will be able to:

- <b>SLO#1: demonstrate understanding of the global natural and cultural environments and the geographic methods by which they are studied</b>
- <b>SLO#2: compare and contrast the general biophysical and socio-cultural differences and similarities among world regions that operate through time and over space</b>
- <b>SLO#3: evaluate and analyze critical geographic issues facing the world today</b>
- <b>SLO#4: recognize the diversity of peoples, places, and events globally as well as within specific geographic regions</b>
SLO#5: interpret maps and mapped data utilizing basic map elements, including scales, common coordinate systems, and map symbols.

SLO#6: use a computer effectively to research, map and analyze geographic information.

SLO#7: compare and contrast common geographic technologies such as geographic information systems (GIS) and the global positioning system (GPS).

SLO#8: communicate geographic information effectively in oral, written, and graphic form.

Career Information

Natural Resource Management; Environmental Conservation; International Development; Urban and Regional Planning; Education (K-12 through University); Tourism; Cartographer; Climatologist; Park Ranger; Transportation Specialist; Real Estate Analyst; International Business; Marketing Analyst; Land Surveyor; Research Scientist; Remote Sensing Specialist; Demographer; GIS Analyst; and many more (please contact the program for additional information). Some career options may require more than two years of college study.

Certificate of Achievement

Sustainability Certificate

This certificate advances student's understanding of the principles of sustainability and sustainable practices with respect to ecosystems, green buildings, business, agriculture, nutrition, natural resource management and conservation, waste management, energy, transportation systems, urban planning and design, and more. Theoretical and practical aspects of sustainability are explored including social, economic, and environmental dimensions.

Upon completion of this program, the student will be able to:

- PSLO#1: Communicate effectively about environmental issues and sustainability, utilizing correct vocabulary.
• PSLO#2: Articulate an awareness of the relevance of sustainability to the student’s life and wider community at both local and global scales.

• PSLO#3: Evaluate and analyze environmental problems facing the world today and propose sustainable solutions.

• PSLO#4: Employ information-gathering tools to investigate theoretical and practical aspects of sustainability in the context of energy consumption, transportation systems, food production, water resources, industry, the built environment, and socio-cultural institutions and practices.

Career Information

This certificate prepares students for entry-level sustainability consultant/technician positions in a variety of industries and settings, including private firms, nonprofit organizations, educational institutions, and government agencies at the local, state, and federal levels. Work opportunities for those pursuing additional coursework include positions in environmental economics, sustainable business practices, green building, natural resource management, food systems, energy, transportation, and urban planning.
Social Justice Studies (SJS)

SJS 300 Introduction to Social Justice Studies

Units: 3  
Hours: 54 hours LEC  
Prerequisite: None.  
Advisory: ENGW 100  
Transferable: CSU  
General Education: AA/AS Area V(b) (effective Summer 2020); AA/AS Area VI (effective Summer 2020)  
C-ID: C-ID SJS 110  
Catalog Date: June 1, 2020

This interdisciplinary course introduces students to the theoretical and practical foundations of social justice and the social processes that create and resist oppression. It covers the sociology, history, and psychology of oppressions based upon race, ethnicity, class, gender, sexuality, and other group identities in the United States and abroad and the corresponding social justice movements for liberation. It investigates how creating and undoing asymmetrical power relations are linked to social structures, institutional processes, and culture. Additionally, it provides a basis for a better understanding of socioeconomic, political, and cultural conditions of key social groups in the United States and globally. Topics include theoretical foundations of social justice and oppression, history and politics of group identity, culture and ideologies, forms of oppression, privilege, and forms of resistance. Field trips may be required.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- DEFINE THE FOUNDATIONAL THEORIES WITHIN SOCIAL JUSTICE STUDIES. (SLO 1)
- Critically evaluate the methodologies and ethics of social justice research including the role of bias. (Objective 1a)
- Identify and analyze the foundations of social justice studies in ethical theory. (Objective 1b)
- ASSESS THE STATUS, GROWTH, AND DIVERSITY OF MINORITY GROUPS IN THE UNITED STATES. (SLO 2)
- Explain the histories, experiences, and contributions of groups oppressed because of race, ethnicity, class, gender, and sexuality in the United States. (Objective 2a)
- Identify and analyze the role of culture in oppression and in empowerment, including art, film, literature, or music reflecting different groups. (Objective 2b)
- ANALYZE THE COMPLEX INTERSECTIONS AND RELATIONSHIPS WITHIN AND ACROSS RACE, ETHNICITY, SOCIOECONOMIC CLASS, GENDER, SEXUAL ORIENTATION, AND OTHER IDENTITIES. (SLO 3)
- Identify systematic forms of oppression and analyze the role of privilege and intersectionality for minority groups. (Objective 3a)
- Apply the operation of privilege, oppression, and power asymmetry to major institutions such as education, health care, the economy and the criminal justice system. (Objective 3b)
- IDENTIFY AND UNDERSTAND STRUGGLES OF SOCIAL JUSTICE, LIBERATION, AND DECOLONIZATION FOR RESISTING GROUPS GLOBALLY. (SLO 4)
- Compare social justice movements in the United States to those globally. (Objective 4a)
- Assess the importance of human rights efforts in promoting social justice around the world through non-governmental and grass roots organizations. (Objective 4b)
SJS 310 Introduction to LGBTQ Studies

This interdisciplinary course introduces students to Lesbian, Gay, Bisexual, Transgender, and Queer (LGBTQ+) studies. It explores how LGBTQ+ communities in the U.S. and abroad are impacted by various social, cultural, historical, and political factors that create and resist oppression. It investigates the politics of sexuality and sexual identities as they intersect with race, ethnicity, class, and gender. It evaluates how sexual and gender prejudices function alongside racism, sexism, and classism. Additionally, it provides a historical understanding of how queer activism and resistance movements in the U.S. and globally have responded to oppression and violence against LGBTQ communities. This course also includes contemporary LGBTQ+ issues in family, education, religion, and the law.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- ANALYZE THE VARIOUS WAYS PEOPLE IDENTIFY THEIR SEXUAL ORIENTATION AND/OR THEIR GENDER IDENTITY AND EXPRESSION. (SLO 1)
- Examine sexual orientation and gender identity within Native American, African American, Latinx, Asian American, Pacific Islander, and recent immigrant communities in the United States and abroad. (Objective 1a)
- Assess theories about sexual orientation and gender identity and expression within the context of feminist theory, gender theory, and queer theory. (Objective 1b)
- EXPLORE THE INTERSECTIONS AND INTERRELATIONSHIPS BETWEEN SYSTEMIC FORMS OF OPPRESSION AGAINST LGBTQ COMMUNITIES AND THEIR INTERSECTING IDENTITIES WITHIN THE CONTEXT OF LGBTQ POLITICAL STRUGGLES IN THE UNITED STATES AND GLOBALLY. (SLO 2)
- Assess the impact of hate crimes on LGBTQ individuals, the LGBTQ individuals, the community at large, and public policy. (Objective 2a)
- Identify key historical movements and describe its contribution to domestic and international LGBTQ struggles for full human rights. (Objective 2b)
- ASSESS THE CONTINUOUS EVOLUTION OF LEGAL POLICIES AND SOCIETAL VIEWS OF LGBTQ PEOPLE ON A GLOBAL LEVEL. (SLO 3)
- Research the history of public health policy in the United States as well as internationally to explore the ways that LGBTQ people have consistently suffered under policies structured by sexual and gendered prejudices. (Objective 3a)
- Explore the impact of our education system on the ability of LGBTQ individuals and communities to achieve social justice and equity. (Objective 3b)
- EXAMINE THE EVOLUTION OF LGBTQ CULTURE IN LITERATURE, THE MEDIA, AND THE ARTS. (SLO 4)
- Identify strategies LGBTQ artists use to draw the relationship between art and political resistance (Objective 4a).
The Social Science department offers classes in law and society and special studies in the areas of Mexican-American, Asian, and Native American experiences.

Dean

 WilliaL3@crc.losrios.edu

Associate Degree

A.A. in Social Science

The Social Science department offers classes in law and society and special studies in the areas of Mexican-American, Asian, and Native American experiences. These classes provide an excellent background for further study.

The program includes 21 units of coursework in the following areas: anthropology, economics, geography, history, philosophy, political science, psychology, social science, or sociology.

This degree enables the student to experience a wide range of diverse social science disciplines. To verify the transferability of specific courses and their university application, please consult your CRC counselor. Students who wish to transfer to a four-year college or university should plan their programs to meet general education and lower division major requirements. All students are encouraged to consult with a counselor.

Highlights include:
* Opportunities to build a foundation for interdisciplinary studies
* Overview of theoretical, methodological, analytical, and cultural principles

Note to Transfer Students:
If you are interested in transferring to a four-year college or university to pursue a bachelor's degree in this major, it is critical that you meet with a CRC counselor to select and plan the courses for your major. Schools vary widely in terms of the required preparation. The courses that CRC requires for an Associate's degree in this major may be different from the requirements needed for the Bachelor's degree.

Catalog Date: June 1, 2020

The Social Science Associate in Arts (A.A.) degree may be obtained by completion of the required program, plus general education requirements, plus sufficient electives to meet a 60-unit total. See CRC graduation requirements.

Student Learning Outcomes
Upon completion of this course, the student will be able to:

- Identify and comprehend an individual's relationship to structures in the larger society.
- Apply effective critical thinking skills to interpret sociological phenomena.
- Assess the significance of important social movements in American society.
- Define and identify various theoretical perspectives across the discipline of Sociology.
- Comprehend how social practices facilitate the functioning of social structures as they are responsible for maintaining the society as a whole.
- Analyze, interpret, and critically think about sociological ascriptions to race, gender, ethnicity, class, sexual orientation, political affiliation, and other sociological concepts.

Career Information

Instructor: Social Worker; Researcher; Criminal Justice; Social Services; Business and Corporate employment. Some career options may require more than two years of college study.

Social Science (SOCSC)

SOCSC 360 Law and Society

This course is an introduction to the American legal system emphasizing the nature, purpose, sources and functioning of American law but including some comparative analysis of other historical and contemporary legal systems. It stresses the evolution of legal concepts as a reflection of the social environment and the role of the judiciary. A theoretical rather than practical viewpoint is used through analysis of selected cases and legislation in the areas of individualism, socioeconomic groups, the family, the economy, crime, criminal procedure and punishment, church and state separation, the environment, and torts. This course should not be taken for any major for which BUS 340 is required, as it is not comparable. This course is the same as BUS 345, and only one may be taken for credit. See “Cross-Listed Courses” in the catalog.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO 1: DEMONSTRATE SKILL AND COMPREHENSION IN RESPECTIVE SUBJECT AREAS AS INDICATED BY COURSE OUTCOMES PERTAINING TO BUSINESS LAW.
- Develop an understanding of the law as an evolutionary, stabilizing, and reforming factor in human affairs with, however, certain limitations as an instrument of social control.
- Develop an understanding of the magnitude and vitality of the law and the ways in which history, economics, sociology, psychology, and technology have influenced and have been influenced by the law.
- Develop an understanding of the basic organization and operation of the American judicial system.
- Develop an understanding of the Anglo-American Common Law System; its historical origin; some of its fundamental concepts; and the complexities inherent in such a multifaceted institution.
- Develop an understanding of the nature and purpose of law in society.
- SLO 2: DEMONSTRATE THE ABILITY TO THINK CRITICALLY AND ANALYZE PROBLEMS.
- Develop an understanding of the role of logic, critical analysis, imagination, and creativity in the study and application of the law and the legal process.

SOCSC 495 Independent Studies in Social Science

Upon completion of this program, the student will be able to:

- Identify and comprehend an individual's relationship to structures in the larger society.
- Apply effective critical thinking skills to interpret sociological phenomena.
An independent studies project involves an individual student or small group of students in study, research, or activities beyond the scope of regularly offered courses. See the current catalog section of "Special Studies" for full details of Independent Studies.

**Student Learning Outcomes**

Upon completion of this course, the student will be able to:

- **SLO #1**: Actively engage in intellectual inquiry beyond that required in order to pass a course of study (College Wide Learning Outcome – Area 4).
- Discuss and outline a proposal of study (that can be accomplished within one semester term) with a supervising instructor qualified within the discipline.
- Design an independent study (to be completed individually or by collaboration of a small group) to foster special knowledge, skills, and experience that are not available in any one regularly scheduled course.
- Use information resources to gather discipline-specific information.
- **SLO #2**: Utilize modes of analysis and critical thinking to apply theoretical perspectives and/or concepts in the major discipline of study to significant problems and/or educational activities (College Wide Learning Outcome – Area 3).
- Analyze and apply the knowledge, skills and experience that are involved in the independent study to theoretical perspectives and/or concepts in the major discipline of study.
- Explain the importance of the major discipline of study in the broader picture of society.
- **SLO #3**: Communicate a complex understanding of content matter of the major discipline of study (College Wide Outcome – Area 3).
- Demonstrate competence in the skills essential to mastery of the major discipline of study that are necessary to accomplish the independent study.
- **SLO #4**: Identify personal goals and pursue these goals effectively (College Wide Outcome – Area 4).
- Utilize skills from the "academic tool kit" including time management, study skills, etc., to accomplish the independent study within one semester term.

**Units:** 1 - 3  
**Hours:** 54 - 162 hours LAB  
**Prerequisite:** None.  
**Transferable:** CSU  
**Catalog Date:** June 1, 2020
Sociology | Cosumnes River College

Cosumnes River College offers courses and a degree in the study of human behavior in society. The discipline is concerned with the study of systems and how individuals work and interact within them.

Dean
(916) 691-7142
WilliaL3@crc.losrios.edu

Associate Degree for Transfer

A.A.-T. in Sociology

Cosumnes River College Sociology Associate in Arts for Transfer Program is designed to facilitate successful transfer to baccalaureate sociology degree programs. This degree provides students with the lower division breadth and depth of the field of sociology. Additionally, this degree exposes students to the core principles and practices in the field. Students will learn to: identify and comprehend their individual relationship to structures in the larger society; apply effective critical thinking skills to interpret sociological phenomena; assess the significance of important social movements in American society; define and identify various theoretical perspectives across the discipline of sociology; and analyze, interpret, and critically think about sociological ascriptions to race, gender, ethnicity, class, sexual orientation, political affiliation, and other sociological concepts.

Total Units: 18 - 19

The Associate in Arts in Sociology for Transfer (AA-T) degree may be obtained by completion of 60 transferable, semester units with a minimum 2.0 GPA, including (a) the major or area of emphasis described in the Required Program, and (b) either the Intersegmental General Education Transfer Curriculum (IGETC) or the California State University General Education-Breadth Requirements.

Student Learning Outcomes
Upon completion of this program, the student will be able to:

- (PSLO1) Identify and comprehend their individual relationship to structures in the larger society.
- Individuals will comprehend the magnitude of their influence on social structures in society, and the social structures that influence them.
- Demonstrate an awareness of the sociological resources available within the structures of society.
- Effectively utilize social structures as resources in society to facilitate their own movement and/or progress in society.
- (PSLO2) Apply effective critical thinking skills to interpret sociological phenomena.
- Apply sociological approaches to assess a social context.
- Distinguish between macro-level and micro-level orientations of assessment of given social contexts.
- Investigate and determine which social contexts require objective or subjective analysis.
- (PSLO3) Assess the significance of important social movements in American society.
- Demonstrate an awareness of the consistent goals, perspectives, and factors leading to social movements.
- Assess the significance of social movements of marginalized people in society.
- Explain the outcomes of social movements in American society.
- (PSLO4) Define and identify various theoretical perspectives across the discipline of Sociology.
- Discuss and Explain Social Conflict Approach.
- Discuss and Explain Symbolic Interactionist Approach.
- Discuss and Explain Structural Functionalist Approach.
- (PSLO5) Comprehend how social practices facilitate the functioning of social structures as they are responsible for maintaining the society as a whole.
- Examine and assess the effects of sociocultural customs and traditions on social structures and institutions.
- Analyze and evaluate values and norms present in the behavior of individuals and groups occupying society's social structures and institutions.
- Investigate the relationship between religion, language, customs and traditions, and how they facilitate comprehension of values and influence social practices.
- (PSLO6) Analyze, interpret, and critically think about sociological ascriptions to race, gender, ethnicity, class, sexual orientation, political affiliation, and other sociological concepts.
- Discuss and explain how ascriptions to sociological concepts affects and shapes individuals and groups' life chances and opportunities.
- Demonstrate content knowledge of how and why particular ideas are ascribed to sociological concepts.
- Explain and assess the socialization that individuals and groups undergo due to ideas ascribed to sociological concepts.

Career Information

Sociologists with advanced degrees and professional certificates have a broad range of employment opportunities including, but not limited to, teacher, social worker, probation officer, employment counselor, urban planner, and data analyst. NOTE TO TRANSFER STUDENTS: The Associate Degree for Transfer program is designed for students who plan to transfer to a campus of the California State University (CSU). Other than the required core, the courses you choose to complete this degree will depend to some extent on the selected CSU for transfer. In addition, some CSU-GE Breadth or IGETC requirements can also be completed using courses required for this associate degree for transfer major (known as "double-counting"). The Associate Degree for Transfer may not provide adequate preparation for upper-division transfer admissions; it is critical that you meet with a CRC counselor to select and plan the courses for the major, as programs vary widely in terms of the required preparation.

Sociology (SOC)

SOC 300 Introductory Sociology
This course is a study of human behavior in society, including social groups, culture, personality, social stratification, social change, collective behavior and social institutions.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO1: Develop the ability to analyze everyday experience from a sociological perspective.
  - Objective 1a: Understand how social forces influence people.
  - Objective 1b: Apply sociological imagination to recognize inequality of race, gender and class.
  - Objective 1c: Evaluate how institutions and organizations impact individuals.
- SLO 2: Demonstrate an understanding of the scientific nature of social research.
  - Objective 1a: Understand the components of research.
  - Objective 1b: Develop an ability to interpret facts through critical thinking and the use of the inquiry method.
  - Objective 1c: Recognize the various methods of research.
  - Objective 1d: Compare and contrast the three sociological theories.

SOC 301 Social Problems

This course is a survey of social problems in American society. It will examine their causes and evaluate proposed solutions. A special emphasis will be placed on local issues.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO1: Demonstrate an ability to analyze contemporary social problems which exists in society.
  - Objectives 1a: Identify objective and subjective criterion for defining social problem.
  - Objective 1b: Articulate how sociological concepts can be used to explain social problems.
  - Objective 1c: Understand charts, diagrams and statistics of a given problem.
- SLO2: Recognize how social problems are analyzed at a macro and micro-level
  - Objective 2a: Master the three sociological paradigms used in the analysis of social problems.
  - Objective 2b: Describe how various theories address the social problem.
  - Objective 2c: Evaluate the validity of conclusions of the social problems by the three paradigms.

SOC 302 Introduction to Social Research Methods
This course examines theoretical and ethical principles in social science research with an applied emphasis on research design, utilization of qualitative and quantitative techniques, data coding, data cleaning and organization, descriptive and inferential analysis, and the writing of research reports. Students will be introduced to the application of statistical software for quantitative areas of course work.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO 1: Develop the ability to analyze and apply scientific research methods from a sociological perspective.
  
- Objective 1a: Recognize the various methods of research.
  
- Objective 1b: Apply scientific steps to construct a hypothesis, select a methodology, and collect and analyze data.
  
- Objective 1c: Differentiate between qualitative methods and quantitative methods as research tools and assess projects that might benefit from a mixed modality approach.
  
- SLO 2: Demonstrate an understanding and ability to assess the scientific nature of social research.
  
- Objective 2a: Utilize statistical software to organize, clean, and run descriptive and inferential analysis of data.
  
- Objective 2b: Demonstrate an ability to apply critical thinking skills to evaluate literature reviews and research databases to find common themes in research design and reporting.
  
- Objective 2c: Integrate research into a report with a project description, methodology, analysis, conclusions, and future areas of research
  
- Objective 2d: Identify ethical issues in research

SOC 305 Critical Thinking in the Social Sciences

This course examines the definitional and contextual nature of social issues. It develops a "critical thinking" approach which integrates interdisciplinary principles and incorporates a comparative framework utilizing literary criticism, logic, argumentation, and persuasion to analyze and compare the content and validity of social problems. This course specifically explores how the media and scientific community collect, interpret, and report social data. Combining critical thinking techniques with the sociological perspective will help students to question the "taken-for-granted" assumptions that surround social phenomena and influence human behavior.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- Demonstrate an ability to identify and apply the principles and logic of social science research methods (SLO1).
  
- Recognize and analyze the process by which social issues are constructed as "problems" by the media, politicians and social elites (SLO2).
  
- Demonstrate an ability to apply critical thinking skills to assess the logic of an argument (SLO3).
  
- Objective 3a: Identify the issue of an article or piece of information.
  
- Objective 3b: Identify the conclusion statement of an author's written piece or a speaker's presentation.
  
- Objective 3c: Identify and criticize the reasons provided by an author or speaker.
• Objective 3d: Evaluate faulty reasoning, insufficient evidence, and unsupported conclusions used in the analysis and reporting of social problems.

• Objective 3e: Understand the use of statistics, tables, and charts in the presentation of an argument.

• Objective 3f: Contrast ideographic (full description) & nomothetic (generalized understanding) approaches to knowledge used by scientists, politicians & the media.

• Investigate and critically analyze information presented in everyday publications and media venues for their strengths and weaknesses (SLO4).

• Apply library research methods and computer skills in the collection, analysis, and reporting of social data (SLO5).

• Objective 5a: Compare and contrast the use of ‘expert opinion’, primary and secondary sources, and the influence of special interest groups in recognizing and giving credence to evidence reported about social problems.

• Demonstrate improved writing and analytical skills within the social sciences (with a minimum of 8,000 words in written assignments) [SLO6].

SOC 310 Marriage and the Family

This course will examine the social, psychological, cross-cultural, political, historical and economic factors relating to the changing family, marriage, remarriage and significant relationships. The intersection of race, ethnicity, class, age, gender, and sexuality will be explored.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

• SLO 1: DEMONSTRATE AN UNDERSTANDING OF SOCIOLOGICAL THEORIES RELATING TO THE SOCIAL INSTITUTION OF THE FAMILY.
  
  Objective 1a: Examine cross-cultural, historical, political, and economic factors in the development of the family form and function.

  Objective 1b: Examine the racial and ethnic variations of the American family.

  Objective 1c: Examine the intersection of class, age, and gender in the family.

  Objective 1d: Examine sexuality and the emergence of new family forms.

• SLO2: EXAMINE THE INFLUENCE OF CHANGING GENDER ROLES IN MARRIAGE AND FAMILY.
  
  Objective 2a: Identify the expressive and instrumental roles of men and women and demonstrate an understanding of their historical change.

  Objective 2b: Assess the impact of evolving social structures such as economy, education, religion and politics and their impact on gender roles.

  Objective 2c: Understand the socialization process in the family and the various form of parenting.

• SLO3: APPRAISE AREAS OF CONFLICT AND CONFLICT RESOLUTION IN INTIMATE RELATIONSHIPS.
  
  Objective 3a: Identify reasons for conflict.

  Objective 3b: Examine methods of conflict resolution.

  Objective 3c: Apply Sociological Imagination in interpreting reasons for divorce and rise in remarriages.

  Objective 3d: Discuss the socio-economic and political implications of divorce and remarriages on men, women and children.

SOC 321 Race, Ethnicity and Inequality in the United States
This course is a social profile of major American minority groups. It examines the problems of minority assimilation into an "open" society and culture.

**Student Learning Outcomes**

Upon completion of this course, the student will be able to:

- SLO 1: Explain how an individual's race or ethnicity can affect the quality of their interactions in social structures throughout the larger society.
- Objective 1A: Explain how race and ethnicity can impact an individual's experience with structural assimilation.
- SLO 2: Define and identify various sociological theoretical perspectives in regard to the experiences of racial and ethnic groups.
- Objective 2A: Explain assimilation theories, which help us to understand the ideal social conditions under which different ethnic groups can become part of American society.
- Objective 2B: Explain Social Conflict Theory and the sub-theories of internal colonialism, separatism, and secessionism, and cultural pluralism which help us understand the impact of these processes in American society.
- SLO 3 Analyze how prejudice, discrimination, and racism have both historically and contemporarily disadvantaged minority groups in American society and simultaneously advantaged the majority group in American society.
- Objective 3A: Explain the terms genocide, forced removal, slavery, segregation, social distance, cultural assimilation, primary structural assimilation, and secondary structural assimilation.
- Objective 3B: Describe the various ways that people show combinations of prejudice and discrimination according to Robert Merton, such as Active Bigot, Timid Bigot, All-Weather Liberal, and Fair-Weather Liberal
- Objective 3C: Examine both inter and intra-group social conflict.
- SLO 4: Explain the historical legacies of racial and ethnic inequalities and inequities and how these have led to contemporary social issues.
- Objective 4A: Describe the effects of stigma, the social construction of race, and stereotypes.
- SLO 5: Assess the significance of racial and ethnic groups' social movements in American society.
- Objective 5A: Explain the Civil Rights Movements of African Americans, Native Americans (AIM), Hispanic or Latino (Chicano Movement), and Asian Americans.
- Objective 5B: Examine the impact of these movements on the social perceptions of different groups in U.S. society. Students will understand race as a social construction of reality.

**SOC 341 Sex and Gender in the U.S.**

This course provides a study of the changing roles of women and men in the US. Theories of women's and men's gender role socialization, gender related inequalities, health and body issues, and a current examination of the women's and men's movements will be explored.

**Student Learning Outcomes**

Upon completion of this course, the student will be able to:

- SLO 1: Articulate the general principles of biological, psychological, anthropological, and sociological theories to the study of sex and gender.
SOC 495 Independent Studies in Sociology

Units: 1 - 3
Hours: 54 - 162 hours LAB
Prerequisite: None.
Transferable: CSU
Catalog Date: June 1, 2020

An independent studies project involves an individual student or small group of students in study, research, or activities beyond the scope of regularly offered courses. See the current catalog section of "Special Studies" for full details of Independent Studies.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO #1: Actively engage in intellectual inquiry beyond that required in order to pass a course of study (College Wide Learning Outcome – Area 4).
- Discuss and outline a proposal of study (that can be accomplished within one semester term) with a supervising instructor qualified within the discipline.
- Design an independent study (to be completed individually or by collaboration of a small group) to foster special knowledge, skills, and experience that are not available in any one regularly scheduled course.
- Use information resources to gather discipline-specific information.
- SLO #2: Utilize modes of analysis and critical thinking to apply theoretical perspectives and/or concepts in the major discipline of study to significant problems and/or educational activities (College Wide Learning Outcome – Area 3).
- Analyze and apply the knowledge, skills and experience that are involved in the independent study to theoretical perspectives and/or concepts in the major discipline of study.
- Explain the importance of the major discipline of study in the broader picture of society.
- SLO #3: Communicate a complex understanding of content matter of the major discipline of study (College Wide Outcome – Area 3).
- Demonstrate competence in the skills essential to mastery of the major discipline of study that are necessary to accomplish the independent study.
- SLO #4: Identify personal goals and pursue these goals effectively (College Wide Outcome – Area 4).
- Utilize skills from the "academic tool kit" including time management, study skills, etc., to accomplish the independent study within one semester term.
Spanish | Cosumnes River College

CRC offers the basic grammar and conversation courses in Spanish. Students will be able to understand the spoken language, to speak with reasonable fluency, and to write at their speaking level.

Associate Degrees for Transfer

A.A.-T. in Spanish

The Associate in Arts in Spanish for Transfer Degree (AA-T) is designed to provide a seamless transfer pathway for students interested in pursuing at least one Spanish degree option in the California State University (CSU) system. Students must complete the core curriculum and electives to meet a total of 60 transferable units with a minimum 2.0 GPA, which includes the CSU General Education Breadth or the Intersegmental General Education Transfer Curriculum (IGETC) pattern. Students must also earn a grade of C or better in all the courses for the major as described in the Required Program. Upon successful completion of the degree requirements, students will be guaranteed admission to the CSU system with junior status and will not have to repeat lower division coursework. Students are encouraged to meet with a counselor to develop their educational plans as degree options and general education requirements vary for each university.

Catalog Date: June 1, 2020

1SPAN 426 and 427 have a prerequisite of SPAN 412 or 415, so many of the "Option" courses will need to be completed before these courses.

The Associate in Arts in Spanish for Transfer (AA-T) degree may be obtained by completion of 60 transferable, semester units with a minimum 2.0 GPA, including (a) the major or area of emphasis described in the Required Program, and (b) either the Intersegmental General Education Transfer Curriculum (IGETC) or the California State University General Education-Breadth Requirements.

**Student Learning Outcomes**

Upon completion of this program, the student will be able to:

- utilize correct grammatical structures of standard Spanish.
- read Spanish proficiently as found, for example, in Spanish language newspapers, magazines, short stories, essays, and selections of poetry written by Spanish, Spanish-American, and Chicano authors.
- demonstrate appropriate writing and composition skills using Spanish.
- discuss and critique Spanish-American literature in a historical context.
- demonstrate proficiency in these areas: comprehension, speaking, reading, writing, and understanding the peoples and cultures of Spanish-speaking countries.

**Career Information**
The AA-T in Spanish can provide students with the foundational knowledge necessary for transfer to a 4-year Bachelor of Arts (BA) degree program. Career opportunities for students who have earned BA or BS degrees in Spanish include but are not limited to: Airlines/Travel, Banking, Bilingual Education, Bilingual Telecommunications, Emergency Services, Foreign Service, Foreign Language Teacher, Import & Export, Intelligence/Military Service, International Business, IRS/State Franchise Tax Board, Business & Commerce, Law Enforcement/Correctional Officer, Social Security Officer, Social Service, Translating & Interpreting, and Tourism. Some careers may require additional training.

NOTE TO TRANSFER STUDENTS: The Associate Degree for Transfer program is designed for students who plan to transfer to a campus of the California State University (CSU). Other than the required core, the courses you choose to complete this degree will depend to some extent on the selected CSU for transfer. In addition, some CSU-GE Breadth or IGETC requirements can also be completed using courses required for this associate degree for transfer major (known as “double-counting”). Meeting with a counselor to determine the most appropriate course choices will facilitate efficient completion of your transfer requirements. For students wishing to transfer to other universities (UC System, private, or out-of-state), the Associate Degree for Transfer may not provide adequate preparation for upper-division transfer admissions; it is critical that you meet with a CRC counselor to select and plan the courses for the major, as programs vary widely in terms of the required preparation.

Associate Degrees

A.A. in Spanish

CRC offers the basic grammar and conversation courses in Spanish. Students will be able to understand the spoken language, to speak with reasonable fluency, and to write at their speaking level.

Highlights include:
* Courses in Spanish
* Multimedia, interactive language lab with Internet capabilities
* Internationally trained faculty and staff
* Oral Proficiency Certification in Spanish

This degree is designed to meet common lower division requirements for a major in Spanish in a four-year university. This will include the fundamentals of language learning, listening, speaking, reading, writing, and culture.

Note to Transfer Students:
If you are interested in transferring to a four-year college or university to pursue a bachelor’s degree in this major, it is critical that you meet with a CRC counselor to select and plan the courses for your major. Schools vary widely in terms of the required preparation. The courses that CRC requires for an Associate’s degree in this major may be different from the requirements needed for the Bachelor’s degree.

Native speakers of the language who have high school - equivalent reading and writing skills in their native language should enroll in the 413 level course (or above) in their native language.

</tbody>
</table>

This is a first semester introduction to the Spanish language. It is designed for beginning students with little or no previous exposure to the language. It is characterized by an emerging ability to understand and produce appropriate responses in high frequency situations utilizing learned materials. Speaking and writing will be comprehensible to a sympathetic listener. Verbal and written expression is limited to short, culturally appropriate communication. Students will acquire a knowledge of the geography, culture and people of regions where Spanish is spoken and of Spanish-speakers' contributions to North American and world cultures. This class consists of two hours lecture and one hour of laboratory work conducted in the classroom each week and two hours of laboratory work conducted in the Language Laboratory each week.

**Student Learning Outcomes**

Upon completion of this course, the student will be able to:

- SLO-1: Demonstrate increasing comprehension of language use.
- Understand and produce appropriate responses in familiar situations, such as those pertaining to classroom, family, home, travel, etc.
- SLO-2: Analyze and discuss various topics from newspapers and magazine articles.
- Create a series of basic oral presentations where the student compares and contrasts a given topic.
- SLO-3: Experience a culturally rich environment. Demonstrate knowledge of geography.
- Understand the culture of the regions where Spanish is spoken.
- SLO-4: Analyze different linguistic patterns from other Spanish speaking countries, such as gestures, the use of tú vs usted and cultural values.
- Interact with community members where the language is spoken at community activities and events.

#### SPAN 102 Conversational Spanish, Elementary

<table>

<tr>
<td>Prerequisites:</td>
<td>SPAN 101 with a grade of &quot;C&quot; or better</td>
</tr>
<tr>
<td>General Education:</td>
<td>AA/AS Area I</td>
</tr>
<tr>
<td>Catalog Date:</td>
<td>June 1, 2020</td>
</tr>
</tbody>
</table>
This is second semester Elementary Spanish. It is designed for students who have completed SPAN 101 or two years of high school Spanish. It provides refinement of skills begun in SPAN 101. Students will gain increased accuracy and ability to understand and produce appropriate responses in high frequency situations utilizing learned materials. Speaking and writing will be comprehensible to a sympathetic listener. Verbal and written expression will be limited to short, culturally appropriate communication on a broader scale than at the SPAN 101 level. Students will acquire a knowledge of the geography, culture and people of regions where Spanish is spoken and of Spanish-speakers' contribution to North American and world cultures. This class consists of two hours lecture and one hour of laboratory work conducted in the classroom each week and two hours of laboratory work conducted in the Language Laboratory each week.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO-1: Develop the ability to communicate creatively in a real-world setting.
- Create short dialogs from learned materials.
- SLO-2: Demonstrate increased conceptual understanding and more sustained control of learned high frequency expressions and phrases in conversation.
- Follow a series of basic oral instructions requiring non-verbal response, such as commands and directions.
- SLO-3: Formulate and analyze various topics from newspaper and magazine articles.
- Discuss different topics, such as educational plans, political issues in Latin America, cultural values, and to learn about the contributions of other people from other cultures to American life.
- SLO-4: Demonstrate knowledge of geography and an understanding of the culture of the regions where Spanish is spoken.

SPAN 311 Conversational Spanish, Intermediate

| Units: | 2 |
| Hours: | 18 hours LEC; 54 hours LAB |
| Prerequisite: | SPAN 102 or 401 with a grade of "C" or better; or two years of high school Spanish |
| Transferable: | CSU |
| Catalog Date: | June 1, 2020 |

This is a conversational course designed for students who have completed SPAN 102 or two years of high school Spanish. Refining skills obtained in previous coursework, students will continue to build their communication skills including listening, reading and speech. Students will develop the ability to respond in an unrehearsed manner on concrete topics in known situations. Students will be exposed to the geography, culture and people of regions where Spanish is spoken and to Spanish-speakers' contributions to North American and world cultures. This course will consist of one hour of lecture and two hours of laboratory work conducted in the classroom each week and one hour of laboratory work conducted in the Language Laboratory each week.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- DEMONSTRATE INCREASING COMPREHENSION OF LANGUAGE USE. SLO#1
  - Using listening comprehension skills identify the main ideas of natural, spoken conversation using an increasing vocabulary and idioms.
- DEVELOP LANGUAGE SKILLS TO COMMUNICATE EFFECTIVELY. SLO#2
  - Utilize sustained control of high-frequency expressions and phrases learned in the beginning levels in conversation.
  - Ask and answer simple questions on every day topics.
- RECOGNIZE AND APPRECIATE PATTERNS OF CULTURE IN SPANISH SPEAKING REGIONS. SLO#3
  - Identify physical and cultural geography of Spanish speaking countries.

SPAN 312 Conversational Spanish, Intermediate

| Units: | 2 |
| Hours: | 18 hours LEC; 54 hours LAB |
| Prerequisite: | SPAN 311 or 402 with a grade of "C" or better; or three years of high school Spanish |
| Transferable: | CSU |
| Catalog Date: | June 1, 2020 |
This is second semester Intermediate Spanish. This is a conversation course designed for students who have completed SPAN 311 or SPAN 402 or three years of high school Spanish. Continuing to refine skills obtained in previous coursework, students will continue to build their communication skills including listening, reading and speech. Students will develop the ability to respond in an unrehearsed manner on concrete topics in known situations. Students will be exposed to the geography, culture and people of regions where Spanish is spoken and to Spanish-speakers’ contributions to North American and world cultures. This course will consist of one hour of lecture and three hours of laboratory work conducted in the classroom and one hour of laboratory work conducted in the Language Laboratory each week.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- DEMONSTRATE INCREASING COMPREHENSION OF LANGUAGE USE. SLO#1
  - Demonstrate listening comprehension with an increased understanding of ideas presented in native-spoken conversation.
- DEVELOP LANGUAGE SKILLS TO COMMUNICATE EFFECTIVELY. SLO#2
  - Demonstrate sustained control of high-frequency expressions and phrases used in the intermediate levels of conversation.
  - Produce language that communicates information.
  - Ask and answer questions on every day topics.
- RECOGNIZE AND APPRECIATE PATTERNS OF CULTURE IN SPANISH SPEAKING REGIONS. SLO#3
  - Demonstrate knowledge of physical and cultural geography of Spanish speaking countries.

SPAN 401 Elementary Spanish

Units: 4
Hours: 54 hours LEC; 54 hours LAB
Prerequisite: None.
Transferable: CSU; UC (Corresponds to two years of high school study)
General Education: AA/AS Area I; CSU Area C2; IGETC Area 6
C-ID: C-ID SPAN 100
Catalog Date: June 1, 2020

This is the first semester introduction to the Spanish language. It is designed for beginning students with little or no previous exposure to the language. It is characterized by an emerging ability to understand and produce appropriate responses in high frequency situations utilizing learned materials. Speaking and writing will be comprehensible to a sympathetic listener. Verbal and written expression is limited to short, culturally appropriate communication. Students will acquire a knowledge of the geography, culture and people of regions where Spanish is spoken and of Spanish-speakers’ contributions to North American and world cultures.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- PRODUCE AND COMPREHEND BASIC COURTESIES AND SIMPLE CONVERSATIONS ON STUDENT LIFE IN SPANISH. SLO#1
  - Understand short spoken dialogue and answer simple questions, such as telling time, greetings, days of the week, academic subjects, identifying people, and sports.
  - Communicate minimally with learned material. The student can respond orally using core vocabulary phrases and expressions.
  - Demonstrate knowledge of geography and an understanding of the culture of the regions where Spanish is spoken.
  - Incorporate basic learned materials, such as phrases, paraphrastic expressions, reflexive and preterite verbs, in daily life situations.
- DEMONSTRATE ABILITY TO COMMUNICATE IN WRITING USING LEARNED GRAMMATICAL FORMS. SLO#2
  - List and describe material read or heard. Supply specific biographical information. Write simple sentences about travel, family, classroom, pastimes and weather.
- ANALYZE AND INTERPRET WRITTEN MATERIAL. SLO#3
  - Comprehend a reading selection based on familiar topics, such as travel, family, classroom and academic life, pastime, and weather.
- DISTINGUISH CULTURAL ELEMENTS OF THE SPANISH-SPEAKING WORLD. SLO#4
Recognize the fundamental cultural values in a variety of situations, such as gestures and the use of tú and usted.

## SPAN 402 Elementary Spanish

| Units: | 4 |
| Hours: | 54 hours LEC; 54 hours LAB |
| Prerequisite: | SPAN 401 with a grade of "C" or better |
| Transferable: | CSU; UC (SPAN 402 and 413 combined: maximum transfer credit is one course) |
| General Education: | AA/AS Area I; CSU Area C2; IGETC Area 6 |
| C-ID: | C-ID SPAN 110 |
| Catalog Date: | June 1, 2020 |

This is second semester Elementary Spanish. It is designed for students who have completed SPAN 401 or two years of high school Spanish. It provides refinement of skills begun in SPAN 401. Students will gain increased accuracy and ability to understand and produce appropriate responses in high-frequency situations utilizing learned materials. Speaking and writing will be comprehensible to a sympathetic listener. Verbal and written expression will be limited to short, culturally appropriate communication on a broader scale than at the SPAN 401 level. Students will acquire a knowledge of the geography, culture and people of regions where Spanish is spoken and of Spanish-speakers' contribution to North American and world cultures.

### Student Learning Outcomes

Upon completion of this course, the student will be able to:

- DEMONSTRATE INCREASED CONCEPTUAL UNDERSTANDING AND MORE SUSTAINED CONTROL OF LEARNED HIGH FREQUENCY EXPRESSIONS AND PHRASES IN CONVERSATION (SLO#1).
- Create and dramatize short dialogs which include routine questions, talk about future plans, including weekends and evenings, and give simple instructions, compare and contrast. Produce speech intelligible to a sympathetic listener using broader vocabulary than in SPAN 401.
- DEMONSTRATE ABILITY TO COMMUNICATE IN WRITING USING LEARNED GRAMMATICAL FORMS (SLO#2).
- Create compositions that include listing, writing simple messages and supplying basic biographical information using simple sentences. Writing will be intelligible to a sympathetic listener used to communicate with non-native speakers and demonstrate emerging creativity. It will consist of short responses and questions using basic but broader vocabulary than that used at the SPAN 401 level and will do so with increasing accuracy.
- DISTINGUISH AND EXAMINE CULTURAL ELEMENTS OF THE SPANISH-SPEAKING WORLD (SLO #3).
- Recognize characteristics of the regions where Spanish is spoken, including architecture, music, dance, literary figures, recording artists and other cultural activities, which are part of the culture.

## SPAN 411 Intermediate Spanish

| Units: | 4 |
| Hours: | 54 hours LEC; 54 hours LAB |
| Prerequisite: | SPAN 402 with a grade of "C" or better |
| Transferable: | CSU; UC |
| General Education: | AA/AS Area I; CSU Area C2; IGETC Area 3B; IGETC Area 6 |
| C-ID: | C-ID SPAN 200 |
| Catalog Date: | June 1, 2020 |

This is first semester Intermediate Spanish. It is designed for students who have completed SPAN 402 or three years of high school Spanish. It provides refinement of skills attained in SPAN 402. Students will work toward the ability to create with the language without relying on learned responses, to understand main ideas in routine speech and to understand main ideas in written texts. Listening and reading comprehension continue to develop; speaking and writing will be comprehensible to a somewhat sympathetic native speaker. Students will develop the ability to respond in an unrehearsed manner on concrete topics in known situations. Written expression will meet limited personal needs and culturally appropriate language at a higher level of accuracy than found in SPAN 402. The student will continue acquisition of knowledge of geography, culture and people of regions where Spanish is spoken and of Spanish-speakers' contributions to North American and world cultures.

### Student Learning Outcomes

Upon completion of this course, the student will be able to:

- PRODUCE AND COMPREHEND BASIC COURTESIES AND SIMPLE CONVERSATIONS ON STUDENT LIFE IN SPANISH (SLO#1).
- Understand short, spoken dialogue and answer simple questions, such as telling time, greetings, days of the week, academic subjects, identifying people, and sports.
• Communicate minimally with learned material by responding orally using core vocabulary phrases and expressions.
• Demonstrate knowledge of geography and an understanding of the culture of the regions where Spanish is spoken.
• Incorporate basic learned materials, such as phrases and expressions, in daily life situations.
• Demonstrate sustained control of high-frequency expression and phrases learned at the moderate-beginning level in conversation and writing.

DEMONSTRATE ABILITY TO COMMUNICATE IN WRITING USING LEARNED GRAMMATICAL FORMS (SLO#2).
• Write down simple sentences about travel, family, classroom, pastimes and weather.
• Demonstrate listening comprehension by getting the main ideas of natural, spoken conversation using a 1000-3000-word vocabulary.
• Identify the gist of general topics in brief passages of contemporary prose.
• Create conversations and compositions with the language by combining learned elements in a reactive mode.
• Sustain and close simple, basic communicative tasks.

ANALYZE AND INTERPRET WRITTEN MATERIAL (SLO#3).
• Comprehend a reading selection based on familiar topics, such as travel, family, classroom and academic life, pastimes, and weather.
• Demonstrate knowledge of geography and an understanding of the culture of the regions where Spanish is spoken, including art, architecture, music, dance, literary figures, recording artists, and other activities which are part of the culture.

DISTINGUISH CULTURAL ELEMENTS OF THE SPANISH-SPEAKING WORLD (SLO#4).
• Recognize the fundamental cultural values in a variety of situations, such as gestures and the use of tú and usted.

SPAN 412 Intermediate Spanish

Units: 4
Hours: 54 hours LEC; 54 hours LAB
Prerequisites: SPAN 411 with a grade of "C" or better
Transferable: CSU; UC
General Education: AA/AS Area I; CSU Area C2; IGETC Area 3B; IGETC Area 6
C-ID: C-ID SPAN 210
Catalog Date: June 1, 2020

This is second semester Intermediate Spanish. It is designed for students who have completed SPAN 411 or four years of high school Spanish. It provides continued development of skills attained in SPAN 411. The focus will be the development of written narratives and expository prose combined with increased cultural awareness. Emphasis will be on culturally authentic reading and writing through the introduction of basic literary analysis. Students will develop the ability to handle complicated situations using past and future time frames. Students will continue acquisition of knowledge of geography, culture and people of regions where Spanish is spoken and of Spanish-speakers’ contributions to North American and world cultures.

Student Learning Outcomes

Upon completion of this course, the student will be able to:
• Communicate in writing using learned grammatical forms. (SLO 1, P-SLO 2)
• Write expressively with a high degree of accuracy in word choice and grammatical construction from essays and articles.
• Analyze some of the literary works and compare some of the authors and their work.
• Develop listening and reading comprehension skills by selecting topics related to the learned materials. (SLO2, P-SLO 1)
• Read and discuss a variety of written works.
• Discussions may be on cultural, social and political events.
• Use a more sophisticated and varied vocabulary than during the previous course level. (SLO 3, P-SLO 2)
• Communicate in complex situations about topics beyond immediate and personal needs.
• Narrate and describe in the present and past tenses.
• Extend his/her knowledge of the geography and culture of Spanish-speaking regions. These topics may include art, music, architecture, literary figures, and other cultural activities of those regions. (SLO 4, P-SLO 3)
- Analyze the culture of the target language by doing Internet research in Spanish.
- Compare and contrast different Spanish speaking countries' culture and customs.

SPAN 413 Spanish for Native Speakers I

This course offers the fundamentals of spoken and written Spanish for the native speaker of Spanish. It covers the structure of the language, oral communication, fundamentals of grammar and composition. Focus is placed primarily in the indicative tenses. The course also covers diacritical marks, like the accent mark, and their uses. In addition, the course introduces the student to the geography and culture of the Spanish speaking world. This course is conducted in Spanish.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- **SLO #1**: Demonstrate proficiency in the five skills as mandated by the competency guidelines of the American Council on the Teaching of Foreign Languages (ACTFL): comprehension, speaking, reading, writing, and an understanding of the people and culture of the Spanish-speaking countries.
- Recognize and compose with the indicative tenses: present, preterit, imperfect and future.
- Utilize correct grammatical structures of standard Spanish.
- Demonstrate critical thinking through contrastive and inductive analysis and techniques to develop logical and coherent thought and expression in written and oral language.
- Read Spanish proficiently as found, for example, in Spanish language newspapers, magazines, short stories, essays, and selections of poetry written by Spanish, Spanish-American, and Chicano authors.
- Identify the countries and the capitals of countries where Spanish is the official language.
- Speak standard Spanish with greater precision using varied grammatical patterns of enriched vocabulary.
- Identify and use diacritical marks: the accent, dieresis, tilde, question and exclamation marks.
- Name and write, with correct spelling, the forms of articles, adjectives, pronouns and nouns.
- Identify and demonstrate the correct use of direct object nouns and pronouns, and reflexive pronouns.
- Identify and demonstrate the use of gender and number in nouns and articles.
- Identify which verb forms and vocabulary words belongs to standard Spanish, colloquial Spanish, and local colloquial Spanish, influenced in lexicon and syntax by the English language and common to Spanish speakers with no formal education in the language.
- Compose sentences in Spanish using correct punctuation and capitalization.
- **SLO #2**: Analyze and critique, from a student's own experience and knowledge, aspects of the Spanish-speaking culture that differ significantly from contemporary United States culture.
- Research and identify names of some major landmarks and regions in Spanish-speaking nations, names of persons and events of historical and cultural importance.

SPAN 415 Spanish for Native Speakers II
This course is a continuation of Spanish 413. It offers the fundamentals of spoken and written Spanish for the native speaker of Spanish. It covers the structure of the language, oral communication, fundamentals of grammar and composition. Focus is placed primarily on the conditional and subjunctive forms, the future tense, and the compound tenses. The course also covers diacritical marks, like the accent mark, and their uses. In addition, the course introduces the student to the geography and culture of the Spanish speaking world. This course is conducted in Spanish.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- (SLO1) Demonstrate proficiency in the five skills as mandated by the competency guidelines of the American Council on the Teaching of Foreign Languages (ACTFL): comprehension, speaking, reading, writing, and an understanding of the people and culture of the Spanish-speaking countries
- Recognize and demonstrate the correct use of the indicative tenses: present, preterite, imperfect and future
- Recognize and demonstrate the correct use the conditional form, the subjunctive form and the compound tenses
- Recognize and demonstrate the correct use of the direct object, the indirect object, and reflexive pronouns
- Read Spanish proficiently as found, for example, in Spanish language newspapers, magazines, short stories, essays, and selections of poetry written by Spanish, Spanish-American, and Chicano authors like Ernesto Cardenal, Octavio Paz, Gabriel García Márquez, Tomás Rivera, Elena Poniatowska, Ana Castillo, Otto René Castillo, Roque Dalton, Gioconda Belli, and others
- Identify names of some major landmarks and regions in Spanish-speaking nations, names of persons and events of historical and cultural importance, holidays in the Spanish speaking world, etc.
- Identify and employ diacritical marks: the accent, dieresis, tilde, question and exclamation marks
- Produce sentences, paragraphs and essays in Spanish using correct punctuation and capitalization
- Analyze from their own experience and knowledge aspects of the Spanish-speaking culture that differ significantly from contemporary United States culture
- (SLO2) Students will improve their language skills above the prerequisite course, and will continue to expand their knowledge between standard and popular Spanish, using varied grammatical patterns and an enriched vocabulary
- Identify and differentiate which verb forms and vocabulary words belongs to standard Spanish, colloquial Spanish, and local colloquial Spanish, influenced in lexicon and syntax by the English language and common to Spanish speakers with no formal education in the language

SPAN 423 Contrastive Grammar of English-Spanish I

This course presents part one of the essential elements of Spanish grammar side by side with their grammatical equivalent in English. It allows native Spanish-speakers and advanced Spanish learners to compare and contrast the grammars of both languages at a glance. It focuses upon the development of analytical abilities by presenting the interlingual differences between Spanish and English in a simple and direct way. Students will be provided with numerous exercises, through which the nature of such differences can be readily perceived and acted upon. This course will begin with an overview of grammatical terminology and sentence structure in both languages.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO 1: DEMONSTRATE KNOWLEDGE AND UNDERSTANDING OF BASIC SENTENCE STRUCTURE IN ENGLISH AND SPANISH.
- Identify the five sentence types: 1) positive sentence; 2) negative sentence; 3) yes/no question; 4) negative yes/no question; and 5) content question.
Compose grammatically correct sentences utilizing basic and intermediate structures of English and Spanish in writing.

SLO 2: ANALYZE SPANISH AND ENGLISH GRAMMAR FROM A CONTRASTIVE PERSPECTIVE.

Recognize and interpret intermediate structures of English and Spanish grammar in text and speech.

Compare and contrast the five sentence types in Spanish and English.

Examine and demonstrate the differences between and the correct use of the indicative tenses in English and Spanish.

Contrast usage of Imperfect and Preterite tenses in Spanish and compare to their equivalent usage in English.

SLO 3: IDENTIFY INDIVIDUAL PATTERNS OF GRAMMAR ERRORS WHEN USING THE TARGET LANGUAGE IN ORDER TO LATER AVOID THEM SUCCESSFULLY.

SPAN 424 Contrastive Grammar of English-Spanish II

| Units: | 1.5 |
| Hours: | 27 hours LEC |
| Prerequisite: | SPAN 423 with a grade of "C" or better; or Spanish native speaker proficiency or equivalent advanced intermediate level as assessed by the instructor. |
| Transferable: | CSU |
| Catalog Date: | June 1, 2020 |

This course presents part two of the essential elements of Spanish grammar side by side with their grammatical equivalent in English. It allows native Spanish-speakers and advanced Spanish learners to compare and contrast the grammars of both languages at a glance. It focuses upon the development of analytical abilities by presenting the interlingual differences between Spanish and English in a simple and direct way. Students will be provided with numerous exercises, through which the nature of such differences can be readily perceived and acted upon.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO 1: DEMONSTRATE KNOWLEDGE AND UNDERSTANDING OF BASIC SENTENCE STRUCTURE IN ENGLISH AND SPANISH AT ALL LEVELS OF GRAMMATICAL COMPLEXITY.

- Identify the five sentence types: 1) positive sentence; 2) negative sentence; 3) yes/no question; 4) negative yes/no question; and 5) content question.

- Compose grammatically correct sentences utilizing intermediate and advanced structures of English and Spanish in speech and writing.

- SLO 2: ANALYZE SPANISH AND ENGLISH GRAMMAR FROM A CONTRASTIVE PERSPECTIVE.

- Recognize and interpret intermediate and advanced structures of English and Spanish grammar in text and speech.

- Compare and contrast word order or “syntax” in Spanish and English in the five sentence types: 1) positive sentence; 2) negative sentence; 3) yes/no question; 4) negative yes/no question; and 5) content question.

- Examine and demonstrate the differences between and the correct use of the subjunctive form and the compound tenses in English and Spanish.

- Contrast Spanish and English conditional sentences and unreal comparisons.

- SLO 3: IDENTIFY INDIVIDUAL PATTERNS OF GRAMMAR ERRORS WHEN USING THE TARGET LANGUAGE IN ORDER TO LATER AVOID THEM SUCCESSFULLY.

SPAN 425 Advanced Reading and Conversation

| Units: | 3 |
| Hours: | 54 hours LEC |
| Prerequisite: | SPAN 412 or 415 with a grade of "C" or better |
| Transferable: | CSU; UC |
| General Education: | AA/AS Area I; CSU Area C2; IGETC Area 3B |
| Catalog Date: | June 1, 2020 |

This class focuses on building advanced reading and conversational skills in Spanish. The emphasis is on developing critical thinking skills and academic writing proficiency through a functional grammar approach. Readings and activities provide the appropriate vocabulary, linguistic structures, and writing strategies to allow for building on vocabulary, grammar review, and meaningful dialogue.
Upon completion of this course, the student will be able to:

- Demonstrate increasing comprehension of language use (SLO#1).
- Improve pronunciation, aural comprehension, reading and writing skills through practical use.
- Analyze the functions of the elements of the sentence (i.e. grammar and syntax)
- Write short narratives and expository prose combined with increased culture awareness (SLO#2).
- Develop the ability to communicate creatively in real-world setting.
- Identify and describe the geography, culture and people of regions where Spanish is spoken and of Spanish-speakers’ contributions to the world cultures.

**SPAN 426 Introduction to Mexican American Literature**

<table>

</table>

This course is an introductory survey to the four genres of Spanish-American literature: Poetry, Narrative, Theatre, and the Essay, and the culture which produced it. Post-independence writers and their works will be emphasized. This course is conducted in Spanish.

**Student Learning Outcomes**

Upon completion of this course, the student will be able to:
• SLO #1: RECOGNIZE, DESCRIBE AND ANALYZE THE FOUR TRADITIONAL LITERARY GENRES AND IDENTIFY REPRESENTATIVE SPANISH-AMERICAN AUTHORS AND THEIR WORKS.

• Name, identify and critique representative Spanish-American authors, their literary works and the socio-historical context of their literary productions.

• Criticize specific Spanish-American literary works.

• Recognize the different Spanish-American literary genres.

• Describe the characteristics of each Spanish-American literary genre.

• SLO #2: ANALYZE AND DEMONSTRATE THE SPECIFIC CHARACTERISTICS OF SPANISH-AMERICAN LITERARY WORKS AND THEIR RELATIONSHIP TO LATIN-AMERICAN CULTURE AND SOCIETY.

• Formulate questions about the relationship between society and Spanish-American literature.

• Compose narratives analyzing the relationships between specific literary productions and their socio-historical context.

SPAN 434 Spanish for the Professions - Intermediate

This is an intermediate course designed for persons in law enforcement, business and finance, social services and the medical professions. The emphasis of the course is on acquiring verbal facility in interviewing, collecting data, giving instructions and general courtesies. The course will help students acquire language proficiency while reviewing and broadening the grammar foundation attained in elementary Spanish. It will introduce specific vocabulary necessary for professionals to communicate successfully in a professional situation. Cultural and behavioral attitudes appropriate for relating to persons of Hispanic heritage will be suggested.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

• UNDERSTAND AND PRODUCE APPROPRIATE RESPONSES IN FAMILIAR SITUATIONS IN THE PROFESSIONAL SETTING (SLO1).

• Demonstrate ability to communicate effectively in a professional situation.

• Demonstrate knowledge and understanding of the Spanish speaking culture.

• Demonstrate ability to interview, collect data, give instructions and sustain a logical dialogue with one another or a native speaker.

SPAN 495 Independent Studies in Spanish

An independent studies project involves an individual student or small group of students in study, research, or activities beyond the scope of regularly offered courses. See the current catalog section of "Special Studies" for full details of Independent Studies.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

• SLO #1: Actively engage in intellectual inquiry beyond that required in order to pass a course of study (College Wide Learning Outcome – Area 4).

• Discuss and outline a proposal of study (that can be accomplished within one semester term) with a supervising instructor qualified within the discipline.

• Design an independent study (to be completed individually or by collaboration of a small group) to foster special knowledge, skills, and experience that are not available in any one regularly scheduled course.
- Use information resources to gather discipline-specific information.

- SLO #2: Utilize modes of analysis and critical thinking to apply theoretical perspectives and/or concepts in the major discipline of study to significant problems and/or educational activities (College Wide Learning Outcome – Area 3).

- Analyze and apply the knowledge, skills and experience that are involved in the independent study to theoretical perspectives and/or concepts in the major discipline of study.

- Explain the importance of the major discipline of study in the broader picture of society.

- SLO #3: Communicate a complex understanding of content matter of the major discipline of study (College Wide Outcome – Area 3).

- Demonstrate competence in the skills essential to mastery of the major discipline of study that are necessary to accomplish the independent study.

- SLO #4: Identify personal goals and pursue these goals effectively (College Wide Outcome – Area 4).

- Utilize skills from the “academic tool kit” including time management, study skills, etc., to accomplish the independent study within one semester term.
Student Government (SGVT)

SGVT 300 Introduction to Student Government

Units: 2
Hours: 18 hours LEC; 54 hours LAB
Prerequisites: None.
Transferable: CSU
General Education: AA/AS Area III(b)
Catalog Date: June 1, 2020

This course provides a study of the legal, educational and philosophical basis of student government. The course may include travel to other campuses, local, regional and state conferences and provide the opportunity to participate on faculty and administrative committees. Topics are designed to teach leadership skills and to give practical experience in the social and civic responsibilities of student government.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- **ANALYZE GROUP DYNAMICS AND ORGANIZATIONAL BEHAVIOR (SLO-1).**
  - Assess and express organizational behavior that is effective and appropriate for student government tasks and relations, such as goal setting, stress management, motivation, and basic oral and written communication skills of active listening, interpersonal communication, and diversity awareness.
  - Evaluate and develop effective leadership skills which may include personal assessment, delegating, problem solving, budgeting and critical thinking.

- **DEMONSTRATE LEADERSHIP AND ENGAGEMENT IN ACTIVITIES AND EFFECTIVE STUDENT GOVERNANCE (SLO-2).**
  - Analyze and audit the Student Senate budget to demonstrate fiscal responsibility.
  - Plan and organize a variety of campus activities.
  - Identify and use campus resources to complete class projects.
  - Demonstrate a working knowledge of parliamentary procedure.
  - Advocate for fair representation of college students.
  - Demonstrate an understanding of the importance to an organization of clearly articulated vision and tenets.

- **EXAMINE CRITICALLY THE WORKINGS OF A STUDENT GOVERNMENT (SLO-3).**
  - Demonstrate an understanding of Title 5 and student governance at the community college.
• Cite and apply basic principles of the Ralph M. Brown Act.
• Reflect on the effectiveness and appropriateness of personal and group efforts within student government activities.
• PARTICIPATE IN THE COMMUNITY BEYOND THE CAMPUS, DEMONSTRATING AN UNDERSTANDING OF PERSONAL, SOCIAL AND CIVIC RESPONSIBILITIES IN THE LARGER CONTEXT (SLO-4).
• Participate in student government planning, meetings and activities on campus, and/or at the district, state and national levels.

SGVT 315 Dynamics of Leadership

Units: 3
Hours: 54 hours LEC
Prerequisite: None.
Transferable: CSU
General Education: AA/AS Area III(b)
Catalog Date: June 1, 2020

This course is designed to introduce students to the fundamental elements of leadership as it pertains to student governmental processes, team and community building. Students will examine contemporary leadership models as well as their own values and beliefs to develop a personal philosophy of leadership. Through activities and projects facilitated by student government, students will learn how to apply theory and experience leadership in the college and community settings. Students interested in broadening their understanding of diverse topics related to self-knowledge, group dynamics and leadership are encouraged to enroll.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

• DEFINE AND DEMONSTRATE AN UNDERSTANDING OF FUNDAMENTAL ELEMENTS OF LEADERSHIP (SLO 1)
• Analyze and evaluate diverse leadership theories, styles and philosophies including gender, cultural and ethnic influences.
• Evaluate and articulate personal leadership values and beliefs.
• Correlate leadership theories, styles and approaches within the planning and conduct of organized events facilitated by student government.
• DEVELOP ORGANIZATIONAL AND SITUATIONAL ACUMEN AND LEARN STRATEGIES TO MANAGE AND EFFECT CHANGE (SLO 2)
• Incorporate and apply leadership theories and models to activities facilitated by student government and community life experiences.
• Demonstrate effective critical thinking and ethical decision making skills.
• CLARIFY VALUES AND SELF-KNOWLEDGE OF LEADERSHIP SKILLS AND ABILITIES (SLO 3)
• Critique self-assessment and recommend purposeful feedback of others.
• Construct and articulate a personal philosophy of leadership that includes an understanding of self, others and community.

SGVT 495 Independent Studies in Student Government

Units: 1 - 3
Hours: 54 - 162 hours LAB
Prerequisite: None.
Catalog Date: June 1, 2020

An independent studies project involves an individual student or small group of students in study, research, or activities beyond the scope of regularly offered courses. See the current catalog section of "Special Studies" for full details of Independent Studies.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

• SLO #1: Actively engage in intellectual inquiry beyond that required in order to pass a course of study (College Wide Learning Outcome – Area 4).
• Discuss and outline a proposal of study (that can be accomplished within one semester term) with a supervising instructor qualified within the discipline.
Design an independent study (to be completed individually or by collaboration of a small group) to foster special knowledge, skills, and experience that are not available in any one regularly scheduled course.

Use information resources to gather discipline-specific information.

SLO #2: Utilize modes of analysis and critical thinking to apply theoretical perspectives and/or concepts in the major discipline of study to significant problems and/or educational activities (College Wide Learning Outcome – Area 3).

Analyze and apply the knowledge, skills and experience that are involved in the independent study to theoretical perspectives and/or concepts in the major discipline of study.

Explain the importance of the major discipline of study in the broader picture of society.

SLO #3: Communicate a complex understanding of content matter of the major discipline of study (College Wide Outcome – Area 3).

Demonstrate competence in the skills essential to mastery of the major discipline of study that are necessary to accomplish the independent study.

SLO #4: Identify personal goals and pursue these goals effectively (College Wide Outcome – Area 4).

Utilize skills from the “academic tool kit” including time management, study skills, etc., to accomplish the independent study within one semester term.
Television Production  
| Cosumnes River College

This program is designed to provide skills in television and film production through the preparation of projects for campus, Cable TV and Internet viewing. This option can lead to entry-level jobs in television, film, Cable TV, business and industry or for preparation for transfer to a four-year institution.

Dean

 (916) 691-7170

 BedforB@crc.losrios.edu (mailto:BedforB@crc.losrios.edu)

Associate Degree

A.A. in Television Production

This program is designed to provide skills in television and video production through the preparation of projects for campus, Cable TV and Internet viewing. This option can lead to entry-level jobs in television, film, Cable TV, business and industry or for preparation for transfer to a four-year institution.

Highlights include:
* Practical experience working in the campus television studio
* Internship opportunities working in local television stations, post-production facilities, and with independent film-makers
* Complete digital TV studio with multiple cameras, switcher, character generator and teleprompter
* State-of-the-art digital computer lab for graphics and non-linear editing

Note to Transfer Students:
If you are interested in transferring to a four-year college or university to pursue a bachelor’s degree in this major, it is critical that you meet with a CRC counselor to select and plan the courses for your major. Schools vary widely in terms of the required preparation. The courses that CRC requires for an Associate’s degree in this major may be different from the requirements needed for the Bachelor’s degree.

The Television Production Associate in Arts (A.A.) degree may be obtained by completion of the required program, plus general education requirements, plus sufficient electives to meet a 60-unit total. See CRC graduation requirements.

### Student Learning Outcomes

Upon completion of this program, the student will be able to:

- Write in clear, concise English. (PSLO-1)
- Research critically, filter the results and present them in a cogent manner. (PSLO-2)
- Resolve and execute standard pre-production skills including planning, scripting, budgeting, and crew and equipment selection. (PSLO-3)
- Utilize basic video production equipment correctly, safely and creatively, including cameras, lights and audio, and control room equipment such as audio mixers, switchers, video recording, character generation and TelePrompter. (PSLO-4)
- Operate essential post production equipment for audio and video editing and distribution in a variety of contemporary and emerging methods. (PSLO-5)
- Analyze, interpret, and exercise critical judgment in the evaluation of media productions. (PSLO-6)
- Demonstrate through projects that with the power of a communicator, comes moral and ethical responsibility. (PSLO-7)
- Demonstrate a hands-on ability to perform the professional level critical thinking needed for successful teamwork in television, film or other media employment. (PSLO-8)

### Career Information

Camera Operator; Computer Graphic Artist; Non-Linear Video Editor; Technical Director; Audio Engineer; Broadcast Technician; Production Assistant; TV, Film, DVD, or Internet Producer/Director; Personal or Corporate Video Some career options may require more than two years of college study. Classes beyond the associate degree may be required to fulfill some career options or for preparation for transfer to a university program.

### Certificate of Achievement

Television Production Certificate
Designed to provide skills in television production through the preparation of video projects for campus viewing, Cable TV, Internet or DVD. This option can lead to entry level jobs in television, Cable TV, business and industry or as preparation for transfer to a four-year institution.

Veterinary Technology | Cosumnes River College

The Cosumnes River College Veterinary Technology program does NOT provide veterinary medical services to the public.

Veterinary Technology program is designed to provide the student with the skills and knowledge necessary to pursue a career as a Registered Veterinary Technician. The program offers a rigorous and rewarding academic curriculum while simultaneously providing ample hands-on experience. The student will gain a working knowledge of animal behavior, restraint, nutrition and nursing. The curriculum will include, but not be restricted to, the performance of veterinary emergency care, anesthesia, dental care, surgical assistance and laboratory procedures.

Registered Veterinary Technicians (RVTs) are trained professionals who work as highly skilled assistants to veterinarians and researchers. RVTs are integral members of the veterinary health care team and are valuable employees in a variety of related fields.

Most states require official licensing of Veterinary Technicians. In California, licensure is accomplished by:

- Graduation from an AVMA Accredited/California Veterinary Medical Board Approved RVT program (or equivalent)
- Achievement of a passing score on the Veterinary Technician National Exam (VTNE)
- Application for a Registered Veterinary Technician license from the California Veterinary Medical Board. (Please visit the California VMB website for details about the licensure process.)

Associate Degree

A.S. in Veterinary Technology

CRC's Veterinary Technology program is designed to provide the student with the skills and knowledge necessary to pursue a career as a Registered Veterinary Technician. The program offers a rigorous yet rewarding academic curriculum while simultaneously providing ample hands-on experience. The student will gain a working knowledge of animal behavior, restraint, nutrition and nursing. The curriculum will include, but not be restricted to, the performance of emergency care, anesthesia, dental care, surgical assistance and laboratory procedures.

Registered Veterinary Technicians (RVTs) (previously known as Animal Health Technicians) are trained professionals who work as highly skilled assistants to veterinarians and researchers. Their knowledge and skills have led to their being desirable employees in a variety of related fields.

Most states (including California) require official licensing or certification of RVTs. In California, certification is accomplished by:

- completion of an educational curriculum, and
- achievement of a passing score on a state board exam

Highlights include:

* One of only six programs in California that has earned accreditation by the American Veterinary Medical Association
* Acceptance of degree by examining boards in states other than California
* High-quality training recognized by local employers
* Excellent record of students passing state board exams
* On-the-job training and future job placement opportunities
Requirements for Pre-enrollment to the Program
A grade of "C" or better in the following courses is required:
BIOL 400
CHEM 400 or CHEM 305
BIOL 440
Forms are available from the Careers and Technology Division office or apply online at http://crc.losrios.edu/~vettech/app.htm. Only completed application packets will be considered. Completed applications must include all official college transcripts. Transcripts must be submitted as soon as they are available. For the latest admission requirements refer to:
http://crc.losrios.edu/Areas_of_Study/Careers_and_Technology/Veterinary_Technology.htm
Note: The AVMA requires that all applicants for enrollment must have a high school diploma or G.E.D.

Only students who meet the pre-enrollment requirements and follow the pre-enrollment procedures will be considered for the program. Applications must be received for the following fall semester by April 1st.

IMPORTANT NOTE TO STUDENTS
In order to ensure that prerequisites for subsequent courses are met and to allow completion of course work in four semesters, the student must adhere to the following schedule. NOTE: Each VT course is offered only once per year in either the spring or fall semester, as shown in the Required Program section.

* SEMESTER 1 (Fall): VT 100, VT 111
* SEMESTER 2 (Spring): VT 110, VT 113, VT 152, VT 298**
* SEMESTER 3 (Fall): VT 120, VT 122, VT 126, VT 298
* SEMESTER 4 (Spring): VT 123, VT 130, VT 131, VT 134, VT 298

With the exception of VT 110, all courses are pre- or co-requisites for the subsequent semester's courses. Failure to complete a course successfully will therefore delay progress through the program.

**VT 298, Work Experience, can only be taken after successful completion of VT 100 and VT 111. Per AVMA requirements, a minimum of 300 hours is required. At least one unit of VT 298 must be completed prior to beginning the third semester courses.

Additional Program Notes:
All students enrolled in any of the following courses will be required to spend 2-6 hours per week in the care of colony animals. Shifts will be assigned and will include weekends, holidays and semester break: VT 100; VT 111; VT 113; VT 120; VT 126; VT 130; VT 131; VT 152

Failure to complete all required courses for the A.S. degree will make you ineligible to sit for the State Board examination under the AVMA accredited program eligibility guidelines.

Catalog Date: June 1, 2020

Students enrolled in VT 100 will be required to spend 2-6 hours per week in the care of colony animals. Shifts will be assigned and will include weekends, holidays, and semester break.

Students enrolled in VT 111 will be required to spend 2-6 hours per week in the care of colony animals. Shifts will be assigned and will include weekends, holidays, and semester break.

Students enrolled in VT 152 will be required to spend 2-6 hours per week in the care of colony animals. Shifts will be assigned and will include weekends, holidays, and semester break.

Students enrolled in VT 113 will be required to spend 2-6 hours per week in the care of colony animals. Shifts will be assigned and will include weekends, holidays, and semester break.

Students enrolled in VT 120 will be required to spend 2-6 hours per week in the care of colony animals. Shifts will be assigned and will include weekends, holidays, and semester break.

Students enrolled in VT 126 will be required to spend 2-6 hours per week in the care of colony animals. Shifts will be assigned and will include weekends, holidays, and semester break.

Students enrolled in VT 130 will be required to spend 2-6 hours per week in the care of colony animals. Shifts will be assigned and will include weekends, holidays, and semester break.

Students enrolled in VT 131 will be required to spend 2-6 hours per week in the care of colony animals. Shifts will be assigned and will include weekends, holidays, and semester break.

Beginning with the entering class of 2010-11, students must complete a minimum of 300 hours of internship/work experience. Students in a paid work experience earn one unit for a minimum of 75 hours. Students in an unpaid work experience earn one unit for a minimum of 60 hours. Work Experience is repeatable when there is new or expanded learning on the job.

_The Veterinary Technology Associate in Science (A.S.) degree may be obtained by completion of the required program, plus general education requirements, plus sufficient electives to meet a 60-unit total. See CRC graduation requirements._

**Enrollment Eligibility**

To be eligible for enrollment in the program, the student must meet the following criteria:

- Completion of BIOL 400 with a grade of "C" or better.*
- Completion of CHEM 400 or CHEM 305 with a grade of "C" or better.
- Completion of BIOL 440 with a grade of "C" or better.
- Completion of a pre-enrollment form including official copies of all college transcripts.
- AVMA requires that all applicants for enrollment must have a high school diploma or G.E.D.
- *Students are advised to check prerequisites for courses when registering.

**Enrollment Process**

Eligible students are selected for the program according to the following steps:

- Admission to the program is based on a random lottery process from among the qualified applicants. Only students who meet the educational and pre-veterinary technology requirements, and follow the pre-enrollment procedures will be considered for the program. Meeting all the requirements does not guarantee acceptance into the program.

**Student Learning Outcomes**

Upon completion of this program, the student will be able to:

- SLO 1: Apply the principles of pharmacology to the practice of veterinary medicine
- Interpret written orders, calculate doses, and correctly fill prescriptions in a veterinary pharmacy.
- Identify the indications and contraindications to the utilization of pharmaceuticals in the practice of veterinary medicine and surgery.
- Administer medications including but not limited to anesthetics, tranquilizers, pain medications, antibiotics, anti-inflammatories, hormones, chemotherapy agents, and other specialty medications to animals using appropriate techniques.
- SLO 2: Assist the veterinarian in the performance of veterinary medicine and surgery.
  - List and identify instrumentation used in a veterinary hospital.
  - Demonstrate the ability to sterilize instrumentation and maintain equipment in a veterinary hospital.
  - Demonstrate correct tissue handling and suturing techniques in a surgical setting.
  - Correctly restrain animals for treatment including companion, non-domestic, and large animals.
  - Perform nursing functions to include, but not limited to: physical examination, intravenous catheter care, basic life support (BLS), urinary catheter care, bandaging, and homeostatic maintenance for animals within a veterinary hospital.
- SLO 3: Apply the principles of radiography to the practice of veterinary medicine.
  - Take radiographs of small and large animals using correct radiographic technique.
  - Demonstrate the ability to develop, critique, radiographs, and correct errors in the performance of veterinary radiography.
  - Compare and contrast imaging modalities such as CAT, MRI, and ultrasound with respect to indications and applications of these techniques.
- SLO 4: Perform clinical laboratory duties within a veterinary hospital
  - Identify common parasite ova and larvae of domestic animals in fecal and blood samples.
  - Perform common laboratory tests utilized to formulate a minimum data base for an animal including, but not limited to the performance of clinical hematology, chemistry, urinalysis, and fecal analysis tests.
  - Formulate a quality control and maintenance program schedule for a clinical in house veterinary laboratory.
- SLO 5: Utilize the principles of dentistry in the practice of veterinary medicine.
  - Demonstrate proper technique in the utilization of dental instruments.
  - Perform non-surgical dental extractions in animals.
  - Communicate to clients techniques utilized in home dental care.
  - Perform a dental prophylaxis procedure in small animals.
- SLO 6: Perform clerical hospital/office duties within a veterinary hospital.
  - Maintain financial and patient records.
  - Operate a veterinary office computer system.
  - Maintain logs required by law including radiographic, laboratory, surgical, anesthesia, and controlled substance logs.
  - Organize and maintain an appointment schedule.
  - Perform an inventory of hospital supplies and medications.
  - Demonstrate telephone answering skills such as greeting clients, answering questions and proper telephone etiquette.
- SLO 7: Provide safe, humane, and effective care for common laboratory animals used in animal research.
  - Administer medications by oral or injectable methods to laboratory animals.
  - Identify common laboratory animal species.
  - Collect laboratory specimens such as blood, urine, and feces.
  - Determine the sex of common laboratory species.
  - Perform and/or supervise basic husbandry practices for common laboratory animal species.
- SLO 8: Provide safe, humane, and effective care for birds, reptiles, amphibians, rabbits, and ferrets.
  - Demonstrate restraint techniques.
  - Administer medications by oral and injectable methods.
  - Perform and/or supervise basic husbandry practices.
  - Collect laboratory specimens such as blood, urine, and feces.

Career Information
Certificate of Achievement

Veterinary Technology Certificate

This certificate is designed for students with three years of verifiable full-time experience working as an unregistered veterinary assistant. Upon completion of this certificate program, and three years clinical experience, the student will be fully eligible to take the State Board examination to become registered as a Veterinary Technician.

CRC's Veterinary Technology program is designed to provide the student with the skills and knowledge necessary to pursue a career as a Registered Veterinary Technician. The program offers a rigorous yet rewarding academic curriculum while simultaneously providing ample hands-on experience. The student will gain a working knowledge of animal behavior, restraint, nutrition and nursing. The curriculum will include, but not be restricted to, the performance of emergency care, anesthesia, dental care, surgical assistance and laboratory procedures.

Registered Veterinary Technicians (RVTs) (previously known as Animal Health Technicians) are trained professionals who work as highly skilled assistants to veterinarians and researchers. Their knowledge and skills have led to their being desirable employees in a variety of related fields.

Most states (including California) require official licensing or certification of RVTs. In California certification is accomplished by:

- completion of an educational curriculum
- achievement of a passing score on a state board exam

Highlights include:
- One of only six programs in California that has earned accreditation by the American Veterinary Medical Association
- Acceptance of degree by examining boards in states other than California
- High-quality training recognized by local employers
- Excellent record of students passing state board exams
- On-the-job training and future job placement opportunities

Requirements for Pre-enrollment to the Program

A grade of "C" or better in the following courses is required:

- BIOL 400
- CHEM 400 or CHEM 305
- BIOL 440

Forms are available from the Careers and Technology Division office or apply on-line at http://crc.losrios.edu/~vettech/app.htm. Only completed application packets will be considered. Completed applications must include all official college transcripts. Transcripts must be submitted as soon as they are available. For the latest admission requirements refer to:

http://crc.losrios.edu/Areas_of_Study/Careers_and_Technology/Veterinary_Technology.htm

Note: The AVMA requires that all applicants for enrollment must have a high school diploma or G.E.D.

Only students who meet the pre-enrollment requirements and follow the pre-enrollment procedures will be considered for the program. Applications must be received for the following fall semester by April 1st. Selection will be based on a random selection process, should the number of qualified applicants exceed available spaces in the program.

IMPORTANT NOTE TO STUDENTS

In order to ensure that prerequisites for subsequent courses are met and to allow completion of course work in four semesters, the student must adhere to the following schedule. NOTE: VT courses are offered only once per year - spring or fall semester.

* SEMESTER 1 (Fall): VT 100, VT 111
* SEMESTER 2 (Spring): VT 110, VT 113, VT 152
* SEMESTER 3 (Fall): VT 120, VT 122, VT 126
* SEMESTER 4 (Spring): VT 123, VT 130, VT 131, VT 134

With the exception of VT 110, all courses are pre- or co-requisites for the subsequent semester's courses. Failure to complete a course successfully will therefore delay progress through the program.

Additional Program Notes:

All students enrolled in any of the following courses will be required to spend 2-6 hours per week in the care of colony animals. Shifts will be assigned and will include weekends, holidays and semester break: VT 100; VT 111; VT 113; VT 120; VT 122; VT 126; VT 130; VT 131; VT 152

  - Formulate a quality control and maintenance program schedule for a clinical in house veterinary laboratory.

- **SLO 5**: Utilize the principles of dentistry in the practice of veterinary medicine
  - Demonstrate proper technique in the utilization of dental instruments.
  - Perform non-surgical extractions in animals.
  - Communicate to clients home dental care techniques
  - Perform a dental prophylaxis procedure in small animals.

- **SLO 6**: Perform clerical hospital/office duties within a veterinary hospital
  - Maintain financial and patient records.
  - Operate a veterinary office computer system.
  - Maintain logs required by law including radiographic, laboratory, surgical, anesthesia, and controlled substance logs.
  - Organize and maintain an appointment schedule.
  - Perform an inventory of hospital supplies and medications.
  - Demonstrate telephone answering skills such as greeting clients, answering questions and proper telephone etiquette.

- **SLO 7**: Provide safe, humane, and effective care for common laboratory animals used in animal research
  - Administer medications by oral or injectable methods to laboratory animals.
  - Identify common laboratory animal species.
Veterinary Technology (VT)

VT 100 Introduction to Veterinary Technology

This is an orientation course that reviews the history, training and career opportunities pertaining to Registered Veterinary Technicians. Animal behavior, handling, training and restraint will be thoroughly presented and discussed in the lecture periods. Laboratories will provide opportunities for students to gain hands-on experience with domestic, farm, laboratory and non-domestic animal species (when they are available). Students will be introduced to the medical terminology common to the animal health care field. Students will also be required to spend 2-6hrs/week during assigned times in the care of the colony animals. Time may include weekends and holidays as well as semester break. Enrollment in this course limited to students admitted to the Veterinary Technology program via the pre-enrollment process. See the course catalog or a counselor for more information.

Career Information

Private Veterinary Practice; Zoos/Wild Animal Parks; Pharmaceutical Industry; Veterinary Supplies Sales; Diagnostic Laboratories; Military Service; Education; Biomedical Research; Humane Societies/Animal Control; Regulatory Veterinary Medicine; Livestock Health Management

Veterinary Technology (VT)

VT 100 Introduction to Veterinary Technology

Units: 3
Hours: 36 hours LEC; 54 hours LAB
Prerequisites: None.
Enrollment Limitation: Students must complete the pre-enrollment process for the Veterinary Technology program. All students entering the Veterinary Technology program must complete BIOL 400 or BIOL 310 and BIOL 440 and CHEM 305 to be considered for pre-enrollment. See the course catalog or a counselor for more information
Catalog Date: June 1, 2020

This is an orientation course that reviews the history, training and career opportunities pertaining to Registered Veterinary Technicians. Animal behavior, handling, training and restraint will be thoroughly presented and discussed in the lecture periods. Laboratories will provide opportunities for students to gain hands-on experience with domestic, farm, laboratory and non-domestic animal species (when they are available). Students will be introduced to the medical terminology common to the animal health care field. Students will also be required to spend 2-6hrs/week during assigned times in the care of the colony animals. Time may include weekends and holidays as well as semester break. Enrollment in this course limited to students admitted to the Veterinary Technology program via the pre-enrollment process. See the course catalog or a counselor for more information.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO 1: Relate and physically demonstrate an understanding of animal behavior, handling, training, and restraint principles with respect to domestic, farm, laboratory and non-domestic species (such as birds and reptiles).
- Describe physical restraint techniques for various species and the consequences of inappropriate restraint to both handler and animal patient.
- Explain the indications for using chemical restraint and the common drugs used for such a purpose.
- Explain the indications for euthanasia and the acceptable methods of euthanasia for a variety of species and circumstances.
- Differentiate the common behavioral disorders of dogs and cats and define appropriate treatment and/or management for these disorders.
- SLO 2: Discuss the level of training, responsibilities, legal implications and job diversity of Registered Veterinary Technicians.
- List the job tasks legally restricted to Registered Veterinary Technicians.
- Describe a spectrum of available career opportunities for a Registered Veterinary Technician.
- Explain the licensure requirements for Registered Veterinary Technicians.
- SLO 3: Demonstrate knowledge of medical terminology commonly used in the animal health care field.
- Define commonly used medical terms in veterinary medicine.
VT 110 Veterinary Office Practice

Interpret commonly used statements from a medicolegal document such as a patient record.

Communicate, using appropriate medical terminology, different patient medical conditions as would be done in a hospital “rounds” environment.

Effectively translate medical information and directions to lay people regarding animal patient disease and care.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO 1: Perform duties expected of a receptionist in a veterinary office.
- Assess and interpret client needs during telephone conversations.
- Admit and discharge patients, take history, maintain records and prepare appropriate documents and certificates for signature.
- Perform basic filing of medical records, radiographs, lab reports, etc.
- Schedule appointments for clients.
- Perform appropriate elementary computer skills (input, retrieve and print data).
- Differentiate between emergency and non-emergency needs of veterinary patients based on client information.
- SLO 2: Maintain radiograph, surgery, anesthesia, laboratory, and controlled substance logs and accurately enter data.
- Assess which logs are appropriate to procedures being performed on a patient.
- SLO 3: Understand and organize work duties of personnel in a veterinary hospital.
- Formulate a plan of basic cleanliness and orderliness of a veterinary facility (including a hospital, clinic, practice, or laboratory).
- SLO 4: Use weights and measures commonly used in a veterinary facility.
- Demonstrate the operation of a scale, pharmacy or laboratory balance, calibrated syringes, and other calibrated measuring devices used in a veterinary facility.
- Accurately convert between metric and U.S. standard measurements of mass, volume and length.
- SLO 5: Demonstrate knowledge of Veterinary Laws and Ethics.
- Understand the relevant Veterinary Medical Board terminology and the legal limitations of a Registered Veterinary Technician in the veterinary field.
- Demonstrate understanding of the National Association of Veterinary Technicians of America (NAVTA) and the American Veterinary Medical Association (AVMA) code of ethics for Veterinary Technicians and Veterinarians.
- SLO 6: Use of proper medical terminology.
- Demonstrate comprehension of medical terminology.
- SLO 7: Client and co-worker relations
- Practice through role play and demonstrate understanding of communication techniques for effective inter-personal relationships in the workplace.
- SLO 8: Interview skills
- Discuss and practice recommended interview approaches to questions and scenarios for successful outcomes.
Discuss unsuccessful interview performances and how to improve for future interview opportunities.

VT 111 Anatomy-Physiology of Animals

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO 1: Describe the structural and functional organization of the animal body.
  - Describe the hierarchical structure of living things.
  - Explain the microscopic structure of animal cells.
  - Construct a concept map that explains locations and functions of tissues within the body of animals.
  - Identify organs and organ systems of an animal body by visual inspection using models, diagrams, and cadavers.
  - Identify the body cavities of animals.

- SLO 2: Demonstrate the ability to use medical terminology correctly.
  - Define directions on the body using anatomical terminology.
  - Describe the regional anatomy of the animal body using anatomical terms.

- SLO 3: Explain the basic physiology of each body systems and relate that knowledge to the overall function of the animal body.
  - Describe the functions of each organ system.
  - Explain the mechanisms of metabolic reactions within the body.
  - Explain the mechanism of internal communication using the nervous and endocrine systems within the body.

- SLO 4: Compare the differences in anatomy and physiology of specific organ systems among domestic animals such as ruminants, equines, and carnivores.
  - Describe the structure of specific organ systems unique to domestic animals such as ruminants, equines, and carnivores.
  - Explain the mechanism of digestion in ruminants, equines, and carnivores.

- SLO 5: Explain the basic principles of homeostasis as relates to maintenance of the animal body.
  - Identify components of a homeostatic system.
  - Analyze the differences between negative and positive feedback systems and give examples of each.

- SLO 6: Integrate anatomical structure of different organs and organ systems by describing topographical anatomy of specific areas of the body.
  - Describe the surgical anatomy of different areas of the body.
  - Explain the structures that will be affected by a specific surgical approach to an area of the body.
  - Analyze what function will be disrupted by damage to a specific area of the body.

Units: 4

Hours: 54 hours LEC; 72 hours LAB

Prerequisite: None.

Corequisite: Concurrent enrollment in VT 100 (may be taken previously)

Enrollment Limitation: Students must complete the pre-enrollment process for the Veterinary Technology program. See the course catalog or a counselor for more information

Catalog Date: June 1, 2020

This course is a study of the basic anatomy and physiology of common domestic animals, specifically dogs, cats, horses, swine and ruminants. The information will be organized according to body systems. Within each system, the variation between species will be explored. Whenever possible, topics will be related to pertinent veterinary situations. (Note: Laboratory periods will include dissection of cadavers.) Students will also be required to spend 2-6hrs /week during assigned times in the care of the colony animals. Time may include weekends and holidays as well as semester break.
VT 113 Clinical Laboratory Techniques for Veterinary Technicians

This course will cover the basic clinical laboratory skills needed by Registered Veterinary Technicians. Topics covered will include parasitology, cytology, urinalysis, microbiology, and hematology. Both normal and abnormal values for various species of animals will be covered. Students will gain additional hands-on experience as they learn to restrain animals for specimen collection procedures. Office procedures as they pertain to clinical laboratory work will be included: filing, recordkeeping, telephone reports, etc. Students will be required to spend 2-6 hours per week during assigned times in the care of the colony animals. Time may include weekends and holidays as well as semester break.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO 1: Properly use and care for common veterinary laboratory equipment.
  - Demonstrate how to operate a microscope, hematology analyzer, blood chemistry analyzer, centrifuge, microbiological incubator, and the enzyme-linked immunosorbent assay (ELISA) test kits.
  - Plan a schedule for daily, weekly, and monthly maintenance for common veterinary laboratory equipment.

- SLO 2: Perform and evaluate safety procedures within a clinical veterinary laboratory setting.
  - Explain the procedures utilized to handle biological specimens including but not limited to: body fluids, fecal material, and tissue samples.
  - Describe the types and uses of protective clothing such as gloves, goggles, masks, caps, aprons and gowns required in a veterinary clinical laboratory.
  - Differentiate between the usage of a biohazard container and a sharps container.

- SLO 3: Demonstrate knowledge of basic biology of common veterinary parasites by the following:
  - Draw a life cycle for each Phylum and Class of parasites that infect domestic animals.
  - Differentiate between zoonotic and non-zoonotic parasites.
  - Explain basic methods of parasite control.

- SLO 4: Accurately perform diagnostic testing for internal and external parasites.
  - Perform a fecal flotation and centrifugation.
  - Analyze a fecal sample and identify parasite ova.
  - Perform a skin scraping.
  - Analyze a skin scraping and identify common ectoparasites.
  - Perform an ear swab for ear mites.
  - Perform a heartworm test.

- SLO 5: Culture and identify common veterinary microorganisms.
  - Perform a gram stain.
  - Perform a bacterial culture and sensitivity test.
  - Interpret the results of a culture and sensitivity test.
  - Differentiate between rods, cocci, spirochetes, yeast, and fungi by microscopy.

- SLO 6: Demonstrate basic knowledge of principles of hematology by performing the following:
  - Identify blood cells of domestic animals.
  - Perform a blood smear and stain on a microscope slide.
  - Perform a CBC including a PCV, white cell count and differentiation, and platelet estimate.
  - Describe the appropriate tubes and anticoagulants used for hematology.
Explain how the CBC relates to disease processes in an animal.

- SLO 7: Perform blood chemistry analysis.
- Correlate tests for enzymes and other chemicals with specific organs.
- Identify the correct blood collection tubes used for chemistry analysis.
- Correlate the results of serum chemistry analysis with disease processes in an animal.
- SLO 8: Analyze a urine specimen.
- Describe different methods of urine collection.
- Demonstrate how to perform a urine sedimentation analysis.
- Demonstrate how to perform a urinalysis by dipstick methods.
- Correlate the results of a urinalysis with disease processes in an animal.
- SLO 9: Demonstrate knowledge of basic principles of cytology by performing the following:
  - Perform a direct smear and stain on cytological specimens.
  - Perform a fine needle aspiration.
  - Differentiate between the basic characteristics of normal cells and neoplastic cells.
  - Distinguish the phases of the canine estrus cycle by identification of vaginal cell types.
  - Identify the basic characteristics of animal semen.
  - Differentiate between normal and abnormal sperm.

VT 120 Pharmacology and Anesthesiology for the Veterinary Technician

- **Units:** 4
- **Hours:** 54 hours LEC; 72 hours LAB
- **Prerequisites:** VT 111 and 113 with grades of "C" or better
- **Catalog Date:** June 1, 2020

This course will lay the foundation for the students’ understanding of pharmacological agents. Drugs will be discussed according to classification, action, method of administration and dispensing (including procedures for scheduled drugs). Injectable and inhalation anesthetic agents will be discussed and demonstrated during surgical laboratory exercises. Students will have an opportunity to work with two types of inhalation anesthetic agents. All students will rotate through various surgical positions where they will enhance their knowledge of equipment and job tasks required of the surgical assistant and anesthesia monitor. Students will learn intravenous catheterization and fluid therapy. Students will be required to spend 2-6hrs /week during assigned times in the care of the colony animals. Time may include weekends and holidays as well as semester break. Students will also be assigned a dog and cat which will require an additional 140 min/wk for obedience training, socialization and grooming.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO 1: Apply principles of pharmacology to the utilization of drugs in the practice of veterinary medicine.
- Safely administer drugs and anesthetics while providing surgical care.
- Evaluate status of anesthetized patients by monitoring from the preanesthetic period through the recovery period.
- Describe the effects and contraindication of commonly used preanesthetic and anesthetic agents.
- SLO 2: Operate and perform maintenance on a gas anesthetic machine.
- Identify the components of a gas anesthetic machine and describe their function.
- Perform maintenance on a gas anesthetic machine including breakdown and reassembly.
- SLO 3: Assist the veterinarian in surgery.
- List the names and describe uses of surgical instruments and equipment.
- Demonstrate the protocol for the utilization of aseptic technique in the surgical environment.
Devise a program for the disinfection and sterilization of instruments, operating room materials, and the operating room.

- SLO 4: Perform nursing and technician duties involving medicating, examining, and preparing patients for surgery.
- Demonstrate collection of blood from peripheral veins.
- Demonstrate the placement of intravenous catheters in dogs and cats.
- Perform endotracheal intubation of dogs and cats.
- Perform preanesthetic evaluation of patients including complete blood counts, serum chemistries and urinalysis.
- Suture existing skin wounds.
- Calculate drug doses and dilutions accurately.
- Perform subcutaneous, intramuscular and intravenous injections.

VT 122 Animal Disease: Pathology

**Units:** 3  
**Hours:** 54 hours LEC  
**Prerequisite:** VT 113 and 298 with grades of "C" or better; Students must have at least one unit of VT 298. Students should have experience in a clinical setting, including animal handling, client communication, sample collection and basic diagnostic modalities including auscultation, radiology, sample preparation, etc. prior to taking VT 122.  
**Catalog Date:** June 1, 2020

A course of study designed to acquaint the Veterinary Technician trainee with the many varied disease entities seen in the animal health field. While most of the diseases discussed will be those of common small, domestic animals, some problems of exotic and laboratory animal species will also be investigated. There will be exposure to such areas of study as etiology, pathogenesis, symptomatology and prevention of disease. Necropsy demonstrations may be provided as visual aids to the textbook study.

**Student Learning Outcomes**

Upon completion of this course, the student will be able to:

- SLO 1: Apply principles of animal diseases in the practice of veterinary medicine.
- Describe common signs of disease of major body systems.
- Evaluate environmental factors that predispose patient to disease.
- Evaluate patient’s immune system function in relation to disease conditions.
- Describe features of common disease agents and pathogenesis.
- SLO 2: Assist the veterinarian in small animal disease investigation.
- Evaluate status of sick patient by observing clinical appearance.
- Take a complete medical history of small animal patient.
- Demonstrate the protocol for a complete physical examination of a diseased small animal patient.
- Conduct and properly record findings from physical examination.
- Conduct or assist with a small animal necropsy and report findings.
- Describe the effects and contraindication of commonly used disease treatments.
- Properly utilize medical terminology while describing the condition of the small animal patient.
- SLO 3: Operate and perform basic diagnostic tests for the diagnosis of small animal disease.
- Perform disease evaluation of patients including complete blood counts, serum chemistries, urinalysis and disease specific tests.
- Describe common laboratory findings associated with specific disease conditions.
- List the names and describe uses of diagnostic tests utilized for diagnosis of infectious diseases.
- SLO 4: Develop a small animal preventive health plan.
- Devise a program for the prevention of small animal diseases for the specific patient’s environment.
VT 123 Large Animal Disease: Pathology

- Articulate to owner the disease agents which may affect the pet and what clinical signs to observe.
- Apply knowledge to predict features of related or potential disease conditions.
- Describe common zoonotic diseases and their prevention and control within the household.

Units: 3
Hours: 54 hours LEC
Prerequisite: VT 113 with a grade of "C" or better
Corequisite: BIOL 440 (may have been taken previously)
Catalog Date: June 1, 2020

A course of study designed to acquaint the Veterinary Technician trainee with the many varied large animal disease entities seen in the animal health field. While most of the diseases discussed will be those of the common large domestic animals, some emerging and foreign animal diseases will be investigated with an emphasis on public health concerns. There will be exposure to such areas of study as etiology, pathogenesis, symptomatology and control of disease. Course will cover mechanisms of protecting the nation's food supply through herd health disease prevention and control programs for zoonotic diseases.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO 1: Apply principles of large animal diseases in the practice of veterinary medicine.
- Properly use medical terminology pertinent to the study of large animal disease.
- Apply the concept of herd health to describe the interaction of environment, host and disease agent.
- Perform a disease risk assessment to evaluate large animal patient's predisposition to disease.
- Apply basic on farm biosecurity protocols based on the assessment results.
- Determine herd immune status and evaluate disease risk potential.
- Describe features of common disease agents and pathogenesis.
- Assess the potential emergence of a foreign disease within the herd.
- Evaluate the factors leading to the emergence or re-emergence of infectious diseases worldwide.
- Describe epidemiology of emerging and re-emerging diseases.
- Apply disease prevention and control methodology to protect the nation's food supply.
- Protect public health through implementation of biosecurity and disease prevention and control principles.
- SLO 2: Assist the veterinarian in large animal disease investigation.
- Evaluate status of sick patients by observing clinical appearance and environment.
- Obtain a complete medical history of large animal patient(s).
- Perform a complete physical examination of the diseased patient(s).
- Properly use medical terminology while reporting the condition of the patient and herd.
- Conduct a large animal necropsy and report findings.
- Describe the effects and contraindication of commonly used disease treatments.
- SLO 3: Perform basic diagnostic tests for the diagnosis of large animal disease.
- Perform disease evaluation of patients including complete blood counts, serum chemistries, urinalysis and disease specific tests.
- Describe common laboratory findings associated with specific large animal disease conditions.
- List names and describe uses of diagnostic tests that are utilized for the diagnosis of infectious diseases.
- SLO 4: Develop a Herd Health Plan.
- Devise a program for the prevention of large animal diseases for the specific herd environment.
- Articulate to owner the disease agents which may affect the patient and what clinical signs to observe.
Apply knowledge to predict features of related conditions.
Describe common zoonotic diseases and their prevention and control within the herd.
Apply knowledge of the various methods of control of infectious agents, including vaccination, antimicrobial therapy, behavioral, and social changes.

VT 126 Dentistry for the Veterinary Technician

**Units:** 1.5  
**Hours:** 18 hours LEC; 27 hours LAB  
**Prerequisite:** None.  
**Corequisite:** VT 120  
**Catalog Date:** June 1, 2020

This course will prepare the student for all aspects of veterinary diagnostics and prophylaxis in dogs and cats appropriate to the veterinary technician. It will include instruction in dental charting, radiography, prophylaxis and extractions. Students will perform dental radiography and prophylaxis on anesthetized animals. Students will also be required to spend 2-6hrs/week during assigned times in the care of the colony animals. Time may include weekends and holidays as well as semester break.

**Student Learning Outcomes**

Upon completion of this course, the student will be able to:

- SLO 1: Perform routine dental prophylaxis (manual and machine).
- Demonstrate correct usage of hand scaling instruments.
- Demonstrate correct sharpening and maintenance of hand dental instruments.
- Explain what type of damage to the patient may be incurred with improper usage of scaling instrumentation.
- Correctly apply polishing paste to dental surfaces.
- Examine oral cavity of an anesthetized patient.
- SLO 2: Prepare dental radiographs of anesthetized animals.
- Demonstrate various positions of animals for dental radiography.
- Explain usage of radiograph machine in the practice of dentistry.
- Develop dental radiographs.
- Prepare a maintenance schedule for radiographic developing equipment.
- Evaluate technique used to obtain dental radiographs.
- SLO 3: Maintain dental records
- Compare different types of charting systems used in veterinary dentistry.
- Compose a patient dental chart.
- SLO 4: Perform routine non-surgical extractions of teeth.
- Demonstrate correct technique utilized to remove teeth non surgically.
- Differentiate between surgical and non surgical extractions.
- Explain the criteria for determining when a surgical extraction must be performed.
- SLO 5: Discuss home dental care for animals with clients.
- Prepare a written home care plan for a client.
- Discuss home care in a "mock" client situation.
- SLO 6: Demonstrate knowledge of the anatomy and nomenclature of canine, feline and equine dentition.

VT 130 Advanced Veterinary Technology
This course includes instruction in advanced veterinary technology practices which includes, but is not limited to abnormal hematology, cytology, an introduction to bone marrow aspiration and evaluation, veterinary nutrition, emergency patient care, and advanced life support. There will be an emphasis placed upon advanced nursing techniques for companion animals, laboratory animals and non domestic species. Students will be required to spend two to six hours per week during assigned times in the care of the colony animals. Time may include weekends and holidays as well as semester break. Students will also be assigned a dog and cat which will require an additional 140 minutes per week for obedience training, socialization and grooming.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO 1: Demonstrate techniques for collection, handling, and reading of bone marrow samples in animals.
- Describe the process of hematopoiesis including the cellular characteristics and maturation sequence of blood cell precursors.
- Demonstrate the technique used to collect and store bone marrow samples.
- Identify the correct instrumentation to use for bone marrow collection.
- SLO 2: Compare hematological differences between healthy and diseased animals.
- Identify mature and immature leukocytes and erythrocytes in peripheral blood.
- Identify platelets and assess platelet morphology.
- Compare erythrocyte indexes and morphology between normal and diseased animals.
- Perform simple clotting tests to assess coagulation in an animal.
- SLO 3: Demonstrate the ability to run a chemical assay on whole blood and identify abnormalities in the chemical assay.
- Describe the components serum and plasma.
- Identify abnormalities in the chemical content of blood.
- SLO 4: Perform an electrocardiogram.
- Recognize common arrhythmias on an ECG.
- Identify abnormalities on an ECG trace, and correlate abnormalities with physical symptoms of cardiac disease in an animal.
- SLO 5: Apply and care for bandages, casts, and splints on animals.
- Apply bandages and casts correctly.
- Describe appropriate use of various casting, bandaging and splinting materials and techniques.
- SLO 6: Triage patients in need of veterinary medical care.
- Describe the causes, diagnosis and treatment of shock.
- Describe the principles of basic life support (BLS), first aid and emergency care.
- Describe the administration and monitoring of fluid therapy including blood transfusion.
- Describe indications for, methods of, and risks associated with O2 therapy.
- Perform CPR on a 'mock' animal, including drug and electrical therapies.
- Prioritize treatment of specific emergency situations as presented by the instructor.
- Describe common causes, associated signs and treatment of selected animal poisoning cases.
- SLO 7: Analyze a nutritional support plan for an animal.
- Compare ingredients found in small animal commercial diets.
- Select an appropriate diet for nutritional support of normal healthy patients, or a patient with a particular disease condition, obesity, or to help recover from disease or starvation.
- SLO 8: Demonstrate ability to perform advanced support and nursing techniques.
- Demonstrate how to perform gastric lavage on a mock animal.
• Insert a nasal oxygen canula in an animal.
• Place IV catheters in dogs and cats including cephalic, saphenous, and jugular catheters.
• Collect urine specimens by cystocentesis.
• Suture existing skin wounds.
• Perform CVP monitoring of an animal.
• Perform a blood crossmatch and transfusion on an animal.
• SLO 9: Critique general anesthetic protocols and procedures.
• Formulate an anesthetic plan for an animal with a given disease condition as presented by the instructor.
• Appropriately respond to an anesthetic emergency including, hypovolemia, hypotension, hypertension, cardiac arrest, respiratory arrest, hypothermia, and hyperthermia.

VT 131 Introduction to Diagnostic Imaging

Units: 3
Hours: 36 hours LEC; 54 hours LAB
Prerequisite: VT 120 and 122 with grades of "C" or better
Catalog Date: June 1, 2020

This course is designed to meet the needs of the veterinary technician who will be working for veterinarians in private practice, animal research laboratories, and/or private and state industrial or educational institutions. The course covers safety procedures, rules, regulations, x-ray production and theory as well as specific techniques associated with the use of radiographic equipment. It includes positioning techniques for various animal species as well as radiograph developing techniques and basic x-ray theory. Alternate imaging modalities are introduced and their use in veterinary medicine described. Emphasis is placed on the theory of diagnostic ultrasound and its use in veterinary medicine. A local field trip to a facility that offers the opportunity to perform large animal radiographic techniques may be required. Students will also be required to spend 2-6 hrs/week during assigned times in the care of the colony animals. Time may include weekends and holidays as well as semester break.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

• SLO 1: Produce diagnostic radiographs of dogs, cats, birds, small mammals and reptiles.
• Measure and position animals using anatomical landmarks.
• Demonstrate how to choose an appropriate technique to produce a quality radiographic image.
• Utilize radiographic equipment to produce a latent image.
• Process an exposed film using automatic and hand processing methods.
• Perform radiographic contrast studies.
• Perform radiographic techniques to screen for canine hip dysplasia.
• SLO 2: Analyze radiographic image for diagnostic quality.
• Critique image quality based on proper positioning and radiographic technique.
• Demonstrate ability to offer solutions to correct deficiencies in non-diagnostic radiographic images.
• Recognize radiographic artifact and cause of artifact.
• SLO 3: Implement radiation safety measures to minimize radiation exposure to personnel and to the patient.
• Properly use portable and stationary radiography equipment.
• Recognize faulty equipment.
• Properly use barrier equipment.
• Demonstrate an understanding of radiation regulations.
• SLO 4: Implement radiation quality control measures.
• Demonstrate proper maintenance protocols for imaging equipment.
VT 134 Large Animal Nursing

**Units:** 1.5
**Hours:** 18 hours LEC; 27 hours LAB
**Prerequisite:** VT 113 with a grade of "C" or better
**Catalog Date:** June 1, 2020

A course in restraint, behavior, anesthesia and nursing care of domestic large animal species. Species covered will include horses, cattle, sheep, goats, and swine. Students will learn and have hands on practice in basic restraint, physical examination, oral and injectable medication administration, and blood and urine collection techniques. In this course students will receive instruction through in-person lectures and/or online modules and discussions followed by hands-on practice and demonstrations at off campus livestock facilities. Written Midterm and Final examinations will take place on campus. Students will also receive instruction in the use of restraint equipment and techniques for obstetrical examination and dystocia, administration of and complications associated with large animal anesthesia, tail and leg wrapping, intravenous catheterization, and common husbandry practices including disbudding, tail docking, and castration.

**Student Learning Outcomes**

Upon completion of this course, the student will be able to:

- Develop and properly use a technique chart.
- Properly complete radiation logs, files and records.
- Demonstrate how to properly label, file and store films.
- SLO 5: Demonstrate understanding of other radiographic imaging techniques.
- Understand the uses of ultrasound and demonstrate how to prepare an animal for an ultrasound procedure.
- Understand basic knowledge of the function and appropriate use of other modalities including fluoroscopy, MRI, CT and PET.

VT 152 Introduction to Laboratory Animals and Caged Birds

**Units:** 2
**Hours:** 27 hours LEC; 27 hours LAB
**Prerequisite:** VT 100 and 111 with grades of "C" or better
**Catalog Date:** June 1, 2020
This course is designed to expand upon the brief introduction the veterinary technology student has had to caged birds and laboratory animals. The student will have more hands-on exposure to laboratory animals and caged birds (e.g. specimen collection, anesthesia, etc.) thereby increasing their understanding of laboratory animal care maintenance requirements. Greater emphasis will be placed on obtaining handling skills. This course will provide information and handling skills which will help the student prepare for the American Association for Laboratory Animal Science (AALAS) certification. A field trip to a research facility is required. Students will also be required to spend 2-6hrs/week during assigned times in the care of the colony animals. Time may include weekends and holidays as well as semester break.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- **SLO1**: Students will explain the laws that affect working with and maintaining laboratory animals. Differentiate and identify local, state and federal laws and statutes regulating animal use.
- **SLO2**: Students will be able to explain and identify acceptable and appropriate laboratory animal housing. Distinguish common research facility cages and devices including environmental enrichment designs.
- **SLO3**: Students identify appropriate AVMA approved euthanasia protocol for laboratory animal species. Describe the principles and methods of AVMA and IACUC approved humane euthanasia for a variety of lab animal, reptile and bird species.
- **SLO4**: Students will identify and discuss organ systems and anatomy of rodent, lagomorph, avian and reptile species. Identify and describe the basic organ systems and comparative anatomy of mice, rats, rabbits, hamsters, guinea pigs, snakes, turtles, lizards and birds.
- **SLO5**: Students calculate and administer accurately calculated drugs to laboratory animal species. Assemble appropriate equipment and administer intravenous, intraperitoneal, subcutaneous and intramuscular injections to laboratory animals, reptiles and birds.
- **SLO6**: Students safely and humanely anesthetize rodents and lagamorphs for basic procedures. Weigh animals and convert measurements and dosages to metric values. Calculate drug dosages. Assess appropriate vessel access for successful venipuncture and perform blood sample collection.
- **SLO7**: Students develop disease recognition, prevention and treatment including zoonotic and infectious diseases. Recognize and distinguish contagious, nutritional, environmental, congenital and zoonotic diseases for lab animals, reptiles and birds. Maintain disease prevention with proper husbandry and cleaning practices. Discuss appropriate medical or surgical management of these diseases, including pharmacological agents employed and specific laboratory tests used for diagnosis.
- **SLO8**: Students identify and describe unique nutritional requirements for laboratory animal, avian and reptile species.
Define the basic concepts of nutrition and food types as pertinent to laboratory species, reptiles and birds.

SLO9: Students identify the role of the veterinary technician in successful operation of a laboratory animal facility or research center.

Describe the role of the Registered Veterinary Technician in laboratory animal medicine.

Discuss the veterinary technician's role in facilities management.

An independent studies project involves an individual student or small group of students in study, research, or activities beyond the scope of regularly offered courses. See the current catalog section of “Special Studies” for full details of Independent Studies.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- **SLO #1:** Actively engage in intellectual inquiry beyond that required in order to pass a course of study (College Wide Learning Outcome – Area 4).
- Discuss and outline a proposal of study (that can be accomplished within one semester term) with a supervising instructor qualified within the discipline.
- Design an independent study (to be completed individually or by collaboration of a small group) to foster special knowledge, skills, and experience that are not available in any one regularly scheduled course.
- Use information resources to gather discipline-specific information.
- **SLO #2:** Utilize modes of analysis and critical thinking to apply theoretical perspectives and/or concepts in the major discipline of study to significant problems and/or educational activities (College Wide Learning Outcome – Area 3).
- Analyze and apply the knowledge, skills and experience that are involved in the independent study to theoretical perspectives and/or concepts in the major discipline of study.
- Explain the importance of the major discipline of study in the broader picture of society.
- **SLO #3:** Communicate a complex understanding of content matter of the major discipline of study (College Wide Outcome – Area 3).
- Demonstrate competence in the skills essential to mastery of the major discipline of study that are necessary to accomplish the independent study.
- **SLO #4:** Identify personal goals and pursue these goals effectively (College Wide Outcome – Area 4).
- Utilize skills from the “academic tool kit” including time management, study skills, etc., to accomplish the independent study within one semester term.

This course provides students with opportunities to develop marketable skills in preparation for employment in their major field of study or advancement within their career. It is designed for students interested in work experience and/or internships in associate degree level or certificate occupational programs. Course content includes understanding the application of education to the workforce; completion of required forms which document the student's progress and hours spent at the work site; and developing workplace skills and competencies. Appropriate level learning objectives are established by the student and the employer. During the semester, the student is required to participate in a weekly orientation and 75 hours of related paid work experience, or 60 hours of unpaid work experience for one unit. An additional 75 or 60 hours of related work experience is required for each additional unit. Work Experience may be taken for a total of 16 units when there are new or expanded learning objectives. Only one Work Experience course may be taken per semester.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- **DEMONSTRATE AN UNDERSTANDING AND APPLICATION OF PROFESSIONAL WORKPLACE BEHAVIOR IN A FIELD OF STUDY RELATED ONE'S CAREER.(SLO 1)**
  - Understand the effects time, stress, and organizational management have on performance.
  - Demonstrate an understanding of consistently practicing ethics and confidentiality in a workplace.
  - Examine the career/life planning process and relate its relevancy to the student.
  - Demonstrate an understanding of basic communication tools and their appropriate use.
  - Demonstrate an understanding of workplace etiquette.

- **DESCRIBE THE CAREER/LIFE PLANNING PROCESS AND RELATE ITS RELEVANCY TO ONE'S CAREER.(SLO 2)**
  - Link personal goals to long term achievement.
  - Display an understanding of creating a professional first impression.
  - Understand how networking is a powerful job search tool.
  - Understand necessary elements of a résumé.
  - Understand the importance of interview preparation.
  - Identify how continual learning increases career success.

- **DEMONSTRATE APPLICATION OF INDUSTRY KNOWLEDGE AND THEORETICAL CONCEPTS AS WRITTEN IN LEARNING OBJECTIVES IN PARTNERSHIP WITH THE EMPLOYER WORK SITE SUPERVISOR.(SLO 3)**
Welding | Cosumnes River College

The CRC welding program is designed for students interested in seeking employment or advancing employment in welding fabrication and industrial repairs. Current job statistics show a long-term and growing industry demand for skilled welders with very good pay for those with experience. Welding encompasses study in electrical, metallurgy, chemistry, physics, design, and mechanical engineering.

Associate Degrees

A.S. in General Agriculture

Agriculture is a vital component of our local, state, and national economies and offers many exciting employment opportunities. In addition to the production of a wide range of valuable agricultural commodities, the Sacramento region is home to numerous multinational agricultural corporations and statewide governmental agencies. It is also a center for international agricultural trade and commerce. This program is designed for students majoring in Agriculture while also allowing the student to select courses that fit his/her individual needs and desires.

As a General Agriculture major, you will:

* Study a general agriculture curriculum representing all of the departments of the Cosumnes River College agriculture program including: agriculture business, horticulture, welding, veterinary technology and plant science.

* Develop your leadership and communication skills.

* Identify the agricultural career you are most interested in and build a course of study to better qualify you for a profession.

HIGHLIGHTS

* As the only community college agriculture program in the Sacramento region, the CRC General Agriculture program provides an excellent opportunity for individuals who wish to pursue a career in agriculture and receive a General Agriculture Associate of Science degree.

* The faculty in this program works closely with the five California agricultural degree offering universities to provide a quality program for students interested in agriculture business, management and economics.

* The Sacramento region is fortunate to have some of the best high school agriculture programs in California. The faculty in the CRC Ag program works closely with these feeder schools to articulate coursework and facilitate the successful transition of agriculture students from high school to the university.

* Internships in agriculture are available for students interested in work experience opportunities.

NOTE TO TRANSFER STUDENTS: If you are interested in transferring to a four-year college or university to pursue a bachelor’s degree in this major, it is critical that you meet with a CRC counselor to select and plan the courses for your major. Schools vary widely in terms of the required preparation. The courses that CRC requires for an Associate’s degree in this major may be different from the requirements needed for the Bachelor’s degree.

Welding Units: 4

Total Units: 33

This major requires that you complete all courses in the required program plus one area of concentration.

The General Agriculture Associate in Science (A.S.) degree may be obtained by completion of the required program, plus general education requirements, plus sufficient electives to meet a 60-unit total. See CRC graduation requirements.

Student Learning Outcomes

Upon completion of this program, the student will be able to:

- PSLO 1: Demonstrate knowledge and hands-on experience in the basic concepts of all aspects of agriculture.
- PSLO 2: Demonstrate the ability to logically breakdown aspects of a project/problem and be able to resolve an issue in the agriculture industry.
- PSLO 3: Demonstrate independent & group learning expressing effective communication skills, both orally & written.
- PSLO 4: Participate in leadership opportunities to develop life-long learning traits.

Career Information

Management; Supervision; Finance; Insurance; Government; Marketing; Distribution; International Trade; Sales and Service; Nursery Management and Operations; Park Maintenance; Landscape Design, Teaching, Communication; Contracting & Maintenance; Fertilizer & Insecticide Application; Research; Retail/Wholesale; Estimator; Consultant; Government Agency employee; Welding Technician; Inspection; Welding Engineering; Sculpting; Home/Handicraft & Hobby; Construction; Trucking & Automotive. Some positions, however, require a four-year degree for which CRC’s program is a good base for transfer.

A.S. in Welding Technology

The Welding Program at Cosumnes River College specializes in welding training to meet current needs for the Welding Industry. In addition to learning technical welding skills of Shielded Metal Arc, Gas Metal Arc, Gas Tungsten Arc and Flux Core Arc Welding processes, students will be introduced to safety standards, common metal working machinery and welding practices common with the welding industry.

Catalog Date: June 1, 2020

The Welding Technology Associate in Science (A.S.) degree may be obtained by completion of the required program, plus general education requirements, plus sufficient electives to meet a 60-unit total. See CRC graduation requirements.

Student Learning Outcomes

Upon completion of this program, the student will be able to:

- Demonstrate welding skills to meet or exceed Industry Standards. PSLO #1
- Understand and implement Welding Procedures and Welding Specifications to meet or exceed the Welding Code Standards. PSLO #2
- Understand and implement Cal-OSHA and FED-OSHA Safety Regulations and Procedures that pertain to the Welding Industry. PSLO #3
- Apply academic skills in reading, mathematics, chemistry, physics, business, communication, engineering design and concepts to welding fabrication. PSLO #4
- Demonstrate work attributes that contribute to personal success and contribute to the goals of the company or organization for which one is employed. PSLO #5

Certificates of Achievement

Welding Code Certificate

The Welding Code Certificate specializes in the American Welding Society Structural Steel Welding Code (D1.1) and Seismic Welding Code (D1.8). Students have the option to select one of the three courses; Flux Core Arc Welding, Shielded Metal Arc Welding and Pipe Welding procedures as a focus course to prepare to take the Certified Welding Inspector (CWI) exam at an AWS testing site. Students may take all of the focus courses to assist with preparing for the CWI exam, but only one of the optional courses is needed to earn the certificate.

**Catalog Date:** June 1, 2020

Student Learning Outcomes

Upon completion of this program, the student will be able to:

- PSLO 1: Demonstrate welding skills sufficient to meet industry standards.
- PSLO 2: Identify and recall American Welding Society Structural Steel regulations pertaining to construction and or fabrication of weldments.

Career Information

Job advancement in the welding industry as a welder, quality control inspector or welding supervisor. Certified Welding Inspector Certified Welding Supervisor Certified Welding Educator

Welding Fabricator Certificate

The Welding Fabricator Certificate specializes in up to date welding code and safety regulations, modern power sources and techniques, fabrication procedures with the Gas Metal Arc Welding Process and the Gas Tungsten Arc Welding Process. Students will have the opportunity to meet or exceed industry standards in-order to become employed in the welding industry.

Student Learning Outcomes

Upon completion of this program, the student will be able to:

- PSLO #1: Fabrication and Certification: Use proper hand, measuring and layout tools to fabricate welding projects or certification coupons.
- Be able to properly and accurate measure a welding bead with a fillet weld gage.
- Be able to properly measure the height of a welding bead with a "V Wac" gage or "Bridge Cam" gage.
- PSLO #2: Professionalism: Demonstrate work attributes that contribute to personal success and contribute to the goals of the company or organization for which one is employed.
- Be able to be a team player who shows up to work on time.

Career Information

Job advancement and or employment in the welding industry.
The CRC welding program is designed for students interested in seeking employment or advancing employment in welding fabrication and industrial repairs.

Current job statistics show a long-term and growing industry demand for skilled welders with very good pay for those with experience in Gas Metal Arc Welding, Shielded Metal Arc Welding and Flux Core Arc Welding talents.

Welding encompasses study in Electrical, Metallurgy, Chemistry, Physics, Design, and Mechanical Engineering.

This welding certificate can be used in conjunction with other technology areas such as:
* Automotive Mechanics Technology
* Building Inspection Technology
* Construction Management Technology

Highlights include:
* Classes for beginning and advanced welders
* Welder Operator Qualification Records
* Hands-on experience and opportunities for participation in student projects

**Catalog Date:** June 1, 2020

This is an introductory course that covers the safety procedures of operating an electric arc welding machine, oxygen-acetylene cutting torch, oxygen-propane cutting and heating torch, plasma arc cutting, flux core arc welding, gas metal arc welding and the gas tungsten arc welding process. The course also includes the scientific theory of welding and cutting, modern power sources, welding symbols, proper joint design, the proper welding procedures and techniques for all types of welding and cutting processes.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO 1: Demonstrate welding skills sufficient to meet industry standards.
- The student will perform basic fillet weld beads in the flat position with the GMAW, GTAW, SMAW and the FCAW process.
- SLO 2: Apply integrated knowledge with incremental skill improvement resulting in functional application of welding techniques.
- The student will demonstrate an understanding of basic welding skills by being able to identify and explain the technical differences of the SMAW, GMAW, GTAW and the FCAW processes.
- The student will demonstrate the ability to use a welding machine's owner's manual as a reference guide to produce a sound weld bead.
- SLO 3: Use proper hand, measuring and layout tools to fabricate welding projects.
- Demonstrate proper use of hand and power tools by changing out high pressure welding cylinders, setting up and shutting down an oxygen fuel outfit and performing a safety inspection of the equipment.
- Demonstrate proper use of a tape measure, carpenter square and soap stone to layout and cut material with various shop tools to specific dimensions to complete the welding assignments.
- SLO 4: Demonstrate knowledge of Cal OSHA regulations pertaining to the welding industry.
- Demonstrate how to safely operate high-pressure gas cylinders and regulators for welding and cutting operations per manufacturer's recommendations.
- Demonstrate how to safely adjust, ignite and shut down a cutting torch or welding torch to manufacturer's recommended procedures.
- Demonstrate how to safely prepare and handle oxygen and acetylene cylinders, regulators, cutting and welding attachments for transportation and long term storage conditions.

WELD 110 Advanced Shielded Metal Arc Welding

<table>

</tbody>
</table>
The WELD 110 advanced welding course specializes in vertical up and overhead welding procedures with the shielded metal arc welding (SMAW) process. Students will be introduced to current welding code regulations for structural steel, bridge and seismic applications with the SMAW process. Students will learn welding parameters, distortion, pre-heat and post-heat procedures, acceptable code procedures and practices. Laboratory assignments will prepare students to be successful in the WELD 151 Industry Training course.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO 1: Demonstrate welding skills that meet industry certified welder standards.
- perform the proper welding procedures and techniques with the Shielded Metal Arc Welding (SMAW) and the Flux Core Arc Welding (FCAW) process.
- produce code-quality welds with the SMAW or FCAW process.
- demonstrate the ability to manipulate the welding arc of the SMAW or FCAW process to significantly reduce, if not eliminate undercut, porosity, slag inclusion, and inconsistent weld bead profile.
- explain the technical function of shielding gas for the SMAW process.
- identify, analyze and manipulate welding parameters to produce an AWS D1.1 acceptable weld bead with the SMAW and FCAW process.
- SLO 2: Apply integrated knowledge with incremental skill improvement resulting in functional application of welding techniques.
- explain the technical function of shielding gas for the FCAW process.
- identify the technical differences of the electrode alloy content and flux elements of the SMAW and FCAW processes.
- explain the theoretical and set-up procedures for a constant voltage and a constant current power supplies.
- read and understand any manufacturer's operating manual as a resource guide to safely operate any given welding machine.
- reference welding manufacturer's websites to research welding electrode consumable data required to complete a welding procedure specification document.
- demonstrate standard certification procedures by using a welding procedure specification document to attain certification.
- SLO 3: Use proper hand, measuring and layout tools to fabricate welding projects.
- demonstrate how to correctly inspect welds for accuracy, weld profile characteristics and identify any rejectable weld discontinuities.
- SLO 4: Demonstrate knowledge of Cal OSHA regulations that pertain to the welding industry.
- demonstrate the safe operating procedures for an oxygen acetylene cutting torch, plasma cutting torch, hydraulic shearing and punching tool and a mechanical metal cutting shear.
- demonstrate effective safety inspections of tools, equipment and personal protective equipment.
- SLO 5: Demonstrate work attributes that contribute to personal success and contribute to the goals of the company or organization for which one is employed.
- effectively communicate with other welders, production or schedule supervisors, welding inspectors and safety personnel to effectively and efficiently perform code quality welding.

WELD 111 Basic Pipe Welding Procedures

- Units: 4
- Hours: 54 hours LEC; 54 hours LAB
- Prerequisite: WELD 100 or 160 with a grade of "C" or better; The student needs safety training on gas cutting equipment and electric arc welding machinery to be eligible for the WELD 111 course.
- Catalog Date: June 1, 2020

Basic Pipe Welding Procedures covers personal safety, hand and power tool safety, machinery safety and operational procedures for preparing metal for welding. The student will be introduced to the proper procedures of beveling pipe with a cutting torch and grinder, welding in the 5G and 6G positions with the SMAW, FCAW, GMAW or the GTAW process. The course will also include Metallurgy, Materials, Fabrication, Welding Codes, Industry Standards, Welding Procedures and Welding Inspection procedures. Laboratory assignments will allow students to focus on pipe to pipe fit-up and welding bead quality to meet or exceed industry standards.

Student Learning Outcomes
Upon completion of this course, the student will be able to:

- SLO #1: Demonstrate welding skills sufficient to meet industry standards (Program Learning Outcome #1).
- The student must be able to perform a surface weld on 8" pipe with E6010 electrode.
- The student must be able to perform a surface weld on 8" pipe with E7018 electrode.
- SLO #2: Develop safe work habits and skills with welding tools and machinery for a safe welding procedures and practices for a long term career in the welding industry (Program Learning Outcome #3).
- The student must be able to properly setup and shut down an oxygen acetylene cutting torch apparatus safely.
- The student must be able to safely shear metal with various hydraulic and power actuated shears.
- SLO #3: Utilize proper hand, measuring and layout tools to fabricate welding projects (Program Learning Outcome #4).
- The student must be able to measure a pipe bevel angle with a protractor.
- The student must be able to measure a weld bead height with a "V wac" gauge within a 1/32" tolerance.

WELD 113 Basic Flux Core Welding Procedures

Units: 4
Hours: 54 hours LEC; 54 hours LAB
Prerequisite: WELD 100 or 160 with a grade of "C" or better
Catalog Date: June 1, 2020

The flux core arc welding process course provides training to develop semi-automatic welding skills on carbon steel plate to structural welding code standards. Topics include safety training, welding inspection and testing procedures with various size diameter flux cored electrodes, with and without external shielding gas, in all positions on fillet and groove welds. The laboratory assignments will prepare the student for the WELD 151 Industrial Training course.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO 1: Demonstrate welding skills that meet industry standards.
- Perform the proper welding procedures and techniques with the Flux Core Arc Welding (FCAW) process.
- Produce code-quality welds with the FCAW process.
- Demonstrate the ability to manipulate the welding arc of the FCAW process to significantly reduce, if not eliminate undercut, porosity, slag inclusion, and inconsistent weld bead profile.
- Identify, analyze and manipulate welding parameters to produce an AWS D1.1 acceptable weld bead with the FCAW process.
- SLO 2: Use proper hand, measuring and layout tools to fabricate welding projects.
- Demonstrate how to correctly inspect welds for accuracy, weld profile characteristics and identify any rejectable weld discontinuities.
- SLO 3: Apply integrated knowledge with incremental skill improvement resulting in functional application of welding techniques.
- Explain the technical function of shielding gas for the FCAW process.
- Identify the technical differences of the electrode alloy content and flux elements of the FCAW processes.
- Explain the theoretical and set-up procedures for a constant voltage and a constant current power supplies.
- Read and understand any manufacturer’s operating manual as a resource guide to safely operate any given welding machine.
- Reference welding manufacturer’s websites to research welding electrode consumable data required to complete a welding procedure specification document.

WELD 125 Introduction to the Gas Metal Arc Welding Process
The Gas Metal Arc Welding (GMAW) course is an introductory welding course designed for the career or non-career welding student who requires the proper safety training and welding procedures to perform the GMAW process to meet industry safety and welding standards.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO 1: Demonstrate welding skills sufficient to meet industry standards. (PSLO #1)
- Perform a 2F welding coupon with the GMAW process safely on plate
- Perform a 3F Down welding coupon with the GMAW process safely on plate
- SLO 2: Utilize proper hand, measuring and layout tools to fabricate welding projects. (PSLO #3)
- Measure a fillet weld properly.
- Measure the bead height on a groove weld properly.

WELD 126 Gas Metal Arc Welding of Plate & Pipe

Units: 3
Hours: 36 hours LEC; 54 hours LAB
Prerequisite: None.
Catalog Date: June 1, 2020

Gas Metal Arc Welding process of Plate and Pipe focuses on safety, hand and power tools, machinery, welding parameters, welding code and power supplies. The laboratory assignments will allow students to focus on proper preparation methods and welding techniques to perform correct pipe to pipe connections to meet or exceed industry standards.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO 1: Demonstrate welding skills sufficient to meet industry standards. (PSLO #1)
- Perform a 2F welding coupon with the GMAW process on plate
- Perform a 3F welding coupon with the GMAW process on plate
- SLO 2: Utilize proper hand, measuring and layout tools to fabricate welding projects. (PSLO #3)
- Measure a fillet weld properly.
- Measure the bead height on a groove weld properly.

WELD 127 Gas Metal Arc Welding Process of Sheet Metal

Units: 3
Hours: 36 hours LEC; 54 hours LAB
Prerequisite: None.
Catalog Date: June 1, 2020

Gas Metal Arc Welding Process of Sheet Metal is a welding course that specializes in the safety, shop hand and power tools, machinery, power supplies, welding codes and welding techniques of the Gas Metal Arc Welding process. Laboratory assignments will be completed on medium carbon steel, aluminum alloy or stainless steel sheet-metal to meet industry standards. AWS, ASME and API Qualifications may be issued by the employer, not the college welding program.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO #1: Demonstrate welding skills sufficient to meet industry standards. (PSLO #1)
- Perform a 2F welding coupon with the GMAW process.
- Perform a 3F Up welding coupon with the GMAW process.
- SLO #2: Apply integrated knowledge with incremental skill improvement resulting in functional application of welding techniques. (PSLO #2)
- Perform a fillet weld in the horizontal position and use those learned skills to perform a 3F Up, 3F Down or 4F weld.
- SLO #3: Use proper hand, measuring and layout tools to fabricate welding projects. (PSLO #3)
- Measure a fillet weld properly.
- Measure the bead height on a groove weld properly.
- Develop safe work habits and skills with welding tools and machinery for a safe long term career in the welding industry.

WELD 128 Gas Tungsten Arc Welding of Aluminum Alloys

Units: 3
Hours: 36 hours LEC; 54 hours LAB
Prerequisite: WELD 100 or 160 with a grade of “C” or better
Catalog Date: June 1, 2020

Gas Tungsten Arc Welding of Aluminum Alloy focuses on welding safety, shop tools and machinery, welding codes, welding inspection, power supplies, welding technique and welding parameters. Laboratory assignments will be completed with the Gas Tungsten Arc Welding process with modern inverter power supplies on Aluminum Alloy material to prepare students for employment in the welding industry. AWS, ASME and API Qualifications may be issued by the employer, not the college welding program.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO #1: Demonstrate welding skills sufficient to meet industry standards. (PSLO #1)
- Perform a 2F welding coupon with the GTAW process.
- Perform a 1G welding coupon with the GTAW process.
- SLO #2 Interpret safety codes and regulations that pertain to the welding industry. (PSLO #3)
- Have a basic understanding of OSHA safety regulations with high pressure cylinders.
- Have a basic understanding of personal protective equipment for welding operators.
- SLO #3: Use proper hand, measuring and layout tools to fabricate welding projects or certification coupons. (PSLO #4)
- Accurately use a tape measure to layout metal for student projects.
- Accurately measure a fillet weld.

WELD 129 Gas Tungsten Arc Welding of Stainless Steel

Units: 3
Hours: 36 hours LEC; 54 hours LAB
Prerequisite: WELD 100 or 160 with a grade of “C” or better
Catalog Date: June 1, 2020

Gas Tungsten Arc Welding of stainless steel focuses on welding safety, shop tools and machinery, welding codes, welding inspection, power supplies, welding technique and welding parameters. Laboratory assignments will be completed with the Gas Tungsten Arc Welding process with modern inverter power supplies on stainless steel material. AWS, ASME and API Qualifications may be issued by the employer, not the college welding program.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO #1: Demonstrate welding skills sufficient to meet industry standards. (PSLO #1, Welding Skills)
WELD 145 Basic Welding Shop Fabrication Skills

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO 1: Apply integrated knowledge with incremental skill improvement resulting in functional application of welding techniques.
- Demonstrate the ability to design a project with a pencil and paper
- Demonstrate the ability to design a project with a computer assisted drawing program.
- SLO 2: Use proper hand, measuring and layout tools to fabricate welding projects.
- The student shall be able to measure metal with a standard or metric tape measure.
- The student shall be able to properly use hand tools like a hacksaw, drill and grinder to perform fabrication projects.

WELD 151 Welding Industry Training

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO 1: Demonstrate welding skills sufficient to meet industry welding standards.
- Produce code quality welds with the Gas Metal Arc Welding Process (GMAW), Gas Tungsten Arc Welding Process (GTAW), Shielded Metal Arc Welding Process (SMAW) and or the Flux Core Arc Welding process (FCAW).
Identify, analyze and correct welding parameters to produce a suitable weld bead with the GMAW, GTAW, SMAW and or the FCAW process.

Apply and manipulate the welding arc of the GMAW, GTAW, SMAW and or the FCAW process to significantly reduce undercut, porosity, cold lap and other common welding defects.

SLO 2: Identify and apply proper hand, measuring and layout tools to fabricate welding projects.

Inspect welds for accurate weld size, acceptable weld profile and identify any weld discontinuities to the latest welding code common to the welding industry.

SLO 3: Identify and recall American Welding Society Structural Steel regulations pertaining to construction, manufacturing or fabrication.

Interpret safety rules and regulations and demonstrate safe welding and cutting procedures.

SLO 4: Apply work attributes that contribute to personal success and contribute to the goals of the company or organization for which one is employed.

Communicate effectively with other welders, production or schedule supervisors, welding inspectors and safety personnel to effectively and efficiently perform code quality welding.

WELD 160 Welding Technology for the Automotive Industry

Units: 1.5
Hours: 18 hours LEC; 27 hours LAB
Prerequisite: None.
Catalog Date: June 1, 2020

This is an introductory level course that addresses safety and the proper procedures pertaining to the following equipment: Oxygen Acetylene and Oxygen Propane Cutting and Heating equipment, Electric Arc Welding, Plasma Arc Cutting equipment, Gas Metal Arc Welding equipment and Gas Tungsten Arc Welding equipment. The course focuses on welding technology for the purpose of modification and/or repair of automotive related components.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO 1: Demonstrate the welding skills sufficient to meet industry standards.
- Demonstrate the basic knowledge and elementary skills of oxygen acetylene cutting, plasma arc cutting, shielded metal arc welding, gas metal arc welding, gas tungsten arc welding on Aluminum alloys.
- SLO 2: Apply integrated knowledge with incremental skill improvement resulting in functional application of welding techniques.
- Explain the technical differences of the welding and cutting processes such as the GMAW, GTAW, OFC and PAC processes.
- Identify and adjust the welding parameters for a gas metal arc welding machine and a shielded metal arc welding machine to the correct amperage, voltage, wire feed speed, shielding gas flow rate to weld the correct weld bead.
- SLO 3: Use proper hand, measuring and layout tools to fabricate welding projects.
- Develop a basic hand and eye coordination skills with basic welding tools and metalworking equipment.
- SLO 4: Demonstrate knowledge of Cal OSHA regulations pertaining to the welding industry.
- Inspect, set up, change out cylinders and regulators, safely operate, and disassemble an Oxygen-Acetylene Welding and Cutting outfit.
- Safely operate an Oxygen-Acetylene Cutting Torch to severe carbon steel plate and severe aluminum alloy with a plasma cutting machine.
- SLO 5: Demonstrate work attributes that contribute to personal success and contribute to the goals of the company or organization for which one is employed.

WELD 294 Topics in Welding
WELD 294 is a course developed in cooperation with the industry to meet specialized training needs of the Sacramento area or specifically high demand welding processes for the welding industry.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO 1: Demonstrate welding skills sufficient to meet industry certified welder standards.
- Apply integrated knowledge with incremental skill improvement resulting in functional application of welding techniques.
- SLO 3: Use proper hand, measuring and layout tools to fabricate welding projects.
- Demonstrate knowledge of Cal OSHA and Fed OSHA regulations pertaining to the welding industry.
- Demonstrate new advancements in power supplies and welding skills sufficient to meet industry standards.
- SLO 4: Demonstrate knowledge of Cal OSHA regulations pertaining to the welding industry.

WELD 295 Independent Studies in Welding

An independent studies project involves an individual student or small group of students in study, research, or activities beyond the scope of regularly offered courses. See the current catalog section of "Special Studies" for full details of Independent Studies.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO #1: Actively engage in intellectual inquiry beyond that required in order to pass a course of study (College Wide Learning Outcome – Area 4).
- Discuss and outline a proposal of study (that can be accomplished within one semester term) with a supervising instructor qualified within the discipline.
- Design an independent study (to be completed individually or by collaboration of a small group) to foster special knowledge, skills, and experience that are not available in any one regularly scheduled course.
- Use information resources to gather discipline-specific information.
- SLO #2: Utilize modes of analysis and critical thinking to apply theoretical perspectives and/or concepts in the major discipline of study to significant problems and/or educational activities (College Wide Learning Outcome – Area 3).
- Analyze and apply the knowledge, skills and experience that are involved in the independent study to theoretical perspectives and/or concepts in the major discipline of study.
- Explain the importance of the major discipline of study in the broader picture of society.
- SLO #3: Communicate a complex understanding of content matter of the major discipline of study (College Wide Outcome – Area 3).
- Demonstrate competence in the skills essential to mastery of the major discipline of study that are necessary to accomplish the independent study.
- SLO #4: Identify personal goals and pursue these goals effectively (College Wide Outcome – Area 4).
- Utilize skills from the "academic tool kit" including time management, study skills, etc., to accomplish the independent study within one semester term.

WELD 298 Work Experience in Welding
This course provides students with opportunities to develop marketable skills in preparation for employment in their major field of study or advancement within their career. It is designed for students interested in work experience and/or internships in associate degree level or certificate occupational programs. Course content includes understanding the application of education to the workforce; completion of required forms which document the student's progress and hours spent at the work site; and developing workplace skills and competencies. Appropriate level learning objectives are established by the student and the employer. During the semester, the student is required to participate in a weekly orientation and 75 hours of related paid work experience, or 60 hours of unpaid work experience for one unit. An additional 75 or 60 hours of related work experience is required for each additional unit. Work Experience may be taken for a total of 16 units when there are new or expanded learning objectives. Only one Work Experience course may be taken per semester.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- **DEMONSTRATE AN UNDERSTANDING AND APPLICATION OF PROFESSIONAL WORKPLACE BEHAVIOR IN A FIELD OF STUDY RELATED ONE'S CAREER (SLO 1)**
  - Understand the effects time, stress, and organizational management have on performance.
  - Demonstrate an understanding of consistently practicing ethics and confidentiality in a workplace.
  - Examine the career/life planning process and relate its relevancy to the student.
  - Demonstrate an understanding of basic communication tools and their appropriate use.
  - Demonstrate an understanding of workplace etiquette.
- **DESCRIBE THE CAREER/LIFE PLANNING PROCESS AND RELATE ITS RELEVANCY TO ONE'S CAREER (SLO 2)**
  - Link personal goals to long term achievement.
  - Display an understanding of creating a professional first impression.
  - Understand how networking is a powerful job search tool.
  - Understand necessary elements of a résumé.
  - Understand the importance of interview preparation.
  - Identify how continual learning increases career success.
- **DEMONSTRATE APPLICATION OF INDUSTRY KNOWLEDGE AND THEORETICAL CONCEPTS AS WRITTEN IN LEARNING OBJECTIVES IN PARTNERSHIP WITH THE EMPLOYER WORK SITE SUPERVISOR (SLO 3)**
Vietnamese | Cosumnes River College

CRC offers the basic grammar and conversation courses in Vietnamese. Students will be able to understand the spoken language, to speak with reasonable fluency, and to write at their speaking level.

Associate Degrees for Transfer

A.A.-T. in Theatre Arts

The Cosumnes River Theatre Department Associate of Arts Degree for Transfer Program is designed to facilitate successful transfer to baccalaureate theatre or drama degree programs. This degree provides students with the lower division breadth and depth of the field of theatre arts. Additionally, this degree exposes students to the core principles and practices in the field. Students will learn: the basics of acting, the basics of theatre technology and production, and where theatre fits in to both the historical and modern world of entertainment.

Catalog Date: June 1, 2020

If students utilized three units of Rehearsal and Performance courses in the core of the degree they may use three units of Technical Production courses here. If they used Technical Production courses in the core they may use three units of Rehearsal and Performance courses here.

The Associate in Arts in Theatre Arts for Transfer (AA-T) degree may be obtained by completion of 60 transferable, semester units with a minimum 2.0 GPA, including (a) the major or area of emphasis described in the Required Program, and (b) either the Intersegmental General Education Transfer Curriculum (IGETC) or the California State University General Education-Breadth Requirements.

Student Learning Outcomes
Upon completion of this program, the student will be able to:

- Critique and evaluate the role of the theatre arts and its relationship to other parts of society.
- Evaluate the historical, artistic, social, and philosophical environments in which theatre exists.
- Analyze and critique dramatic literature and performance.
- Formulate alternative solutions to theatrical production situations.
- Employ audition and performance skills in community, educational, and/or professional theatres.
- Develop skills to work as a theatre technician in community, educational, and/or professional theatres.
- Demonstrate the ability to work effectively as an ensemble member of a theatre company.
- Demonstrate skills that will allow the student to thrive in a baccalaureate level theatre program.

Career Information
People with advanced degrees in Theatre have a broad range of employment opportunities including, but not limited to, acting, design/technology for the theatre, publicity and public relations, teaching, theatre technician, stage management, and Box Office management. Some of these careers may need additional degrees beyond the Associates level. NOTE TO TRANSFER STUDENTS: The Associate Degree for Transfer program is designed for students who plan to transfer to a campus of the California State University (CSU). Other than the required core, the courses you choose to complete this degree will depend to some extent on the selected CSU for transfer. In addition, some CSU-GE Breadth or IGETC requirements can also be completed using courses required for this associate degree for transfer major (known as "double-counting"). Meeting with a counselor to determine the most appropriate course choices will facilitate efficient completion of your transfer requirements. For students wishing to transfer to other universities (UC System, private, or out-of-state), the Associate Degree for Transfer may not provide adequate preparation for upper-division transfer admissions; it is critical that you meet with a CRC counselor to select and plan the courses for the major, as programs vary widely in terms of the required preparation.

Associate Degrees
A.A. in Theatre Arts
The two-year degree in Theatre Arts is a comprehensive program in theater that combines a critical study of theatre with experiential practice in one or more of its component parts. Students explore the various areas of theater to build a foundation for future creative work. The theatre arts degree will provide training in theatre arts production for students who intend to pursue study beyond the AA degree, who are preparing for careers in teaching or in the professional theatre. The basic program also provides an opportunity for specialization in Performance or Design/Technology. A Certificate of Achievement in Theatre for Young Audiences is also available for students whose interest is in doing theatre with or for children.

Highlights include:
* Distinguished faculty with nationally renowned professional experience in directing and design, as well as considerable teaching experience on both the graduate and undergraduate levels.
* A Visual and Performing Arts Complex, which includes a 320-seat proscenium theatre, a 100-seat Black Box theatre, and an outdoor stage.
* Opportunity for advanced students to gain access to the finest four-year college and university theatre programs as well as internships in major regional theatres throughout the country.
* Partnerships with local professional theatre companies for internships.

This degree is designed to provide hands-on experience in the production of plays as well as prepare students for transfer to four-year institutions, and for a baccalaureate major in Theatre or related majors.

Note to Transfer Students:
If you are interested in transferring to a four-year college or university to pursue a bachelor's degree in this major, it is critical that you meet with a CRC counselor to select and plan the courses for your major. Schools vary widely in terms of the required preparation. The courses that CRC requires for an Associate's degree in this major may be different from the requirements needed for the Bachelor's degree.

The Theatre Arts Associate in Arts (A.A.) degree may be obtained by completion of 60 transferable, semester units, including (a) the major or area of emphasis described in the Required Program; and (b) one of the following: the CRC General Education, the Intersegmental General Education Transfer Curriculum (IGETC), or the California State University General Education-Breadth Requirements.

Student Learning Outcomes

Upon completion of this program, the student will be able to:

- Critique and evaluate the role of the theatre arts and its relationship to other parts of society.
- Evaluate the historical, artistic, social, and philosophical environments in which theatre exists.
- Analyze and critique dramatic literature and performance.
- Develop both a conceptual understanding and a practical application of skills related to the theatre discipline in performance, technical theatre, theatre production and performance studies.
- Synthesize the roles and responsibilities of working as a member of an ensemble and production team and perform dependably, competently, collaboratively and resourcefully as part of the ensemble and production team.
- Apply the necessary skills for entry-level work in educational, community and professional theatrical endeavors and for entry into undergraduate bachelorette study in theatre arts.

Career Information

Theater arts majors will develop attributes that are highly valued by employers. These include: interpersonal soft skills, critical thinking, research, analysis, oral/written communication, presentation, and problem solving skills. The A.A. degree helps prepare students for many career opportunities. Program career opportunities include jobs with theater production and performing arts organizations as well as many related industries such as advertising, television, film, recreation, and academia. Potential Job Titles: Costume Designer, Drama Therapist, Casting Director, Set Designer, Stage Manager, Talent Manager, Playwright, Teacher Stage Actor, Director, Literary Manager, Arts Manager, Box office manager, Producer, Arts advocate, Lobbyist, Giving and Fundraising Specialist, Lighting Designer, Sound Designer, Designer, Lighting Engineer, Dramaturge, Shop Supervisor, Wardrobe Crew, Dresser, Booking Agent, Public Relations Specialist, Special Effects Technician, Theater Critic, Voice acting, Announcer, Event Planner, Arts Administrator, PR and Advertising Specialist. Additionally, many employers in other disciplines actively recruit theatre majors. Students may find employment in government agencies, nonprofits, educational institutions, and businesses depending on their skills and experience. Internships or relevant part-time jobs may be a prerequisite to finding employment. This list does not reflect all potential places of employment or kinds of jobs for theater arts majors. Some career choices may require courses beyond the Associate Degree.

Certificate of Achievement

Theatre for Young Audiences Certificate

The Certificate in Children's Theatre focuses on building skills in puppetry, storytelling, Story Dramatization, creative drama in the classroom and other skills pertaining to children's theatre. This certificate allows the student to further their education with transferable theatre classes.

This course will increase students' understanding, appreciation, and critical perceptions of theatre arts. Students will be introduced to the elements of the production process including play writing, acting, directing, design, and criticism. Students will also survey different periods, styles and genres of theatre through play reading, discussion, films and viewing and critiquing live theatre, including required attendance of theatre productions. Students will examine the relationship of theatre to various cultures throughout history, and the contributions of significant individual theatre artists. It is an audience-oriented, non-performance theatre arts course open to all students.

### Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO #1. Assess the historical, artistic, social, and philosophical in which theatre exists.
- Students will demonstrate the ability to critically evaluate analyze and interpret (including significant historical or contemporary analyses and interpretations) arts, ideas, skills (including language), and/or institutions.
- Analyze and evaluate the nature of theatre and its role in society.
- Critique and evaluate the role of the theatre arts and its relationship to other parts of society.
- Demonstrate an appreciation of artistic endeavors, cultural expressions, ideas and/or institutions through non-empirical, analytic, interpretive studies and critical thinking projects.
• Articulate the development of and relationships between different civilizations, cultural traditions, ideas and/or institutions through the application of non-empirical, analytical reasoning.

• SLO #2. As a theatre patron analyze and critique dramatic literature and performance.

• Critically analyze dramatic literature and performances.

• Identify and examine theatrical components in production.

• Demonstrate an appreciation of viewing theatre as an art form

• Execute analysis and interpretations of arts, ideas, skills (including language), and/or institutions, and will properly use the vocabulary appropriate to the field.

• Examine and evaluate the production needs of a play in order to propose, demonstrate, and articulate alternative solutions to theatrical production situations.

**Hours:** 54 hours LEC
**Prerequisites:** None.
**Advisory:** ENGWR 101, or placement through the assessment process.
**Transferable:** CSU; UC
**General Education:** AA/AS Area I; CSU Area C1; IGETC Area 3A
**C-ID:** C-ID THTR 113
**Catalog Date:** June 1, 2020

This course is a survey of the history of theatre from the Greeks through the 17th Century. The history and development of theatre and drama are studied in relationship to cultural, political and social conditions of the time. Plays are read for analysis of structure, plot, character and historical relevance. This course is recommended for students planning to major in Theatre, Humanities, English or Communication.

**Student Learning Outcomes**

Upon completion of this course, the student will be able to:

• SLO #1: Critique and evaluate the historical, artistic, social and philosophical environments in which theatre exists.

• Outline the historical development of theatre from the Greeks through the 17th century.

• Compile evidence illustrating how the relationship between the audience and theatre artist has changed over time.

• Analyze the role of the theatre arts and its relationship to other parts of society.

• SLO #2: As a theatre patron analyze and critique dramatic literature and performance

• Confirm the value and necessity of theatre arts in culture and society

• Assess the historical relevance, context and importance of different plays.

• Compare, contrast and analyze the world view presented by the playwrights in each play.

• Demonstrate critical thinking and communication skills such as listening, reasoning, analysis and criticism when reading or viewing plays.

**TA 303 History and Theory of the Theatre II**

**Units:** 3
**Hours:** 54 hours LEC
**Prerequisites:** None.
**Advisory:** ENGWR 101, or placement through the assessment process.
**Transferable:** CSU; UC
**General Education:** AA/AS Area I; CSU Area C1; IGETC Area 3A
**Catalog Date:** June 1, 2020

This course is a survey of the history of theater from the 17th Century through modern times. This history and development of theater and drama are studied in relationship to cultural, political and social conditions of the time. Plays are read or viewed for analysis of structure, plot, character and historical relevance. This course is recommended for students planning to major in Theater, Humanities, English, or Communication.
Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO #1: Critique and evaluate the historical, artistic, social and philosophical environments in which theatre exists.
- Outline the historical development of theatre from the 17th Century through modern times.
- Compile evidence illustrating how the relationship between the audience and theatre artist has changed over time.
- Analyze the role of the theatre arts and its relationship to other parts of society.
- SLO #2: As a theatre patron, analyze and critique dramatic literature and performance.
- Confirm the value and necessity of theatre arts in culture and society
- Assess the historical relevance, context and importance of different plays.
- Compare, contrast and analyze the world view presented by the playwrights in each play.
- Demonstrate critical thinking and communication skills such as listening, reasoning, analysis and criticism when reading or viewing plays.

TA 305 Script Analysis

Units: 3
Hours: 54 hours LEC
Prerequisite: None.
Transferable: CSU; UC
General Education: CSU Area C1; IGETC Area 3A
C-ID: C-ID THTR 114
Catalog Date: June 1, 2020

This course will explore an in-depth methodology of reading, analyzing, and understanding play scripts in a variety of genres and styles intended for live theatrical production. Students will investigate techniques used to determine the playwright's methods of creating the plot, themes, characters, and imagery within theatrical scripts and how theatre scripts are distinct from other forms of literature.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- P-SLO 2: Evaluate the historical, artistic, social, and philosophical environments in which theatre exists.
- Identify common patterns in the structures of theatrical scripts through different historical periods and artistic genres.
- Identify where historical, artistic, social, and philosophical elements alter the structures of theatrical scripts.
- P-SLO 3: As a theatre patron analyze and critique dramatic literature and performance.
- Formulate the skills and techniques to achieve a greater comprehension and satisfaction when reading a play
- Assemble both creative and analytical responses to a chosen play
- P-SLO 4: As a participant in theatre productions formulate alternative solutions to theatrical production situations.
- Identify production elements including character requirements, design requirements, and plot structures required and suggested by theatrical scripts.

TA 306 Diversity in American Drama (1960 to Present)

Units: 3
Hours: 54 hours LEC
Prerequisite: None.
Transferable: CSU; UC
General Education: AA/AS Area I; AA/AS Area VI; CSU Area C1; CSU Area D3; IGETC Area 3A; IGETC Area 4C
Catalog Date: June 1, 2020

This multicultural course surveys the theatrical expression of Native-American, African-American, Chicana/Chicano, and Asian-American theatre from 1960 to the present, including the social, political, cultural, and economic climate in which the theatre was created.
Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO 1: Critique and evaluate the role of the theatre arts and its relationship to other parts of society.
- Analyze stereotypes and racism as expressed in the theatre of Native-American, African-American, Chicana/Chicano, and Asian American and in society at large.
- Describe and evaluate the ramifications and contributions of the unique theatrical expression of America’s diverse populations.
- SLO 2: Evaluate the historical, artistic, social and philosophical environments in which theatre exists.
- Describe and analyze the major historical, cultural, political, and economic forces at work within Native-American, African-American, Chicana/Chicano, and Asian American groups and in society at large.
- Examine the stereotypes and racism as expressed in the theatre of diverse ethnic groups and society at large.
- SLO 3: As a theatre patron analyze and critique dramatic literature and performance
- Compare and contrast the ways that ritual, music, dance, and storytelling influence and shape the theatrical expression of diverse groups.
- Apply elements of critical theory to ethnically diverse plays to facilitate a broader understanding of the issues raised.

TA 340 Beginning Acting

Units: 3
Hours: 54 hours LEC
Prerequisite: None.
Transferable: CSU; UC
Catalog Date: June 1, 2020

This course introduces the student to the basic art and craft of acting. Basic exercises in voice and diction, movement, and character will be utilized.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO #1: Apply the creative process in acting.
  - Objective 1a: Demonstrate knowledge of basic terminology and process of the craft.
  - Objective 1b: Demonstrate the elementary participatory techniques used in the process of acting.
  - Objective 1c: Analyze by means of assigned structured improvisation, the elemental tools of the actors craft.
  - Objective 1d: Demonstrate an understanding of how to prepare and perform a scene.
- SLO #2: Analyze and critique dramatic literature and performance.
  - Objective 2a: Confirm the value and necessity of theatre arts in culture and society.
  - Objective 2b: Assess the historical relevance, context and importance of different plays to the actor.
  - Objective 2c: Demonstrate critical thinking and communication skills such as listening, reasoning, analysis and criticism when reading, discussing or viewing plays.

TA 344 Improvisation and Theatre Games

Units: 2
Hours: 36 hours LEC
Prerequisite: None.
Transferable: CSU
Catalog Date: June 1, 2020

This class will include theatre games and improvisational exercises designed to develop trust and cooperation, mental acuity, and physical and vocal range as an actor. Improvisation technique will be developed, providing a strong foundation for more advanced work in scripted and non-scripted performance and also in modern rehearsal technique that involves extensive use of improvisation. Students may be required to attend live theatrical performances.
Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO #1: Apply the creative process in acting.
- Objective 1a: Demonstrate knowledge of basic terminology and process of improvisation.
- Objective 1b: Demonstrate the elementary participatory techniques used in the process of improvisation.
- Objective 1c: Analyze by means of assigned structured improvisation, the elemental tools of the actor's craft.
- Objective 1d: Demonstrate an understanding of how to prepare and perform an improvised scene.
- SLO #2: Analyze and critique improvisation and performance.
- Objective 2a: Confirm the value and necessity of theatre arts in culture and society.
- Objective 2b: Assess the historical relevance, context and importance of different plays to the actor.
- Objective 2c: Demonstrate critical thinking and communication skills such as listening, reasoning, analysis and criticism when reading, discussing or viewing plays.

TA 350 Theory and Techniques of Acting I

| Units: | 3 |
| Hours: | 54 hours LEC |
| Prerequisite: | None. |
| Transferable: | CSU; UC |
| General Education: | AA/AS Area I; CSU Area C1 |
| C-ID: | C-ID THTR 151 |
| Catalog Date: | June 1, 2020 |

This course explores the theories and techniques used in the preparation of a role for the stage. American realistic scenes and monologues are staged and performed in the classroom. The emphasis will be placed on broadening the understanding of the acting process.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO #1: Apply the creative process in acting.
- Objective 1a: Demonstrate knowledge and application of basic theory and techniques of acting.
- Objective 1b: Describe the audition process and begin to build a repertoire of audition pieces.
- Objective 1c: Perform simple vocal warm-up technique and a methodology for good vocal production.
- Objective 1d: Demonstrate an understanding of how to prepare and perform scene and monologues.
- SLO #2: Analyze and critique dramatic literature and performance.
- Objective 2a: Confirm the value and necessity of theatre arts in culture and society.
- Objective 2b: Assess the historical relevance, context and importance of different plays to the actor.
- Objective 2c: Demonstrate critical thinking and communication skills such as listening, reasoning, analysis and criticism when reading, discussing or viewing scenes, monologues or plays.

TA 351 Theory and Techniques of Acting II

| Units: | 3 |
| Hours: | 54 hours LEC |
| Prerequisite: | TA 350 with a grade of "C" or better |
| Advisory: | ENGWR 300 |
| Transferable: | CSU; UC |
| C-ID: | C-ID THTR 152 |
| Catalog Date: | June 1, 2020 |
This course follows TA 350 and continues the exploration of the theories and techniques used in the preparation of a role for the stage. A variety of scenes and monologues are staged and performed in the classroom. An emphasis will be placed on deepening the understanding of the acting process. The student actor is encouraged to explore and expand the range and flexibility of their individual acting process. Student actors are required to participate in a student showcase performance at the end of each semester.

**Student Learning Outcomes**

Upon completion of this course, the student will be able to:

- SLO #1: Apply the creative process in acting.
  - Objective 1a: Demonstrate knowledge and application of broader and multiple theories and techniques of acting beyond basic theories and techniques.
  - Objective 1b: Perform advanced vocal warm-up technique and apply methodology for good vocal production.
  - Objective 1c: Perform advanced physical warm-up technique and apply methodology for good physical connectivity.
  - Objective 1d: Demonstrate an understanding of how to prepare and perform a variety of scenes and monologues at a more advanced level.
  - Objective 1e: Explore and expand the range and flexibility of personal acting process.
- SLO #2: Critique and evaluate the role of the theatre arts and its relationship to other parts of society.
  - Objective 2a: Confirm the value and necessity of theatre arts in culture and society.
  - Objective 2b: Assess the historical relevance, context and importance of different plays to the actor.
  - Objective 2c: Survey the major approaches to Western acting since the nineteenth century, their historical evolution, and their relationship to one another.
- SLO #3: Analyze and critique dramatic literature and performance.
  - Objective 3a: Demonstrate critical thinking and communication skills such as listening, reasoning, analysis and criticism when reading, discussing or viewing scenes, monologues or plays.
- SLO #4: Audition and perform in community, educational, and/or professional theatres.
  - Objective 4a: Participate in and refine the audition process.
  - Objective 4b: Further enhance the repertoire of audition pieces.

**TA 356 Acting for the Camera I**

- **Same As:** RTVF 378
- **Units:** 3
- **Hours:** 36 hours LEC; 54 hours LAB
- **Prerequisite:** RTVF 370 or TA 350 with a grade of "C" or better
- **Transferable:** CSU; UC
- **General Education:** CSU Area C1
- **Catalog Date:** June 1, 2020

This is an introductory course in the theory and techniques of acting for film and video, comparing the differences between stage acting and acting for the camera. Scenes and commercials are enacted and played back on videotape for class critiquing. Students experience single camera and multiple-camera studio production and performance techniques. This course is the same as RTVF 378, and only one may be taken for credit.

**Student Learning Outcomes**

Upon completion of this course, the student will be able to:

- write in clear, concise English (SLO-1).
- analyze, interpret, and exercise critical judgment in the evaluation of media productions (SLO-2).
- analyze a scene from an observer's point of view and identify strengths and weaknesses of that presentation from a fundamental technique viewpoint.
- formulate alternative solutions to theatrical production situations as an on-camera participant in theatre productions (SLO-3).
- demonstrate a firm foundation in the basic fundamentals of the craft of acting for the camera.
- investigate the technical and stylistic differences between stage acting and acting for the camera.
• demonstrate acting skills and talents in a video studio setting, and in a single camera out-of-order shoot.
• demonstrate understanding of performance technique using microphones.
• audition and/or perform in community, educational, or professional productions (SLO-4).
• demonstrate through projects that with the power of a communicator, comes moral and ethical responsibility (SLO-5).
• demonstrate a hands-on ability to perform the professional level critical thinking needed for successful teamwork in television, film or other media employment (SLO-6).
• demonstrate performance techniques for work in professional commercials, industrial films, theatrical films, cable and broadcast video.
• describe the steps involved in entering the business of acting for films and video.

TA 360 Styles of Acting

Units: 3
Hours: 54 hours LEC
Prerequisite: TA 350 with a grade of "C" or better
Transferable: CSU; UC
Catalog Date: June 1, 2020

Students will study and practice radically different styles of acting (historical, literary, fantastical) and characterizations; scene work is presented in a variety of historical periods (Greek, Commedia, Elizabethan, Molière, Restoration, Belle Epoque), as well as modern hyper-realistic theatrical forms such as the theatres of alienation and the absurd, and exemplary recent dramas by Tony Kushner, Margaret Edson, August Wilson and Doug Wright. The instructor may concentrate on selected periods. Students may wish to challenge the prerequisite on the basis of equivalent experience.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

• SLO #1: Apply the creative process in acting.
  • Objective 1a: Demonstrate knowledge and application of basic theory and techniques of acting in period pieces.
  • Objective 1b: Demonstrate an understanding of how to prepare and perform period scene and monologues.
• SLO #2: Analyze and critique dramatic literature and performance.
  • Objective 2a: Confirm the value and necessity of theatre arts in culture and society.
  • Objective 2b: Assess the historical relevance, context and importance of different styles to the actor playing period pieces.
  • Objective 2c: Demonstrate critical thinking and communication skills such as listening, reasoning, analysis and criticism when reading, discussing or viewing period scenes, monologues or plays.

TA 395 Playwriting

Units: 3
Hours: 54 hours LEC
Prerequisite: None.
Advisory: ENGWR 300, or placement through the assessment process.
Transferable: CSU
Catalog Date: June 1, 2020

This course includes the writing, reading, performance, critique and continuous revision of original work. Students will write continually throughout the semester, and their work will be read, performed, and discussed in class. Students will complete a full-length play by the end of the semester.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

• SLO 1: Critique and evaluate the role of the theatre arts and its relationship to other parts of society (P-SLO 1).
• Demonstrate an understanding of the theatrical techniques used in creating unique characterizations in plays.
TA 401 Children's Literature and Creative Drama

This course examines teaching strategies and techniques for introducing children to drama and theatre. This course will introduce the students to children's dramatic literature and creative drama in the classroom. Encouraging both teacher and student imagination and expression, the course helps future teachers, service providers and/or recreational leaders integrate drama into their programs and classrooms. Students will be introduced to a variety of genres and strategies for incorporating drama into their programs, including mime, dramatic play, improvisation, and dramatic literature. The course focuses on drama as an art form as well as a teaching tool.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO 1: Critique and evaluate the role of the theatre arts and its relationship to other parts of society.
- Objective 1a: Develop a comprehensive approach for the use of drama in education.
- Objective 1b: Develop simple drama activities and games for children.
- Objective 1c: Describe the basic skills used to teach narrative pantomime, story dramatization and improvisation to children.
- SLO 2: Evaluate the historical, artistic, social and philosophical environments in which theatre exists.
- Objective 2a: Plan drama lessons which integrate the exercises into the classroom curriculum.
- Objective 2b: Analyze and explore the nature of working in groups and setting classroom limits.
- SLO 3: As a theatre patron analyze and critique dramatic literature and performance.
- Objective 3a: While viewing performances, live or recorded, critique the social, emotional and developmental appropriateness of the theatrical experience for children.

TA 404 Techniques of Puppetry

This course explores puppetry as a dramatic medium. It covers the history and development of puppetry; puppet design and creation; puppet manipulation and improvisation; and puppet play production techniques and applications.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO #1: Apply the creative process in acting with puppets.
- Objective 1a: Demonstrate knowledge of basic terminology and process of puppetry.
- Objective 1b: Demonstrate the elementary voice and puppet movement techniques used in the process of puppetry.
- Objective 1c: Analyze by means of assigned structured improvisations and scenes, the elemental tools of the puppeteer.
- Objective 1d: Demonstrate an understanding of how to prepare and perform an puppetry scene.
Objective 1e: Create original material for puppetry using standard dramatic structure.

SLO #2: Analyze and critique puppetry and performance.

Objective 2a: Confirm the value and necessity of theatre arts in culture and society.

Objective 2b: Demonstrate critical thinking and communication skills such as listening, reasoning, analysis and criticism when reading, discussing or viewing puppet plays.

SLO #3: Work as a theatre technician in community, educational, and/or professional theatres.

Objective 3a: Construct puppets using basic craft skills (clay and foam modeling, casting, sewing, woodworking, painting)

Objective 3b: Plan and execute productions using constructed puppets.

TA 420 Stagecraft

Unit: 3
Hours: 36 hours LEC; 54 hours LAB
Prerequisite: None.
Transferable: CSU; UC
C-ID: C-ID THTR 171
Catalog Date: June 1, 2020

This course is an introduction to technical theatre and the creation of scenic elements. Includes basic concepts of design, painting techniques, set construction, set movement, prop construction, backstage organization, and career possibilities. Also included in this class is an introduction to theatrical construction and painting techniques; types of theatrical scenery and backstage organization. These topics are explored through a combination of lecture and practical experience gained by working on department productions.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO 1: As a participant in theatre productions formulate alternative solutions to theatrical production situations (P-SLO 4).
- Develop the cooperative and collaborative effort necessary in the technical production of plays.
- Develop proficiency in scenic production skills.
- Evaluate scenic tools, materials, and processes.
- Analyze scenic production problems; evaluate alternatives and recommend solutions.
- Analyze and apply information derived from scenic plans.
- SLO 2: Work as a theatre technician in community, educational, and/or professional theatres (P-SLO 6).
- Analyze effective crew methods and procedures.
- Develop the skills necessary to be an effective backstage crew member.

TA 422 Stage Lighting

Unit: 3
Hours: 36 hours LEC; 54 hours LAB
Prerequisite: None.
Transferable: CSU; UC
C-ID: C-ID THTR 173
Catalog Date: June 1, 2020

This course is an introduction to basic concepts of stage lighting, including planning, rigging and operations of lighting systems; optics, equipment, electricity, control and color; basic lighting design.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO 1: As a participant in theatre productions formulate alternative solutions to theatrical production situations. (P-SLO 4)
Demonstrate proficiency in selection, use, and application of lighting technology (instruments, dimmers, and control systems) stage lighting skills.

Evaluate the lighting requirements of a scene or play (through the script, setting, and director's concept) and develop an appropriate lighting design.

Formulate and execute a lighting plan which will provide the visibility as well as artistic needs of a production (color, angle, style, etc.).

SLO-2: Work as a theatre technician in community, educational, and/or professional theatres. (P-SLO 6)

Identify the different types and functions of lighting equipment and evaluate their appropriateness to provide different solutions to production needs.

Interpret and analyze a Light Plot to produce a full scale show.

Calculate the capacity of electrical wire gauge and safe current flow.

Recall and practice safety information concerning electrical hazards

**TA 424 Advanced Technical Theatre**

| Units: | 3 |
| Hours: | 36 hours LEC; 54 hours LAB |
| Prerequisites: | TA 420 and 422 with grades of "C" or better |
| Transferable: | CSU |
| Catalog Date: | June 1, 2020 |

This course will explore advanced technical theatre production techniques and design in the areas of scenery, props, lighting, sound, scenic painting, rigging or stage management, costumes through individual projects and participation in major productions.

**Student Learning Outcomes**

Upon completion of this course, the student will be able to:

- SLO-1: As a participant in theatre productions formulate alternative solutions to theatrical production situations. (P-SLO 4)
- demonstrate proficiency in problem solving solutions to production issues (scenic and or lighting).
- evaluate the scenic and or lighting requirements of a scene or play (through the script, setting, and director's concept) and develop an appropriate solution to the problem.
- formulate and execute a lighting plan which will provide the visibility as well as artistic needs of a production (color, angle, style, etc.) and/or the ability to create a construction plan to build a solution to a production problem that is both artistically viable as well as safe.
- SLO-2: Work as a theatre technician in community, educational, and/or professional theatres. (P-SLO 6)
- demonstrate leadership skills in functioning as a crew leader in the construction and/or implementation of stage lighting solutions.
- evaluate the requirements of a scene or play (through the script, setting, and director's concept) and develop an appropriate lighting design or scenic solution.
- lead work crews in the construction of basic scenic units and the hanging/focusing of standard theatrical lighting instruments

**TA 430 Costume Construction**

| Units: | 3 |
| Hours: | 36 hours LEC; 54 hours LAB |
| Prerequisites: | None. |
| Transferable: | CSU; UC |
| C-ID: | C-ID THTR 174 |
| Catalog Date: | June 1, 2020 |
Student Learning Outcomes

Upon completion of this course, the student will be able to:

- Role of Theatre: Critique and evaluate the role of the theatre arts and its relationship to other parts of society. (SLO 1, PSLO 1)
- Objective 1a: Explain the role of theatre and costuming in society at large.
- Objective 1b: Analyze the historical, artistic, and social environments of various periods and their resultant styles.
- Work as a theatre technician in community, educational, and/or professional theatres. (SLO 2, PSLO 2)
- Objective 2a: Demonstrate basic design skills and basic patterning, construction, and alteration techniques using various sewing machines and hand sewing tools.
- Objective 2b: Explain the composition, properties, and construction of fabric and demonstrate textile manipulation techniques.
- Objective 2c: Describe the role of the costume designer and the costume shop staff in a theatre production.
- Work effectively as an ensemble member of a theatre company. (SLO 3, PSLO 3)
- Objective 3a: Demonstrate basic costume construction, patterning, and alteration techniques using the common machine and hand tools of the craft.
- Problem Solving: As a participant in theatre productions formulate alternative solutions to theatrical production situations. (SLO 4, PSLO 4)
- Objective 4a: Organize an artistic and practical solution to the costume requirements of a dramatic work.
- Objective 4b: Evaluate the costumes in a live theatrical presentation.

TA 495 Independent Studies in Theatre Arts

Units: 1 - 3
Hours: 54 - 162 hours LAB
Prerequisite: None.
Transferable: CSU
Catalog Date: June 1, 2020

An independent studies project involves an individual student or small group of students in study, research, or activities beyond the scope of regularly offered courses. See the current catalog section of "Special Studies" for full details of Independent Studies.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- SLO #1: Actively engage in intellectual inquiry beyond that required in order to pass a course of study (College Wide Learning Outcome – Area 4).
- Discuss and outline a proposal of study (that can be accomplished within one semester term) with a supervising instructor qualified within the discipline.
- Design an independent study (to be completed individually or by collaboration of a small group) to foster special knowledge, skills, and experience that are not available in any one regularly scheduled course.
- Use information resources to gather discipline-specific information.
- SLO #2: Utilize modes of analysis and critical thinking to apply theoretical perspectives and/or concepts in the major discipline of study to significant problems and/or educational activities (College Wide Learning Outcome – Area 3).
- Analyze and apply the knowledge, skills and experience that are involved in the independent study to theoretical perspectives and/or concepts in the major discipline of study.
- Explain the importance of the major discipline of study in the broader picture of society.
- SLO #3: Communicate a complex understanding of content matter of the major discipline of study (College Wide Outcome – Area 3).
Demonstrate competence in the skills essential to mastery of the major discipline of study that are necessary to accomplish the independent study.

SLO #4: Identify personal goals and pursue these goals effectively (College Wide Outcome – Area 4).

Utilize skills from the “academic tool kit” including time management, study skills, etc., to accomplish the independent study within one semester term.

### TA 498 Work Experience in Theatre Arts

**Units:** 1 - 4  
**Hours:** 60 - 300 hours LAB  
**Prerequisite:** None.  
**Enrollment Limitation:** Students must be in a paid or unpaid internship, volunteer position or job related to career goals in Theatre Arts.  
**Transferable:** CSU  
**General Education:** AA/AS Area III(b)  
**Catalog Date:** June 1, 2020

This course provides students with opportunities to develop marketable skills in preparation for employment in their major field of study or advancement within their career. It is designed for students interested in work experience and/or internships in transfer level degree occupational programs. Course content includes understanding the application of education to the workforce; completion of required forms which document the student's progress and hours spent at the work site; and developing workplace skills and competencies. Appropriate level learning objectives are established by the student and the employer. During the semester, the student is required to participate in a weekly orientation and 75 hours of related paid work experience, or 60 hours of unpaid work experience for one unit. An additional 75 or 60 hours of related work experience is required for each additional unit. Work Experience may be taken for a total of 16 units when there are new or expanded learning objectives. Only one Work Experience course may be taken per semester.

### Student Learning Outcomes

Upon completion of this course, the student will be able to:

- **DEMONSTRATE AN UNDERSTANDING AND APPLICATION OF PROFESSIONAL WORKPLACE BEHAVIOR IN A FIELD OF STUDY RELATED TO ONE’S CAREER.** (SLO 1)
  - Understand the effects time, stress, and organizational management have on performance.
  - Demonstrate an understanding of consistently practicing ethics and confidentiality in a workplace.
  - Examine the career/life planning process and relate its relevancy to the student.
  - Demonstrate an understanding of basic communication tools and their appropriate use.
  - Demonstrate an understanding of workplace etiquette.

- **DESCRIBE THE CAREER/LIFE PLANNING PROCESS AND RELATE ITS RELEVANCY TO ONE’S CAREER.** (SLO 2)
  - Link personal goals to long term achievement.
  - Display an understanding of creating a professional first impression.
  - Understand how networking is a powerful job search tool.
  - Understand necessary elements of a résumé.
  - Understand the importance of interview preparation.
  - Identify how continual learning increases career success.

- **DEMONSTRATE APPLICATION OF INDUSTRY KNOWLEDGE AND THEORETICAL CONCEPTS AS WRITTEN IN LEARNING OBJECTIVES IN PARTNERSHIP WITH THE EMPLOYER WORK SITE SUPERVISOR.** (SLO 3)

### Theatre Arts Performance (TAP)

**TAP 300 Modern Rehearsal and Performance I**
This course is the first level of four courses which provide for a workshop training experience for students performing in their first role in a modern theatre production. Students interested in acting audition with the director for acting, singing or dancing roles. All students performing in productions may enroll in this class for one to three units at the discretion of the instructor. Students may enroll in this class after the close of late registration at the discretion of the instructor.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- Audition and perform in community, educational, and/or professional theatres (SLO 1, PSLO 1).
- Objective 1a: Recognize and demonstrate an understanding of the requirements of being an actor in a modern theatrical production including the audition, rehearsal, and production processes.
- Objective 1b: Collaborating with the director and other actors, demonstrate basic understanding of modern script analysis and the techniques of character analysis.
- Objective 1c: Recognize and demonstrate an understanding of the basic skills and rehearsal methods necessary to performing a modern role on stage including: using vocal, instrumental, dance and movement skills, and the use and maintenance of basic production elements such as props, costumes, and furniture to create the world of a chosen play.
- Work effectively as an ensemble member of a theatre company. (SLO 2, PSLO 3)
- Objective 2a: Recognize and demonstrate the basic collaborative responsibilities with the director and designers in rehearsal and in performance in the creation of a modern theatrical production.

TAP 301 Modern Rehearsal and Performance II

This course is the second level of four courses which provide for a workshop training experience for students performing in their second role in a modern theatre production. Students interested in acting audition with the director for acting, singing or dancing roles. All students performing in productions may enroll in this class for one to three units at the discretion of the instructor. Students may enroll in this class after the close of late registration at the discretion of the instructor.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- Audition and perform in community, educational, and/or professional theatres. (SLO 1, PSLO 1)
- Objective 1a: Demonstrate a basic proficiency in the requirements of being an actor in a modern theatrical production including the audition, rehearsal, and production processes.
- Objective 1b: Collaborating with the director and other actors, demonstrate basic proficiency in modern script analysis and the techniques of character analysis.
- Objective 1c: Demonstrate basic proficiency in the skills and rehearsal methods necessary to performing a modern role on stage including: using vocal, instrumental, dance and movement skills, and the use and maintenance of basic production elements such as props, costumes, and furniture to create the world of a chosen play.
- PSLO 3: Work effectively as an ensemble member of a theatre company. (SLO 2, PSLO 3)
- Objective 2a: Demonstrate a basic proficiency in understanding collaborative responsibilities with the director and designers in rehearsal and in performance in the creation of a modern theatrical production.
TAP 302 Modern Rehearsal and Performance III

This course is the third level of four courses which provide for a workshop training experience for students performing in their third role in a modern theatre production. Students interested in acting audition with the director for acting, singing or dancing roles. All students performing in productions may enroll in this class for one to three units at the discretion of the instructor. Students may enroll in this class after the close of late registration at the discretion of the instructor.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- Audition and perform in community, educational, and/or professional theatres. (SLO 1, PSLO 1)
- Objective 1a: Demonstrate an intermediate proficiency in the requirements of being an actor in a modern theatrical production including the audition, rehearsal, and production processes.
- Objective 1b: Collaborating with the director and other actors, demonstrate intermediate proficiency in modern script analysis and the techniques of character analysis.
- Objective 1c: Demonstrate intermediate proficiency in the skills and rehearsal methods necessary to performing a modern role on stage including: using vocal, instrumental, dance and movement skills, and the use and maintenance of basic production elements such as props, costumes, and furniture to create the world of a chosen play.
- Work effectively as an ensemble member of a theatre company. (SLO 2, PSLO 3)
- Objective 2a: Demonstrate an intermediate proficiency in understanding collaborative responsibilities with the director and designers in rehearsal and in performance in the creation of a modern theatrical production.

TAP 303 Modern Rehearsal and Performance IV

This course is the fourth level of four courses which provide for a workshop training experience for students performing in their fourth role in a modern theatre production. Students interested in acting audition with the director for acting, singing or dancing roles. All students performing in productions may enroll in this class for one to three units at the discretion of the instructor. Students may enroll in this class after the close of late registration at the discretion of the instructor.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- Audition and perform in community, educational, and/or professional theatres. (SLO 1, PSLO 1)
- Objective 1a: Demonstrate leadership in a cast by mentoring other actors in the requirements of being an actor in a modern theatrical production.
- Objective 1b: Demonstrate leadership in a cast by assisting the director and other actors in modern script analysis and the techniques of character analysis.
- Objective 1c: Demonstrate leadership in a cast by assisting the director and other actors in the skills and rehearsal methods necessary to performing a modern role on stage including: using vocal, instrumental, dance and movement skills, and the use and maintenance of basic production elements such as props, costumes, and furniture to create the world of a chosen play.
- Work effectively as an ensemble member of a theatre company. (SLO 2, PSLO 3)
Objective 2a: Demonstrate leadership in a cast through their collaborative interactions with the director and designers in rehearsal and in performance in the creation of a modern theatrical production.

TAP 310 Modern Technical Production I

Units: 1 - 3
Hours: 54 - 162 hours LAB
Course Family: Modern Performance and Technical Production (http://crc.losrios.edu/course-families#id_100003)
Prerequisite: None.
Enrollment Limitation: Interview
Transferable: CSU; UC
C-ID: C-ID THTR 192
Catalog Date: June 1, 2020

This course is the first level of four courses which provide for a workshop training experience for students working in their first position on the production crew of a modern theatre production. Students interested in technical work interview for positions in stage management, crewing, set construction, costumes and makeup, lighting and sound, box office and publicity. Students will gain practical experience in the application of production responsibilities in any of the following: stage management, construction, scenery, properties, costume, lighting, sound, and running crews. All students performing in productions may enroll in this class for one to three units at the discretion of the instructor. Students may enroll in this class after the close of late registration at the discretion of the instructor.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- Work as a theatre technician in community, educational, and/or professional theatres. (SLO 1, PSLO 2)
- Objective 1a: Recognize and demonstrate a basic understanding of the responsibilities of the set designer, lighting designer, sound designer, special effects coordinator, technical director, director and audience in relationship to the crew in a Modern production.
- Objective 1b: Recognize and demonstrate a basic understanding of scene shop operation, maintenance and safety procedures regarding the usage of tools and technical equipment, building materials and fastening methods, blueprint readings, and the overall planning of the technical aspects of a Modern theatrical production.
- Objective 1c: Demonstrate a basic proficiency in understanding of formulating solutions to unfamiliar situations in technical theatre and procedures to appraise the efficacy of the solutions. In Modern Theatrical productions the production situations may include: the integration of projections into productions, abstract scenery and lighting, box (realistic) scenery and lighting, accommodating different iterations of audience interaction, etcetera.
- Objective 1d: Recognize and demonstrate a basic understanding of the importance of teamwork in carrying out a group project as it relates to technical theatre in a Modern theatrical production.
- Work effectively as an ensemble member of a theatre company. (SLO 2, PSLO 3)
- Objective 2a: Recognize and demonstrate a basic understanding of different iterations of crew dynamics in Modern theatrical productions including visible crew members (koken), performers acting as crew, crew used to “alienate” an audience’s experience, fourth-wall crew, etcetera.
- Objective 2b: Recognize and demonstrate a basic understanding of technicians’ responsibilities in a Modern theatrical production.

TAP 311 Modern Technical Production II

Units: 1 - 3
Hours: 54 - 162 hours LAB
Course Family: Modern Performance and Technical Production (http://crc.losrios.edu/course-families#id_100003)
Prerequisite: TAP 310 with a grade of "C" or better
Enrollment Limitation: Enrollment is limited to students with the ability to perform specific technical crew positions as determined by an interview and the requirements of the play.
Transferable: CSU; UC
C-ID: C-ID THTR 192
Catalog Date: June 1, 2020
This course is the second level of four courses which provide for a workshop training experience for students working in their second position on the production crew of a modern theatre production. Students interested in technical work interview for positions in stage management, crewing, set construction, costumes and makeup, lighting and sound, box office and publicity. Students will gain practical experience in the application of production responsibilities in any of the following: stage management, house management, construction, scenery, properties, costume, lighting, sound, and running crews. All students performing in productions may enroll in this class for one to three units at the discretion of the instructor. Students may enroll in this class after the close of late registration at the discretion of the instructor.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- Work as a theatre technician in community, educational, and/or professional theatres. (SLO 1, PSLO 2)
- Objective 1a: Demonstrate a basic proficiency in understanding the responsibilities of the set designer, lighting designer, sound designer, special effects coordinator, technical director, performers, and the director and audience in relationship to the crew in a Modern production.
- Objective 1b: Demonstrate a basic proficiency in understanding scene shop operation, maintenance and safety procedures regarding the usage of tools and technical equipment, building materials and fastening methods, blueprint readings, and the overall planning of the technical aspects of a Modern theatrical production.
- Objective 1c: Demonstrate a basic proficiency in understanding of formulating solutions to unfamiliar situations in technical theatre and procedures to appraise the efficacy of the solutions. In Modern Theatrical productions the production situations may include: the integration of projections into productions, abstract scenery and lighting, box (realistic) scenery and lighting, accommodating different iterations of audience interaction, etcetera.
- Objective 1d: Demonstrate a basic proficiency in understanding the importance of teamwork in carrying out a group project as it relates to technical theatre in a Modern theatrical production.
- Work effectively as an ensemble member of a theatre company. (SLO 2, PSLO 3)
- Objective 2a: Demonstrate a basic proficiency in understanding of different iterations of crew dynamics in Modern theatrical productions including visible crew members (koken), performers acting as crew, crew used to “alienate” an audience’s experience, fourth-wall crew, etcetera.
- Objective 2b: Demonstrate a basic proficiency in understanding technicians’ responsibilities in a Modern theatrical production.

This course is the third level of four courses which provide for a workshop training experience for students working in their third position on the production crew of a modern theatre production. Students interested in technical work interview for positions in stage management, crewing, set construction, costumes and makeup, lighting and sound, box office and publicity. Students will gain practical experience in the application of production responsibilities in any of the following: stage management, house management, construction, scenery, properties, costume, lighting, sound, and running crews. All students performing in productions may enroll in this class for one to three units at the discretion of the instructor. Students may enroll in this class after the close of late registration at the discretion of the instructor.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- Work as a theatre technician in community, educational, and/or professional theatres. (SLO 1, PSLO 2)
- Objective 1a: Demonstrate an intermediate proficiency in working and collaborating with the set designer, lighting designer, sound designer, special effects coordinator technical director, performers, and the director and audience in relationship to the crew in a Modern production.
- Objective 1b: Demonstrate an intermediate proficiency in scene shop operation, maintenance and safety procedures regarding the usage of tools and technical equipment, building materials and fastening methods, blueprint readings, and the overall planning of the technical aspects of a Modern theatrical production.
Objective 1c: Demonstrate an intermediate proficiency in formulating solutions to unfamiliar situations in technical theatre and procedures to appraise the efficacy of the solutions. In Modern Theatrical productions the production situations may include: the integration of projections into productions, abstract scenery and lighting, box (realistic) scenery and lighting, accommodating different iterations of audience interaction, etcetera.

Objective 1d: Demonstrate an intermediate proficiency in the importance of teamwork in carrying out a group project as it relates to technical theatre in a Modern theatrical production.

Work effectively as an ensemble member of a theatre company. (SLO 2, PSLO 3)

Objective 2a: Demonstrate an intermediate proficiency in different iterations of crew dynamics in Modern theatrical productions including visible crew members (koken), performers acting as crew, crew used to “alienate” an audience’s experience, fourth-wall crew, etcetera.

Objective 2b: Demonstrate an intermediate proficiency in technicians’ responsibilities in a Modern theatrical production.

TAP 313 Modern Technical Production IV

Units: 1 - 3
Hours: 54 - 162 hours LAB
Course Family: Modern Performance and Technical Production (http://crc.losrios.edu/course-families#id_100003)
Prerequisite: TAP 312 with a grade of “C” or better
Enrollment Limitation: Interview
Transferable: CSU; UC
C-ID: C-ID THTR 192
Catalog Date: June 1, 2020

This course is the fourth level of four courses which provide for a workshop training experience for students working in their fourth position on the production crew of a modern theatre production. Students interested in technical work interview for positions in stage management, crewing, set construction, costumes and makeup, lighting and sound, box office and publicity. Students will gain practical experience in the application of production responsibilities in any of the following: stage management, house management, construction, scenery, properties, costume, lighting, sound, and running crews. All students performing in productions may enroll in this class for one to three units at the discretion of the instructor. Students may enroll in this class after the close of late registration at the discretion of the instructor.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- Work as a theatre technician in community, educational, and/or professional theatres. (SLO 1, PSLO 2)
- Objective 1a: Demonstrate leadership in a crew through their interactions and collaborations with the set designer, lighting designer, sound designer, special effects coordinator, technical director, performers, and the director and audience in relationship to the crew in a Modern production.
- Objective 1b: Demonstrate leadership in a crew through mentoring other crew members in scene shop operation, maintenance and safety procedures regarding the usage of tools and technical equipment, building materials and fastening methods, blueprint readings, and the overall planning of the technical aspects of a Modern theatrical production.
- Objective 1c: Demonstrate leadership in a crew through mentoring other crew members in formulating solutions to unfamiliar situations in technical theatre and procedures to appraise the efficacy of the solutions. In Modern Theatrical productions the production situations may include: the integration of projections into productions, abstract scenery and lighting, box (realistic) scenery and lighting, accommodating different iterations of audience interaction, etcetera.
- Objective 1d: Demonstrate leadership in a crew through mentoring other crew members in the importance of teamwork in carrying out a group project as it relates to technical theatre in a Modern theatrical production.
- Work effectively as an ensemble member of a theatre company. (SLO 2, PSLO 3)
- Objective 2a: Demonstrate leadership in a crew through mentoring other crew members in different iterations of crew dynamics in Modern theatrical productions including visible crew members (koken), performers acting as crew, crew used to “alienate” an audience’s experience, fourth-wall crew, etcetera.
- Objective 2b: Demonstrate leadership in a crew through mentoring other crew members in technicians’ responsibilities in a Modern theatrical production.

TAP 320 Classical Rehearsal and Performance I
This course is the first level of four courses which provide for a workshop training experience for students performing in their first role in a classical theatre production. Students interested in acting audition with the director for acting, singing or dancing roles. All students performing in productions may enroll in this class for one to three units at the discretion of the instructor. Students may enroll in this class after the close of late registration at the discretion of the instructor.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- Audition and perform in community, educational, and/or professional theatres. (SLO 1, PSLO 1)
- Objective 1a: Recognize and demonstrate an understanding of the requirements of being an actor in a classical theatrical production including the audition, rehearsal, and production processes.
- Objective 1b: Collaborating with the director and other actors, demonstrate basic understanding of classical script analysis and the techniques of character analysis.
- Objective 1c: Recognize and demonstrate an understanding of the basic skills and rehearsal methods necessary to performing a classical role on stage including: using vocal, instrumental, dance and movement skills, and the use and maintenance of basic production elements such as props, costumes, and furniture to create the world of a chosen play.
- Work effectively as an ensemble member of a theatre company. (SLO 2, PSLO 3)
- Objective 2a: Recognize and demonstrate the basic collaborative responsibilities with the director and designers in rehearsal and in performance in the creation of a classical theatrical production.

TAP 321 Classical Rehearsal and Performance II

This course is the second level of four courses which provide for a workshop training experience for students performing in their second role in a classical theatre production. Students interested in acting audition with the director for acting, singing or dancing roles. All students performing in productions may enroll in this class for one to three units at the discretion of the instructor. Students may enroll in this class after the close of late registration at the discretion of the instructor.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- Audition and perform in community, educational, and/or professional theatres. (SLO 1, PSLO 1)
- Objective 1a: Demonstrate a basic proficiency in the requirements of being an actor in a classical theatrical production including the audition, rehearsal, and production processes.
- Objective 1b: Collaborating with the director and other actors, demonstrate basic proficiency in classical script analysis and the techniques of character analysis.
- Objective 1c: Demonstrate a basic proficiency in the skills and rehearsal methods necessary to performing a classical role on stage including: using vocal, instrumental, dance and movement skills, and the use and maintenance of basic production elements such as props, costumes, and furniture to create the world of a chosen play.
- PSLO 3: Work effectively as an ensemble member of a theatre company. (SLO 2, PSLO 3)
- Objective 2a: Demonstrate a basic proficiency in understanding collaborative responsibilities with the director and designers in rehearsal and in performance in the creation of a classical theatrical production.
TAP 322 Classical Rehearsal and Performance III

This course is the third level of four courses which provide for a workshop training experience for students performing in their third role in a classical theatre production. Students interested in acting audition with the director for acting, singing or dancing roles. All students performing in productions may enroll in this class for one to three units at the discretion of the instructor. Students may enroll in this class after the close of late registration at the discretion of the instructor.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- Audition and perform in community, educational, and/or professional theatres. (SLO 1, PSLO 1)
- Objective 1a: Demonstrate an intermediate proficiency in the requirements of being an actor in a classical theatrical production including the audition, rehearsal, and production processes.
- Objective 1b: Collaborating with the director and other actors, demonstrate intermediate proficiency in classical script analysis and the techniques of character analysis.
- Objective 1c: Demonstrate intermediate proficiency in the skills and rehearsal methods necessary to performing a classical role on stage including: using vocal, instrumental, dance and movement skills, and the use and maintenance of basic production elements such as props, costumes, and furniture to create the world of a chosen play.
- Work effectively as an ensemble member of a theatre company. (SLO 2, PSLO 3)
- Objective 2a: Demonstrate an intermediate proficiency in understanding collaborative responsibilities with the director and designers in rehearsal and in performance in the creation of a classical theatrical production.

TAP 323 Classical Rehearsal and Performance IV

This course is the fourth level of four courses which provide for a workshop training experience for students performing in their fourth role in a classical theatre production. Students interested in acting audition with the director for acting, singing or dancing roles. All students performing in productions may enroll in this class for one to three units at the discretion of the instructor. Students may enroll in this class after the close of late registration at the discretion of the instructor.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- Audition and perform in community, educational, and/or professional theatres. (SLO 1, PSLO 1)
- Objective 1a: Demonstrate leadership in a cast by mentoring other actors in the requirements of being an actor in a classical theatrical production.
- Objective 1b: Demonstrate leadership in a cast by assisting the director and other actors in classical script analysis and the techniques of character analysis.
- Objective 1c: Demonstrate leadership in a cast by assisting the director and other actors in the skills and rehearsal methods necessary to performing a classical role on stage including: using vocal, instrumental, dance and movement skills, and the use and maintenance of basic production elements such as props, costumes, and furniture to create the world of a chosen play.
- Work effectively as an ensemble member of a theatre company. (SLO 2, PSLO 3)
Objective 2a: Demonstrate leadership in a cast through their collaborative interactions with the director and designers in rehearsal and in performance in the creation of a classical theatrical production.

TAP 330 Classical Technical Production I

Units: 1 - 3
Hours: 54 - 162 hours LAB
Course Family: Classical Performance and Technical Production (http://crc.losrios.edu/course-families#id_100000)
Prerequisite: None.
Enrollment Limitation: Interview
Transferable: CSU; UC
C-ID: C-ID THTR 192
Catalog Date: June 1, 2020

This course is the first level of four courses which provide for a workshop training experience for students working in their first position on the production crew of a classical theatre production. Students interested in technical work interview for positions in stage management, crewing, set construction, costumes and makeup, lighting and sound, box office and publicity. Students will gain practical experience in the application of production responsibilities in any of the following: stage management, house management, construction, scenery, properties, costume, lighting, sound, and running crews. All students performing in productions may enroll in this class for one to three units at the discretion of the instructor. Students may enroll in this class after the close of late registration at the discretion of the instructor.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- Work as a theatre technician in community, educational, and/or professional theatres. (SLO 1, PSLO 2)
- Objective 1a: Recognize and demonstrate a basic understanding of the responsibilities of the set designer, lighting designer, sound designer, special effects coordinator, technical director, director and audience in relationship to the crew in a Classical production.
- Objective 1b: Recognize and demonstrate a basic understanding of scene shop operation, maintenance and safety procedures regarding the usage of tools and technical equipment, building materials and fastening methods, blueprint readings, and the overall planning of the technical aspects of a Classical theatrical production.
- Objective 1c: Recognize and demonstrate a basic understanding of formulating solutions to unfamiliar situations in technical theatre and procedures to appraise the efficacy of the solutions. In Classical Theatrical productions the production situations may include: creating a space to evoke a performance in an amphitheater (Greek or Roman), the stagecraft of Shakespeare and other renaissance theatre types, forced perspective and other scenic artistry, etcetera.
- Objective 1d: Recognize and demonstrate a basic understanding of the importance of teamwork in carrying out a group project as it relates to technical theatre in a Classical theatrical production.
- Work effectively as an ensemble member of a theatre company. (SLO 2, PSLO 3)
- Objective 2a: Recognize and demonstrate a basic understanding of different iterations of crew dynamics in Classical theatrical productions including: dressing historical costumes, historical crew configurations, representational scenery and properties, etcetera.
- Objective 2b: Recognize and demonstrate a basic understanding of technicians' responsibilities in a Classical theatrical production.

TAP 331 Classical Technical Production II

Units: 1 - 3
Hours: 54 - 162 hours LAB
Course Family: Classical Performance and Technical Production (http://crc.losrios.edu/course-families#id_100000)
Prerequisite: TAP 330 with a grade of "C" or better
Enrollment Limitation: Interview
Transferable: CSU; UC
C-ID: C-ID THTR 192
Catalog Date: June 1, 2020

This course is the second level of four courses which provide for a workshop training experience for students working in their second position on the production crew of a classical theatre production. Students interested in technical work interview for positions in stage management, crewing, set construction, costumes and makeup, lighting and sound, box office and publicity. Students will gain practical experience in the application of production responsibilities in any of the following: stage management, house management, construction, scenery, properties, costume, lighting, sound, and running crews. - Work effectively as an ensemble member of a theatre company. (SLO 2, PSLO 3)

- Objective 2a: Demonstrate leadership in a crew through mentoring other crew members in different iterations of crew dynamics in Classical theatrical productions including: dressing historical costumes, historical crew configurations, representational scenery and properties, etcetera.

- Objective 2b: Demonstrate leadership in a crew through mentoring other crew members in technicians' responsibilities in a Classical theatrical production.

TAP 340 Musical Rehearsal and Performance I

**Units:** 1 - 3  
**Hours:** 54 - 162 hours LAB  
**Course Family:** Musical Performance and Technical Production  
**Prerequisite:** None.  
**Enrollment Limitation:** Audition  
**Transferable:** CSU; UC  
**C-ID:** C-ID THTR 191  
**Catalog Date:** June 1, 2020
This course is the first level of four courses which provide for a workshop training experience for students performing in their first role in a musical theatre production. Students interested in acting audition with the director for acting, singing or dancing roles. All students performing in productions may enroll in this class for one to three units at the discretion of the instructor. Students may enroll in this class after the close of late registration at the discretion of the instructor.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- Audition and perform in community, educational, and/or professional theatres. (SLO 1, PSLO 1)
- Objective 1a: Recognize and demonstrate an understanding of the requirements of being an actor in a musical theatrical production including the audition, rehearsal, and production processes.
- Objective 1b: Collaborating with the director and other actors, demonstrate basic understanding of musical script analysis and the techniques of character analysis.
- Objective 1c: Recognize and demonstrate an understanding of the basic skills and rehearsal methods necessary to performing a musical role on stage including: using vocal, instrumental, dance and movement skills, and the use and maintenance of basic production elements such as props, costumes, and furniture to create the world of a chosen play.
- Work effectively as an ensemble member of a theatre company. (SLO 2, PSLO 3)
- Objective 2a: Recognize and demonstrate the basic collaborative responsibilities with the director and designers in rehearsal and in performance in the creation of a musical theatrical production.

TAP 341 Musical Rehearsal and Performance II

Units: 1 - 3
Hours: 54 - 162 hours LAB
Course Family: Musical Performance and Technical Production (http://crc.losrios.edu/course-families#id_100005)
Prerequisites: TAP 340 with a grade of "C" or better
Enrollment Limitation: Audition
Transferable: CSU; UC
C-ID: C-ID THTR 191
Catalog Date: June 1, 2020

This course is the second level of four courses which provide for a workshop training experience for students performing in their second role in a musical theatre production. Students interested in acting audition with the director for acting, singing or dancing roles. All students performing in productions may enroll in this class for one to three units at the discretion of the instructor. Students may enroll in this class after the close of late registration at the discretion of the instructor.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- Audition and perform in community, educational, and/or professional theatres. (SLO 1, PSLO 1)
- Objective 1a: Demonstrate a basic proficiency in the requirements of being an actor in a musical theatrical production including the audition, rehearsal, and production processes.
- Objective 1b: Collaborating with the director and other actors, demonstrate basic proficiency in musical script analysis and the techniques of character analysis.
- Objective 1c: Demonstrate basic proficiency in the skills and rehearsal methods necessary to performing a musical role on stage including: using vocal, instrumental, dance and movement skills, and the use and maintenance of basic production elements such as props, costumes, and furniture to create the world of a chosen play.
- Work effectively as an ensemble member of a theatre company (SLO 2, PSLO 3)
- Objective 2a: Demonstrate a basic proficiency in understanding collaborative responsibilities with the director and designers in rehearsal and in performance in the creation of a musical theatrical production.

TAP 342 Musical Rehearsal and Performance III
This course is the third level of four courses which provide for a workshop training experience for students performing in their third role in a musical theatre production. Students interested in acting audition with the director for acting, singing or dancing roles. All students performing in productions may enroll in this class for one to three units at the discretion of the instructor. Students may enroll in this class after the close of late registration at the discretion of the instructor.

### Student Learning Outcomes

Upon completion of this course, the student will be able to:

- Audition and perform in community, educational, and/or professional theatres. (SLO 1, PSLO 1)
- Objective 1a: Demonstrate an intermediate proficiency in the requirements of being an actor in a musical theatrical production including the audition, rehearsal, and production processes.
- Objective 1b: Collaborating with the director and other actors, demonstrate intermediate proficiency in musical script analysis and the techniques of character analysis.
- Objective 1c: Demonstrate intermediate proficiency in the skills and rehearsal methods necessary to performing a musical role on stage including: using vocal, instrumental, dance and movement skills, and the use and maintenance of basic production elements such as props, costumes, and furniture to create the world of a chosen play.
- Work effectively as an ensemble member of a theatre company. (SLO 2, PSLO 3)
- Objective 2a: Demonstrate leadership in a cast by mentoring other actors in the requirements of being an actor in a musical theatrical production.
- Objective 2b: Demonstrate leadership in a cast by assisting the director and other actors in musical script analysis and the techniques of character analysis.
- Objective 2c: Demonstrate leadership in a cast by assisting the director and other actors in the skills and rehearsal methods necessary to performing a musical role on stage including: using vocal, instrumental, dance and movement skills, and the use and maintenance of basic production elements such as props, costumes, and furniture to create the world of a chosen play.
- Objective 2d: Work effectively as an ensemble member of a theatre company. (SLO 2, PSLO 3)

### TAP 343 Musical Rehearsal and Performance IV

This course is the fourth level of four courses which provide for a workshop training experience for students performing in their fourth role in a musical theatre production. Students interested in acting audition with the director for acting, singing or dancing roles. All students performing in productions may enroll in this class for one to three units at the discretion of the instructor. Students may enroll in this class after the close of late registration at the discretion of the instructor.

### Student Learning Outcomes

Upon completion of this course, the student will be able to:

- Audition and perform in community, educational, and/or professional theatres. (SLO 1, PSLO 1)
- Objective 1a: Demonstrate leadership in a cast by mentoring other actors in the requirements of being an actor in a musical theatrical production.
- Objective 1b: Demonstrate leadership in a cast by assisting the director and other actors in musical script analysis and the techniques of character analysis.
- Objective 1c: Demonstrate leadership in a cast by assisting the director and other actors in the skills and rehearsal methods necessary to performing a musical role on stage including: using vocal, instrumental, dance and movement skills, and the use and maintenance of basic production elements such as props, costumes, and furniture to create the world of a chosen play.
- Work effectively as an ensemble member of a theatre company. (SLO 2, PSLO 3)
- Objective 2a: Demonstrate leadership in a cast through their collaborative interactions with the director and designers in rehearsal and in performance in the creation of a musical theatrical production.
TAP 350 Musical Technical Production I

This course is the first of four courses which provide for a workshop training experience for students working in their first position on the production crew of a musical theatre production. Students interested in technical work interview for positions in stage management, crewing, set construction, costumes and makeup, lighting and sound, box office and publicity. Students will gain practical experience in the application of production responsibilities in any of the following: stage management, house management, construction, scenery, properties, costume, lighting, sound, and running crews. All students performing in productions may enroll in this class for one to three units at the discretion of the instructor. Students may enroll in this class after the close of late registration at the discretion of the instructor.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- Work as a theatre technician in community, educational, and/or professional theatres. (SLO 1, PSLO 2)
- Objective 1a: Recognize and demonstrate a basic understanding of the responsibilities of the set designer, lighting designer, sound designer, special effects coordinator, technical director, director and audience in relationship to the crew in a Musical production.
- Objective 1b: Recognize and demonstrate a basic understanding of scene shop operation, maintenance and safety procedures regarding the usage of tools and technical equipment, building materials and fastening methods, blueprint readings, and the overall planning of the technical aspects of a Musical theatrical production.
- Objective 1c: Recognize and demonstrate a basic understanding of formulating solutions to unfamiliar situations in technical theatre and procedures to appraise the efficacy of the solutions. In Musical Theatrical productions the production situations may include: sound reinforcement, accommodating orchestras and musicians, preparing a stage for dance, preparing a space for large casts, etcetera.
- Objective 1d: Recognize and demonstrate a basic understanding of the importance of teamwork in carrying out a group project as it relates to technical theatre in a Musical theatrical production.
- Work effectively as an ensemble member of a theatre company. (SLO 2, PSLO 3)
- Objective 2a: Recognize and demonstrate a basic understanding of different iterations of crew dynamics in Musical theatrical productions including: dressing elaborate costumes, coordinating wireless microphones, balancing sound between singers and the orchestra/musicians, large elaborate scenery and scene changes, etcetera.
- Objective 2b: Recognize and demonstrate a basic understanding of technicians’ responsibilities in a Musical theatrical production.

TAP 351 Musical Technical Production II

This course is the second of four courses which provide for a workshop training experience for students working in their second position on the production crew of a musical theatre production. Students interested in technical work interview for positions in stage management, crewing, set construction, costumes and makeup, lighting and sound, box office and publicity. Students will gain practical experience in the application of production responsibilities in any of the following: stage management, house management, construction, scenery, properties, costume, lighting, sound, and running crews. All students performing in productions may enroll in this class for one to three units at the discretion of the instructor. Students may enroll in this class after the close of late registration at the discretion of the instructor.

Student Learning Outcomes
Upon completion of this course, the student will be able to:

- Work as a theatre technician in community, educational, and/or professional theatres. (SLO 1, PSLO 2)
- Objective 1a: Demonstrate a basic proficiency in understanding the responsibilities of the set designer, lighting designer, sound designer, special effects coordinator, technical director, performers, and the director and audience in relationship to the crew in a Musical production.
- Objective 1b: Demonstrate a basic proficiency in understanding scene shop operation, maintenance and safety procedures regarding the usage of tools and technical equipment, building materials and fastening methods, blueprint readings, and the overall planning of the technical aspects of a Musical theatrical production.
- Objective 1c: Demonstrate a basic proficiency in understanding of formulating solutions to unfamiliar situations in technical theatre and procedures to appraise the efficacy of the solutions. In Musical Theatrical productions the production situations may include: sound reinforcement, accommodating orchestras and musicians, preparing a stage for dance, preparing a space for large casts, etcetera.
- Objective 1d: Demonstrate a basic proficiency in understanding the importance of teamwork in carrying out a group project as it relates to technical theatre in a Musical theatrical production.
- Work effectively as an ensemble member of a theatre company. (SLO 2, PSLO 3)
- Objective 2a: Demonstrate a basic proficiency in understanding of different iterations of crew dynamics in Musical theatrical productions including: dressing elaborate costumes, coordinating wireless microphones, balancing sound between singers and the orchestra/musicians, large elaborate scenery and scene changes, etcetera.
- Objective 2b: Demonstrate a basic proficiency in understanding technicians' responsibilities in a Musical theatrical production.

TAP 352 Musical Technical Production III

- Units: 1 - 3
- Hours: 54 - 162 hours LAB
- Course Family: Musical Performance and Technical Production (http://crc.losrios.edu/course-families#id_100005)
- Prerequisite: TAP 351 with a grade of "C" or better
- Enrollment Limitation: Interview
- Transferable: CSU; UC
- C-ID: C-ID THTR 192
- Catalog Date: June 1, 2020

This course is the third of four courses which provide for a workshop training experience for students working in their third position on the production crew of a musical theatre production. Students interested in technical work interview for positions in stage management, crewing, set construction, costumes and makeup, lighting and sound, box office and publicity. Students will gain practical experience in the application of production responsibilities in any of the following: stage management, house management, construction, scenery, properties, costume, lighting, sound, and running crews. All students performing in productions may enroll in this class for one to three units at the discretion of the instructor. Students may enroll in this class after the close of late registration at the discretion of the instructor.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- Work as a theatre technician in community, educational, and/or professional theatres. (SLO 1, PSLO 2)
- Objective 1a: Demonstrate an intermediate proficiency in working and collaborating with the set designer, lighting designer, sound designer, special effects coordinator technical director, performers, and the director and audience in relationship to the crew in a Musical production.
- Objective 1b: Demonstrate an intermediate proficiency in scene shop operation, maintenance and safety procedures regarding the usage of tools and technical equipment, building materials and fastening methods, blueprint readings, and the overall planning of the technical aspects of a Musical theatrical production.
- Objective 1c: Demonstrate an intermediate proficiency in formulating solutions to unfamiliar situations in technical theatre and procedures to appraise the efficacy of the solutions. In Musical Theatrical productions the production situations may include: sound reinforcement, accommodating orchestras and musicians, preparing a stage for dance, preparing a space for large casts, etcetera.
- Objective 1d: Demonstrate an intermediate proficiency in the importance of teamwork in carrying out a group project as it relates to technical theatre in a Musical theatrical production.
- Work effectively as an ensemble member of a theatre company. (SLO 2, PSLO 3)
- Objective 2a: Demonstrate an intermediate proficiency in different iterations of crew dynamics in Musical theatrical productions including: dressing elaborate costumes, coordinating wireless microphones, balancing sound between singers and the orchestra/musicians, large elaborate scenery and scene changes, etcetera.
TAP 353 Musical Technical Production IV

**Units:** 1 - 3  
**Hours:** 54 - 162 hours LAB  
**Course Family:** Musical Performance and Technical Production (http://crc.losrios.edu/course-families#id_100005)  
**Prerequisite:** TAP 352 with a grade of "C" or better  
**Enrollment Limitation:** Interview  
**Transferable:** CSU; UC  
**C-ID:** C-ID THTR 192  
**Catalog Date:** June 1, 2020

This course is the fourth of four courses which provide for a workshop training experience for students working in their fourth position on the production crew of a musical theatre production. Students interested in technical work interview for positions in stage management, crewing, set construction, costumes and makeup, lighting and sound, box office and publicity. Students will gain practical experience in the application of production responsibilities in any of the following: stage management, house management, construction, scenery, properties, costume, lighting, sound, and running crews. All students performing in productions may enroll in this class for one to three units at the discretion of the instructor. Students may enroll in this class after the close of late registration at the discretion of the instructor.

**Student Learning Outcomes**

Upon completion of this course, the student will be able to:

- Work as a theatre technician in community, educational, and/or professional theatres. (SLO 1, PSLO 2)

- Objective 1a: Demonstrate leadership in a crew through their interactions and collaborations with the set designer, lighting designer, sound designer, special effects coordinator, technical director, performers, and the director and audience in relationship to the crew in a Musical production.

- Objective 1b: Demonstrate leadership in a crew through mentoring other crew members in scene shop operation, maintenance and safety procedures regarding the usage of tools and technical equipment, building materials and fastening methods, blueprint readings, and the overall planning of the technical aspects of a Musical theatrical production.

- Objective 1c: Demonstrate leadership in a crew through mentoring other crew members in formulating solutions to unfamiliar situations in technical theatre and procedures to appraise the efficacy of the solutions. In Musical Theatrical productions the production situations may include: sound reinforcement, accommodating orchestras and musicians, preparing a stage for dance, preparing a space for large casts, etcetera.

- Objective 1d: Demonstrate leadership in a crew through mentoring other crew members in the importance of teamwork in carrying out a group project as it relates to technical theatre in a Musical theatrical production.

- Work effectively as an ensemble member of a theatre company. (SLO 2, PSLO 3)

- Objective 2a: Demonstrate leadership in a crew through mentoring other crew members in different iterations of crew dynamics in Musical theatrical productions including: dressing elaborate costumes, coordinating wireless microphones, balancing sound between singers and the orchestra/musicians, large elaborate scenery and scene changes, etcetera.

- Objective 2b: Demonstrate leadership in a crew through mentoring other crew members in technicians' responsibilities in a Musical theatrical production.

TAP 360 Children's Theatre Rehearsal and Performance I

**Units:** 1 - 3  
**Hours:** 54 - 162 hours LAB  
**Course Family:** Children's Theatre Performance and Technical Production (http://crc.losrios.edu/course-families#id_100046)  
**Prerequisite:** None  
**Enrollment Limitation:** Audition  
**Transferable:** CSU; UC  
**C-ID:** C-ID THTR 191  
**Catalog Date:** June 1, 2020

This course is the first level of four courses which provide a workshop training experience for students performing in their first role in a children's theatre production. Students interested in acting audition with the director for acting, singing or dancing roles. All students performing in productions may enroll in this class for one to three units at the discretion of the instructor. Students may enroll in this class after the close of late registration at the discretion of the instructor.

**Student Learning Outcomes**
Upon completion of this course, the student will be able to:

- Audition and perform in community, educational, and/or professional theatres (SLO 1, PSLO 1).
- Objective 1a: Recognize and demonstrate an understanding of the requirements of being an actor in a children’s theatrical production including the audition, rehearsal, and production processes.
- Objective 1b: Collaborating with the director and other actors, demonstrate basic understanding of children’s script analysis and the techniques of character analysis.
- Objective 1c: Recognize and demonstrate an understanding of the basic skills and rehearsal methods necessary for performing a children's role on stage including: using vocal, instrumental, dance and movement skills; and the use and maintenance of basic production elements such as props, costumes, and furniture to create the world of a chosen play.
- Work effectively as an ensemble member of a theatre company. (SLO 2, PSLO 3)
- Objective 2a: Recognize and demonstrate the basic collaborative responsibilities with the director and designers in rehearsal and in performance in the creation of a children's theatrical production.

TAP 361 Children's Theatre Rehearsal and Performance II

This course is the second level of four courses which provide a workshop training experience for students performing in their second role in a children's theatre production. Students interested in acting audition with the director for acting, singing or dancing roles. All students performing in productions may enroll in this class for one to three units at the discretion of the instructor. Students may enroll in this class after the close of late registration at the discretion of the instructor.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- Audition and perform in community, educational, and/or professional theatres. (SLO 1, PSLO 1)
- Objective 1a: Building upon the skills learned in TA 360, the student should be able to demonstrate proficiency in: • Audition Techniques (including cold readings and paired readings); • Rehearsal Techniques (including improvisation and character development techniques); • Production Processes (including working with props and costuming to enhance their performance).
- Objective 1b: Building upon the skills learned in TA 360, the student should be able to demonstrate proficiency in collaborating with the director and other actors to analyze a children's theatre script and employ techniques of character analysis.
- Objective 1c: Building upon the skills learned in TA 360, the student should be able to demonstrate proficiency in the skills and rehearsal methods necessary for performing a children's role on stage including: using vocal, instrumental, dance and movement skills; and the use and maintenance of basic production elements such as props, costumes, and furniture to create the world of a chosen play.
- PSLO 3: Work effectively as an ensemble member of a theatre company. (SLO 2, PSLO 3)
- Objective 2a: Building upon the skills learned in TA 360, the student should be able to demonstrate proficiency in the collaborative responsibilities between the director, designers and actors in rehearsal and in performance in the creation of a children's theatrical production.

TAP 362 Children's Theatre Rehearsal and Performance III

This course is the second level of four courses which provide a workshop training experience for students performing in their second role in a children's theatre production. Students interested in acting audition with the director for acting, singing or dancing roles. All students performing in productions may enroll in this class for one to three units at the discretion of the instructor. Students may enroll in this class after the close of late registration at the discretion of the instructor.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- Audition and perform in community, educational, and/or professional theatres. (SLO 1, PSLO 1)
- Objective 1a: Building upon the skills learned in TA 360, the student should be able to demonstrate proficiency in: • Audition Techniques (including cold readings and paired readings); • Rehearsal Techniques (including improvisation and character development techniques); • Production Processes (including working with props and costuming to enhance their performance).
- Objective 1b: Building upon the skills learned in TA 360, the student should be able to demonstrate proficiency in collaborating with the director and other actors to analyze a children's theatre script and employ techniques of character analysis.
- Objective 1c: Building upon the skills learned in TA 360, the student should be able to demonstrate proficiency in the skills and rehearsal methods necessary for performing a children's role on stage including: using vocal, instrumental, dance and movement skills; and the use and maintenance of basic production elements such as props, costumes, and furniture to create the world of a chosen play.
- PSLO 3: Work effectively as an ensemble member of a theatre company. (SLO 2, PSLO 3)
- Objective 2a: Building upon the skills learned in TA 360, the student should be able to demonstrate proficiency in the collaborative responsibilities between the director, designers and actors in rehearsal and in performance in the creation of a children's theatrical production.
This course is the third level of four courses which provide for a workshop training experience for students performing in their third role in a children's theatre production. Students interested in acting audition with the director for acting, singing or dancing roles. All students performing in productions may enroll in this class for one to three units at the discretion of the instructor. Students may enroll in this class after the close of late registration at the discretion of the instructor.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- Audition and perform in community, educational, and/or professional theatres. (SLO 1, PSLO 1)

- Objective 1a: Building upon the skills developed in TA360 and TA361, the student should be able to differentiate audition, rehearsal and production techniques and skills and appropriately employ them for different situations.

- Objective 1b: Building upon the skills developed in TA360 and TA361, the student should be able to differentiate different techniques of script analysis and character analysis and appropriately employ them for different situations.

- Objective 1c: Building upon the skills developed in TA360 and TA361, the student should be able to differentiate different techniques and rehearsal methods necessary to performing a children's role on stage and appropriately employ them for different situations.

- Work effectively as an ensemble member of a theatre company. (SLO 2, PSLO 3)

- Objective 2a: Building upon the skills developed in TA360 and TA361, the student should be able to differentiate different collaborative responsibilities between the director, designers and actors in rehearsal and in performance in the creation of a children's theatrical production.

TAP 363 Children's Theatre Rehearsal and Performance IV

This course is the fourth level of four courses which provide a workshop training experience for students performing in their fourth role in a children's theatre production. Students interested in acting audition with the director for acting, singing or dancing roles. All students performing in productions may enroll in this class for one to three units at the discretion of the instructor. Students may enroll in this class after the close of late registration at the discretion of the instructor.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- Audition and perform in community, educational, and/or professional theatres. (SLO 1, PSLO 1)

- Objective 1a: Building upon the skills learned in TA360, 361 and 362, the student should demonstrate leadership in a cast by mentoring other actors in the requirements of being an actor in a children's theatrical production.

- Objective 1b: Building upon the skills learned in TA360, 361 and 362, the student should demonstrate leadership in a cast by assisting the director and other actors in children's script analysis and the techniques of character analysis.

- Objective 1c: Building upon the skills learned in TA360, 361 and 362, the student should demonstrate leadership in a cast by assisting the director and mentoring other actors in the skills and rehearsal methods necessary to performing a children's role on stage.

- Work effectively as an ensemble member of a theatre company. (SLO 2, PSLO 3)

- Objective 2a: Building upon the skills learned in TA360, 361 and 362, the student should demonstrate leadership in a cast through their collaborative interactions with the director and designers in rehearsal and in performance in the creation of a children's theatrical production.

TAP 370 Children's Theatre Technical Production I
This course is the first level of four courses which provide a workshop training experience for students working in their first position on the production crew of a children's theatre production. Students interested in technical work interview for positions in stage management, crewing, set construction, costumes and makeup, lighting and sound, box office and publicity. Students will gain practical experience in the application of production responsibilities in any of the following: stage management, house management, construction, scenery, properties, costume, lighting, sound, and running crews. All students working on productions may enroll in this class for one to three units at the discretion of the instructor. Students may enroll in this class after the close of late registration at the discretion of the instructor.

**Student Learning Outcomes**

Upon completion of this course, the student will be able to:

- Work as a theatre technician in community, educational, and/or professional theatres. (SLO 1, PSLO 2)
- Objective 1a: As a crew member, the student should recognize and demonstrate a basic understanding of the responsibilities of the set designer, lighting designer, sound designer, special effects coordinator, technical director, director and audience in relationship to the crew in a children's theatre production.
- Objective 1b: As a crew member, the student should recognize and demonstrate a basic understanding of scene shop operation, maintenance and safety procedures regarding the usage of tools and technical equipment, building materials and fastening methods, blueprint readings, and the overall planning of the technical aspects of a children's theatrical production.
- Objective 1c: As a crew member, the student should recognize and demonstrate a basic proficiency in understanding of formulating solutions to unfamiliar situations in technical theatre and procedures to appraise the efficacy of the solutions. In children's theatrical productions the production situations may include: the integration of projections into productions, abstract scenery and lighting, box (realistic) scenery and lighting, accommodating different iterations of audience interaction, etcetera.
- Objective 1d: As a crew member, the student should recognize and demonstrate a basic understanding of the importance of teamwork in carrying out a group project as it relates to technical theatre in a children's theatrical production.
- Work effectively as an ensemble member of a theatre company. (SLO 2, PSLO 3)
- Objective 2a: As a crew member, the student should recognize and demonstrate a basic understanding of different iterations of crew dynamics in Children's theatrical productions including visible crew members (koken), performers acting as crew, crew used to "alienate" an audience's experience, fourth-wall crew, etcetera.
- Objective 2b: As a crew member, the student should recognize and define technicians' responsibilities in a children's theatrical production.
Objective 1a: As a crew member, the student should demonstrate an ability to collaboratively work with the set designer, lighting designer, sound designer, special effects coordinator, technical director, performers, and the director to effectively produce a children's theatre production.

Objective 1b: As a crew member, the student should demonstrate the ability to evaluate and employ the policies and procedures which govern scene shop operation, maintenance and safety procedures regarding the usage of tools and technical equipment, building materials and fastening methods, blueprint readings, and the overall planning of the technical aspects of a children's theatrical production.

Objective 1c: As a crew member, the student should demonstrate the ability to evaluate and prioritize solutions to unfamiliar situations in technical theatre and procedures to appraise the efficacy of the solutions.

Objective 1d: As a crew member, the student should demonstrate effective teamwork in group projects as it relates to technical theatre in a children's theatrical production.

Work effectively as an ensemble member of a theatre company. (SLO 2, PSLO 3)

Objective 2a: As a crew member, the student should demonstrate the ability to evaluate and prioritize different iterations of crew dynamics in children's theatrical productions.

Objective 2b: As a crew member, the student should demonstrate and appraise technicians' responsibilities in a children's theatrical production.

TAP 372 Children's Theatre Technical Production III

This course is the third level of four courses which provide a workshop training experience for students working in their third position on the production crew of a children's theatre production. Students interested in technical work interview for positions in stage management, crewing, set construction, costumes and makeup, lighting and sound, box office and publicity. Students will gain practical experience in the application of production responsibilities in any of the following: stage management, house management, construction, scenery, properties, costume, lighting, sound, and running crews. All students working on productions may enroll in this class for one to three units at the discretion of the instructor. Students may enroll in this class after the close of late registration at the discretion of the instructor.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- Work as a theatre technician in community, educational, and/or professional theatres. (SLO 1, PSLO 2)

Objective 1a: As a crew member, the student should be able to differentiate the working relationships necessary between the crew and the set designer, lighting designer, sound designer, special effects coordinator technical director, performers, and the director to effectively produce a children's theatre production.

Objective 1b: As a crew member, the student should demonstrate the ability to explain and train others in the policies and procedures which govern scene shop operation, maintenance and safety procedures regarding the usage of tools and technical equipment, building materials and fastening methods, blueprint readings, and the overall planning of the technical aspects of a children's theatrical production.

Objective 1c: As a crew member, the student should demonstrate the ability to differentiate and discriminate between different solutions to unfamiliar situations in technical theatre.

Objective 1d: As a crew member, the student should demonstrate the ability to differentiate and discriminate between different teamwork dynamics in implementing a group project as it relates to technical theatre in a children's theatrical production.

Work effectively as an ensemble member of a theatre company. (SLO 2, PSLO 3)

Objective 2a: As a crew member, the student should demonstrate the ability to differentiate and discriminate between different iterations of crew dynamics in children's theatrical productions.

Objective 2b: As a crew member, the student should demonstrate the ability to differentiate and discriminate between different technicians' responsibilities in a Children's theatrical production.
This course is the fourth level of four courses which provide a workshop training experience for students working in their fourth position on the production crew of a children's theatre production. Students interested in technical work interview for positions in stage management, crewing, set construction, costumes and makeup, lighting and sound, box office and publicity. Students will gain practical experience in the application of production responsibilities in any of the following: stage management, house management, construction, scenery, properties, costume, lighting, sound, and running crews. All students working on productions may enroll in this class for one to three units at the discretion of the instructor. Students may enroll in this class after the close of late registration at the discretion of the instructor.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- Work as a theatre technician in community, educational, and/or professional theatres. (SLO 1, PSLO 2)
- Objective 1a: As a crew member, the student should demonstrate leadership in a crew through their interactions and collaborations with the set designer, lighting designer, sound designer, special effects coordinator, technical director, performers, and the director and audience in relationship to the crew in a Children's production.
- Objective 1b: As a crew member, the student should demonstrate leadership in a crew through mentoring other crew members in scene shop operation, maintenance and safety procedures regarding the usage of tools and technical equipment, building materials and fastening methods, blueprint readings, and the overall planning of the technical aspects of a children's theatrical production.
- Objective 1c: As a crew member, the student should demonstrate e leadership in a crew through mentoring other crew members in formulating solutions to unfamiliar situations in technical theatre and procedures to appraise the efficacy of the solutions.
- Objective 1d: As a crew member, the student should demonstrate leadership in a crew through mentoring other crew members in the importance of teamwork in carrying out a group project as it relates to technical theatre in a Children's theatrical production.
- Work effectively as an ensemble member of a theatre company. (SLO 2, PSLO 3)
- Objective 2a: As a crew member, the student should demonstrate leadership in a crew through mentoring other crew members in different iterations of crew dynamics in children's theatrical productions.
- Objective 2b: As a crew member, the student should demonstrate leadership in a crew through mentoring other crew members in technicians' responsibilities in a Children's theatrical production.
Work Experience Education is a unique, experiential, academic program that allows individuals to apply what they've learned in the classroom to a work environment. Upon completion of their Work Experience, students may earn 1 to 4 units of transferable credit with a letter grade.

Work Experience serves: College interns, volunteers, and employees. It is also one of several Living Skills graduation requirements for an associate degree.

**Work Experience (WEXP)**

**WEXP 198 Work Experience - General**

**Units:** 1 - 3  
**Hours:** 60 - 225 hours LAB  
**Prerequisite:** None.  
**Enrollment Limitation:** Students must be in a paid or unpaid internship, volunteer position or job.  
**General Education:** AA/AS Area III(b)  
**Catalog Date:** June 1, 2020

This course provides students with opportunities to develop marketable skills in preparation for employment or advancement within a career. It is designed for students interested in exploring various career options. Course content includes understanding the application of education to the workforce; completion of required forms which document the student's progress and hours spent at the work site; and developing workplace skills and competencies. Appropriate level learning objectives are established by the student and the employer. During the semester, the student is required to participate in a weekly orientation and 75 hours of related paid work experience, or 60 hours of unpaid work experience for one unit. An additional 75 or 60 hours of related work experience is required for each additional unit. Work Experience may be taken for a total of 6 units when there are new or expanded learning objectives. Only one Work Experience course may be taken per semester.

**Student Learning Outcomes**

Upon completion of this course, the student will be able to:

- DEMONSTRATE AN UNDERSTANDING AND APPLICATION OF PROFESSIONAL WORKPLACE BEHAVIOR IN A FIELD OF STUDY RELATED ONE'S CAREER.(SLO 1)
  - Understand the effects time, stress, and organizational management have on performance.
  - Demonstrate an understanding of consistently practicing ethics and confidentiality in a workplace.
  - Examine the career/life planning process and relate its relevancy to the student.
  - Demonstrate an understanding of basic communication tools and their appropriate use.
  - Demonstrate an understanding of workplace etiquette.
  - DESCRIBE THE CAREER/LIFE PLANNING PROCESS AND RELATE ITS RELEVANCY TO ONE'S CAREER.(SLO 2)
  - Link personal goals to long term achievement.
  - Display an understanding of creating a professional first impression.
  - Understand how networking is a powerful job search tool.
Understand necessary elements of a résumé.
Understand the importance of interview preparation.
Identify how continual learning increases career success.

DEMONSTRATE APPLICATION OF INDUSTRY KNOWLEDGE AND THEORETICAL CONCEPTS AS WRITTEN IN LEARNING OBJECTIVES IN PARTNERSHIP WITH THE EMPLOYER WORK SITE SUPERVISOR (SLO 3)

WEXP 298 Work Experience in (Subject)

Units: 1 - 4
Hours: 60 - 300 hours LAB
Prerequisite: None.
Enrollment Limitation: Students must be in a paid or unpaid internship, volunteer position or job related to career goals.
General Education: AA/AS Area III(b)
Catalog Date: June 1, 2020

This course provides students with opportunities to develop marketable skills in preparation for employment in their major field of study or advancement within their career. It is designed for students interested in work experience and/or internships in associate degree level or certificate occupational programs. Course content includes understanding the application of education to the workforce; completion of required forms which document the student's progress and hours spent at the work site; and developing workplace skills and competencies. Appropriate level learning objectives are established by the student and the employer. During the semester, the student is required to participate in a weekly orientation and 75 hours of related paid work experience, or 60 hours of unpaid work experience for one unit. An additional 75 or 60 hours of related work experience is required for each additional unit. Work Experience may be taken for a total of 16 units when there are new or expanded learning objectives. Only one Work Experience course may be taken per semester.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- DEMONSTRATE AN UNDERSTANDING AND APPLICATION OF PROFESSIONAL WORKPLACE BEHAVIOR IN A FIELD OF STUDY RELATED ONE'S CAREER (SLO 1)
- Understand the effects time, stress, and organizational management have on performance.
- Demonstrate an understanding of consistently practicing ethics and confidentiality in a workplace.
- Examine the career/life planning process and relate its relevancy to the student.
- Demonstrate an understanding of basic communication tools and their appropriate use.
- Demonstrate an understanding of workplace etiquette.
- DESCRIBE THE CAREER/LIFE PLANNING PROCESS AND RELATE ITS RELEVANCY TO ONE'S CAREER (SLO 2)
- Link personal goals to long term achievement.
- Display an understanding of creating a professional first impression.
- Understand how networking is a powerful job search tool.
- Understand necessary elements of a résumé.
- Understand the importance of interview preparation.
- Identify how continual learning increases career success.
- DEMONSTRATE APPLICATION OF INDUSTRY KNOWLEDGE AND THEORETICAL CONCEPTS AS WRITTEN IN LEARNING OBJECTIVES IN PARTNERSHIP WITH THE EMPLOYER WORK SITE SUPERVISOR (SLO 3)

WEXP 498 Work Experience in (Subject)
This course provides students with opportunities to develop marketable skills in preparation for employment in their major field of study or advancement within their career. It is designed for students interested in work experience and/or internships in transfer level degree occupational programs. Course content includes understanding the application of education to the workforce; completion of required forms which document the student's progress and hours spent at the work site; and developing workplace skills and competencies. Appropriate level learning objectives are established by the student and the employer. During the semester, the student is required to participate in a weekly orientation and 75 hours of related paid work experience, or 60 hours of unpaid work experience for one unit. An additional 75 or 60 hours of related work experience is required for each additional unit. Work Experience may be taken for a total of 16 units when there are new or expanded learning objectives. Only one Work Experience course may be taken per semester.

Student Learning Outcomes

Upon completion of this course, the student will be able to:

- **DEMONSTRATE AN UNDERSTANDING AND APPLICATION OF PROFESSIONAL WORKPLACE BEHAVIOR IN A FIELD OF STUDY RELATED ONE’S CAREER.(SLO 1)**
  - Understand the effects time, stress, and organizational management have on performance.
  - Demonstrate an understanding of consistently practicing ethics and confidentiality in a workplace.
  - Demonstrate an understanding of basic communication tools and their appropriate use.
  - Demonstrate an understanding of workplace etiquette.

- **DESCRIBE THE CAREER/LIFE PLANNING PROCESS AND RELATE ITS RELEVANCY TO ONE’S CAREER.(SLO 2)**
  - Link personal goals to long term achievement.
  - Display an understanding of creating a professional first impression.
  - Understand how networking is a powerful job search tool.
  - Understand necessary elements of a résumé.
  - Understand the importance of interview preparation.
  - Identify how continual learning increases career success.

- **DEMONSTRATE APPLICATION OF INDUSTRY KNOWLEDGE AND THEORETICAL CONCEPTS AS WRITTEN IN LEARNING OBJECTIVES IN PARTNERSHIP WITH THE EMPLOYER WORK SITE SUPERVISOR.(SLO 3)**
